NOTE: The GMT-ASROC rating is designated on military records by NEC 0891, ASROC Launching Group MK 16 Maintenanceman; some individuals may also hold the additional NEC 0893, ASROC Weapons Handling System (AWHS). *Summary:* Performs routine and intermediate-level maintenance on ASROC (Anti-submarine rocket) equipment; operates, inspects, maintains, and repairs electric-hydraulic powered missile launching systems, missile equipment, and explosive components; prepares missile components and associated equipment for checkout and/or firing; inspects and stows missiles and components; installs explosive components in missile and operates special-handling equipment to transport missiles; services weapon system pneumatic and hydraulic components; tests and repairs electrical controls circuitry; uses standard and special test equipment. If person holds NEC 0893, ASROC Weapons Handling System (AWHS), also performs the following duties: Maintains, troubleshoots, and repairs logic computer circuitry, electronic and magnetic amplifiers, and power supplies; uses standard and special test equipment. *GMT3:* (ASROC) Performs electro-mechanical and pneumatic maintenance and repair on ASROC equipment; cleans, lubricates, and inspects hydraulic components; tests and replaces electronic printed circuits; tests and adjusts servomechanisms; maintains and repairs electrical cables and wiring, using trace and schematic diagrams; makes authorized changes to technical and maintenance publications; uses special tools, test equipment, and hand tools. If person holds NEC 0893 (AWHS) (ASROC Weapons Handling System), also performs the following duties: Operates and performs preventive and corrective maintenance on the ASROC Weapon Handling Systems; maintains, troubleshoots, and replaces components in logic computer circuitry, electronic and magnetic amplifiers; uses special tools and test equipment. *GMT2:* (ASROC) Able to perform the duties required for GMT3 (ASROC); isolates and replaces defective components; provides technical guidance to subordinate personnel. *GMT1:* (ASROC) Able to perform the duties required for GMT2 (ASROC); maintains records and reports for weapons systems, weapons, and components; organizes and supervises the maintenance of a technical library; supervises changes to technical publications; supervises systems and subsystems maintenance. *GMTC:* (ASROC) Able to perform the duties required for GMT1 (ASROC); directs and supervises repair of systems and subsystems; prepares reports; disseminates information, regulations, and policies; prepares nuclear weapons check sheets; organizes work requirements within ordnance maintenance shop; establishes work priorities and assigns work; prepares quarterly schedules of preventive maintenance; conducts maintenance inspections. *GMTCS:* (ASROC) Able to perform the duties required for GMTC (ASROC); prepares ordnance loading and stowage plans; provides information and advice on utilization, capabilities, reliability, and operations; prepares correspondence; establishes and implements a program for interviewing, evaluating, and assigning personnel; organizes and schedules training programs, evaluates their effectiveness,and initiates improvements; administers a long-range planned maintenance program. *GMTCM:* (ASROC) Able to perform the duties required for GMTCS (ASROC); plans, organizes, implements, and controls activities; establishes goals, objectives, and priorities; reviews personnel, equipment, and material requirements and forecasts future requirements; develops operating budgets and monitors expenditures.

Recommendation, GMT3

(ASROC) In the vocational certificate category, 3 semester hours in basic electricity and electronics, 3 in electricity/electronics laboratory, 3 in fluid power systems, and 2 in blueprint reading; if person holds NEC 0893 (AWHS), add 3 semester hours in basic computer theory. In the lower-division baccalaureate/associate degree category, 2 semester hours in basic electricity and electronics, 2 in electricity/electronics laboratory, 2 in fluid power laboratory, and 2 in blueprint reading; if person holds NEC 0893 (AWHS), add 3 semester hours in basic computer theory (11/82).

Recommendation, GMT2

(ASROC) In the vocational certificate category, 3 semester hours in basic electricity and electronics, 3 in electricity/electronics laboratory, 3 in fluid power systems, and 2 in blueprint reading; if person holds NEC 0893 (AWHS), add 3 semester hours in basic computer theory. In the lower-division baccalaureate/associate degree category, 2 semester hours in basic electricity and electronics, 2 in electricity/electronics laboratory, 2 in fluid power laboratory, and 2 in blueprint reading; if person holds NEC 0893 (AWHS), add 3 semester hours in basic computer theory (11/82).

Recommendation, GMT1

(ASROC) In the vocational certificate category, 3 semester hours in basic electricity and electronics, 3 in electricity/electronics laboratory, 3 in fluid power systems, and 3 in blueprint reading, if person holds NEC 0893 (AWHS), add 3 semester hours in basic computer theory. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity and electronics, 3 in electricity/electronics laboratory, 3 in fluid power laboratory, 3 in blueprint reading, 2 in personnel supervision, and 2 in maintenance management; if person holds NEC 0893 (AWHS), add 3 semester hours in basic computer theory (11/82).

Recommendation, GMTC

(ASROC) In the vocational certificate category, the recommendation is the same as that for GMT1 (ASROC). In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity and electronics, 3 in electricity/electronics laboratory, 3 in fluid power laboratory, 3 in blueprint reading, 3 in personnel supervision, 3 in maintenance management, and 3 in human relations; if person holds NEC 0893 (AWHS), add 3 semester hours in basic computer theory (11/82).

Recommendation, GMTCS

(ASROC) In the vocational certificate category, the recommendation is the same as that for GMT1 (ASROC). In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for GMTC (ASROC). In the upper-division baccalaureate category, 3 semester hours for field experience in management, 3 in personnel management, and 3 in management problems (11/82).

Recommendation, GMTCM

(ASROC) In the vocational certificate category, the recommendation is the same as that for GMT1 (ASROC). In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for GMTC (ASROC). In the upper-division baccalaureate category, 6 semester hours for field experience in management, 3 in personnel management, and 3 in management problems (11/82).

NER-GS-001

GAS TURBINE SYSTEM TECHNICIAN,
SENIOR CHIEF AND MASTER CHIEF
GSCS
GSCM

Exhibit Dates: 1/81–Present.

Occupational Field: 3 (Marine Engineering).

Career Pattern

May progress from GSEC (Chief Gas Turbine System Technician, Electrical) (E-7) or GSMC (Chief Gas Turbine System Technician, Mechanical) (E-7). *GSCS:* Senior Chief Gas Turbine System Mechanic (E-8). *GSCM:* Master Chief Gas Turbine System Mechanic (E-9).

Description

GSCS: Able to perform the duties required for GSMC (Chief Gas Turbine System Technician, Mechanical), or GSEC (Chief Gas Turbine System Technician, Electrical); provides guidance on technical information pertaining to operation, maintenance, and repair of gas turbine systems; interviews, evaluates, and assigns personnel; prepares correspondence, directives, and reports; maintains divisional training records; organizes and schedules training programs and evaluates their effectiveness; may supervise 25-30 persons. *GSCM:* Able to perform the duties required for GSCS; develops and monitors safety programs; prepares diagrams and equipment layouts; coordinates repair activities, and performs casualty analysis; forecasts future requirements; establishes goals and priorities; plans, implements, and controls activities in compliance with orders and directives; develops operating budgets and monitors expenditures.

Recommendation, GSCS

In the vocational certificate category, use the recommendation for GSM2 (Gas Turbine System Technician, Mechanical, Second Class) in exhibit NER-GSM-001, or GSE2 (Gas Turbine System Technician, Electrical, Second Class) in exhibit NER-GSE-001, as appropriate. In the lower-division baccalaureate/associate degree category, 2 semester hours in record keeping, 1 in technical writing, and 1 additional semester hour in personnel supervision; add either the 27 semester hours for GSMC (Chief Gas Turbine System Technician, Mechanical) in exhibit NER-GSM-001, or the 32 semester hours for GSEC (Chief Gas Turbine System Technician, Electrical), in exhibit NER-GSE-001, as appropriate. In the upper-division baccalaureate category, 3 semester hours in quality control, 3 in personnel management, and 3 for field experience in management (5/81).

Recommendation, GSCM

In the vocational certificate category, the recommendation is the same as that for GSCS. In the lower-division baccalaureate/associate degree category, 3 semester hours in record keeping, 2 in technical writing, and 1 additional semester hour in personnel supervision; add either the 27 semester hours for GSMC (Chief Gas Turbine System Technician, Mechanical) in exhibit NER-GSM-001, or the 32 semester hours for GSEC (Chief Gas Turbine System Technician, Electrical) in exhibit NER-GSE-001, as appropriate. In the upper-division baccalaureate category, 3 semester hours in quality control, 3 in personnel management, and 6 for field experience in management (5/81).

NER-GSE-001

GAS TURBINE SYSTEM TECHNICIAN,
ELECTRICAL
GSE3
GSE2
GSE1
GSEC

Exhibit Dates: 1/81–Present.

Occupational Field: 3 (Marine Engineering).

Career Pattern

FN: Fireman (E-3). *GSE3:* Gas Turbine System Technician, Electrical, Third Class (E-4). *GSE2:* Gas Turbine System Technician, Electrical, Second Class (E-5). *GSE1:* Gas Turbine System Technician, Electrical, First Class (E-6). *GSEC:* Chief Gas Turbine System Technician, Electrical (E-7). *GSCS:* Senior Chief Gas Turbine System Technician (E-8). *GSCM:* Master Chief Gas Turbine System Technician (E-9).

Description

Summary: Operates, repairs and performs organizational and intermediate maintenance on electrical and electronic components of gas turbine engine, main propulsion machinery, auxiliary equipment and control systems; repairs and performs maintenance on assigned electrical and electronic circuitry up to printed circuit module with an ability to continue to the component level. *GSE3:* Inspects, locates, identifies, and replaces faulty components; performs preventive maintenance on control and monitoring circuits; maintains electrical equipment such as motors, batteries, and bus transfer equipment; tests alarm and indicating system and locates faults; interprets technical drawings in the form of schematics, blueprints, and charts; operates and performs mechanical maintenance on propulsion systems; operates and recognizes fault indicators from dials, gauges and controls; locates, interprets and maintains files of publications, directives, manuals, and catalogs; operates engine control systems, electrical generators, and electric plant control equipment from local operating stations or switchboards; performs maintenance and checkout procedures on power supplies, engineering control systems, and electrical generator control units; locates equipment casualties to systems, subsystems, and circuits in main gas turbine control equipment; uses necessary test equipment for troubleshooting gas turbine control equipment; checks, repairs, or adjusts alarm and indicating systems. *GSE2:* Able to perform the duties required for GSE3; inserts and monitors diagnostic programs in order to diagnose malfunctions of digital data equipment; maintains electromechanical and electro-hydraulic control systems; performs engineering system control checks and calibrations. *GSE1:* Able to perform the duties required for GSE2; diagnoses intermittent, recurring, and interacting electrical and electronic malfunctions; analyzes system control and monitoring circuit malfunctions and determines corrective action; coordinates and controls operation of engineering control system at control stations or consoles; inspects, monitors, and analyzes condition of all subsystems; trains and supervises personnel in operation, maintenance, and repair of engineering control systems; reviews completed system forms and prepares schedules for preventive maintenance. *GSEC:* Able to perform the duties required for GSE1; prepares and maintains quarterly schedules, summaries, and performance logs; monitors systems performance logs; estimates time and materials necessary for repair of gas turbine control and auxiliary systems; analyzes discrepancy trends, determines deficiencies, and develops inspection and corrective procedures; inspects installation, alteration, and repair of equipment; maintains accounting system forms, records, and reports.

Recommendation, GSE3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity/electronics laboratory, 3 in basic AC/DC theory, 1 in applied physics, 2 in motors and controls, 2 in blueprint reading, and 2 in technical mathematics; add 3 semester hours in electronic systems troubleshooting on the basis of institutional evaluation (5/81).

Recommendation, GSE2

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity/electronics laboratory, 1 in applied physics, 3 in basic AC/DC theory, 2 in motors and controls, 2 in blueprint reading, 2 in technical mathematics, 6 in systems troubleshooting, and 2 in digital fundamentals. In the upper-division baccalaureate category, 2 semester hours in quality control (5/81).

Recommendation, GSE1

In the vocational certificate category, the recommendation is the same as that for GSE2. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity/electronics laboratory, 1 in applied physics, 3 in basic AC/DC theory, 2 in motors and controls, 2 in blueprint reading, 2 in technical mathematics, 6 in systems troubleshooting, 2 in digital fundamentals, 2 in personnel supervision, and 3 in maintenance management. In the upper-division baccalaureate category, 3 semester hours in quality control (5/81).

Recommendation, GSEC

In the vocational certificate category, the recommendation is the same as that for GSE2. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity/electronics laboratory, 1 in applied physics, 3 in basic AC/DC theory, 2 in motors and controls, 2 in blueprint reading, 2 in technical mathematics, 6 in systems troubleshooting, 2 in digital fundamentals, 2 in personnel supervision, 3 in maintenance management, 3 in introduction to management, and 3 in safety management. In the upper-division baccalaureate category, 3 semester hours in quality control (5/81).

NER-GSM-001

GAS TURBINE SYSTEM TECHNICIAN,
MECHANICAL
GSM3
GSM2
GSM1
GSMC

Exhibit Dates: 1/81–12/87.

Occupational Field: 3 (Marine Engineering).

Career Pattern

FN: Fireman (E-3). *GSM3:* Gas Turbine System Technician, Mechanical, Third Class (E-4). *GSM2:* Gas Turbine System Technician, Mechanical, Second Class (E-5). *GSM1:* Gas Turbine System Technician, Mechanical, First Class (E-6). *GSMC:* Chief Gas Turbine System Technician, Mechanical (E-7). *GSCS:* Senior Chief Gas Turbine System Technician (E-8). *GSCM:* Master Chief Gas Turbine System Technician (E-9).

Description

Summary: Operates, repairs, and performs maintenance on mechanical components of gas turbine engines, main propulsion machinery (including gears, shafts, and controllable pitch propellers), auxiliary equipment and propulsion control systems. *GSM3:* Troubleshoots and performs maintenance on hydraulic, electrical, and propulsion systems of a gas turbine; uses schematic diagrams, drawings, charts, and blueprints; operates various pumps, filters, and strainers; fabricates and installs both high and low pressure tubing and hose; changes lube oil, cleans or changes filters and strainers, and obtains fuel, oil and water samples; maintains logs and records. *GSM2:* Able to perform the duties required for GSM3; repairs hydraulic system components and pneumatic/hydraulic systems; repairs and maintains low-pressure air compressors, and gas turbine reduction gear clutching assemblies; tests propulsion fuels and lubricants; makes pitch and valve adjustments; replaces seal rings; overhauls pumps; prepares and maintains daily fuel and water reports; requisitions supplies and equipment. *GSM1:* Able to perform the duties required for GSM2; analyzes malfunctions of hydraulic and pneumatic systems and determines corrective action; disassembles, inspects, and repairs reducing, relief, and temperature valves; coordinates and controls operation of engineering control systems at the central control station; supervises the receiving, transferring, discharging, and storage of propulsion fuels and lubricants; trains and supervises personnel in the operation of engineering control systems; maintains, inspects, and monitors all systems; maintains records and prepares maintenance schedules. *GSMC:* Able to perform the duties required for GSM1; supervises engine change outs and shipboard mechanical alterations; prepares summaries and quarterly preventive maintenance schedules; maintains accounting system forms, records, and reports; inspects the installation, alteration, and repair of equipment.

Recommendation, GSM3

In the vocational certificate category, 1 semester hour in fundamentals of hydraulics, 6 in gas turbines, 4 in basic AC/DC theory, 2 in blueprint reading, 2 in technical mathematics, and 2 in applied physics. In the lower-division baccalaureate/associate degree category, 1 semester hour in fundamentals of hydraulics, 3 in gas turbines, 2 in basic AC/DC theory, 2 in blueprint reading, 2 in technical mathematics, and 2 in applied physics (5/81).

Recommendation, GSM2

In the vocational certificate category, 4 semester hours in fundamentals of hydraulics, 6 in gas turbines, 4 in basic AC/DC theory, 2 in technical mathematics, 2 in blueprint reading, 2 in applied physics, and 2 in pneumatics. In the lower-division baccalaureate/associate degree category, 1 semester hour in fundamentals of hydraulics, 3 in gas turbines, 2 in basic AC/DC theory, 2 in technical mathematics, 2 in blueprint reading, 2 in applied physics, and 3 in mechanical maintenance (hydraulics and pneumatics). In the upper-division baccalaureate category, 2 semester hours in quality control (5/81).

Recommendation, GSM1

In the vocational certificate category, the recommendation is the same as that for GSM2. In the lower-division baccalaureate/associate degree category, 1 semester hour in fundamentals of hydraulics, 3 in gas turbines, 2 in basic AC/DC theory, 2 in technical mathematics, 2 in blueprint reading, 2 in applied physics, 3 in mechanical maintenance (hydraulics and pneumatics), 3 in maintenance management, 3 in mechanical technology, and 2 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in quality control (5/81).

Recommendation, GSMC

In the vocational certificate category, the recommendation is the same as that for GSM2. In the lower-division baccalaureate/associate degree category, 1 semester hour in fundamentals of hydraulics, 3 in gas turbines, 2 in basic AC/DC theory, 2 in technical mathematics, 2 in blueprint reading, 2 in applied physics, 3 in mechanical maintenance (hydraulics and pneumatics), 3 in maintenance management, 3 in mechanical technology, 2 in personnel supervision, 3 in safety management, and 3 in introduction to management. In the upper-division baccalaureate category, 3 semester hours in quality control (5/81).

NER-GSM-002

HOSPITAL CORPSMAN

HM3
HM2
HM1
HMC
HMCS
HMCM

Exhibit Dates: 6/71–Present.

Occupational Field: 14 (Health Care).

Career Pattern

HN: Hospitalman (E-3). *HM3:* Hospital Corpsman Third Class (E-4). *HM2:* Hospital Corpsman Second Class (E-5). *HM1:* Hospital Corpsman First Class (E-6). *HMC:* Chief Hospital Corpsman (E-7). *HMCS:* Senior Chief Hospital Corpsman (E-8). *HMCM:* Master Chief Hospital Corpsman (E-9).

Description

Summary: Serves as an assistant in the prevention and treatment of diseases and injuries, and in the administration of medical departments. *HM3:* Administers first aid; assists with physical examinations; provides nursing care to patients; administers medicine and collects specimens; assists in the transportation of the sick and injured; performs cardiopulmonary resuscitation (CPR); performs emergency procedures for the treatment of common injuries; transcribes medical orders; writes admission nursing notes; admits, transfers, and discharges patients; maintains mechanical equipment on the ward. *HM2:* Able to perform the duties required for HM3; submits routine medical reports; supervises personnel in performance of clinic or ward duties; maintains medical journals, logs, and health records; prepares, processes, controls, and transmits optical-scan documents; instructs medical and nonmedical personnel in general and emergency medical care and in self-administration of medications; performs elementary laboratory procedures, such as urinalysis, blood count, and preparation of smears. *HM1:* Able to perform the duties required for HM2; performs supervisory duties in such areas as sick call, health care inspections, preventive medicine and environmental inspections; differentiates normal and abnormal laboratory results; maintains health, dental, personnel, and accounting records; distinguishes legal implications in routine and emergency medical care situations. *HMC:* Able to perform the duties required for HM1; supervises departmental administrative procedures and patient care delivery; plans, supervises, and coordinates health care programs; compiles budgetary statistical data; orders, receives, and issues supplies. *HMCS:* Able to perform the duties required for HMC; prepares directives and instructions for attaining organization objectives and improving operations; establishes a program for interviewing, evaluating, and assigning personnel for maximum utilization; prepares correspondence; organizes and schedules training programs. *HMCM:* Able to perform the duties required for HMCS; plans, organizes, and implements activities; reviews personnel, equipment, and material requirements, and forecasts future requirements; establishes goals, objectives, and priorities; provides counseling on medical department training opportunities; develops operating budgets and monitors expenditures.

Recommendation, HM3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 1 semester hour in cardiopulmonary resuscitation (CPR), and 2 in advanced first aid (12/81). NOTE: Add the credit recommended for Hospitalman (E-3) in exhibit NER-HN-001.

Recommendation, HM2

In the vocational certificate category, the recommendation is the same as that for HM3. In the lower-division baccalaureate/associate degree category, 1 semester hour in cardiopulmonary resuscitation (CPR), 2 in advanced first aid, 3 in medical laboratory techniques, 3 in records management, and 1 in human relations (12/81). NOTE: Add the credit recommended for Hospitalman (E-3) in exhibit NER-HN-001.

Recommendation, HM1

In the vocational certificate category, the recommendation is the same as that for HM3. In the lower-division baccalaureate/associate degree category, 1 semester hour in cardiopulmonary resuscitation (CPR), 2 in advanced first aid, 3 in introduction to medical laboratory techniques, 3 in records management, 2 in human relations, 2 in personnel supervision, 3 in sanitation/environmental control, and 3 in personnel office procedures (12/81). NOTE: Add the credit recommended for Hospitalman (E-3) in exhibit NER-HN-001.

Recommendation, HMC

In the vocational certificate category, the recommendation is the same as that for HM3. In the lower-division baccalaureate/associate degree category, 1 semester hour in cardiopulmonary resuscitation (CPR), 2 in advanced first aid, 3 in introduction to medical laboratory techniques, 3 in records management, 3 in human relations, 3 in personnel supervision, 3 in sanitation/environmental control, 3 in personnel office procedures, 2 in communication skills, and 3 in business organization. In the upper-division baccalaureate category, 3 semester hours in personnel management (12/81). NOTE: Add the credit recommended for Hospitalman (E-3) in exhibit NER-HN-001.

Recommendation, HMCS

In the vocational certificate category, the recommendation is the same as that for HM3. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for HMC. In the upper-division baccalaureate category, 3 semester hours in personnel management, 3 in business management, 3 for field experience in management, 3 in human relations, and 3 in health care administration (12/81). NOTE: Add the credit recommended for Hospitalman (E-3) in exhibit NER-HN-001.

Recommendation, HMCM

In the vocational certificate category, the recommendation is the same as that for HM3. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for HMC. In the upper-division baccalaureate category, 3 semester hours in personnel management, 3 in business management, 6 for field experience in management, 3 in human relations, 3 in health care administration, and 3 in health care planning (12/81). NOTE: Add the credit recommended for Hospitalman (E-3) in exhibit NER-HN-001.

NER-HN-001

HOSPITALMAN

HN

Exhibit Dates: 6/71–Present.

Career Pattern

Hospitalman is a general rate (Naval apprenticeship) for persons at pay grades E-1 (recruit), E-2 (Hospitalman apprentice), and E-3 (Hospitalman). At pay grade E-4 (petty officer third class), the person progresses to the Hospitalman Corpsman (HM) rating.

Description

Performs basic nursing care; applies bandages, splints, and dressings; takes and records vital signs; collects specimens; under direction, administers medication; identifies the basic elements and functions of the circulatory, respiratory, digestive, urogenital, musculoskeletal, and nervous systems; keeps medical department equipment and spaces clean and sanitary; performs routine clerical duties of the ward.

Recommendation

In the vocational certificate category, the training is equivalent to a one-year practical nursing program, including basic knowledge in the following areas: nursing techniques and clinical application, basic anatomy and physiology, pharmacology, and medical terminology. In the lower-division baccalaureate/associate degree category, 2 semester hours in health and hygiene, 3 in nursing techniques, 4-5 in clinical nursing, 2 in emergency medical techniques, 1 in medical terminology, and credit in anatomy and physiology on the basis of institutional evaluation (12/81). NOTE: Credit for Hospitalman (HN) should be granted only after pay grade E-3 has been achieved.

NER-HT-001

HULL MAINTENANCE TECHNICIAN

HT3
HT2
HT1
HTC
HTCS
HTCM

Exhibit Dates: 6/71–3/87.

Occupational Field: 4 (Ship Maintenance).

Career Pattern

FN: Fireman (E-3). *HT3:* Hull Maintenance Technician, Third Class (E-4). *HT2:* Hull Maintenance Technician, Second Class (E-5). *HT1:* Hull Maintenance Technician, First Class (E-6). *HTC:* Chief Hull Maintenance Technician (E-7). *HTCS:* Senior Chief Hull Maintenance Technician (E-8). *HTCM:* Master Chief Hull Maintenance Technician (E-9).

Description

Summary: Performs repairs to the ship's hull, plumbing, and piping systems; performs maintenance on firefighting equipment and damage control equipment. *HT3:* Operates, stores, and performs maintenance on firefighting equipment and damage control equipment; inspects and tests installed damage control equipment and systems; performs blazing, electrical arc welding, and oxyacetylene welding and cutting; repairs ship plumbing and piping systems; controls discharging and pumping of waste in restricted water; completes maintenance data forms; orders repairs parts and tools. *HT2:* Able to perform the duties required for HT3; performs gas-free testing of voids and compartments to assure safe entry; inspects fire main, sprinklers, and ventilation systems; performs repairs to ship structure using heavy gauge metal; completes maintenance reports; inventories installed equipment. *HT1:* Able to perform the duties required for HT2; organizes and supervises damage control and firefighting parties; prepares training records; reviews completed maintenance data forms; prepares weekly maintenance schedules. *HTC:* Able to perform the duties required for HT1; plans and conducts damage control exercises; maintains shop records and prepares progress reports; supervises training programs; estimates time, personnel, and material requirements; prepares quarterly maintenance schedules; supervises a hull maintenance technician shop. *HTCS:* Able to perform the duties required for HTC; prepares directives and instructions for attaining organizational objectives; establishes and implements a program for interviewing, evaluating, and assigning personnel to assure maximum utilization; prepares correspondence; organizes and evaluates training programs; administers a long-range planned maintenance program. *HTCM:* Able to perform the duties required for HTCS; reviews personnel, equipment, and material requirements and forcasts future requirements;

plans, organizes, implements, and controls activities; develops operating budgets and monitors expenditures.

Recommendation, HT3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 2 semester hours in arc welding, 2 in oxyacetylene welding, 4 in fire science, 2 in basic plumbing, and 2 in brazing and soldering (12/78).

Recommendation, HT2

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in arc welding, 3 in oxyacetylene welding, 6 in fire science, 3 in basic plumbing, 3 in brazing and soldering, and 1 in record keeping (12/78).

Recommendation, HT1

In the vocational certificate category, the recommendation is the same as that for HT2. In the lower-division baccalaureate/associate degree category, 3 semester hours in arc welding, 3 in oxyacetylene welding, 6 in fire science, 3 in basic plumbing, 3 in brazing and soldering, 1 in record keeping, 2 in personnel supervision, 2 in maintenance management, and 3 in human relations (12/78).

Recommendation, HTC

In the vocational certificate category, 3 semester hours in arc welding, 3 in oxyacetylene welding, 6 in fire science, 3 in basic plumbing, 3 in brazing and soldering, and 2 in record keeping. In the lower-division baccalaureate/associate degree category, 3 semester hours in arc welding, 3 in oxyacetylene welding, 6 in fire science, 3 in basic plumbing, 3 in brazing and soldering, 2 in record keeping, 3 in personnel supervision, 3 in maintenance management, and 3 in human relations (12/78).

Recommendation, HTCS

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, the recommendation is the same as that for HTC. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (12/78).

Recommendation, HTCM

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, the recommendation is the same as that for HTC. In the upper-division baccalaureate category, 6 semester hours for field experience in management, and 3 in management problems (12/78).

FN: Fireman (E-3). *HT3:* Hull Maintenance Technician, Third Class (E-4). *HT2:* Hull Maintenance Technician, Second Class (E-5). *HT1:* Hull Maintenance Technician, First Class (E-6). *HTC:* Chief Hull Maintenance Technician (E-7). *HTCS:* Senior Chief Hull Maintenance Technician (E-8). *HTCM:* Master Chief Hull Maintenance Technician (E-9).

Description

Summary: Performs repairs to the ship's hull, plumbing and piping systems and structural members. *HT3:* Performs brazing, electrical arc welding, oxyacetylene welding and cutting, and MIG/TIG welding; repairs ship plumbing and piping systems; fabricates damage control patches, sheet metal ducting, brackets, ladders, and platforms; controls discharging and pumping of waste in restricted water; completes maintenance data forms; orders repairs parts and tools. *HT2:* Able to perform the duties required for HT3; performs gas-free testing of voids and compartments to assure safe entry; performs repairs to ship structure using heavy gauge metal; completes maintenance reports; inventories installed equipment. *HT1:* Able to perform the duties required for HT2; organizes and supervises damage repair parties; prepares training records; reviews completed maintenance data forms; prepares weekly maintenance schedules. *HTC:* Able to perform the duties required for HT1; plans and conducts damage repair exercises; maintains shop records and prepares progress reports; supervises training programs; estimates time, personnel, and material requirements; prepares quarterly maintenance schedules; supervises a hull maintenance technician shop. *HTCS:* Able to perform the duties required for HTC; prepares directives and instructions for attaining organizational objectives; establishes and implements a program for interviewing, evaluating, and assigning personnel to assure maximum utilization; prepares correspondence; organizes and evaluates training programs; administers a long-range planned maintenance program. *HTCM:* Able to perform the duties required for HTCS; reviews personnel, equipment, and material requirements and forcasts future requirements; plans, organizes, implements, and controls activities; develops operating budgets and monitors expenditures.

Recommendation, HT3

In the lower-division baccalaureate/associate degree category, 2 semester hours in oxyacetylene welding, 2 in arc welding, 2 in MIG/TIG welding, 2 in plumbing and pipe fitting, 1 in blueprint reading, and 1 in maintenance technology (3/90).

Recommendation, HT2

In the lower-division baccalaureate/associate degree category, 3 semester hours in oxyacetylene welding, 3 in arc welding, 3 in MIG/TIG welding, 3 in plumbing and pipe fitting, 2 in blueprint reading, 2 in maintenance technology, and 1 in recordkeeping (3/90).

Recommendation, HT1

In the lower-division baccalaureate/associate degree category, 4 semester hours in oxyacetylene welding, 4 in arc welding, 4 in MIG/TIG welding, 4 in plumbing and pipe fitting, 2 in blueprint reading, 3 in maintenance technology, 1 in recordkeeping, 2 in principles of supervision, and 2 in maintenance management (3/90).

Recommendation, HTC

In the lower-division baccalaureate/associate degree category, 4 semester hours in oxyacetylene welding, 4 in arc welding, 4 in MIG/TIG wkding, 4 in plumbing and pipe fitting, 2 in blueprint reading, 3 in maintenance technology, 2 in recordkeeping, 3 in principles of supervision, and 3 in maintenance management (3/90).

Recommendation, HTCS

In the lower-division baccalaureate/associate degree category, 4 semester hours in oxyacetylene welding, 4 in arc welding, 4 in MIG/TIG welding, 4 in plumbing and pipe fitting, 2 in blueprint reading, 3 in maintenance technology, 2 in recordkeeping, 3 in principles of supervision, and 4 in maintenance management. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (3/90).

Recommendation, HTCM

In the lower-division baccalaureate/associate degree category, 4 semester hours in oxyacetylene welding, 4 in arc welding, 4 in MIG/TIG welding, 4 in plumbing and pipe fitting, 2 in blueprint reading, 3 in maintenance technology, 2 in recordkeeping, 3 in principles of supervision, and 5 in maintenance management. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 6 in management problems (3/90).

NER-IC-001

INTERIOR COMMUNICATIONS ELECTRICIAN

IC3
IC2
IC1
ICC
ICCS

Exhibit Dates: 6/73–Present.

Occupational Field: 3 (Marine Engineering).

Career Pattern

FN: Firemen (E-3). *IC3:* Interior Communications Electrician, Third Class (E-4). *IC2:* Interior Communications Electrician, Second Class (E-5). *IC1:* Interior Communications Electrician, First Class (E-6). *ICC:* Chief Interior Communications Electrician (E-7). *ICCS:* Senior Chief Interior Communications Electrician (E-8). *EMCM:* Master Chief Electrician's Mate (E-9).

Description

Summary: Operates and performs maintenance on voice interior communications systems, alarm systems, warning systems, ship's control systems, plotting systems, gyrocompass systems, and entertainment systems. *IC3:* Operates standard test and metering equipment, including multimeter, voltmeter, ammeter, ohmmeter, oscilloscope, signal generator, frequency meter, vacuum tube voltmeter, and megger; makes standard wire splices; tests and operates alarm and indicating systems; troubleshoots and repairs synchro systems; inspects, tests, maintains, charges, and replaces batteries; repairs components of general announcing systems and sound-powered telephone systems; cleans and inspects plotters and dead-reckoning equipment; tests external circuits of interior communications equipment for continuity, short circuits, and grounds, and measures electrical quantities; reads and interprets schematic diagrams and blueprints of basic electrical, electronic, and logic circuits. *IC2:* Able to perform the duties required for IC3; troubleshoots and repairs ship's metering, alarm, and indicating systems; troubleshoots and repairs synchro-amplifiers, servo systems, and tape recorders/producers; maintains microfiche readers/printers; isolates and repairs malfunctions in common electronic circuits; inspects and cleans commutators and adjusts brushes on motors and generators; inventories installed equipment and spare part support; may supervise up to three third class Interior Communications Electricians. *IC1:* Able to perform the duties required for IC2; isolates troubles to faulty equipment in dead-reckoning systems, including gyrocompass; tests, replaces, and adjusts components on the interior communication and local switchboards; determines types of acceptable substitute components; checks operating logs and maintenance records; prepares weekly maintenance schedules; may supervise up to five Interior Communications Electricians. *ICC:* Able to perform the duties required for IC1; analyzes and evaluates electrical and electronic tests; adjusts, calibrates, and repairs interior communications equipment; plans, organizes, and directs work of personnel operating and maintaining interior communications systems; estimates time, materials, and labor required for repair of equipment. *ICCS:* Able to perform the duties required for ICC; advises on the opening and inspection of equipment, and preparation of work request; provides information and advises on utilization, capabilities, reliability, and operations; prepares directives and instructions for attaining organizational objectives; establishes and implements a program for interviewing, evaluating, and assigning personnel; administers a long-range planned maintenance program.

Recommendation, IC3

In the vocational certificate category, 5 semester hours in basic electricity/electronics, 4 in troubleshooting techniques, 5 in electrical/electronic circuits, 4 in electrical/mechanical systems, and 2 in applied mathematics. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, 2 in electrical/electronics laboratory, 2 in troubleshooting techniques, 3 in electrical/electronic circuits, 3 in electrical/mechanical systems, and 2 in applied mathematics (10/87).

Recommendation, IC2

In the vocational certificate category, 5 semester hours in basic electricity/electronics, 6 in troubleshooting techniques, 6 in electrical/electronic circuits, 4 in electrical/mechanical systems, and 2 in applied mathematics. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, 2 in electrical/electronics laboratory, 2 in troubleshooting techniques, 3 in electrical/electronic circuits, 3 in electrical/mechanical systems, 2 in applied mathematics, and 1 in digital electronics; if assigned to gas turbine propulsion systems, credit in gas turbine technology on the basis of institutional evaluation (10/87).

Recommendation, IC1

In the vocational certificate category, 5 semester hours in basic electricity/electronics, 8 in troubleshooting techniques, 6 in electrical/electronic circuits, 4 in electrical/mechanical systems, and 2 in applied mathematics. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, 2 in electrical/electronics laboratory, 2 in troubleshooting techniques, 3 in electrical/electronic circuits, 3 in electrical/mechanical systems, 2 in applied mathematics, 2 in digital electronics, 3 in human relations, 2 in maintenance management, and 2 in personnel supervision; if assigned to gas turbine propulsion systems, credit in gas turbine technology on the basis on institutional evaluation. In the upper-division baccalaureate category, 3 semester hours in electrical circuits (10/87).

Recommendation, ICC

In the vocational certificate category, 5 semester hours in basic electricity/electronics, 8 in troubleshooting techniques, 6 in electrical/electronic circuits, 4 in electrical/mechanical systems, 2 in applied mathematics, and 1 in record keeping. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, 2 in electrical/electronics laboratory, 2 in toubleshooting techniques, 3 in electrical/electronic circuits, 3 in electrical/mechanical systems, 2 in applied mathematics, 2 in digital electronics, 3 in human relations, 3 in maintenance management, 3 in personnel supervision, 1 in record keeping, and 1 in report writing; if assigned to gas turbine propulsion systems, credit in gas turbine technology on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours in electrical circuits (10/87).

Recommendation, ICCS

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, the recommendation is the same as that for ICC. In the upper-division baccalaureate category, 3 semester hours in electrical curcuits, 3 for field experience in management, and 3 in management problems (10/87).

INSTRUMENTMAN

IM3
IM2
IM1
IMC
IMCS

Exhibit Dates: 6/71–12/89.

Occupational Field: 4 (Ship Maintenance).

Career Pattern

SN: Seaman (E-3). *IM3:* Instrumentman, Third Class (E-4). *IM2:* Instrumentman, Second Class (E-5). *IM1:* Instrumentman, First Class (E-6). *IMC:* Chief Instrumentman (E-7). *IMCS:* Senior Chief Instrumentman (E-8). *PICM:* Master Chief Opticalman (E-9).

Description

Summary: Performs maintenance on mechanical instruments, office machines, and navy timepieces, and implements mechanical instrument repair and calibration shop procedures. *IM3:* Uses schematic diagrams; prepares sketches of mechanical parts, using applicable symbols, and dimensional and material specifications; uses twist drills and thread tops; operates bench grinders, lathe (jeweler's lathe) and drill press; manufactures and maintains instrument repair and calibration tools; cleans and refinishes painted surfaces of instruments; solders metals using soldering iron, soldering gun, and torch; brazes brass and steel; tempers, hardens, and anneals metals; determines nominal value of measuring instruments and related test equipment; calibrates and adjusts pressure instruments and vacuum-measuring instruments, centrifugal tachometers, bimetallic thermometers, and torque measuring tools; operates the following equipment: constant temperature bath (with resistance thermometer indicators), manometers, vacuum chamber and pump, nitrogen booster pump assembly, hydraulic and pneumatic pressure gage calibration panel, tachometer calibrator, torque wrench testers, portable pneumatic calibrators, pressure test chambers, portable pneumatic amplifiers, DC volt/ohm meters, millivolt potentiometer, and pneumatic, bifluid, water, and oil dead weight testers; completes correct forms, labels, and tags during calibration; disassembles, cleans, lubricates, repairs and performs casualty analysis on: bourdon tube pressure gages, centrifugal techometers, bellows gages, torque indicating devices, diaphragm pressure gages, liquid level indicators, dial indicators, and pressure regulators; carries out hand, machine, and ultrasonic cleaning procedures; exercises precautions and safety procedures to prevent comtamination of oxygen and nitrogen test instruments; operates demagnetizers; uses feeler gages, micrometers, vernier calipers, and dial indicators; disassembles, cleans, reassembles, adjusts, and repairs addressographs, paper shredders and cutters, manual typewriters, and fluid and stencil process duplicators; replaces and aligns typeface; installs various types of tubing, pipe, and fittings; removes burrs from machine threads using taps and dies, thread combs, gravers, stones, and files; removes broken screws and studs, using drill and screw extractor or thread tap; completes maintenance data forms, maintenance requirement cards, and office machine inspection sheets. *IM2:* Able to perform the duties required for IM3; calibrates and adjusts positive displacement fluid flowmeter, depth and caisson gages, filled system and liquid-in-glass thermometers, and chronometric tachometers; operates resistance thermometer bridge and DC resistance box; performs preventive maintenance on the following equipment: pressure gage calibration panels, torque wrench calibrators, dead weight testers, tachometer calibrators, nitrogen pump assemblies, constant temperature baths, and resistance thermometers; performs contamination flushing and testing of bleeder and dead-ended type of oxygen or nitrogen bourdon tubes gages; disassembles, cleans, lubricates, and reassembles chronometric tachomters; repairs and performs casualty analysis of liquid level indicators, temperature instruments, and chronometric tachometers; disassembles, cleans, reassembles, adjusts, and repairs electric typewriters; operates and maintains jeweler's lathe and attachments; completes maintenance reports; prepares and maintains shop work records; inventories installed equipment; orders repair parts and special tools. *IM1:* Able to perform the duties required for IM2; calibrates resistance thermometer indicators and pressure working standards with the dead weight reference standards and applies appropriate correction factors; determines accuracy limitations of calibration standards to determine which standard is best suited to a particular calibration; calibrates and adjusts liquid level indicators, absolute pressure gages, hydraulic, remote reading, and liquid level systems, thermocouple and resistance thermometer systems; supervises repair of watches and clocks; disassembles, cash registers, and liquid, thermo, and coated paper reproduction equipment; instructs personnel in basic physics and mathematics pertaining to metrology, and on the characteristics, pressure limitations, and use of mechanical connectors, tubing, pipe, and hose fitting; applies quality control procedures; reviews completed forms; ensures that navy calibration procedures are current; prepares preventive maintenance schedules; plans and supervises report work. *IMC:* Able to perform the duties required for IM1; directs operation and repair of test equipment in instrument repair work center; supervises operation and use of office machine test equipment and special tools; manages the maintenance, calibration, and repair of jeweled instruments, and the maintenance, repair, procurement, and utilization of all parts and machines in stock; informs superiors about new developments and procedures pertaining to precision measuring instruments, and design, use, and support of office equipment; instructs personnel in techniques and procedures of repair of temperature, fluid, and flow measuring instruments, watches, clocks, and office machines; prepares quarterly maintenance schedules; supervises maintenance and repair of office machines and equipment, navy timepieces, and optical instruments and equipment; supervises maintenance, repair, and calibration of measuring instruments and test equipment; disassembles, cleans, reassembles, adjusts, and repairs rotary and electronic calculators, dual spectrum and electrostatic reproduction equipment. *IMCS:* Able to perform the duties required for IMC; prepares directives and instructions for attaining organizational objectives and improving operations; prepares correspondence; establishes and implements a program for interviewing, evaluating, and assigning personnel to assure maximum utilization; administers repair and maintenance records; organizes and schedules training programs, evaluates their effectiveness, and initiates improvements; coordinates quality assurance audits; coordinates and prepares work estimates; directs quality assurance program; administers a long-range maintenance program.

Recommendation, IM3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 1 semester hour in mechanical blueprint reading, 1 in basic machine tool operation, 6 in basic instrumentation, and 3 in office machine repair; if NEC was IM-1821, Precision Physical Measuring Specialist, 3 semester hours in technical mathematics (12/78).

Recommendation, IM2

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 1 semester hour in mechanical blueprint reading, 1 in basic machine tool operation, 6 in basic instrumentation, 1 in test and measurement standards (instrumentation), 3 in office machine repair, and 1 in shop supervision; if NEC was IM-1821, Precision Physical Measuring Specialist, 3 semester hours in technical mathematics (12/78).

Recommendation, IM1

In the vocational certificate category, 1 semester hour in mechanical blueprint reading, 1 in basic machine tool operation, 6 in basic instrumentation, 1 in test and measurement standards (instrumentation), 3 in office machine repair, and 2 in shop supervision; if NEC was IM-1821, Precision Physical Measuring Specialist, 3 semester hours in technical mathematics. In the lower-division baccalaureate/associate degree category, 1 semester hour in mechanical blueprint reading, 1 in basic machine tools, 6 in basic instrumentation, 1 in test and measurement standards (instrumentation), 3 in office machine repair, 2 in shop supervision, 1 in records administration, and 2 in personnel supervision; if NEC was IM-1821, Precision Physical Measuring Specialist, 3 semester hours in technical mathematics (12/78).

Recommendation, IMC

In the vocational certificate category, the recommendation is the same as that for IM1. In the lower-division baccalaureate/associate degree category, 1 semester hour in mechanical blueprint reading, 1 in basic machine tools, 6 in basic instrumentation, 1 in test and measurement standards (instrumentation), 3 in office machine repair, 2 in shop supervision, 3 in personnel supervision, and 2 in records administration; if NEC was IM-1821, Precision Physical Measuring Specialist, 3 semester hours in technical mathematics (12/78).

Recommendation, IMCS

In the vocational certificate category, the recommendation is the same as that for IM1. In the lower-division baccalaureate/associate degree category, 1 semester hour in mechanical blueprint reading, 1 in basic machine tools, 6 in basic instrumentation, 1 in test and measurement standards (instrumentation), 3 in office machine repair, 2 in shop supervision, 3 in personnel supervision, 2 in records administration, and 3 in human relations; if NEC was IM-1821, Precision Physical Measuring Specialist, 3 semester hours in technical mathematics. In the upper-division baccalaureate category, 3 semester hours for field experience in management (12/78).

INTELLIGENCE SPECIALIST

IS3
IS2
IS1
ISC
ISCS
ISCM

Exhibit Dates: 7/75–Present.

Occupational Field: 22 (Intelligence).

Career Pattern

SN: Seaman (E-3). *IS3:* Intelligence Specialist, Third Class (E-4). *IS2:* Intelligence Specialist, Second Class (E-5). *IS1:* Intelligence Specialist, First Class (E-6). *ISC:* Chief Intelligence Specialist (E-7). *ISCS:* Senior Chief Intelligence Specialist (E-8). *ISCM:* Master Chief Intelligence Specialist (E-9).

Description

Summary: Collects, processes, and disseminates intelligence by performing analytical and administrative duties; identifies and produces intelligence from raw information; assembles and analyzes multi-source operational intelligence in support of intelligence briefing, reporting, and analytical programs; prepares and presents intelligence briefings; prepares material for use in planning and photographic reconnaissance missions; prepares graphics including annotated photographs, mosaics, and overlays; plots and prepares multi-sensor imagery and intelligence reports; provides input to and receives data from computerized intelligence systems; maintains files including photographs, maps and charts, and photographic interpretation keys; maintains and updates intelligence libraries. NOTE: Many of the duties for this rating involve highly classified materials and activities; therefore, not all the competencies and knowledges associated with the rating were evaluated. *IS3:* Files and controls intelligence reports; recognizes aerial camera capabilities; has knowledge of basic geopolitical background of assigned areas; prepares graphics; uses basic photographic interpretation instruments; employs photogrammetry skills; plots remotely sensed data; prepares mosaics and stereopairs; selects and uses photographic interpretation keys; uses topographic and cultural map symbols, distances, and scales; uses computer formats; is familiar with basic fundamentals of radar interpretation; operates and maintains office and audio-visual equipment; performs general office duties; prepares photographic interpretation reports; assists in preparation of intelligence information reports. *IS2:* Able to perform the duties required for IS3; analyzes data to produce information; develops data from non-photographic sensors, including infrared and side-looking radar. *IS1:* Able to perform the duties required for IS2; conducts briefings; plans and organizes small working groups; prepares intelligence information reports. *ISC:* Able to perform the duties required for IS1; supervises preparations of reports; conducts liaison with other agencies; applies office management concepts and skills; directs and controls administrative procedures of a division. *ISCS:* Able to perform the duties required for ISC; manages mission planning and evaluates performance of staff; directs administrative staff functions; organizes and schedules training programs; evaluates effectiveness; initiates improvements. *ISCM:* Able to perform the duties required for ISCS; plans, organizes, implements, and controls activities in compliance with policy, orders, and directives; forecasts requirements and establishes goals, objectives, and priorities; reviews personnel and equipment requirements; advises superiors on regulations, procedures and practices; develops administrative and executive department directives, regulations, and procedures; develops operating budgets and monitors expenditures.

Recommendation, IS3

In the vocational certificate category, 3 semester hours in applied mathematics, 3 in basic photography and dark room techniques, 3 in introduction to computer concepts, 2 in drafting and design, 3 in technical writing, and 3 in office practices. In the lower-division baccalaureate/associate degree category, 3 semester hours in technical mathematics, 3 in basic photography and dark room techniques, 3 in introduction to computer concepts, 3 in introduction to maps and aerial photographs, and 3 in general cultural geography. In the upper-division baccalaureate category, 3 semester hours in area studies, 3 in aerial photographic interpretation, and 3 in photogrammetry (9/80).

Recommendation, IS2

In the vocational certificate category, 3 semester hours in applied mathematics, 3 in basic photography and dark room techniques, 3 in introduction to computer concepts, 2 in drafting and design, 3 in technical writing, and 3 in office practices. In the lower-division baccalaureate/associate degree category, 3 semester hours in technical mathematics, 3 in basic photography and dark room techniques, 3 in introduction to computer concepts, 3 in introduction to maps and aerial photographs, and 3 in general cultural geography. In the upper-division baccalaureate category, 3 semester hours in area studies, 3 in aerial photographic interpretation, and 3 in photogrammetry (9/80).

Recommendation, IS1

In the vocational certificate category, the recommendation is the same as that for IS2. In the lower-division baccalaureate/associate degree category, 3 semester hours in technical mathematics, 3 in basic photography and dark room techniques, 3 in introduction to computer concepts, 3 in introduction to maps and aerial photographs, 3 in general cultural geography, 3 in public speaking, and 3 in principles and practices of personnel management. In the upper-division baccalaureate category, 3 semester hours in area studies, 3 in aerial photographic interpretation, and 3 in photogrammetry (9/80).

Recommendation, ISC

In the vocational certificate category, the recommendation is the same as that for IS2. In the lower-division baccalaureate/associate degree category, 3 semester hours in technical mathematics, 3 in basic photography and dark room techniques, 3 in introduction to computer concepts, 3 in introduction to maps and aerial photographs, 3 in general cultural geography, 3 in public speaking, 3 in principles and practices of personnel management, and 3 in office management. In the upper-division baccalaureate category, 3 semester hours in area studies, 3 in aerial photographic interpretation, 3 in photogrammetry, and 3 in principles of management (9/80).

Recommendation, ISCS

In the vocational certificate category, the recommendation is the same as that for IS2. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for ISC. In the upper-division baccalaureate category, 3 semester hours in area studies, 3 in aerial photographic interpretation, 3 in photogrammetry, 3 in principles of management, 3 in management problems, and 3 for a practicum in management, and 3 in techniques of information analysis on the basis of institutional evaluation (9/80).

Recommendation, ISCM

In the vocational certificate category, the recommendation is the same as that for IS2. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for ISC. In the upper-division baccalaureate category, 3 semester hours in area studies, 3 in aerial photographic interpretation, 3 in photogrammetry, 3 in principles of management, 3 in management problems, 6 for a practicum in management, and 3 in techniques of information analysis on the basis institutional evaluation (9/80).

FN: Fireman (E-3). *ML3:* Molder Third Class (E-4). *ML2:* Molder Second Class (E-5). *ML1:* Molder First Class (E-6). *MLC:* Chief Molder (E-7). *MLCS:* Senior Chief Molder (E-8). *MLCM:* Master Chief Molder (E-9).

Description

Summary: Operates foundries aboard ship and at shore stations; makes molds and cores; sets up flasks; prepares heats; operates melting furnaces and pours castings of ferrous and nonferrous metals and alloys; cleans castings; casts a variety of navy equipment components, including bearings, brass and bronze fittings, and cast iron, steel, and aluminum items; operates muller and controls sand quality; performs maintenance on assigned equipment; works from shop drawings. *ML3:* Conducts bench and floor molds; makes and installs cores, rebabbits bearings, prepares and evaluates molding sands; arranges molding sequence; identifies Navy babbits; charges induction furnaces; selects casting alloys; identifies metals and alloys; selects and applies gas purging methods; repairs refractory linings; cleans furnaces and ladles; uses and maintains pyrometers, electric and pneumatic power tools, and oxyacetylene welding/cutting equipment; makes carbon dioxide process cores; reads and works from shop drawings and sketches; maintains shop files; determines weights of castings; cleans castings. *ML2:* Able to perform the duties required for ML3; makes molds directly from castings and analyzes casting quality; allows for shrinkage effects of cast steel and monel; identifies and uses bonding materials; designs gating systems; determines proper use of refractories; identifies type and effects of gas absorption; selects methods of obtaining proper casting solidification; controls the reaction of sodium silicate binders with carbon dioxide and heat; determines cause and method of detection of casting defects related to foundry sand, melting and pouring practice, and molding technique; determines and obtains proper molding pressure for metals cast; identifies abrasive materials and their uses; orders repair parts and special tools for equipment maintenance; prepares sketches from mechanical drawings and existing parts. *ML1:* Able to perform the duties required for ML2; interprets materials lists and modifications; maintains manuals; estimates time, material, and cost for foundry work; designs gating systems and special techniques for shrinkage allowance and finish machining; designs and makes internal chills; identifies types and effects of grain formation in cast metal; determines mold buoyancy; melts steel and monel; distinguishes mechanical properties of cast metals and alloys; interprets bindary phase diagrams and cooling curves for commonly used casting compositions; interprets cooling characteristics of metal microstructures; makes special mixture cores; determines gassing and baking times for carbon dioxide cores; schedules and checks maintenance work. *MLC:* Able to perform the duties required for ML1; designs castings with inserts and determines pouring rates and temperatures; trains and supervises personnel in foundry operations, metal identification, and pyrometry; prepares quarterly preventive maintenance schedules.

Recommendation, ML3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 4 semester hours in foundry or metal casting and 1 in manufacturing processes (12/78).

Recommendation, ML2

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 6 semester hours in foundry or metal casting and 2 in manufacturing processes (12/78).

Recommendation, ML1

In the vocational certificate category, 8 semester hours in foundry or metal casting and 2 in manufacturing processes. In the lower-division baccalaureate/associate degree category, 8 semester hours in foundry or metal casting, 2 in manufacturing processes, 1 in materials science, and 1 in shop supervision (12/78).

Recommendation, MLC

In the vocational certificate category, 8 semester hours in foundry or metal casting, and 2 in manufacturing processes. In the lower-division baccalaureate/associate degree category, 8 semester hours in foundry or metal casting, 2 in manufacturing processes, 1 in materials science, 2 in personnel supervision, 2 in shop supervision, 1 in record keeping, and 1 in safety management (12/78).

Description

Summary: Operates foundries aboard ship and at shore stations; makes molds and cores; sets up flasks; prepares heats; operates melting furnaces and pours castings of ferrous and nonferrous metals and alloys; cleans castings; casts a variety of navy equipment components, including bearing, brass and bronze fittings, and cast iron, steel, and aluminum items; operates muller and controls sand quality; performs maintenance on assigned equipment; works from shop drawings. *ML3:* Conducts bench and floor molds; makes and installs cores, rebabbits bearings, prepares and evaluates molding sands; arranges molding sequence; identifies Navy babbits; charges induction furnaces; selects casting alloys; identifies metals and alloys; selects and applies gas purging methods; repairs refractory linings; cleans furnaces and ladles; uses and maintains pyrometers, electric and pnuematic power tools, and oxyacetylene welding/cutting equipment; makes carbon dioxide process cores; reads and works from shop drawings and sketches; maintains shop files; determines weights of castings; cleans castings. *ML2:* Able to perform the duties required for ML3; makes molds directly from castings and analyzes casting quality; allows for shrinkage effects of cast steel and monel; identifies and uses bonding materials; designs gating systems; determines proper use of refractories; identifies type and effects of gas absorption; selects methods of obtaining proper casting solidification; controls the reaction of sodium silicate binders with carbon dioxide and heat; determines cause and method of detection of casting defects related to foundry sand, melting and pouring practice, and molding technique; determines and obtains proper molding pressure for metals cast; identifies abrasive materials and their uses; orders repair parts and special tools for equipment maintenance; prepares sketches from mechanical drawings and existing parts. *ML1:* Able to perform the duties required for ML2, interprets materials lists and modifications; maintains manuals; estimates time, material, and cost for foundry work; designs gating systems and special techniques for shrinkage allowance and finish machining; designs and makes internal chills; identifies types and effects of grain formation in cast metal; determines mold buoyancy; melts steel and monel; distinguishes mechanical properties of cast metals and alloys; interprets bindary phase diagrams and cooling curves for commonly used casting compositions; interprets cooling characteristics of metal microstructures; makes special mixture cores; determines gassing and baking times for carbon dioxide cores; schedules and checks maintenance work. *MLC:* Able to perform the duties required for ML1; designs castings with inserts and determines pouring rates and temperatures; trains, manages, and supervises personnel in foundry operations, metal identification, and pyrometry; prepares quarterly preventive maintenance schedules.

Recommendation, ML3

In the lower-division baccalaureate/associate degree category, 1 semester hour in blueprint reading, 1 in welding, 2 in metallurgy, and 2 in foundry practice (3/90).

Recommendation, ML2

In the lower-division baccalaureate/associate degree category, 2 semester hours in blueprint reading, 2 in welding, 3 in metallurgy, 4 in foundry practice, 1 in record-keeping, and 2 in principles of supervision (3/90).

Recommendation, ML1

In the lower-division baccalaureate/associate degree category, 3 semester hours in blueprint reading, 3 in welding, 3 in metallurgy, 6 in foundry practice, 2 in record-keeping, and 3 in principles of supervision (3/90).

Recommendation, MLC

In the lower-division baccalaureate/associate degree category, 3 semester hours in blueprint reading, 3 in welding, 3 in metallurgy, 8 in foundry practice, 2 in record-keeping, and 4 in principles of supervision. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 1 in management problems (3/90).

NER-ML-003

MOLDER, SENIOR CHIEF AND MASTER CHIEF

MLCS
MLCM

Exhibit Dates: 6/71-12/87.

Occupational Field: 4 (Ship Maintenance).

Career Pattern

May progress from either MLC, Chief Molder (E-7), or PMC, Chief Patternmaker (E-7). *MLCS:* Senior Chief Molder (E-8). *MLCM:* Master Chief Molder (E-9).

Description

MLCS: Able to perform the duties required for MLC (Chief Molder) or PMC (Chief Patternmaker); provides information and advises on utilization, capabilities, reliability, and operations of foundry; prepares local directives and instructions for attaining organization objectives and improving operations; prepares correspondence; establishes and implements a program for interviewing, evaluating, and assigning personnel for maximum utilization; serves as ship's supervisor; supervises operations of foundries and pattern shops; instructs personnel in physical and mechanical properties of metals, alloys, and plastics; coordinates construction and uses of master patterns, molds, and castings; organizes and schedules training programs and evaluates their effectiveness; initiates improvements; administers long range planned and preventive maintenance programs. *MLCM:* Able to perform the duties required for MLCS; assists repair officer in management of repair department; serves as technical advisor to repair officer; plans, organizes, implements, and controls activities in compliance with policy, operation orders, and directives; forecasts future requirements; plans and initiates actions to satisfy safety requirements; establishes goals, objectives, and priorities; reviews personnel, equipment, and material requirements; develops operating budgets and monitors expenditures.

Recommendation, MLCS

In the vocational certificate category, the recommendation is the same as that for either MLC (Chief Molder) in exhibit NER-ML-001 or PMC (Chief Patternmaker) in exhibit NER-PM-001. In the lower-division baccalaureate/associate degree category, 1 additional semester hour in personnel supervision, 1 additional semester hour in record keeping, and 2 in human relations; add either the 17 semester hours for MLC (Chief Molder) in exhibit NER-ML-001, or the 16 semester hours for PMC (Chief Patternmaker) in exhibit NER-PM-001, as appropriate. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 for management problems (12/78).

Recommendation, MLCM

In the vocational certificate category, the recommendation is the same as that for MLCS. In the lower-division baccalaureate/associate degree category, 1 additional semester hour in personnel supervision, 2 additional semester hours in record keeping, and 3 semester hours in human relations; add either the 17 semester hours for MLC (Chief Molder) in exhibit NER-ML-001, or the 16 semester hours for PMC (Chief Patternmaker) in exhibit NER-PM-001. In the upper-division baccalaureate category, 6 semester hours for field experience in management, and 3 in management problems (12/78).

NER-ML-004

MOLDER, SENIOR CHIEF AND MASTER CHIEF

MLCS
MLCM

Exhibit Dates: 1/88-Present.

Occupational Field: 4 (Ship Maintenance).

Career Pattern

May progress from either MLC, Chief Molder (E-7), or PMC, Chief Pattermaker (E-7). *MLCS:* Senior Chief Molder (E-8). *MLCM:* Master Chief Molder (E-9).

Description

Summary: MLCS: Able to perform the duties required for MLC (Chief Molder) or PMC (Chief Patternmaker); provides information and advises on utilization, capabilities, reliability, and operations of foundry; prepares local directives and instructions for attaining organization objectives and improving operations; prepares correspondence; establishes and implements a program for interviewing, evaluating, and assigning personnel for maximun utilization; serves as ship's supervisor; supervises operations of foundries and pattern shops; instructs personnel in physical and mechanical properties of metals, alloys, and plastics; coordinates construction and uses of master patterns, molds, and castings; organizes and schedules training programs and evaluates their effectiveness; initiates improvements; administers long-range preventive maintenance programs. *MLCM:* Able to perform the duties required for MLCS; assists repair officer in management of repair department; serves as technical advisor to repair officer; plans, organizes, implements, and controls activities in compliance with policy, operations orders, and directives; forecasts future requirements; plans and initiates actions to satisfy safety requirements; establishes goals, objectives, and priorities; reviews personnel, equipment, and material requirements; develops operating budgets and monitors expenditures.

Recommendation, MLCS

In the lower-division baccalaureate/associate degree category, if progressed from Molder, use the recommendation for MLC in exhibit NER-ML-002, plus 3 semester hours in materials science; if progressed from pattermaker, use the recommendation for PMC in exhibit NER-PM-002, plus 3 semester hours in materials science. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 3 in management problems (3/90).

Recommendation, MLCM

In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for MLCS. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 6 in management problems (3/90).

MACHINIST'S MATE

MM3
MM2
MM1
MMC
MMCS
MMCM

Exhibit Dates: 6/71-12/89.

Occupational Field: 3 (Marine Engineering).

Career Pattern

FN: Fireman (E-3). *MM3:* Machinist's Mate Third Class (E-4). *MM2:* Machinist's Mate Second Class (E-5). *MM1:* Machinist's Mate First Class (E-6). *MMC:* Chief Machinist's Mate (E-7). *MMCS:* Senior Chief Machinist's Mate (E-8). *MMCM:* Master Chief Machinist's Mate (E-9).

Description

Summary: Operates, repairs, and performs maintenance on ship propulsion machinery, auxiliary equipment, outside machinery (including steering engine, windlasses, hoisting machinery, and elevators), food preparation equipment, laundry equipment, and refrigeration and air-conditioning equipment. *MM3:* Removes and replaces filters in hydraulic systems; drains and fills hydraulic systems; uses the following test equipment: freon leak detector, stroboscope, dead-weight tester, and radiac, lube oil, and feedwater equipment; uses and files blueprints, microform, aperture cards and ship's drawings; inspects, lubricates, and tests galley and laundry equipment and deck machinery; performs distillate and brine tests; operates all pumps associated with main engine operation; carries out prescribed procedures when malfunctions occur; identifies the principles of refrigeration cycles; tests for refrigerant leaks; completes maintenance data forms; exercises environmental control procedures to prevent or minimize air pollution and oil spills. *MM2:* Able to perform the duties required for MM3; calibrates pressure and temperature sensing devices; carries out chemical water treatment procedures; performs maintenance on whistles, sirens, anchor windlasses, cranes, winches, steering engines, food preparation and dishwashing machinery, and air and reefer compressors; operates and performs mechanical maintenance on propulsion system equipment including jacking gears, main engines, and steam turbine generators; adjusts thermal expansion valves, pressure switches, thermostats, and regulator valves; removes moisture from air-conditioning and refrigeration systems by evacuation; may serve as engineroom watch supervisor (in port); completes maintenance reports; inventories installed equipment; orders repair parts and tools. *MM1:* Able to perform the duties required for MM2; performs hydrostatic tests of evaporator and heat exchanger tubes and shells; uses main circulating pump to pump engine room bilges; identifies factors governing main propulsion plant efficiency, causes of poor performance, and appropriate remedies; tests, dehydrates, and recharges refrigeration and air-conditioning systems; may serve as engineroom watch supervisor (underway); instructs engineroom personnel in casualty control and plant operation procedures; reviews completed maintenance data forms; prepares weekly schedules of preventive maintenance; prepares environmental pollution control reports. *MMC:* Able to perform the duties required for MM1; prepares equipment and machinery performance and repair reports; monitors the qualifications of engineroom watchstanders; supervises personnel in carrying out casualty control procedures; plans and schedules workload; prepares quarterly maintenance schedules; supervises and assists personnel in the repair, overhaul, and procurement of ship propulsion and auxiliary equipment. *MMCS:* Able to perform the duties required for MMC; identifies deficiencies of equipment and machinery; provides information and advises on utilization, capabilities, reliability, and operation; prepares directives and instructions for attaining organization objectives; establishes and implements a program for interviewing, evaluating, and assigning personnel to assure maximum utilization; reviews requirements for watchstanding qualifications; prepares correspondence; trains and supervises personnel; organizes and schedules training programs; administers a long-range planned maintenance program; supervises environmental pollution control programs. *MMCM:* Able to perform the duties required for MMCS; develops and monitors safety programs; advises personnel about new technical information; plans, organizes, implements, and controls activities; reviews personnel, equipment, and material requirements, and forecasts future requirements; prepares major maintenance and repair schedules; supervises inspections and surveys of equipment; develops operating budgets and monitors expenditures.

Recommendation, MM3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 10 semester hours in machinery maintenance and repair, 3 in maintenance technology, and 1 in blueprint reading, and credit in air-conditioning and refrigeration on the basis of institutional evaluation (12/78).

Recommendation, MM2

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 10 semester hours in machinery maintenance and repair, 3 in maintenance technology, 1 in blueprint reading, 1 in record keeping, and 3 in air-conditioning and refrigeration (12/78).

Recommendation, MM1

In the vocational certificate category, 12 semester hours in machinery maintenance and repair, 3 in maintenance technology, 1 in blueprint reading, 1 in record keeping, and 3 in air-conditioning and refrigeration. In the lower-division baccalaureate/associate degree category, 12 semester hours in machinery maintenance and repair, 3 in maintenance technology, 1 in blueprint reading, 1 in record keeping, 3 in air-conditioning and refrigeration, 2 in personnel supervision, 2 in maintenance management, and 3 in human relations (12/78).

Recommendation, MMC

In the vocational certificate category, the recommendation is the same as that for MM1. In the lower-division baccalaureate/associate degree category, 12 semester hours in machinery maintenance and repair, 3 in maintenance technology, 1 in blueprint reading, 1 in record keeping, 3 in air-conditioning and refrigeration, 3 in personnel supervision, 3 in maintenance management, and 3 in human relations (12/78).

Recommendation, MMCS

In the vocational certificate category, the recommendation is the same as that for MM1. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for MMC. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (12/78).

Recommendation, MMCM

In the vocational certificate category, the recommendation is the same as that for MM1. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for MMC. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 3 in management problems (12/78).

Exhibit Dates: 1/90–Present.

Occupational Field: 3 (Marine Engineering).

Career Pattern

FN: Fireman (E-3). *MM3:* Machinist's Mate, Third Class (E-4). *MM2:* Machinist's Mate, Second Class (E-5). *MM1:* Machinist's Mate, First Class (E-6). *MMC:* Chief Machinist's Mate (E-7). *MMCS:* Senior Chief Machinist's Mate (E-8). *MMCM:* Master Chief Machinist's Mate (E-9).

Description

Summary: Operates, repairs, and performs maintenance on ship propulsion machinery and auxiliary equipment. *MM3:* Operates main propulsion steam engines, turbo generators and associated systems (condensate circulating water, lube oil, etc); operates auxiliary systems such as compressed air potable water, air conditioning and refrigeration systems and steering systems; completes maintenance data forms; exercises environmental control procedures to prevent or minimize air pollution and oil spills. *MM2:* Able to perform the duties required for MM3; calibrates pressure and temperature sensing devices; carries out chemical water treatment procedures; performs maintenance on whistles, siren, anchor windlasses, cranes, winches, steering engines, food preparation and dishwashing machinery, and air and reefer compressors; operates and performs mechanical maintenance on propulsion system equipment; adjusts thermal expansion valves, pressure switches, thermostats, and regular valves; may serve as engineroom watch supervisor (in port); completes maintenance reports; inventories installed equipment; orders repair parts and tools. *MM1:* Able to perform the duties required for MM2; identifies factors governing main propulsion plant efficiency, causes of poor performance, and appropriate remedies; tests, dehydrates, and recharges refrigeration and air-conditioning systems; may serve as engineroom watch supervisor (underway); instructs engineroom personnel in casualty control and plant operation procedures; reviews completed maintenance data forms; prepares weekly schedules of preventive maintenance; prepares environmental pollution control reports. *MMC:* Able to perform the duties required for MM1; prepares equipment and machinery performance and repair reports; monitors the qualifications of engineroom watchstanders; supervises personnel in carrying out casualty control procedures; plans and schedules workload; prepares quarterly maintenance schedules; supervises and assists personnel in the repair, overhaul, and procurement of ship propulsion and auxiliary equipment. *MMCS:* Able to perform the duties required for MMC; identifies deficiencies of equipment and machinery; provides information and advises on utilization, capabilities, reliability, and operation; prepares directives and instructions for attaining organization objectives; establishes and implements a program for interviewing, evaluating, and assigning personnel to assure maximum utilization; reviews requirements for watchstanding qualifications; prepares correspondence; trains and supervises personnel; organizes and schedules training programs; administers a long-range planned maintenance program; supervises environmental pollution control programs. *MMCM:* Able to perform the duties required for MMCS; develops and monitors safety programs; advises personnel about new technical information; plans, organizes, implements, and controls activities; reviews personnel, equipment, and material requirements, and forecasts future requirements; prepares major maintenance and repair schedules; supervises inspections and surveys of equipment; develops operating budgets and monitors expenditures.

Recommendation, MM3

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic marine engineering (steam turbines), 3 in basic marine engineering (auxiliaries), 3 in maintenance technology, and 1 in blueprint reading (3/90).

Recommendation, MM2

In the lower-division baccalaureate/associate degree category, 5 semester hours in basic marine engineering (steam turbines), 5 in basic marine engineering (auxiliaries), 6 in maintenance technology, 2 in blueprint reading, 1 in recordkeeping, and 1 in principles of supervision (3/90).

Recommendation, MM1

In the lower-division baccalaureate/associate degree category, 6 semester hours in basic marine engineering (steam turbines), 6 in basic marine engineering (auxiliaries), 9 in maintenance technology, 2 in blueprint reading, 2 in recordkeeping, 2 in principles of supervision, and 1 in maintenance management (3/90).

Recommendation, MMC

In the lower-division baccalaureate/associate degree category, 6 semester hours in basic marine engineering (steam turbines), 6 in basic marine engineering (auxiliaries), 9 in maintenance technology, 2 in blueprint reading, 2 in recordkeeping, 3 in principles of supervision, and 2 in maintenance management (3/90).

Recommendation, MMCS

In the lower-division baccalaureate/associate degree category, 6 semester hours in basic marine engineering (steam turbines), 6 in basic marine engineering (auxiliaries), 9 in maintenance technology, 2 in blueprint reading, 2 in recordkeeping, 3 in principles of supervision, and 3 in maintenance management. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (3/90).

Recommendation, MMCM

In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for MMCS. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 6 in management problems (3/90).

MNC
MNCS
MNCM

Exhibit Dates: 6/73–Present.

Occupational Field: 9 (Ordnance Systems).

Career Pattern

SN: Seaman (E-3). *MN3:* Mineman Third Class (E-4). *MN2:* Mineman Second Class (E-5). *MN1:* Mineman First Class (E-6). *MNC:* Chief Mineman (E-7). *MNCS:* Senior Chief Mineman (E-8). *MNCM:* Master Chief Mineman (E-9).

Description

Summary: Responsible for maintenance, installation, and inspection of mines (underwater explosive devices), which are loaded onto surface ships, submarines, or aircraft for placement in the water. *MN3:* Inspects and prepares mine cases for assembly; loads explosives into mine cases; installs electronic modules; stores, charges, and installs batteries; performs mechanical adjustments; checks temperatures in storage areas; uses standard hand tools, thread cutting devices, mechanical measuring devices, portable power tools, and bench tools; uses electrical, hydrostatic, and vacuum tube testing devises; prepares mines for storage. *MN2:* Able to perform the duties required for MN3; performs final preparation on mines for shipment and planting; conducts inventory and orders parts and tools. *MN1:* Able to perform the duties required for MN2; instructs personnel in handling and stowing explosives and detonating agents; supervises assembling, disassembling, handling, testing, maintaining, and issuing of mines; prepares weekly schedules of preventive maintenance. *MNC:* Able to perform the duties required for MN1; develops plans for storage or loading of mines and mine components onto aircraft or vessels; establishes and maintains filing systems; supervises upkeep and operation of a mine assembly unit; checks operating logs and maintenance records to ensure equipment is operating within prescribed limits; ensures that prescribed procedures are followed in operation of test equipment. *MNCS:* Able to perform the duties required for MNC; manages a division within a weapons department concerned with underwater mine ordnance; provides information and advises on utilization, capabilities, reliability, and operations in area of responsiblity; prepares correspondence; administers a long-range maintenance program. *MNCM:* Able to perform the duties required for MNCS; reviews personnel, equipment, and material requirements; plans, organizes, implements, and controls activities in compliance with policy statements, operation orders, and directives; analyzes records and reports; develops operating budgets and monitors expenditures.

Recommendation, MN3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in the use and care of hand and power tools (9/80).

Recommendation, MN2

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in the use and care of hand and power tools (9/80).

Recommendation, MN1

In the vocational certificate category, 3 semester hours in the use and care of hand and power tools. In the lower-division baccalaureate/associate degree category, 3 semester hours in the use and care of hand and power tools and 3 in personnel supervision (9/80).

Recommendation, MNC

In the vocational certificate category, 3 semester hours in use and care of hand and power tools and 2 in records management. In the lower-division baccalaureate/associate degree category, 3 semester hours in use and care of hand and power tools, 3 in personnel supervision, and 2 in records management (9/80).

Recommendation, MNCS

In the vocational certificate category, the recommendation is the same as that for MNC. In the lower-division baccalaureate/associate degree category, 3 semester hours in use and care of hand and power tools, 3 in personnel supervision, 2 in records management, and 3 in operations management (9/80).

Recommendation, MNCM

In the vocational certificate category, the recommendation is the same as that for MNC. In the lower-division baccalaureate/associate degree category, 3 semester hours in use and care of hand and power tools, 3 in personnel supervision, 2 in records management, and 6 in operations management (9/80).

MRCM

Exhibit Dates: 6/72–12/89.

Occupational Field: 4 (Ship Maintenance).

Career Pattern

FN: Fireman (E-3). *MR3:* Machinery Repairman, Third Class (E-4). *MR2:* Machinery Repairman, Second Class (E-5). *MR1:* Machinery Repairman, First Class (E-6). *MRC:* Chief Machinery Repairman (E-7). *MRCS:* Senior Chief Machinery Repairman (E-8). *MRCM:* Master Chief Machinery Repairman (E-9).

Description

Summary: Performs maintenance on shipboard equipment and machinery using the following machine shop equipment: lathes, milling machines, boring mills, grinders, power hacksaws, drill presses, and other machine tools. *MR3:* Operates and performs maintenance on all machine shop equipment that is required to repair, rebuild, or fabricate parts to maintain shipboard equipment and machinery; constructs geometric forms; reads sketches, diagrams, and blueprints; solves basic algebraic and trigonometric layout problems; computes English and metric systems of measurement; operates bench or pedestal drills, pedestal grinders, machine reamers, engine lathes, planers or shapers, milling machines, pantographs, disk metal bandsaw, arbor and hydraulic presses, and oxyacetylene equipment; performs computations to make threads, press fits, tapers, and keyways; completes maintenance data forms. *MR2:* Able to perform the duties required for MR3; maintains blueprint files for machine shop; uses machine shop equipment which includes attachments with special capabilities; performs hardness tests on metals, plastics, and casting, able to select metals and plastics according to specifications; completes maintenance reports; inventories installed equipment; orders repair parts and tools. *MR1:* Able to perform the duties required for MR2; operates equipment that analyzes ferrous and non-ferrous metals; performs heat-treating operations; repairs fixed machinery and equipment; performs alignment tests on all ship equipment; reviews completed maintenance data forms; prepares weekly maintenance schedules. *MRC:* Able to perform the duties required for MR1; supervises maintenance and repair activities; estimates time and material requirements; maintains work center records; prepares quarterly maintenance schedules; directs the replacement, installation, maintenance, and repair of complex repair shop equipment; supervises inventory of tools equipment, and supplies. *MRCS:* Able to perform the duties required for MRC; provides information and advice on utilization, capabilities, reliability, and operations; prepares directives and instructions for attaining organization objectives; establishes and implements a program for interviewing, evaluating, and assigning personnel to assure maximum utilization; prepares correspondence, organizes and schedules training programs; administers a long range planned maintenance program. *MECM:* Able to perform the duties required for MRCS; develops and maintains safety programs, plans, organizes, implements, and controls activities; reviews personnel, equipment, and material requirements, and forecasts future requirements; supervises inspections and survey of equipment; develops operating budgets and monitors expenditures.

Recommendation, MR3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in machine technology, 3 in principles and operation of machine tools, 2 in machine shop mathematics, 1 in blueprint reading, and 1 in introduction to the metric system of measurement (12/78).

Recommendation, MR2

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 6 semester hours in machine technology, 4 in principles and operation of machine tools, 3 in blueprint reading, 2 in machine shop mathematics, 1 in record keeping, and 1 in introduction to the metric system of measurement (12/78).

Recommendation, MR1

In the vocational certificate category, 6 semester hours in machine technology, 6 in principles and operation of machine tools, 3 in blueprint reading, 3 in machine shop mathematics, 1 in introduction to the metric system of measurement, and 1 in record keeping. In the lower-division baccalaureate/associate degree category, 6 semester hours in machine technology, 6 in principles and operation of machine tools, 3 in blueprint reading, 3 in machine shop mathematics, 1 in introduction to the metric system of measurement, 1 in record keeping, 2 in personnel supervision, 2 in maintenance management, and 3 in human relations (12/78).

Recommendation, MRC

In the vocational certificate category, the recommendation is the same as that for MR1. In the lower-division baccalaureate/associate degree category, 6 semester hours in machine technology, 6 in principles and operation of machine tools, 3 in blueprint reading, 3 in machine shop mathematics, 1 in introduction to the metric system of measurement, 1 in record keeping, 3 in personnel supervision, 3 in maintenance management, and 3 in human relations (12/78).

Recommendation, MRCS

In the vocational certificate category, the recommendation is the same as that for MR1. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for MRC. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (12/78).

Recommendation, MRCM

In the vocational certificate category, the recommendation is the same as that for MR1. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for MRC. Description

Summary: Performs maintenance on shipboard equipment and machinery using the following machine shop equipment: lathes, milling machines, boring mills, grinders, power hacksaws, drill presses, and other machine tools. *MR3:* Operates and performs maintenance on all machine shop equipment that is required to repair, rebuild, or fabricate parts to maintain shipboard equipment and machinery; reads sketches, diagrams, and blueprints; operates bench or pedestal drills, pedestal grinders, machine reamers, engine lathes, planers or shapers, milling machines, pantographs, disk metal bandsaw, arbor and hydraulic presses, and oxyacetylene equipment; performs computations to make threads, press fits, tapers and keyways; completes maintenance data forms. *MR2:* Able to perform the duties required for MR3; maintains blueprint files for machine shop; uses machine shop equipment that includes attachments with special capabilities; performs hardness tests on metals, plastics, and casting; able to select metals and plastics according to specifications; completes maintenance reports; inventories installed equipment; orders repair parts and tools. *MR1:* Able to perform the duties required for MR2; operates equipment that analyzes ferrous and non-ferrous metals; performs heat-treating operations; repairs fixed machinery and equipment; performs alignment tests on ship equipment; reviews completed maintenance data forms; prepares weekly maintenance schedules. *MRC:* Able to perform the duties required for MR1; supervises maintenance and repair activities; estimates time and material requirements; maintains work center records; prepares quarterly maintenance schedules; directs the replacement, installation, maintenance and repair of complex repair shop equipment; supervises inventory of tools, equipment, and supplies. *MRCS:* Able to perform the duties required for MRC; provides information and advice on utilization, capabilities, reliability, and operations; prepares directives and instructions for attaining organization objectives; establishes and implements a program for interviewing, evaluating, and assigning personnel to assure maximum utilization; prepares correspondence, organizes and schedules training programs; administers a long-range planned maintenance program. *MRCM:* Able to perform the duties required for MRCS; develops and maintains safety programs; plans, organizes, implements, and controls activities; reviews personnel, equipment, and material requirements, and forecasts future requirements; supervises inspections and survey of equipment; develops operating budgets and monitors expenditures.

Recommendation, MR3

In the lower-division baccalaureate/associate degree category, 3 semester hours in machine tool operations, 3 in maintenance technology, 1 in blueprint reading, and 1 in metallurgy (3/90).

Recommendation, MR2

In the lower-division baccalaureate/associate degree category, 6 semester hours in machine tool operations, 6 in maintenance technology, 2 in blueprint reading, 1 in maintenance management, and 2 in metallurgy (3/90).

Recommendation, MR1

In the lower-division baccalaureate/associate degree category, 9 semester hours in machine tool operations, 9 in maintenance technology, 3 in blueprint reading, 2 in recordkeeping, 2 in principles of supervision, 2 in maintenance management, and 2 in metallurgy (3/90).

Recommendation, MRC

In the lower-division baccalaureate/associate degree category, 9 semester hours in machine tool operations, 9 in maintenance technology, 3 in blueprint reading, 2 in recordkeeping, 3 in principles of supervision, 3 in maintenance management, and 2 in metallurgy (3/90).

Recommendation, MRCS

In the lower-division baccalaureate/associate degree category, 9 semester hours in machine tool operations, 9 in maintenance technology, 3 in blueprint reading, 2 in recordkeeping, 3 in principles of supervision, 4 in maintenance management, and 2 in metallurgy. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (3/90).

Recommendation, MRCM

In the lower-division baccalaureate/associate degree category, 9 semester hours in machine tool operations, 9 in maintenance technology, 3 in blueprint reading, 2 in recordkeeping, 3 in principles of supervision, 5 in maintenance management, and 2 in metallurgy. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 6 in management problems (3/90).

Description

Summary: Provides music for various functions and ceremonies as members of Navy unit bands; performs on one or more designated instruments. NOTE: Musicians are further identified by the following NEC (Navy Enlisted Classification) codes: MU-3801 Flute/Piccolo Instrumentalist; MU-3802 Oboe Instrumentalist; MU-3803 Clarinet Instrumentalist; MU-3804 Bassoon Instrumentalist; MU-3805 Saxophone Instrumentalist; MU-3806 Trumpet/Cornet Instrumentalist; MU-3807 French Horn Instrumentalist; MU-3808 Baritone/Euphonium Instrumentalist; MU-3809 Trombone Instrumentalist; MU-3811 Tuba/String Bass Instrumentalist; MU-3812 Guitar/Bass Drum Instrumentalist; MU-3813 Percussion Instrumentalist; MU-3814 Piano/Bass Drum Instrumentalist; MU-3825 Vocalist; and MU-3851 Assistant Bandleader. *MU3:* Performs as a member of a musical ensemble; performs first parts of elementary music with good intonation and characteristic tone (and with good diction, for vocalists); performs from memory all major and minor scales; is responsive to musical interpretation, including dynamics, tempo, musical terms, and devices peculiar to dance music; able to perform elementary melodic improvisation, including alphabetical chord symbols notated in standard dance and popular music; able to identify, by sound, simple chord progressions used in popular music; able to identify, by sight and sound, major, minor, diminished, and augmented triads in root position and inversions; able to notate melodic (single part) dictation of elementary music, at sight, one tone higher or lower than written. *MU2:* Able to perform the duties required for MU3; performs first parts of intermediate music; performs intermediate melodic improvision following the alphabetic chord symbols notated in standard dance and popular music; interprets chord symbols used in modern dance music up to and including seventh chords, and identifies these chords with the correct symbols; performs, from memory, ten standard dance tunes and standard advanced solos; notates melodic (single part) dictation of intermediate music; identifies, by sound, intermediate chord progression used in popular music; arranges popular melodies for a five-piece combo; rehearses and prepares a small combo for public appearances; rehearses and conducts the National Anthem and one prepared march. *MU1:* Able to perform the duties required for MU2; performs first parts of advanced music at sight; performs advanced melodic improvisation following the alphabetic chord symbols notated in standard dance and popular music;

analyzes and identifies all chords from piano 'lead sheets' and 'stock' piano parts; performs, from memory, eighteen standard dance tunes and advanced solos; harmonizes melodies in four parts, indicating figured bass and using diatonic triads, dominant and diatonic seventh chords, higher dominant dischords, simple modulation, and secondary dominants; arranges songs for an instrumental/vocal ensemble; notates melodic, single part dictation in moderately difficult music; rehearses and conducts a ceremonial band in a program of marches, popular music, and ceremonial music; rehearses and prepares for public performance a dance band of at least eight instruments; assembles and maneuvers a marching band. *MUC:* Able to perform the duties required for MU1; performs advanced solos from memory; rehearses and conducts ten marches and three difficult selections or overtures; prepares a musical program for public performance utilizing dance band and/or combo, and featuring solo or entertainment capabilities of band members; identifies, by sound, advanced chord progressions used in popular music; analyzes scores for harmonic content, modulations and nonharmonic tones, and melodic and harmonic content of piano sheet music; corrects mistakes and omissions in printing of alphabetical chord symbols; arranges 32 or more measures, including introduction and ending of a song or melody for a small concert band, and a popular song or folk song for a seventeen-piece dance band; supervises professional and military instruction; supervises the daily operation of a performing unit of a Navy band; evaluates requests for band performances; initiates and coordinates the preparation of posters, pictures, biographies, radio/TV spots, news releases, programs, and other promotional material required for a Navy band; supervises reports, records maintenance, and other personnel administration requirements; supervises the custody, care, and maintenance of music material; prepares requests for procurement and disposition of music material. *MUCS:* Able to perform the duties required for MUC; conducts a large concert band in performance of advanced literature; prepares a musical program for radio or television, utilizing dance band and/or combo, and featuring solo or entertainment capabilities of band personnel; analyses dominant and diatonic seventh chords in root position and inversions; harmonizes melodies in four parts, indicating figured bass, using diatonic triads with inversions, dominant seventh chords with inversions, and nonharmonic tones; organizes and schedules training programs and evaluates their effectiveness; manages, schedules, and coordinates the rehearsal and performance of all units of a Navy band; manages the preparation and distribution of posters, pictures, biographies, radio/TV spots, news releases, programs, and other promotional material; establishes and implements an effective community relations program; manages non-musical logistic support for Navy band; prepares correspondence; establishes and implements a program for interviewing, evaluating, and assigning personnel to assure maximum utilization; manages procurement, control, maintenance, and disposition of music, musical equipment, and supplies. *MUCM:* Able to perform the duties required for MUCS; plans, organizes, implements, and controls activities; establishes goals, objectives, and priorities; reviews personnel, equipment, and material requirements, and forecasts future requirements; evaluates musical background proficiency and potential of applicants for the Navy music program; develops operating budgets and monitors expenditures.

Recommendation, MU3

In the lower-division baccalaureate/associate degree category, 4 semester hours in music theory (including harmony, ear training, and sight singing), 2 in jazz theory/improvisation, 2-4 in applied performance (individual instruction), and 2 in performing ensembles (3/79).

Recommendation, MU2

In the lower-division baccalaureate/associate degree category, 4 semester hours in music theory (including harmony, ear training, and sight singing), 2 in jazz theory/improvisation, 4-6 in applied performance (individual instruction), 2 in performing ensembles, 1 in elementary conducting, 1 in marching band, and 1 in concert band (3/79).

Recommendation, MU1

In the lower-division baccalaureate/associate degree category, 8 semester hours in music theory (including harmony, ear training, and sight singing), 2 in jazz theory/improvisation, 4-6 in applied performance (individual instruction), 4 in performing ensembles, 1 in elementary conducting, 2 in marching band, and 1 in concert band (3/79).

Recommendation, MUC

In the lower-division baccalaureate/associate degree category, 12 semester hours in music theory (including harmony, ear training, and sight singing), 2 in jazz theory/improvisation, 4-6 in applied performance (individual instruction), 1 in applied performance (secondary instrument), 4 in performing ensembles, 1 in elementary conducting, 3 in marching band, and 1 in concert band. In the upper-division baccalaureate category, 2 semester hours in arranging (3/79).

Recommendation, MUCS

In the lower-division baccalaureate/associate degree category, 16 semester hours in music theory (including harmony, ear training, and sight singing), 2 in jazz theory/improvisation, 4-6 in applied performance (individual instruction), 1 in applied performance (secondary instrument), 4 in performing ensembles, 1 in elementary conducting, 3 in marching band, and 1 in concert band. In the upper-division baccalaureate category, 4 semester hours in arranging, 2 in advanced conducting, 2 in band management, and 2 in personnel management (3/79).

Recommendation, MUCM

In the lower-division baccalaureate/associate degree category, 16 semester hours in music theory (including harmony, ear training, and sight singing), 2 in jazz theory/improvisation, 4-6 in applied performance (individual instruction), 1 in applied performance (individual instruction in secondary instrument), 4 in performing ensembles, 1 in elementary conducting, 3 in marching band, 1 in concert band, 1 in elementary class piano, 1 in instrumental techniques, and 2 in public speaking. In the upper-division baccalaureate category, 6 semester hours in arranging, 4 in advanced conducting, 3 in dance band techniques, 3 in band management, and 3 in personnel management. In the graduate degree category, 2 semester hours in advanced conducting (3/79).

Recommendation, NCCS

In the vocational certificate category, the recommendation is the same as that for NC1. In the lower-division baccalaureate/associate degree category, 1 semester hour in applied psychology, 1 in community relations, 2 in interviewing techniques, 3 for field experience in management, in communication (speech), 3 in communication (written), 3 in career information and counseling, 3 in human relations, and 3 in management electives; if the duty assignment was career counselor, additional credit in applied psychology and in occupational choice and career analysis on the basis of institutional evaluation; if the duty assignment was drugs and alcohol rehabilitation counselor, additional credit in applied psychology, psychological counseling theory and techniques, behavior crisis intervention, and drug and alcohol abuse on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours in problems in human relations (2/89).

Recommendation, NCCM

In the vocational certificate category, the recommendation is the same as that for NC1. In the lower-division baccalaureate/associate degree category, 1 semester hour in applied psychology, 1 in community relations, 2 in interviewing techniques, 3 in communication (speech), 3 in communication (written), 3 in career information and counseling, 3 in human relations, 3 for field experience in management, and 6 in management electives; if the duty assignment was career counselor, additional credit in applied psychology and in occupational choice and career analysis on the basis of institutional evaluation; if the duty assignment was drugs and alcohol rehabilitation counselor, additional credit in applied psychology, psychological counseling theory and techniques, behavior crisis intervention, and drug and alcohol abuse on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours in management problems, 3 for a practicum in vocational counseling, and 6 in problems in human relations (2/89).

NER-OM-001

Opticalman

OM3
OM2
OM1
OMC
OMCS

Exhibit Dates: 6/71–12/87.

Occupational Field: 4 (Ship Maintenance).

Career Pattern

SN: Seaman (E-3). *OM3:* Opticalman, Third Class (E-4). *OM2:* Opticalman, Second Class (E-5). *OM1:* Opticalman, First Class (E-6). *OMC:* Chief Opticalman (E-7). *OMCS:* Senior Chief Opticalman (E-8). *PICM:* Master Chief Precision Instrumentman (E-9).

Description

Summary: Performs maintenance on small navigational instruments, binoculars, gunsights, range finders, submarine and turret periscopes, night vision sights, and other optical instruments. *OM3:* Operates lathe, milling machine, bench grinder, and drill press; uses cutting lubricants on metals; tempers, hardens, and anneals various metals; joins metal by soft and silver solder; repairs and overhauls binoculars, telescopes, marine alidades, fixed prism gunsight telescopes, azimuth and bearing circles, sextants, stadimeters, and magnetic compresses; performs maintenance on image-intensifying and night vision sights, and on external fittings of submarine periscopes; recements lenses using a lens centering instrument; uses the metric and English systems of measurement to determine focal lengths, dioptric strength, and magnifying power of a positive and negative lens; uses and maintains hand tools; completes maintenance data forms. *OM2:* Able to perform the duties required for OM3; reads blueprints and sketches; makes mechanical parts for optical instruments using lathe, milling machine, and drill press; computes calculations required for determining taper per foot, cutting speeds, and surface speeds; removes and installs submarine periscopes; repairs and overhauls ship-mounted binoculars, submarine persicopes, and tilting-prism gunsight telescopes; completes maintenance reports; inventories installed equipment; orders repair parts and tools. *OM1:* Able to perform the duties required for OM2; establishes alignment references, autocollination, base and line transfer, and azimuth transfer; performs complete overhaul of MK21 rangefinders; prepares and maintains records, logs, reports, and work requests; maintains current naval publications concerning standard optical equipment; reviews completed maintenance data forms; prepares weekly maintenance schedule. *OMC:* Able to perform the duties required for *OM1;* coordinates repair and maintenance programs for measuring instruments; supervises equipment inspections; supervises training of personnel in repair and overhaul of optical equipment; plans, schedules, and assigns repair work; prepares quarterly maintenance schedules; supervises repair of precision measuring mechanical and optical instruments; applies laboratory calibration services providing standards for pressure, temperature, flow, and linear measurements. *OMCS:* Able to perform the duties required for OMC; prepares directives and instructions for attaining organization objectives and improving operations; prepares correspondence; establishes and implements a program for interviewing, evaluating, and assigning personnel to assure maximum utilization; administers repair maintenance records; organizes, schedules, and evaluates training programs; coordinates quality assurance audits; prepares work estimates; administers a long-range planned maintenance program.

Recommendation, OM3

In the vocational certificate category, 1 semester hour in machine tool operation, 2 in fabrication techniques, 3 in physics (optics), and 3 in optical laboratory. In the lower-division baccalaureate/associate degree category, 1 semester hour in machine tool operation, 2 in fabrication technology, 3 in physics (optics), and 3 in optical laboratory (12/78).

Recommendation, OM2

In the vocational certificate category, 3 semester hours in machine tool operation, 3 in fabrication techniques, 5 in physics (optics), 5 in optical laboratory, 1 in blueprint reading, and 2 in optical measurement; if NEC was IM-1821, Precision Physical Measuring Specialist, 3 semester hours in technical mathematics. In the lower-division baccalaureate/associate degree category, 3 semester hours in machine tool operation, 3 in fabrication technology, 5 in physics (optics), 5 in optical laboratory, 1 in blueprint reading, and 2 in optical measurement; if NEC was IM-1821, Precision Physical Measuring Specialist, 3 semester hours in technical mathematics (12/78).

Recommendation, OM1

In the vocational certificate category, 3 semester hours in machine tool operation, 3 in fabrication techniques, 5 in physics (optics), 6 in optical laboratory, 1 in blueprint reading, and 2 in optical measurement; if NEC was IM-1821, Precision Physical Measuring Specialist, 3 semester hours in technical mathematics. In the lower-division baccalaureate/associate degree category, 3 semester hours in machine tool operation, 3 in fabrication technology, 5 in physics (optics), 6 in optical laboratory, 1 in blueprint reading, 2 in optical measurement, 3 in record keeping, 2 in personnel supervision, and 1 in shop supervision; if NEC was IM-1821, Precision Physical Measuring Specialist, 3 semester hours in technical mathematics (12/78).

Recommendation, OMC

In the vocational certificate category, the recommendation is the same as that for OM1. In the lower-division baccalaureate/associate degree category, 3 semester hours in machine tool operation, 3 in fabrication technology, 5 in physics (optics), 6 in optical laboratory, 1 in blueprint reading, 2 in optical measurement, 3 in record keeping, 3 in personnel supervision, and 1 in shop supervision; if NEC was IM-1821, Precision Physical Measuring Specialist, 3 semester hours in technical mathematics (12/78).

Recommendation, OMCS

In the vocational certificate category, the recommendation is the same as that for OM1. In the lower-division baccalaureate/associate degree category, 3 semester hours in machine tool operation, 3 in fabrication technology, 5 in physics (optics), 6 in optical laboratory, 1 in blueprint reading, 2 in optical measurement, 3 in record keeping, 3 in personnel supervision, 1 in shop supervision, and 2 in human relations; if NEC was IM-1821, Precision Physical Measuring Specialist, 3 semester hours in technical mathematics. In the upper-division baccalaureate category, 3 semester hours for field experience in management (12/78).

OPERATIONS SPECIALIST

OS3
OS2
OS1
OSC
OSCS
OSCM

Exhibit Dates: 6/72–12/87. NOTE: Until 6/73, the title of this rating was Radarman (RD).

Occupational Field: 2 (Ship Operations).

Career Pattern

SN: Seaman (E-3). *OS3:* (RD3) Operations Specialist Third Class (Radarman Third Class) (E-4). *OS2:* (RD2) Operations Specialist Second Class (Radarman Second Class) (E-5). *OS1:* (RD1) Operations Specialist First Class (Radarman First Class) (E-6). *OSC:* (RDC) Chief Operations Specialist (Chief Radarman) (E-7). *OSCS:* (RDCS) Senior Chief Operations Specialist (Senior Chief Radarman) (E-8). *OSCM:* (RDCM) Master Chief Operations Specialist (Master Chief Radarman) (E-9).

Description

Summary: Operates radar and associated equipment; identifies and maintains a display (plot) of the movement of ships, aircraft, missiles, and natural objects detected by observing a radar; maintains a radar navigation plot of own ship's movement; evaluates information collected by radar and appropriately disseminates it; performs routine preventive maintenance on radar equipment; operates radiotelephones. *OS3:* (RD3) Operates a radar/console screen, observing objects detected by the radar and displayed on the radar screen; identifies the objects detected, determines their movement, and disseminates this information to users by internal communications systems; operates radiotelephones; plots and maintains current display of objects detected; determines own ship's position on nautical charts using ranges, bearing, and, standard navigational symbols; changes given positions into grid coordinates; knows the basic functions and interrelations of the modulator, receiver, antenna, control, and indicator units; reads electronic block diagrams; solves maneuvering board problems for course, speed, closest point of approach, true wind, and desired wind. *OS2:* (RD2) Able to perform the duties required for OS3 (RD3); tests radar and associated electronic equipment; supervises and trains personnel operating radar and associated electronic equipment, plotting display information, operating radiotelephones and log keeping; solves course and speed problems, using polar coordinate graph papers; performs duties of marine coaster radar navigator, using nautical charts; maintains strategic geographic and surface plots; interprets international and inland Nautical Rules of the Road. *OS1:* (RD1) Able to perform the duties required for OS2 (RD2); assigns duties to operations specialist personnel and supervises their performance; performs as supervisor of a watch section, directing the task performance of plotters, radiotelephone operators, radar operators, and other members of the watch section; prepares weekly schedules of preventive maintenance. *OSC:* (RDC) Able to perform the duties required for OS1 (RD1); supervises the training program for operation specialists; prepares quarterly preventive maintenance schedules; supervises the performance of preventive maintenance; serves as an assistant to the officer in charge of the Communications Information Center; serves as piloting officer during radar assisted piloting. *OSCS:* (RDCS) Able to perform the duties required for OSC (RDC): prepares correspondence and other wirtten instructions and directives; organizes, schedules and evaluates training program; administers long-range radar equipment maintenance program; provides superiors with information and advice on utilization and capabilities of personnel, equipment, and material in area of responsibility; interviews, evaluates, and assigns personnel; establishes work priorities. *OSCM:* (RDCM) Able to perform the duties required for OSCS (RDCS); performs technical administrative functions; establishes objectives and sets priorities; reviews personnel, equipment, and material requirements; plans, organizes, and implements activities in accordance with policies and procedures; coordinates repair and maintenance programs in accordance with ship's operating schedule, develop budgets and monitors expenditures.

Recommendation, OS3

(RD3) In the vocational certificate category, 6 semester hours in radar operations, 3 in applied mathematics, 3 in seamanship, and 2 in basic electronics. In the lower-division baccalaureate/associate degree category, 3 semester hours in seamanship and 2 in basic electronics (12/76).

Recommendation, OS2

(RD2) In the vocational certificate category, 6 semester hours in radar operations, 3 in applied mathematics, 3 in seamanship, 3 in basic electronics, 3 in coastwise navigation and piloting (radar navigation), and 1 in record keeping. In the lower-division baccalaureate/associate degree category, 3 semester hours in seamanship, 3 in basic electronics, 3 in coastwise navigation and piloting (radar navigation), 1 in record keeping, and 1 in personnel supervision (12/76).

Recommendation, OS1

(RD1) In the vocational certificate category, 6 semester hours in radar operations, 3 in applied mathematics, 3 in seamanship, 3 in basic electronics, 3 in coastwise navigation and piloting (radar navigation), and 2 in record keeping; if designated as a qualified air controller, additional credit in air traffic control on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 3 semester hours in seamanship, 3 in basic electronics, 3 in coastwise navigation and piloting (radar navigation), 2 in record keeping, and 2 in personnel supervision; if designated as a qualified air controller, additional credit in air traffic control on the basis on institutional evaluation (12/76).

Recommendation, OSC

(RDC) In the vocational certificate category, the recommendation is the same as that for OS1 (RD1). In the lower-division baccalaureate/associate degree category, 3 semester hours in seamanship, 3 in basic electronics, 3 in coastwise navigation and piloting (radar navigation), 3 in personnel supervision, 3 for field experience in management, and 2 in record keeping; if designated as a qualified air controller, additional credit in air traffic control on the basis of institutional evaluation (12/76).

Recommendation, OSCS

(RDCS) In the vocational certificate category, the recommendation is the same as that for OS1 (RD1). In the lower-division baccalaureate/associate degree category, 3 semester hours in seamanship, 3 in basic electronics, 3 in coastwise navigation and piloting (radar navigation), 3 in personnel supervision, 3 for field experience in management, 3 in management electives, and 2 in record keeping; if designated as a qualified air controller, additional credit in air traffic control on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours for a practicum in management and additional credit in human relations on the basis of institutional evaluation (12/76).

Recommendation, OSCM

(RDCM) In the vocational certificate category, the recommendation is the same as that for OS1 (RD1). In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for OSCS. In the upper-division baccalaureate category, 6 semester hours for a practicum in management, 3 in management problems, and 3 in personnel management, and additonal credit in human relations on the basis of institutional evaluation (12/76).

NER-OT-001

OCEAN SYSTEMS TECHNICIAN

OT3
OT2
OT1
OTC
OTCS
OTCM

Exhibit Dates: 6/71-8/84.

Occupational Field: 10 (Sensor Operations).

Career Pattern

SN: Seaman. *OT3:* Ocean Systems Technician, Third Class (E-4). *OT2:* Ocean Systems Technician, Second Class (E-5). *OT1:* Ocean Systems Technician, First Class (E-6). *OTC:* Chief Ocean Systems Technician (E-7). *OTCS:* Senior Chief Ocean Systems Technician (E-8). *OTCM:* Master Chief Ocean Systems Technician (E-9).

Description

NOTE: Ocean Systems Technicians follow either the OPERATIONS track or the TECHNICIAN track. Operators are identified by the following NEC's: OT-611, Improved SOSUS Operator/Analyst; OT-0612, SOSUS Operator/Analyst; OT-0613, TASS Operator/Analyst; or OT-0614, SURTASS Operator/Analyst. Technicians are identified by the following NEC's: OT00622, Ocean Systems Maintenance; OT-0623, TASS Maintenance Technician; OT-0624 SURTASS Maintenance Technician; or OT-0625, SOSUS ADP Maintenance Technician. NOTE: Many of the required duties for this rating involve classified materials, equipment, and activities; therefore, not all the competencies and knowledges associated with the rating were evaluated. *Summary:* (Operations Track) Collects oceanographic data on the underwater acoustical signals; processes this information for automatic data processing and forwards information to superiors; has knowledge of basic oceanography, underwater acoustics, sonar systems, and computer data input. *OT3:* (Operations) Analyzes various acoustic displays and converts displayed information into a format acceptable for computer input; has knowledge about the operation of computer systems. *OT2:* (Operations) Able to perform the duties required for OT3; performs plotting and navigation tasks; has knowledge of a variety of acoustic signal processors designed to collect data on underwater sound. *OT1:* (Operations) Able to perform the duties required for OT2; trains and supervises lower-level personnel; serves as watch coordinator, directing and supervising the performance of 420 personnel in the watch section. *OTC:* (Operations) Able to perform the duties required for OT1, supervises the training of personnel in the operation of underwater acoustic equipment and in the gathering and processing of oceanographic data. *OTCS:* (Operations) Able to perform the duties required for OTC, prepares correspondence and written instructions; organizes, schedules, and evaluates training programs; implements a program for evaluating and assigning personnel. *OTCM:* (Operations) Able to perform the duties required for OTCS, performs operational administrative functions; establishes objectives and sets priorities; plans and organizes activities to achieve objectives, develops budgets and monitors expenditures; serves as technical advisor for operations. *Summary:* (Maintenance Track): Performs preventive maintenance, troubleshooting, and repair of all operational systems (containing both analog and digital equipment, including digital computers) used by Ocean Systems Technicians. *OT3:* (Maintenance) Repairs and performs maintenance on several operational systems; uses basic test equipment, schematics, and instruction manuals to troubleshoot electronic equipment. *OT2:* (Maintenance) Able to perform the duties required for OT3, repairs and performs maintenance on additional operational systems; solves more complex troubleshooting problems; works with digital equipment and computers. *OT1:* (Maintenance) Able to perform the duties required for OT2; has acquired extensive background in the maintenance and repair of the operational systems; solves difficult nonroutine troubleshooting problems; supervises the maintenance and repair of oceanographic/acoustic equipment. *OTC:* (Maintenance) Able to perform the duties required for OT1; supervises the training of personnel in the maintenance and repair of oceanographic/acoustic equipment; administers a maintenance and repair program. *OTCS:* (Maintenance) Able to perform the duties required for OTC; prepares written instructions and correspondence; organizes, schedules, and evaluates training program; develops and implements a program for evaluating and assigning personnel. *OTCM:* (Maintenance) Able to perform the duties required for OTCS; performs technical administrative functions; establishes objectives and goals; plans, organizes, and controls activities to achieve objectives; serves as a technical advisor in the maintenance area; develops budgets and monitors expenditures.

Recommendation, OT3

OPERATIONS: In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to data processing and credit in oceanography on the basis of institutional evaluation. MAINTENANCE: In the vocational certificate category, 2 semester hours in applied mathematics, 3 in basic electronics, 4 in circuit theory, 3 in system maintenance, 3 in digital electronics, 2 in microprocessors, and 1 in computer organization. In the lower-division baccalaureate/associate degree category, 2 semester hours in applied mathematics, 3 in basic electronics, 3 in circuit theory, 2 in systems maintenance, 3 in digital electronics, 2 in microprocessors, and 1 in computer organization (6/81).

Recommendation, OT2

OPERATIONS: In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to data processing and credit in oceanography on the basis of institutional evaluation. MAINTENANCE: In the vocational certificate category, 2 semester hours in applied mathematics, 3 in basic electronics, 4 in circuit theory, 5 in system maintenance, 3 in digital electronics, 2 in microprocessors, and 2 in computer organization. In the lower-division baccalaureate/associate degree category, 2 semester hours in applied mathematics, 3 in basic electronics, 3 in circuit theory, 4 in system maintenance, 3 in digital electronics, 2 in microprocessors, and 2 in computer organization (6/81).

Recommendation, OT1

OPERATIONS: In the vocational certificate category, 3 semester hours in introduction to data processing and credit in oceanography on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to data processing, 2 in personnel supervision, 3 in human relations, and credit in oceanography on the basis of institutional evaluation. MAINTENANCE: In the vocational certificate category, 2 semester hours in applied mathematics, 3 in basic electronics, 4 in circuit theory, 6 in system maintenance, 3 in digital electronics, 2 in microprocessors, and 3 in computer organization. In the lower-division baccalaureate/associate degree category, 2 semester hours in applied mathematics, 3 in basic electronics, 3 in circuit theory, 5 in system maintenance, 3 in digital electronics, 2 in microprocessors, 3 in computer organization, 2 in personnel supervision, 2 in maintenance management, and 3 in human relations (6/81).

Recommendation, OTC

OPERATIONS: In the vocational certificate category, 3 semester hours in introduction to data processing and credit in oceanography on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to data processing, 3 in personnel supervision, 3 in human relations, and credit in oceanography on the basis of institutional evaluation. MAINTENANCE: In the vocational certificate category, the recommendation is the same as that for OT1. In the lower-division baccalaureate/associate degree category, 2 semester hours in applied mathematics, 3 in basic electronics, 3 in circuit theory, 5 in system maintenance, 3 in digital electronics, 2 in microprocessors, 3 in computer organization, 3 in personnel supervision, 3 in maintenance management, and 3 in human relations (6/81).

Recommendation, OTCS

OPERATIONS AND MAINTENANCE: In the vocational certificate category or in the lower-division baccalaureate/associate degree category, the recommendation is the same as that for OTC. In the upper-division baccalaureate category, 3 semester hours for field experience in management, 3 in personnel management, and 3 in management problems (6/81).

Recommendation, OTCM

OPERATIONS and MAINTENANCE: In the vocational certificate category or in the lower-division baccalaureate/associate degree category, the recommendation is the same as that for OTC. In the upper-division baccalaureate category, 6 semester hours for field experience in management, 3 in personnel management, and 3 in management problems (6/81).

NER-OT-002

Ocean Systems Technician, Master Chief

OTCM

Exhibit Dates: 9/84–Present.

Occupational Field: 10 (Sensor Operations).

Career Pattern

May progress to OTCM, Master Chief Ocean Systems Technician (E-9), from either OTACS, Senior Chief Ocean Systems Technician, Analyst (E-8), or OTMCS, Senior Chief Ocean Systems Technician, Maintainer (E-8).

Description

Able to perform the duties required for OTACS, Senior Chief Ocean Systems Technician, Analyst, or OTMCS, Senior Chief Ocean Systems Technician, Maintainer; performs technical and operational administrative functions; establishes objectives and goals; plans, organizes, and controls activities to achieve objectives; serves as a technical advisor in the maintenance and operations areas; develops budgets and monitors expenditures.

Recommendation, OTCM

In the lower-division baccalaureate/associate degree category, if the individual progressed to OTCM from OTACS, Senior Chief Ocean Systems Technician, Analyst, grant the credit for OTACS in exhibit NER-OTA-001; if the individual progressed from OTMCS, Senior Chief Ocean Systems Technician, Maintainer, grant the credit for OTMCS in exhibit NER-OTM-001. In the upper-division baccalaureate category, 6 semester hours for field experience in management, 3 in personnel management, and 3 in management problems (10/85).

NER-OTA-001

Ocean Systems Technician, Analyst

OTA3
OTA2
OTA1
OTAC
OTACS

Exhibit Dates: 9/84–Present.

Occupational Field: 10 (Sensor Operations).

Career Pattern

SN: Seaman. *OTA3:* Ocean Systems Technician, Analyst, Third Class (E-4). *OTA2:* Ocean Systems Technician, Analyst, Second Class (E-5). *OTA1:* Ocean Systems Technician, Analyst, First Class (E-6). *OTAC:* Chief Ocean Systems Technician, Analyst (E-7). *OTACS:* Senior Chief Ocean Systems Technician, Analyst (E-8). *OTCM:* Master Chief Ocean Systems Technician (E-9).

Description

Summary: Collects oceanographic data on underwater acoustical signals; processes this information for automatic data processing and forwards information to superiors; has knowledge of basic oceanography, underwater acoustics, sonar systems, and computer data input. *OTA3:* Analyzes various acoustic displays and converts displayed information into a format acceptable for computer inputs; has knowledge about the operation of computer systems. *OTA2:* Able to perform the duties required for OTA3; performs plotting and navigation tasks; has knowledge of a variety of acoustic signal processors designed to collect data on underwater sound. *OTA1:* Able to perform the duties required for OTA2; trains and supervises lower-level personnel; serves as watch coordinator, directing and supervising the performance of 420 personnel in the watch section. *OTAC:* Able to perform the duties required for OTA1; supervises the training of personnel in the operation of underwater acoustic equipment and in the gathering and processing of oceanographic data. *OTACS:* Able to perform the duties required for OTAC; prepares correspondence and written inspections; organizes schedules and evaluates training programs; implements a program for evaluating and assigning personnel.

Recommendation, OTA3

In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to data processing and credit in oceanography on the basis of institutional evaluation (10/85).

Recommendation, OTA2

In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to data processing and credit in oceanography on the basis of institutional evaluation (10/85).

Recommendation, OTA1

In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to data processing, 3 in personnel supervision, 2 in introduction to management, and credit in oceanography on the basis of institutional evaluation (10/85).

Recommendation, OTAC

In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to data processing, 3 in personnel supervision, 3 in introduction to management, and credit in oceanography on the basis of institutional evaluation (10/85).

Recommendation, OTACS

In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to data processing, 3 in personnel supervision, 3 in introduction to management, and credit in oceanography on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours for field experience in management, 3 in personnel management, and 3 in management problems (10/85).

NER-OTM-001

Ocean Systems Technician, Maintainer

OTM3
OTM2
OTM1
OTMC
OTMCS

Exhibit Dates: 9/84–Present.

Occupational Field: 10 (Sensor Operations).

Career Pattern

SN: Seaman. *OTM3:* Ocean Systems Technician, Maintainer, Third Class (E-4). *OTM2:* Ocean Systems Technician, Maintainer, Second Class (E-5). *OTM1:* Ocean Systems Technician, Maintainer, First Class (E-6). *OTMC:* Chief Ocean Systems Technician, Maintainer (E-7). *OTMCS:* Senior Chief Ocean Systems Technician, Maintainer (E-8). *OTCM:* Master Chief Ocean Systems Technician (E-9).

Description

Summary: Performs preventive maintenance, troubleshooting, and repair of all operational systems (containing both analog and digital equipment, including digital computer) used by Ocean Systems Technicians. *OTM3:* Repairs and performs maintenance on several operational systems; uses basis test equipment, schematics, and instruction manuals to troubleshoot electronic equipment. *OTM2:* Able to perform the duties required for OTM3; repairs and performs maintenance on additional operational systems; solves more complex troubleshooting problems; works with digital equipment and computers. *OTM1:* Able to perform the duties required for OTM2; has acquired extensive background in the maintenance and repair of the operational systems; solves difficult nonroutine troubleshooting problems; supervises the maintenance and repair of oceanographic/acoustic equipment. *OTMC:* Able to perform the duties required for OTM1; supervises the training of personnel in the maintenance and repair of oceanographic/acoustic equipment; administers a maintenance and repair program. *OTMCS:* Able to perform the duties required for OTMC; prepares written instructions and correspondence; organizes, schedules, and evaluates training program; develops and implements a program for evaluating and assigning personnel.

Recommendation, OTM3

In the lower-division baccalaureate/associate degree category, 2 semester hours in applied mathematics, 2 in basic electronics, 3 in circuit theory, 2 in systems maintenance, 3 in digital electronics, 2 in microprocessors, and 2 in computer organization (10/85).

Recommendation, OTM2

In the lower-division baccalaureate/associate degree category, 2 semester hours in applied mathematics, 2 in basic electronics, 3 in circuit theory, 4 in systems maintenance, 3 in digital electronics, 3 in microprocessors, and 2 in computer organization (10/85).

Recommendation, OTM1

In the lower-division baccalaureate/associate degree category, 2 semester hours in applied mathematics, 2 in basic electronics, 3 in circuit theory, 5 in systems maintenance, 3 in digital electronics, 3 in microprocessors, 3 in computer organization, 3 in personnel supervision, 2 in maintenance management, and 2 in introduction to management (10/85).

Recommendation, OTMC

In the lower-division baccalaureate/associate degree category, 2 semester hours in applied mathematics, 2 in basic electronics, 3 in circuit theory, 5 in systems maintenance, 3 in digital electronics, 3 in microprocessors, 3 in computer organization, 3 in personnel supervision, 3 in maintenance management, and 3 in introduction to management (10/85).

Recommendation, OTMCS

In the lower-division baccalaureate/associate degree category, 2 semester hours in applied mathematics, 2 in basic electronics, 3 in circuit theory, 5 in systems maintenance, 3 in digital electronics, 3 in microprocessors, 3 in computer organization, 3 in personnel supervision, 3 in maintenance management, and 3 in introduction to management. In the upper-division baccalaureate category, 3 semester hours for field experience in management, 3 in personnel management, and 3 in management problems (10/85).

NER-PC-001

Postal Clerk

PC3
PC2
PC1
PCC
PCCS
PCCM

Exhibit Dates: 6/72–12/87.

Occupational Field: 15 (Administration).

Career Pattern

SN: Seaman (E-3). *PC3:* Postal Clerk Third Class (E-4). *PC2:* Postal Clerk Second Class (E-5). *PC1:* Postal Clerk First Class (E-6). *PCC:* Chief Postal Clerk (E-7). *PCCS:* Senior Chief Postal Clerk (E-8). *PCCM:* Master Chief Postal Clerk (E-9).

Description

Summary: Operates Navy post office. *PC3:* Performs postal counterwork, including selling stamps, processing international money orders, and collecting and remitting COD charges; performs general clerical duties, including mail sorting and distribution, and record maintenance; able to type 20 words per minute. *PC2:* Able to perform the duties required for PC3; establishes mail transportation schedules and routes; supervises and trains personnel in the operation of a Navy post office; supervises preparation, maintenance, and distribution of local postal records and reports. *PC1:* Able to perform the duties required for PC2; audits and reviews inspection reports of Navy post offices; prepares parent office reports; able to assume the duties, responsibilities, and functions of a postal officer when necessary. *PCC:* Able to perform the duties required for PC1; supervises postal counter and sorting activities; ensures compliance with customs procedures; supervises postal office procedures. *PCCS:* Able to perform the duties required for PCC; conducts inspections of Navy post offices and develops recommendations for the improvement of postal operations; prepares correspondence; develops evaluation programs dealing with personnel and management efficiency. *PCCM:* Able to perform the duties required for PCCS; develops and monitors operating budgets; forecasts future manpower and material requirements; develops basic plans for implementing policy statements and directives; establishes goals, objectives, and priorities in own area of responsibility.

Recommendation, PC3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in mail processing and 2 in postal customer services (12/76).

Recommendation, PC2

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 2 semester hours in record keeping, 2 in postal customer services, 3 in postal delivery and collection, and 4 in mail processing (12/76).

Recommendation, PC1

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 2 semester hours in record keeping, 3 in general clerical procedures, 3 in postal customer services, 3 in postal delivery and collection, and 6 in mail processing (12/76).

Recommendation, PCC

In the vocational certificate category, 2 semester hours in record keeping, 3 in general clerical procedures, 3 in postal customer services, 3 in postal delivery and collection, 6 in mail processing, and 2 in postal problems analysis. In the lower-division baccalaureate/associate degree category, 2 semester hours in record keeping, 3 in general clerical procedures, 3 in personnel supervision, 3 in postal customer services, 3 in postal delivery and collection, 6 in mail processing, and 2 in postal problems analysis, and additional credit for field experience in management on the basis of institutional evaluation (12/76).

Recommendation, PCCS

In the vocational certificate category, the recommendation is the same as that for PCC. In the lower-division baccalaureate/associate degree category, 2 semester hours in record keeping, 3 in general clerical procedures, 3 in personnel supervision, 3 in office management, 3 in communication (written), 3 in postal customer services, 3 in postal delivery and collection, 6 in mail processing, and 2 in postal problems analysis, and additional credit for field experience in management on the basis of institutional evaluation. In the upper-division baccalaureate category, credit in human relations and for a practicum in management on the basis of institutional evaluation (12/76).

Recommendation, PCCM

In the vocational certificate category, the recommendation is the same as that for PCC. In the lower-division baccalaureate/associate degree category, 2 semester hours in record keeping, 3 in general clerical procedures, 3 in personnel supervision, 3 in office management, 3 in communication (written), 3 for management electives, 3 in postal customer services, 3 in postal delivery and collection, 6 in mail processing, and 2 in postal problems analysis, and additional credit for field experience in management on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours in management problems, and additional credit in human relations, in personnel management, and for a practicum in management on the basis of institutional evaluation (12/76).

PCC
PCCS
PCCM

Exhibit Dates: 1/88–Present.

Occupational Field: 15 (Administration).

Career Pattern

SN: Seaman (E-3). *PC3:* Postal Clerk, Third Class (E-4). *PC2:* Postal Clerk, Second Class (E-5). *PC1:* Postal Clerk, First Class (E-6). *PCC:* Chief Postal Clerk (E-7). *PCCS:* Senior Chief Postal Clerk (E-8). *PCCM:* Master Chief Postal Clerk (E-9).

Description

Summary: Operates Navy post office. *PC3:* Performs postal counterwork, including selling stamps, processing international money orders, and collecting and remitting COD charges; performs general clerical duties, including mail sorting and distribution, and record maintenance; advises personnel on packaging and preparation of customs declarations; able to type 20 words per minute. *PC2:* Able to perform the duties required for PC3; establishes mail transportation schedules and routes; supervises and trains personnel in the operation of a Navy post office; supervises preparation, maintenance, and distribution of local postal records and reports. *PC1:* Able to perform the duties required for PC2; audits and reviews inspection reports of Navy post offices; prepares parent office reports; collects and remits postage meter funds; able to assume the duties, responsibilities, and functions of a postal officer when necessary. *PCC:* Able to perform the duties required for PC1; supervises postal counter and sorting activities; ensures compliance with customs procedures; audits Navy post offices; supervises postal office procedures in a large Navy post office. *PCCS:* Able to perform the duties required for PCC; conducts inspections of Navy post offices and develops recommendations for the improvement of postal operations; prepares correspondence; develops evaluation programs dealing with personnel and management efficiency; conduct work simplification and efficiency analysis. *PCCM:* Able to perform the duties required for PCCS; develops and monitors operating budgets; forecasts future manpower and material requirements; develops basic plans for implementing policy statements and directives; establishes goals, objectives, and priorities in own area of responsibility; develops operating budget and monitors expenditures; develops transportation plans for mail routing in bulk.

Recommendation, PC3

In the lower-division baccalaureate/associate degree category, 1 semester hour in keyboarding, 2 in interpersonal communications or postal customer services, and 3 in postal practices and procedures (3/90).

Recommendation, PC2

In the lower-division baccalaureate/associate degree category, 1 semester hour in keyboarding, 2 in interpersonal communications or postal customer services, 4 in postal practices and procedures, and 3 in postal delivery and collection (3/90).

Recommendation, PC1

In the lower-division baccalaureate/associate degree category, 1 semester hour in keyboarding, 3 in interpersonal communications or postal customer services, 6 in postal practices and procedures, 3 in postal delivery and collection, 2 in recordkeeping, and 3 in clerical procedures. In the upper-division baccalaureate category, 2 semester hours in logistics management (3/90).

Recommendation, PCC

In the lower-division baccalaureate/associate degree category, 1 semester hour in keyboarding, 3 in interpersonal communications or postal customer services, 6 in postal practices and procedures, 3 in postal delivery and collection, 2 in recordkeeping, 3 in clerical procedures, 3 in principles of supervision, and 3 in postal problems analysis. In the upper-division baccalaureate category, 3 semester hours in logistics management (3/90).

Recommendation, PCCS

In the lower-division baccalaureate/associate degree category, 1 semester hour in keyboarding, 3 in interpersonal communications or postal customer services, 6 in postal practices and procedures, 3 in postal delivery and collection, 2 in recordkeeping, 3 in clerical procedures, 3 in principles of supervision, 3 in postal problems analysis, and 2 in technical writing. In the upper-division baccalaureate category, 3 semester hours in management problems and 3 in logistics management (3/90).

Recommendation, PCCM

In the lower-division baccalaureate/associate degree category, 1 semester hour in keyboarding, 3 in interpersonal communications or postal customer services, 6 in postal practices and procedures, 3 in postal delivery and collection, 2 in recordkeeping, 3 in clerical procedures, 3 principles of supervision, 3 in postal problems analysis, and 3 in technical writing. In the upper-division baccalaureate category, 3 semester hours in management problems and 3 in logistics management (3/90).

NER-PH-001

Photographer's Mate

PH3
PH2
PH1
PHC
PHCS
PHCM

Exhibit Dates: 6/71–Present.

Occupational Field: 17 (Media).

Career Pattern

AN: Airman (E-3). *PH3:* Photographer's Mate Third Class (E-4). *PH2:* Photographer's Mate Second Class (E-5). *PH1:* Photographer's Mate First Class (E-6). *PHC:* Chief Photographer's Mate (E-7). *PHCS:* Senior Chief Photographer's Mate (E-8). *PHCM:* Master Chief Photographer's Mate (E-9).

Description

Summary: Makes pictorial records of historical and newsworthy events, finished prints, strip photographs, and mosaics; maintains photographic equipment and accessories. *PH3:* Operates 16-mm silent motion picture cameras, 4' x 5' press cameras, copy cameras, view cameras, 2 1/2' format roll film cameras, 35-mm rangefinder-equipped still cameras, 35-mm single-lens-reflex cameras, contact printers, black-and white projection printers, sensitometers, densitometers, color projection printers, color analyzers, exposure meters, and automatic processing machine; photographs small metal parts, architectural structures, persons (formal and informal portraits), and interior and and exterior scenes; processes the following: black-and-white transparencies from black-and white continuous tone originals, high contract transparencies from black-and-white line originals; black-and-white transparencies from multicolored originals; high-contrast black-and-white transparencies from color line originals; color transparencies maintaining the density and color balance of original; sheet and roll film to negatives and affixes identification information; black-and-white negatives from multicolored orginals to show complete separation of the colors as tones; black-and-white contact prints from selected negatives; black-and white projection prints from negatives with variable contrast paper and the correct printing filters; and color corrected prints (custom prints) from color negatives; uses painted light techniques, filters, natural lighting, light enhancement techniques, photoflash techniques, stop motion techniques, selective focus techniques, and basic lighting arrangement; produces prints from copy negatives to show complete separation of the colors as tones; prepares stock/working solutions from prepackaged materials; prepares print rooms for printing black-and white negatives; observes copyright and reproduction regulations; performs operator maintenance on photographic equipment and accessories; performs weekly and monthly maintenance on automatic processing machines. *PH2:* Able to perform the duties required for PH3; operates and maintains portable TV cameras and portable video tape recorders; photographs the interiors of large structures, harbor and port facilities, ships, aircraft, and terrain; processes second-generation black-and-white negatives and large format (16' x 20' minimum) black-and-white, double weight prints; uses motion picture scene-sequencing technique, motion picture editing techniques (silent motion picture film), broad-, short-, and side-lighting techniques, subject posing techniques, and background selection techniques; selects equipment, scale, and coverage for hand-held aerial photographs; establishes master filter packs for printing color negatives; orders standard stock items. *PH1:* Able to perform the duties required for PH2; prepares storyboards for use in producing silent motion pictures; prepares slide presentations with taped narrative; use TV spot news motion picture coverage techniques and motion picture editing techniques; photographs cathode ray tube imager for recording and image retrieval/interpretation; evaluates control charts to determine trends, shifts, and cycles and monitors process control; prepares duplicate negatives and positives from original film for image interpretation; supervises operator maintenance or photographic equipment and accessories; supervises photographic work center. *PHC:* Able to perform the duties required for PH1; provides silent motion picture film for release to television stations for news shows; plans missions for hand-held aerial photographic coverage; supervises maintenance of photographic files and records; ensures that forwarding and releasing deadline requirements are met; schedules maintenance of photographic equipment and accessories and maintains history cards; procures non-standard stock item. *PHCS:* Able to perform the duties required for PHC; ensures compliance with copyright and reproduction regulations; prepares local directives and instructions; prepares correspondence; interviews, assigns, and evaluates personnel to assure maximum utilization; organizes, schedules, and evaluates training programs; determines photographic equipment and supply requirements and coordinates procurement. *PHCM:* Able to perform the duties required for *PHCS;:* reviews manpower authorizations; reviews personnel, equipment, and material requirements and forcasts future needs; establishes goals and sets priorities; develops operating budgets and monitors expenditures.

Recommendation, PH3

In the vocational certificate category, 6 semester hours in camera and accessories operation, 6 in photography techniques, and 6 in photo processing. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic photography, 2 in camera techniques, 2 in darkroom techniques, 2 for an internship in photography/cinema, and 1 in color photography (2/77).

Recommendation, PH2

In the vocational certificate category, the recommendation is the same as that for PH3. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic photography, 3 in camera techniques, 3 in darkroom techniques, 2 in film production, 2 for an internship in photography/cinema, 1 in portraiture, and 1 in color photography (2/77).

Recommendation, PH1

In the vocational certificate category, the recommendation is the same as that for PH3. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic photography, 3 in camera techniques, 3 in darkroom techniques, 3 in film production, 3 for an internship in photography/cinema, 1 in portraiture, 1 in color photography, 1 in technical photography, and 1 in personnel supervision (2/77).

Recommendation, PHC

In the vocational certificate category, the recommendation is the same as that for PH3. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic photography, 3 in camera techniques, 3 in darkroom techniques, 3 in film production, 3 for an internship in photography/cinema, 2 in technical photography, 2 in personnel supervision, 1 in maintenance management, 1 in portraiture, and 1 in color photography (2/77).

Recommendation, PHCS

In the vocational certificate category, the recommendation is the same as that for PH3. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic photography, 3 in camera techniques, 3 in darkroom techniques, 3 in film production, 3 for an internship in photography/cinema, 3 in personnel supervision, 2 in technical photography, 2 in maintenance management, 1 in portraiture, and 1 in color photography (2/77).

Recommendation, PHCM

In the vocational certificate category, the recommendation is the same as that for PH3. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for PHCS. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in organization and planning (2/77).

NER-PI-001

Precision Instrumentman, Master Chief

PICM

Exhibit Dates: 6/71–12/89.

Occupational Field: 4 (Ship Maintenance).

Career Pattern

May progress from either IMCS, Senior Chief Instrumentman (E-8) or OMCS, Senior Chief Opticalman (E-8). *PICM:* Master Chief Precision Instrumentman (E-9).

Description

Able to perform the duties required for IMCS (Senior Chief Instrumentman) or OMCS (Senior Chief Opticalman); develops procedures for conducting safety programs and monitoring compliance; plans, organizes, implements, and controls activities in accordance with policies and directives; forcasts future requirements; establishes goals, objectives, and priorities; reviews personnel, equipment, and material requirements; assists in the management of records; coordinates liaison between repair activities and ship or shipyard; manages repair division; schedules repair work; develops operating budgets and monitors expenditures.

Recommendation

In the vocational certificate category, the recommendation is the same as that for either IM1 (Instrumentman, First Class) in exhibit NER-IM-001 or OM1 (Opticalman, First Class) in exhibit NER-OM-001, as appropriate. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for either IMCS (Senior Chief Instrumentman) in exhibit NER-IM-001 or OMCS (Senior Chief Opticalman) in exhibit NER-OM-001, as appropriate. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 3 in management problems (12/78).

NER-PI-002

PERCISION INSTRUMENTMAN, MASTER CHIEF

PICM

Exhibit Dates: 1/90–12/90. (Effective 1/91, PICM was discontinued and its duties were incorporated into Senior Chief Opticalman (NER-OM-003) and Senior Chief Instrumentman (NER-IM-003)).

Occupational Field: 4 (Ship Maintenance).

Career Pattern

May progress from either IMCS, Senior Chief Instrumentman (E-8) or OMCS, Senior Chief Opticalman (E-8). *PICM:* Master Chief Precision Instrumentman (E-9).

Description

Able to perform the duties required for IMCS (Senior Chief Instrumentman) or OMCS (Senior Chief Instrumentman) or OMCS (Senior Chief Opticalman); develops procedures for conducting safety programs and monitoring compliance; plans, organizes, implements, and controls activities in accordance with policies and directives; forecasts future requirements; establishes goals, objectives, and priorities; reviews personnel, equipment, and material requirements; assists in the management of records; coordinates liaison between repair activities and ship or shipyard; manages repair division; schedules repair work; develops operating budgets and monitors expenditures.

Recommendation

In the vocational certificate category, if progressed from Instrumentman, use the credit recommended for IMCS in exhibit NER-IM-002. In the lower-division baccalaureate/associate degree category, if progressed from Instrumentman, use the credit recommended for IMCS in exhibit NER-IM-002; if progressed from Opticalman, use the credit recommende for OMCS in exhibit NER-OM-002. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 3 in management problems (3/90).

NER-PM-001

PATTERNMAKER

PM3
PM2
PM1
PMC

Exhibit Dates: 6/71–12/89.

Occupational Field: 4 (Ship Maintenance).

Career Pattern

FN: Fireman (E-3). *PM3:* Patternmaker Third Class (E-4). *PM2:* Patternmaker Second Class (E-5). *PM1:* Patternmaker First Class (E-6). *PMC:* Chief Patternmaker (E-7). *MLCS:* Senior Chief Molder (E-8). *MLCM:* Master Chief Molder (E-9).

Description

Summary: Makes wooden, plaster, and metal patterns, core boxes, and flasks used by molders in a Navy foundry. *PM3:* Works from shop drawings and sketches to fabricate simple templates; lays out and constructs (using shrinkage rule) simple one-piece patterns; applies standard color-code finishes; positions and mounts patterns on match boards (flat and irregular parting surfaces); identifies patternmaking woods; computes board feet of lumber; uses wood fillers; identifies glues by characteristics and uses; identifies ferrous and non-ferrours metal by chip and file test; uses and cares for pyrometers and hand tools; maintains shop files. *PM2:* Able to perform the duties required for PM3; prepares sketches from mechanical drawings; fabricates layouts from mechanical drawings, feehand sketches, and castings; constructs layout of developments and cuts templates for intersection of two cylinders and constructs master patterns and patterns used for composite casting; constructs molds using flexible molding compounds; uses principles of mold construction and foundry methods for parting core arrangement, and drawing patterns from molds; designs and constructs flasks for patterns; lays out and constructs patterns and coreboxes for flanged fittings, spool patterns, elbow patterns, handwheel, pulley, shipboard standard billets, pump castings, impellers, globe valves, gate valves, steam chests, manifolds, and louvered and jacketed end-bells; identifies lumber structure and cuts, and effects of shrinkage, swelling and warping; records measurements; computes areas, volumes, weights, and quantities of lumber for patterns; designs and manufactures labor-saving devices; completes maintenance reports. *PM1:* Able to perform the duties required for PM2; constructs patterns for carbon dioxide molding process; lays out and constructs patterns for conical stave constructed patterns and for volute pump castings; constructs patterns requiring intercasting of members; constructs intricate gypsum cement patterns and core boxes; lays out and constructs patterns and core boxes for double action impellers, and spur, bevel, and worn gear blanks; manufactures patterns using plastic materials; constructs tensile test coupon patterns with gating system and risers attached; designs and uses pattern padding required for control of solidification; determines need for and constructs full core boxes for one-piece cores; determines requirements for and constructs proper gating system attached to patterns; prepares maintenance schedules. *PMC:* Able to perform the duties required for PM1; estimates cost for patternmaking jobs; prepares and maintains records and reports required for repair department; solves problems of casting design; applies principles of mold construction and foundry methods for minimizing stresses, strains, and hot spots by using chills, risers, and fillets; controls shrinkage by the use of chills, risers and pods; conducts on-the-job-training; supervises and trains personnel in the design, construction, layout, and manufacture of patterns, in identifying metals, and in the use of immersion and optical pyrometers; prepares quarterly maintenance schedules.

Recommendation, PM3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in blueprint reading and sketching, 3 in introduction to construction, 1 in machine shop, and 1 in use and care of tools (12/78).

Recommendation, PM2

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in blueprint reading and sketching, 3 in introduction to construction, 1 in machine shop, and 1 in use and care of tools (12/78).

Recommendation, PM1

In the vocational certificate category, 3 semester hours in blueprint reading and sketching, 3 in introduction to construction, 2 in machine shop, and 2 in use and care of tools. In the lower-division baccalaureate/associate degree category, 3 semester hours in blueprint reading and sketching, 3 in introduction to construction, 2 in machine shop, 2 in use and care of tools, and 1 in shop supervision (12/78).

Recommendation, PMC

In the vocational certificate category, the recommendation is the same as that for PM1. In the lower-division baccalaureate/associate degree category, 3 semester hours in blueprint reading and sketching, 3 in introduction to construction, 2 in machine shop, 2 in use and care of tools, 2 in shop supervision, 2 in personnel supervision, 1 in record keeping, and 1 in safety (12/78).

FN: Fireman (E-3). *PM3:* Patternmaker, Third Class (E-4). *PM2:* Patternmaker, Second Class (E-5). *PN1:* Patternmaker, First Class (E-6). *PMC:* Chief Patternmaker (E-7). *PMCS:* Senior Chief Patternmaker (E-8). *PMCM:* Master Chief Patternmaker (E-9).

Description

Summary: Makes wooden, plaster, and metal patterns, core boxes, flasks used by molders in a Navy foundry. *PM3:* Works from shop drawings and sketches to fabricate simple templates; lays out and constructs simple one-piece patterns; applies standard color-code finishes; identifies patternmaking woods; identifies ferrous and non-ferrous metal by chip and files. *PM2:* Able to perform the duties required for PM3; prepares sketches from mechanical drawings; fabricates layouts from mechanical drawings, freehand sketches, and castings; constructs layout of developments and cuts templates, master patterns and patterns used for composite casting; constructs molds; designs and constructs flasks for patterns; lays out and constructs patterns and coreboxes; computes areas, volumes, weights, and quantities of lumber for patterns; designs and manufactures laborsaving devices; completes maintenance reports. *PM1:* Able to perform the duties required for PM2; constructs intricate gypsum cement patterns and coreboxes; manufactures patterns using plastic materials; constructs tensile test coupon patterns with gating system and risers attached; designs and uses pattern padding required for control of solidification; prepares maintenance schedules. *PMC:* Able to perform the duties required for PM1; estimates cost for patternmaking jobs; prepares and maintains records and reports required for repair department; solves problems of casting design; applies principles of mold construction and foundry methods for minimizing stress, strains, and hot spots by using chills, risers, and fillets; controls shrinkage by the use of chills, risers and pods; conducts on-the-job training; supervises and trains personnel in the design, construction, layout, and manufacture of patterns, in identifying metals, and in the use of immersion and optical pyrometers; prepares quarterly maintenance schedules.

Recommendation, PM3

In the lower-division baccalaureate/associate degree category, 1 semester hour in blueprint reading, 1 in mechanical drafting, 1 in woodworking laboratory, 1 in machine tool operation, and 2 in patternmaking (3/90).

Recommendation, PM2

In the lower-division baccalaureate/associate degree category, 2 semester hours in blueprint reading, 2 in mechanical drafting, 2 in woodworking laboratory, 2 in machine tool operation, 4 in patternmaking, 1 in recordkeeping, and 2 in principles of supervision (3/90).

Recommendation, PM1

In the lower-division baccalaureate/associate degree category, 3 semester hours in blueprint reading, 2 in mechanical drafting, 3 in woodworking laboratory, 3 in machine tool operation, 6 in patternmaking, 2 in recordkeeping, and 3 in principles of supervision (3/90).

Recommendation, PMC

In the lower-division baccalaureate/associate degree category, 3 semester hours in blueprint reading, 2 in mechanical drafting, 3 in woodworking laboratory, 3 in machine tool operation, 6 in patternmaking, 2 in recordkeeping, and 4 in principles of supervision. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 1 in management problems (3/90).

Exhibit Dates: 6/71–12/89.

Occupational Field: 21 (Communications).

Career Pattern

SN: Seaman (E-3). *RM3:* Radioman Third Class (E-4). *RM2:* Radioman Second Class (E-5). *RM1:* Radioman First Class (E-6). *RMC:* Chief Radioman (E-7). *RMCS:* Senior Chief Radioman (E-8). *RMCM:* Master Chief Radioman (E-9).

Description

Summary: Transmits, receives, and processes all forms of telecommunications through various transmission media; operates, monitors, and controls telecommunications transmission, reception, terminal and processing equipment. *RM3:* Identifies common electrical and electronic terms and symbols; operates general purpose electronic test equipment; operates and interprets readings of radio frequency power meters and voltage standing wave radio meters; detects intrusion, jamming, and interference; operates broadcast using multichannel system; encodes, decodes, sends, and receives messages; relates reflection, refraction, and ionosphere conditions to radiowave propagation; cleans, lubricates, and inspects equipment; prepares maintenance data forms; uses and maintains handtools. *RM2:* Able to perform the duties required for RM3; operates and interprets reading of tube testers and transistor testers, oscilloscopes, signal generators, counters, and distortion analyzers; supervises handling of telecommunications record traffic; interprets commercial traffic regulation and procedures related to Naval telecommunications; traces messages; complies with search and rescue and international radio procedures; identifies capabilities and limitations of various transmission and receiving systems; identifies composition of a teletype signal; effects operation of assigned communications facilities under simulated emergency conditions; performs operational tests and adjustments of equipment. *RM1:* Able to perform the duties required for RM2; identifies the principles of digital logic; interprets schematics and wiring diagrams; trains and instructs personnel in communications operations and procedures; reviews completed maintenance data forms; maintains records and operating logs; prepares weekly preventive maintenance schedule; identifies the principles of microwave and satellite communications; identifies the principles of modulation, heterodying, and multiplexing. *RMC:* Able to perform the duties required for RM1; organizes and supervises communication centers; prepares operational communications reports; maintains accounting procedures for equipment, inventories, and work flow; organizes duties and assigns tasks; organizes and administers a maintenance and repair program; prepares quarterly schedules of preventive maintenance. *RMCS:* Able to perform the duties required for RMC; prepares technical and administrative reports; prepares directives and instructions for attaining organization and improving operations; prepares correspondence; establishes and implements a program for interviewing, evaluating, and assigning personnel to assure maximum utilization; organizes and schedules training programs; evaluates new equipment; administers a long-range maintenance program. *RMCM:* Able to perform the duties required for RMCS; manages a communications center; forecasts future requirements; develops operating budgets and monitors expenditures.

Recommendation, RM3

In the vocational certificate category, 2 semester hours in electronic communications systems, 3 in basic electronics, and 6 in operation of communications systems. In the lower-division baccalaureate/associate degree category, 2 semester hours in electronic communications systems, 3 in basic electronics, and 4 in operation of communications systems (12/78).

Recommendation, RM2

In the vocational certificate category, 3 semester hours in electronic communications systems, 3 in basic electronics, and 8 in operation of communications systems. In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic communications systems, 3 in basic electronics, and 6 in operation of communications systems (12/78).

Recommendation, RM1

In the vocational certificate category, 4 semester hours in electronic communications systems, 3 in basic electronics, 10 in operation of communications systems, and 1 in record keeping. In the lower-division baccalaureate/associate degree category, 4 semester hours in electronic communications systems, 3 in basic electronics, 8 in operation of communications systems, 3 in human relations, 2 in maintenance management, 2 in personnel supervision, and 1 in record keeping (12/78).

Recommendation, RMC

In the vocational certificate category, the recommendation is the same as that for RM1. In the lower-division baccalaureate/associate degree category, 4 semester hours in electronic communications systems, 3 in basic electronics, 8 in operation of communications systems, 3 in human relations, 3 in maintenance management, 3 in personnel supervision, 1 in report writing, and 1 in record keeping (12/78).

Recommendation, RMCS

In the vocational certificate category, the recommendation is the same as that for RM1. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for RMC. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (12/78).

Recommendation, RMCM

In the vocational certificate category, the recommendation is the same as that for RM1. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for RMC. In the upper-division baccalaureate category 6 semester hours for field experience in management and 3 in management problems (12/78).

Ship's Serviceman

SH3 (SHT3, SHB3, SHL3, SHS3)
SH2
SH1
SHC
SHCS
SHCM

Exhibit Dates: 6/72–12/81.

Occupational Field: 16 (Logistics).

Career Pattern

SN: Seaman (E-3). *SH3:* Ship's Serviceman Third Class (SHT3, Tailor; SHB3, Barber; SHL3, Laundryman; SHS3 Clerk) (E-4). *SH2:* Ship's Serviceman Second Class (E-5). *SH1:* Ship's Serviceman First Class (E-6). *SHC:* Chief Ship's Serviceman (E-7). *SHCS:* Senior Chief Ship's Serviceman (E-8). *SHCM:* Master Chief Ship's Serviceman (E-9).

Description

Summary: Able to operate barber shop, tailor shop, ship's store, laundry, dry-cleaning plant, retail store, soda fountain, and commissary store; able to operate and maintain vending machines and cash register; performs clerical and stock control functions. NOTE: Ship's Servicemen Third Class (SH3) specialize as tailors, barbers, laundrymen/dry cleaners, or store clerks. *SHT3:* Serves as tailor; operates and adjusts sewing machines; sews, performs alterations and minor repair work on garments; presses garments on mechanical steam and electric presses; installs zippers, buttons, and makes buttonholes; attaches service ribbons and badges with even stiches; sets up accounts for retail clothing, receipts, and expenditures; inventories stock; receives tags and logs items for processing. *SHB3:* Serves as barber; cuts hair; schedules appointments; maintains acceptable sanitary and health standards in barber shop; has knowledge of basic first aid; maintains shop equipment; knows medical terminology for hair and scalp diseases and sources of infection. *SHL3:* Serves as laundryman; operates and adjusts all laundry cleaning equipment; has knowledge of safety precautions, operating temperatures, and pressures of laundry equipment; removes stains; has knowledge of washing colored clothing, starching garments, using detergents, soaps, and bleaches; uses flatwork ironer and air-operated presser; has knowledge of water-pollution control; issues and records laundry markings and proper packing for laundry items; schedules laundry and dry-cleaning operations; processes claims for loss of or damage to garments; accounts for receipts and expenditures. *SH3:* Serves as store clerk; performs shipboard and shoreside supply functions; conducts inventories, orders stock, and computes standard markups; uses all memoranda, forms, and vouchers used by the Navy supply corps. *SH2:* Able to perform the duties required for SH3 (Tailor, barber, laundryman, or clerk); able to supervise the laundry, barber shop, or tailor shop; assists superiors on smaller ships without a supply corps officer. *SH1:* Able to perform the duties required for SH2; able to function as supply officer on small ships. *SHC:* Able to perform the duties required for SH1; supervises and assigns duties; order materials, prepares work requests, and audits maintenance programs; serves as a counselor on reenlistment and advancement opportunities; plans physical layouts for sales and service activities; investigates and resolves customer complaints. *SHCS:* Able to perform the duties required for SHC; supervises entire supply department; serves as liaison with other departments and supply corps; organizes and schedules training programs, evaluates effectiveness, and initiates improvements. *SHCM:* Able to perform the duties required for SHCS; serves as the administrator of an entire supply department; supervises up to 70 persons; conducts task analysis; approves procedural changes and modifications; reviews personnel evaluations and performance standards; develops operating budgets and monitors expenditures.

Recommendation, SHT3

(Tailor) In the vocational certificate category, 2 semester hours in record keeping, 3 in beginning tailoring, 3 in applied tailoring techniques (alterations, repairs, buttonholing, braiding), and 3 in small business management for tailors. In the lower-division baccalaureate/associate degree category, 2 semester hours in record keeping, 3 in beginning tailoring, 3 in applied tailoring techniques (alterations, repairs, buttonholing, braiding), 3 in small business management for tailors, and 3 in home economics in tailoring techniques (12/76).

Recommendation, SHB3

(Barber) In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 2 semester hours in record keeping, 2 in small business management for barbers, 3 in barber science (equipment and nomenclature), 3 in barber science II (sanitation, dermatology, hygiene), and 7 in applied barber shop techniques (haircuts, trims) (12/76).

Recommendation, SHL3

(Laundryman) In the vocational certificate category, 2 semester hours in record keeping, 2 in treatment of fabrics (stain removing, spotting, solutions), 3 in laundry equipment operational techniques and repair, 3 in laundry management, and 3 in dry cleaning and pressing. In the lower-division baccalaureate/associate degree category, 2 semester hours in record keeping and 1 in environmental control (water) (12/76).

Recommendation, SHS3

(Clerk) In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 2 semester hours in record keeping and 3 in inventory control (12/76).

Recommendation, SH2

In the vocational certificate category, use the appropriate recommendation for SH3 (tailor, barber, laundryman, or clerk). In the lower-division baccalaureate/associate degree category, use the appropriate recommendation for SH3 (tailor, barber, laundryman, or clerk), plus up to 2 semester hours in personnel supervision on the basis of institutional evaluation (12/76).

Recommendation, SH1

In the vocational certificate category, use the appropriate recommendation for SH3 (tailor, barber, laundryman, or clerk). In the lower-division baccalaureate/associate degree category, use the appropriate recommendation for SH3 (tailor, barber, laundryman, or clerk), plus 3 semester hours in personnel supervision (12/76).

Recommendation, SHC

In the vocational certificate category, use the appropriate recommendation for SH3 (tailor, barber, laundryman, or clerk), plus 1 additional semester hour in record keeping and 3 in retail sales management. In the lower-division baccalaureate/associate degree category, use the appropriate recommendation for SH3 (tailor, barber, laundryman, or clerk), plus 1 additional semester hour in record keeping, 3 in retail sales management, 3 in personnel supervision, and 3 for field experience in management (12/76).

Recommendation, SHCS

In the vocational certificate category, use the appropriate recommendation for SH3 (tailor, barber, laundryman, or clerk), plus 1 additional semester hour in record keeping and 3 in retail sales management. In the lower-division baccalaureate/associate degree category, use the appropriate recommendation for SH3 (tailor, barber, laundryman, or clerk), plus 1 additional semester hour in record keeping, 3 in retail sales management, 3 in personnel supervision, 3 in management electives, and 3 for field experience in management. In the upper-division baccalaureate category, 3 semester hours for a practicum in management, and additional credit in human relations on the basis of institutional evaluation (12/76).

Recommendation, SHCM

In the vocational certificate category, use the appropriate recommendation for SH3 (tailor, barber, laundryman, or clerk), plus 1 additional semester hour in record keeping and 3 in retail sales management. In the lower-division baccalaureate/associate degree category, use the appropriate recommendation for SH3 (tailor, barber, laundryman, or clerk), plus 1 additional semester hour in record keeping, 6 in retail sales management, 3 in personnel supervision, 3 in management electives, and 3 for field experience in management. In the upper-division baccalaureate category, 3 semester hours in management problems, 3 for a practicum in management, and 3 in personnel management, and additional credit in human relations on the basis of institutional evaluation (12/76).

SN: Seaman (E-3). *SK3:* Storekeeper Third Class (E-4). *SK2:* Storekeeper Second Class (E-5). *SK1:* Storekeeper First Class (E-6). *SKC:* Chief Storekeeper (E-7). *SKCS:* Senior Chief Storekeeper (E-8). *SKCM:* Master Chief Storekeeper (E-9).

Description

Summary: Orders, receives, inspects, stores, preserves, packages, ships, and issues materials and cargo; prepares and maintains forms, records, correspondence, reports, and files. *SK3:* Knows the basic organization and functions of supply departments; is familiar with the purpose and use of major components of automated data processing (ADP) equipment and knows common terms used in ADP; operates office machines; types (at 20 words per minute), routes and files forms and messages; maintains files, the requisition log, and budget records; prepares supply-related documents; identifies, receives, stows, and issues materials and stock items; prepares items for shipment; prepares shipment documents; inventories stocked material and installed equipment; operates material-handling equipment. *SK2:* Able to perform the duties required for SK3; establishes and maintains files; knows types, uses, and purposes of appropriations and funds; reconciles financial listings; prepares budget reports; requisitions repair parts, supplies, forms, and publications; supervises working parties handling stores; controls inventory; maintains and interprets reports and records; prepares open purchases documents; applies regulations to maintain the security of materials or documents. *SK1:* Able to perform the duties required for SK2; applies automated supply procedures; prepares correspondence and messages; instructs others in the use of publications and directives; supervises the maintenance of publications; reviews requisitions for non-standard materials; establishes and maintains a technical library; implements and supervises target budgeting procedures; processes bills for payment; identifies sources and uses of funds; effects supply issuance; carries out Navy supply procedures; supervises regular and special inventories. *SKC:* Able to perform the duties required for SK1; monitors outgoing correspondence, shipboard ADP, and management of fleet-controlled material; supervises the receipt of material and administrative storekeeper functions; organizes and supervises internal procedures for inventory management; prepares replenishment data for equipage, repair parts, and consumables and estimates requirements which would exist for voyages of various lengths and under various climatic conditions. *SKCS:* Able to perform the duties required for SKC; analyzes supply reports and evaluates problem areas; supervises on-the-job training programs; utilizes ADP in supply operations; monitors and directs supply functions, including those related to security, financial control, and logistics; prepares local directives and instructions. *SKCM:* Able to perform the duties required for *SKCS;:* plans, organizes, implements, and controls activities in compliance with policy statements, operation orders, and directives; forecasts future requirements; plans and initiates actions to satisfy requirements; establishes goals and priorities; reviews and evaluates personnel, equipment, and material requirements; develops operating budgets and monotors expenditures; plans and develops operational requirements for service markets, supply operations assistance program, sea markets, and storage warehouses.

Recommendation, SK3

In the vocational certificate category, 2 semester hours in office machines, 1 in material handling, and 1 in general clerical procedures. In the lower-division baccalaureate/associate degree category, 2 semester hours in office machines and 1 in general clerical procedures (12/76).

Recommendation, SK2

In the vocational certificate category, 3 semester hours in inventory control, 2 in office machines, 2 in record keeping, 1 in material handling, and 1 in general clerical procedures. In the lower-division baccalaureate/associate degree category, 3 semester hours in inventory control, 2 in office machines, 2 in record keeping, 1 in general clerical procedures, and 1 in personnel supervision (12/76).

Recommendation, SK1

In the vocational certificate category, 3 semester hours in inventory control, 2 in office machines, 2 in record keeping, 2 in general clerical procedures, and 1 in material handling. In the lower-division baccalaureate/associate degree category, 3 semester hours in inventory control, 2 in office machines, 2 in record keeping, 2 in general clerical procedures, 1 in automated record keeping, and 1 in personnel supervision (12/76).

Recommendation, SKC

In the vocational certificate category, the recommendation is the same as that for SK1. In the lower-division baccalaureate/associate degree category, 3 semester hours in inventory control, 3 in communication (written), 2 in office machines, 2 in record keeping, 2 in general clerical procedures, 2 in personnel supervision, and 1 in automated record keeping, and additional credit for field experience in management on the basis of institutional evaluation (12/76).

Recommendation, SKCS

In the vocational certificate category, the recommendation is the same as that for SK1. In the lower-division baccalaureate/associate degree category, 3 semester hours in inventory control, 3 in communication (written), 3 in general clerical procedures, 3 in management electives, 2 in office machines, 2 in personnel supervision, 2 in record keeping, and 1 in automated record keeping, and additional credit for field experience in management on the basis of institutional evaluation. In the upper-division baccalaureate category, credit for a practicum in management and in human relations on the basis of institutional evaluation (12/76).

Recommendation, SKCM

In the vocational certificate category, the recommendation is the same as that for SK1. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for SKCS. In the upper-division baccalaureate category, 3 semester hours in supply management and 3 in management problems, and additional credit for a practicum in management and in human relations on the basis of institutional evaluation (12/76).

Description

Summary: Orders, receives, inspects, stores, preserves, packages, ships, and issues materials and cargo; prepares and maintains forms, records, correspondence, reports, and files. *SK3:* Knows the basic organization and functions of supply departments; is familiar with the purpose and use of major components of automated data processing (ADP) equipment and knows common terms used in ADP; operates office machines; types (at 20 words per minute), routes and files forms and messages; maintains files, the requistion log, and budget records; prepares supply-related documents; identifies, receives, stows, and issues materials and stock items; prepares items for shipment; prepares shipment documents; inventories stocked material and installed equipment; operates material-handling equipment. *SK2:* Able to perform the duties required for SK3; establishes and maintains files; knows types, uses, and purpose of appropriations and funds; reconciles financial listings; prepares budget reports; requisitions repair parts, supplies, forms, and publications; supervises working parties handling stores; controls inventory using ADP procedures; maintains and interprets reports and records; prepares open purchases documents; applies regulations to maintain the security of materials or documents. *SK1:* Able to perform the duties required for SK2; applies automated supply procedures; prepares correspondence and messages; instructs others in the use of publications and directives; supervises the maintenance of publications; reviews requisitions for nonstandard materials; establishes and maintains a technical library; implements and supervises target budgeting procedures; processes bills for payment; identifies sources and uses of funds; effects supply issuance; carries out Navy supply procedures; supervises regular and special inventories; writes correspondence. *SKC:* Able to perform the duties required for SK1; monitors outgoing correspondence, shipboard ADP, and management of fleet-controlled material; supervises the receipt of material and administrative storekeeper functions; organizes and supervises internal procedures for inventory management; prepares replenishment data for equipage, repair parts, and consumables and estimates requirements which would exist for voyages of various lengths and under various climatic conditions; interviews, supervises, and evaluates personnel. *SKCS:* Able to perform the duties required for SKC; analyzes supply reports and evaluates problem areas; supervises on-the-job training programs; utilizes ADP in supply operations; monitors and directs supply functions, including those related to security, financial control, and logistics; prepares local directives and instructions. *SKCM:* Able to perform the duties required for SKCS; plans, organizes, implements, and controls activities in compliance with policy statements, operation orders, and directives; forecasts future requirements; plans and initiates actions to satisfy requirements; establishes goals and priorities; reviews and evaluates personnel, equipment, and material requirements; develops operationg budgets and monitors expenditures; plans and develops operational requirements for service markets, supply operations assistance program, sea markets, and storage warehouses.

Recommendation, SK3

In the lower-division baccalaureate/associate degree category, 3 semester hours in office machines, 3 in clerical procedures, and 2 in inventory control (3/90).

Recommendation, SK2

In the lower-division baccalaureate/associate degree category, 3 semester hours in office machines, 3 in clerical procedures, 2 in inventory control, 2 in supply management, and 3 in records and information management (3/90).

Recommendation, SK1

In the lower-division baccalaureate/associate degree category, 3 semester hours in office machines, 3 in clerical procedures, 3 in inventory control, 3 in supply management, 3 in records and informaton management, and 3 in business communications (3/90).

Recommendation, SKC

In the lower-division baccalaureate/associate degree category, 3 semester hours in office machines, 3 in clerical procedures, 3 in inventory control, 3 in supply management, 3 in records and information management, 3 in business communications, 3 in office procedures, and 3 in principles of supervision (3/90).

Recommendation, SKCS

In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for SKC. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in logistics management (3/90).

Recommendation, SKCM

In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for SKC. In the upper-division baccalaureate category, 3 semester hours for field experience in management, 3 in logistics management, and 3 in principles of management (3/90).

NER-SM-001

SIGNALMAN

SM3
SM2
SM1
SMC
SMCS
SMCM

Exhibit Dates: 6/71-12/89.

Occupational Field: 1 (General Seamanship).

Career Pattern

SN: Seaman (E-3). *SM3:* Signalman Third Class (E-4). *SM2:* Signalman Second Class (E-5). *SM1:* Signalman First Class (E-6). *SMC:* Chief Signalman (E-7). *SMCS:* Senior Chief Signalman (E-8). *SMCM:* Master Chief Signalman (E-9).

Description

Summary: Sends and receives messages by flashing light, semaphore, and flaghoist; stands watch on the signal bridge; performs lookout duties; encodes and decodes messages; maintains visual signals equipment; recognizes visual aids to navigation, such as beacons and buoys; takes bearings; serves as navigator's assistant. *SM3:* Performs basic seamanship duties; stands watches as a signal operator under way and in port; inventories equipment, performs routine maintenance on optical equipment; uses and recognizes flag, lights, international distress, emergency, and storm warning signals; transmits and receives code groups by flashing lights at 8 words per minute (WPM) and semaphore at 10 WPM; selects and displays flags and pennants; receives, sends, and handles routine message according to precedence; performs duties of a signalman as member of a boatcrew; operates infrared and flashing light equipment; performs routine maintenance of visual signaling equipment. *SM2:* Able to perform the duties required for SM3; maintains visual signal log and visual traffic files; locates ships in local formation diagrams; corrects and maintains signal publications; completes planned maintenance reports; orders repair parts and special tools required for installed equipment maintenance; constructs and uses all visual call signs, international call signs, and task organization call for ship and commands; encodes and decodes naval or international call signs, and task organization call for ship and commands; encodes and decodes naval or international signals contained in effective visual communications publications; carries out disposal and destruction of classified communications materials; ensures that correct methods of transmissions or transportation of classified information and material are followed; transmits and receives code groups by flashing light of 8 WPM, plain language message by flashing light at 10 WPM, and by semaphore at 15 WPM. *SM1:* Able to perform the duties required for SM2; prepares requests for requisition of equipment; prepares visual equipment communications standing orders for signalmen; instructs signal personnel in identification of ship and aircraft, visual communication procedures, naval communications rules, and recognition procedures and codes; prepares weekly schedules of preventive maintenance; maintains inventory files for equipment and consumable goods; administers security classification policies; authenticates authority of the releaser of visual messages; transmits and receives code group by flashing light of 10 WPM, plain language messages by flashing lights at 12 WPM, and by semaphore at 20 WPM. *SMC:* Able to perform the duties required for SM1; prepares quarterly schedules of preventive maintenance; posts changes to ship equipment configuration accounting system; administers command security education programs; performs duties of tactical communications watch officer; supervises visual communications activities; supervises signal bridge personnel. *SMCS:* Able to perform the duties required for SMC; interprets organization and functions of the communications section; provides information and advice on utilization, capability, and reliability of operations in own area of responsibility; prepares correspondence; prepares local directives and instruction concerning organization objectives and improving operations; evaluates and assigns personnel to assure maximum utilization; observes and evaluates visual exercises and drills; organizes and implements communications section of operation orders and plans; organizes, schedules, and evaluates visual communications training programs; administers long-range planned maintenance programs in accordance with Navy maintenance and material managment system; administers command security program. *SMCM:* Able to perform the duties required for SMCS; plans, organizes, and implements activities in compliance with policy statements, operation orders, and directives; forecasts future requirements and plans and initiates action to satisfy requirements in area of responsibility; establishes goals, objectives, and priorities in area of responsibility; reviews personnel, equipment, and material requirements; develops operating budgets and monitors expenditures.

Recommendation, SM3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in seamanship (12/76).

Recommendation, SM2

In the vocational certificate category, 3 semester hours in seamanship and 2 in record keeping; if shore duty assignment was in the area of security, additional credit in law enforcement or police science on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 3 semester hours in seamanship, 2 in record keeping, and 2 in personnel supervision; if shore duty assignment was in the area of security, additional credit in law enforcement or police science on the basis of institutional evaluation. NOTE: Because of the shortage of signalmen, they frequently are assigned to duty positions that are normally assigned to persons in a higher pay grade. Therefore, it is recommended that the duty assignment be considered when decisions regarding the award of credit are made (12/76).

Recommendation, SM1

In the vocational certificate category, 3 semester hours in seamanship and 2 in record keeping; if shore duty assignment was in the area of security, additional credit in law enforcement or police science on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 3 semester hours in seamanship, 2 in record keeping, and 2 in personnel supervision; if shore duty assignment was in the area of security, additional credit in law enforcement or police science on the basis of institutional evaluation. NOTE: Because of the shortage of signalmen, they frequently are assigned to duty positions that are normally assigned to persons in a higher pay grade. Therefore, it is recommended that the duty assignment be considered when decisions regarding the award of credit are made (12/76).

Recommendation, SMC

In the vocational certificate category, the recommendation is the same as that for SM2. In the lower-division baccalaureate/associate degree category, 3 semester hours in seamanship, 3 for field experience in management, 2 in record keeping, and 2 in personnel supervision; if shore duty assignment was in the area of security, additional credit in law enforcement or police science on the basis of institutional evaluation (12/76).

Recommendation, SMCS

In the vocational certificate category, the recommendation is the same as that for SM2. In the lower-division baccalaureate/associate degree category, 3 semester hours in seamanship, 3 for field experience in management, 3 in management electives, 2 in record keeping, and 2 in personnel supervision; if shore duty assignment was in the area of security, additional credit in law enforcement or police science on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours for a practicum in management, and additional credit in human relations on the basis of institutional evaluation (12/76).

Recommendation, SMCM

In the vocational certificate category, the recommendation is the same as that for SM2. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for SMCS. In the upper-division baccalaureate category, 3 semester hours for a practicum in management, 3 in management problems, 2 in personnel management, and additional credit in human relations on the basis of institutional evaluation (12/76).

Exhibit Dates: 1/90–Present.

Occupational Field: 1 (General Seamanship).

Career Pattern

SN: Seaman (E-3). *SM3:* Signalman Third Class (E-4). *SM2:* Signalman Second Class (E-5). *SM1:* Signalman First Class (E-6). *SMC:* Chief Signalman (E-7). *SMCS:* Senior Chief Signalman (E-8). *SMCM:* Master Chief Signalman (E-9).

Description

Summary: Sends and receives messages by flashing light, semaphore, and flaghoist; stands watch on the signal bridge; performs lookout duties; encodes and decodes messages; maintains visual signal equipment; recognizes visual aids to navigation, such as beacons and buoys; takes bearings; serves as navigator's assistant. *SM3:* Performs basic seamanship duties; stands watches as a signal operator under way and in port; inventories equipment; performs routine maintenance on optical equipment; uses and recognizes flag, lights, international distress, emergency, and storm warning signals; transmits and receives code groups by flashing lights at 8 words per minute (wpm) and semaphore at 10 wpm; selects and displays flags and pennants; receives, sends, and handles routine messages according to precedence; performs duties of a signalman as member of a boatcrew; operates infrared and flashing light equipment; performs routine maintenance of visual signaling equipment. *SM2:* Able to perform the duties required for SM3; maintains visual signal log and visual traffic files; locates ships in local formation using formation diagram; corrects and maintains signal publications; completes planned maintenance reports; orders repair parts and special tools required for installed equipment maintenance; constructs and uses all visual call signs, international call signs, and task organization calls for ship and commands; encodes and decodes naval or international signals contained in effective visual communications publications; carries out disposal and destruction of classified communication materials; ensures that correct methods of tramsmissions or transportation of classified information and material are followed; transmits and receives code groups by flashing light of 8 wpm, plain language message by flashing light at 10 wpm, and by semaphore at 15 wpm. *SM1:* Able to perform the duties required for SM2; prepares requests for requisition of equipment; prepares visual equipment communications standing orders for signalmen; instructs signal personnel in identification of ships and aircraft, visual communication procedures, naval communications rules, and recognition procedures and codes; prepares weekly schedules of preventive maintenance; maintains inventory files for equipment and consumable goods; administers security classification policies; authenticates authority of the releaser of visual messages; transmits and receives code group by flashing lights of 10 wpm, plain language messages by flashing lights at 12 wpm, and semaphore at 20 wpm. *SMC:* Able to perform the duties required for SM1; prepares quarterly schedules of preventive maintenance; posts changes to ship equipment configuration accounting system; administers command security education programs; performs duties of tactical communications watch officer; supervises visual communications activities; supervises signal bridge personnel. *SMCS:* Able to perform the duties required for SMC; interprets organization and functions of the communications section; provides information and advice on utilization, capability of operations in own area of responsibility; prepares correspondence; prepares local directives and instruction concerning organization objectives and improving operations; evaluates and assigns personnel to assure maximum utilization; observes and evaluates visual exercises and drills; organizes and implements communications section of operation orders and plans; organizes, schedules, and evaluates visual communications training programs; administers long-range planned maintenance programs in accordance with Navy maintenance and material management system; administers command security program. *SMCM:* Able to perform the duties required for SMCS; plans, organizes, and implements activities in compliance with policy statements, operation orders, and directives; forecasts future requirements and plans and initiates action to satisfy requirements in area of responsibility; establishes goals, objectives, and priorities in area of responsibility; reviews personnel, equipment, and material requirements; develops operating budgets and monitors expenditures.

Recommendation, SM3

In the lower-division baccalaureate/associate degree category, 3 semester hours in seamanship (12/89).

Recommendation, SM2

In the lower-division baccalaureate/associate degree category, 3 semester hours in seamanship, 2 in recordkeeping, and 2 in personnel supervision (12/89).

Recommendation, SM1

In the lower-division baccalaureate/associate degree category, 3 semester hours in seamanship, 2 in recordkeeping and 2 in personnel supervision (12/89).

Recommendation, SMC

In the lower-division baccalaureate/associate degree category, 3 semester hours in seamanship, 2 in recordkeeping, 3 in personnel supervision, and 3 in personnel administration (12/89).

Recommendation, SMCS

In the lower-division baccalaureate/associate degree category, the recommendationis the same as that for SMC. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (12/89).

Recommendation, SMCM

In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for SMC. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 3 in management problems (12/89).

NER-SN-001

SEAMAN

SN

Exhibit Dates: 6/71–12/89.

Career Pattern

Seaman (SN) is a general rate (Naval apprenticeship) for persons at pay grades E-1 (recruit), E-2 (Seaman apprentice), and E-3 (Seaman). At pay grade E-4 (petty officer third class), the person may enter any one of the following ratings: Boatswain's Mate (BM), Cryptologic Technician (CT) Data Processing Technician (DP), Data Systems Technician (DS), Disbursing Clerk (DK), Electronics Technician (ETN or ETR), Electronics Warfare Technician (EW), Fire Control Technician (FTB, FTG, or FTM), Gunner's Mate (GMG or GMM), Gunner's Mate Technician (GMT), Illustrator Draftsman (DM), Instrumentman (IM), Intelligence Specialist (IS), Journalist (JO), Lithographer (LI), Mess Management Specialist (MS), Mineman (MN), Missile Technician (MT), Musician (MU), Ocean Systems Technician (OT), Operations Specialist (OS), Opticalman (OM), Personnelman (PN), Postal Clerk (PC), Quartermaster (QM), Radioman (RM), Ship's Serviceman (SH), Signalman (SM), Sonar Technician (STG or STS), Storekeeper (SK), Torpedoman's Mate (TM), or Yeoman (YN).

Description

Performs all basic seamanship functions aboard ship that involve line or wire, including knot tying, whipping and seizing, and rigging used to secure the ship to a pier, moor, or anchor; is able to identify functions of navigation and shipboard equipment, including fixed or portable items and power or non-powered items; lowers, raises, and launches life saving equipment; handles small boats; navigates by using several different types of compasses; keeps records by degrees or points; knows navigational aids, Nautical Rules of the Road, and the buoys of inland waters of the U.S.; knows the nonmenclature of decks, superstructures, and parts of the hull; knows the purpose and limitations of first aid and the first aid treatments for electrical shock, simple and compound fractures, heat exhaustion, heat stroke, and burns; must be qualified as a Swimmer Fourth Class, requiring floating for a minimum of five minutes, preparing and using clothing and buoyant object for staying afloat, and swimming through oil, flames, and debris; knows how to determine the classes of fire hoses and how to use carbon dioxide, dry chemical, and water-portable fire extinguishers; knows the function of the typical fire main system, fixed carbon dioxide system, water washdown system, and magazine sprinkling system; knows the difference between flooding and progressive flooding and the dangers involved.

Recommendation

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in seamanship, and additional credit in first aid and fire science on the basis of institutional evaluation; if the duty assignment was boat coxswain, 3 additional semester hours in small boat operation; if qualified as a Swimmer First Class, 1 semester hour in swimming and additional credit in swimming on the basis of institutional evaluation NOTE: Credit for Seaman (SN) should be granted only after pay grade E-3 has been achieved (12/76).

NER-SN-002

SEAMAN

SN

Exhibit Dates: 1/90–Present.

Career Pattern

Seaman (SN) is a general rate (Naval apprenticeship) for persons at paygrades E-1 (recruit), E-2 (Seaman apprentice), and E-3 (Seaman). At paygrade E-4 (petty officer third class), the person may enter any one of the following ratings: Boatswain's Mate (BM), Cryptologic Technician (CT), Data Processing Technician (DP), Data Systems Technician (DS), Disbursing Clerk (DK), Electronics Technician (ET), Electronics Warfare Technician (EW), Fire Control Technician (FTB or FTG), Fire Controlman (FC), Gunner's Mate (GMG or GMM), Gunner's Mate Technician (GMT), Illustrator Draftsman (DM), Instrumentman (IM), Intelligence Specialist (IS), Journalist (JO), Lithographer (LI), Mess Management Specialist (MS), Mineman (MN), Missile Technician (MT), Musician (MU), Ocean Systems Technician (OT), Operations Specialist (OS), Opticalman (OM), Personnelman (PN), Postal Clerk (PC), Quartermaster (QM), Radioman (RM), Religious Program Specialist (RP), Ship's Serviceman (SH), Signalman (SM), Sonar Technician (STG or STS), Storekeeper (SK), Torpedoman-s Mate (TM), or Yeoman (YN).

Description

Performs all basic seamanship functions aboard ship that involve lin or wire, and rigging used to secure the ship to a pier, moor, or anchor; is able to identify functions of navigation and shipboard equipment; lowers, raises, and launches lifesaving equipment; handles small boats; navigates by using several different types of compasses; keeps records by degrees or points; knows navigational aids, Nautical Rules of the Road, and the buoys of inland waters of the U.S.; knows the nonmenclature of decks; superstructures, and parts of the hull; knows the purpose and limitations of first aid and the first aid treatments for electrical shock, simple and compound fractures, heat exhaustion, heat stroke, and burns; must be qualified as a Swimmer Fourth Class; knows how to determine the classes of fire hoses and how to use carbon dioxide, dry chemical, and water-portable fire extinguishers; knows the function of the typical fire main system, fixed carbon dioxide system, water washdown system, and magazine sprinkling system; knows the difference between flooding and progressive flooding and the danger involved.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in nautical science (seamanship) and 3 in nautical science (navigation); if qualified as a Swimmer First Class, 1 semester hour in swimming and additional credit in swimming on the basis of institutional evaluation. NOTE: Credit for Seaman (SN) should be granted only after paygrade E-3 has been achieved (3/90).

NER-ST-001

SONAR TECHNICIAN, MASTER CHIEF

STCM

Exhibit Dates: 7/76–Present.

Occupational Field: 10 (Sensor Operations).

Career Pattern

May progress to STCM, Master Chief Sonar Technician (E-9), from either STGCS, Senior Chief Sonar Technician, Surface (E-8), or STSCS, Senior Chief Sonar Technician, Submarine (E-8).

Description

Able to perform the duties required for STGCS (Senior Chief Sonar Technician, Surface), or STSCS (Senior Chief Sonar Technician, Submarine); serves as technical advisor for operations, maintenance, and training; reviews personnel, equipment, and material requirements, and forecasts future requirements; plans, organizes, implements, and controls activities; develops operating budgets and monitors expenditures.

Recommendation

In the vocational certificate category, use the recommendation for STG2 (Sonar Technician, Surface, Second Class) in exhibit NER-STG-001, or STS2 (Sonar Technician, Submarine, Second Class) in exhibit NER-STS-001, as appropriate. In the lower-division baccalaureate/associate degree category, use the recommendation for STGCS (Senior Chief Sonar Technician, Surface) in exhibit NER-STG-001, or STSCS (Senior Chief Sonar Technician, Submarine) in exhibit NER-STS-001, as appropriate. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 3 in management problems (12/78).

NER-STG-001

SONAR TECHNICIAN, SURFACE

STG3
STG2
STG1
STGC
STGCS

Exhibit Dates: 7/76–12/89.

Occupational Field: 10 (Sensor Operations).

Career Pattern

SN: Seaman (E-3). *STG3:* Sonar Technician, Surface, Third Class (E-4). *STG2:* Sonar Technician, Surface, Second Class (E-5). *STG1:* Sonar Technician, Surface, First Class (E-6). *STGC:* Chief Sonar Technician, Surface (E-7). *STGCS:* Senior Chief Sonar Technician, Surface (E-8). *STCM:* Master Chief Sonar Technician (E-9).

Description

Summary: Operates, troubleshoots, repairs, and performs maintenance on shipboard sonar, oceanographic, and underwater antisubmarine weapons control systems. *STG3:* Performs operational tests and makes external adjustments on equipment; uses schematic and wiring/circuitry diagrams; operates sonar equipment to detect submarines and other underwater objects; operates a bathythermograph to obtain water temperature versus depth; prepares and interprets sonar messages; completes maintenance data forms. *STG2:* Able to perform the duties required for STG3; performs preventive maintenance of sonar equipment; tests and repairs or replaces electrical/electronic components and parts; localizes equipment malfunctions to systems, subsystems, circuits, or parts; installs minor modifications to electronic sonar equipment; operates analog/digital sonar computer; inventories tools, portable test equipment, and installed equipment; completes maintenance reports. *STG1:* Able to perform the duties required for STG2; supervises maintenance and repair of sonar equipment; repairs and calibrates electronic test equipment; trains and supervises personnel in the operation of equipment; prepares weekly maintenance schedules. *STGC:* Able to perform the duties required for STG1; supervises training of personnel in operation, maintenance, and repair of equipment; administers a long-range maintenance program; prepares quarterly maintenance schedules. *STGCS:* Able to perform the duties required for STGC; organizes and schedules training programs; prepares directives and instructions for attaining organizational objectives; establishes and implements a program for interviewing, evaluating, and assigning personnel to assure maximum utilization; prepares correspondence.

Recommendation, STG3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity/electronics, 3 in applied mathematics, and 2 in basic blueprint reading (12/78).

Recommendation, STG2

In the vocational certificate category, 6 semester hours in basic electricity/electronics, 3 in applied mathematics, 3 in basic blueprint reading, and 2 in applied physics. In the lower-division baccalaureate/associate degree category, 6 semester hours in basic electricity/electronics, 3 in applied mathematics, and 3 in basic blueprint reading (12/78).

Recommendation, STG1

In the vocational certificate category, the recommendation is the same as that for STG2. In the lower-division baccalaureate/associate degree category, 6 semester hours in basic electricity/electronics, 3 in applied mathematics, 3 in basic blueprint reading, 2 in maintenance management, 2 in personnel supervision, and 3 in human relations (12/78).

Recommendation, STGC

In the vocational certificate category, the recommendation is the same as that for STG2. In the lower-division baccalaureate/associate degree category, 6 semester hours in basic electricity, 3 in applied mathematics, 3 in basic blueprint reading, 3 in personnel supervision, 3 in maintenance management, 3 in human relations, and 1 in record keeping (12/78).

Recommendation, STGCS

In the vocational certificate category, the recommendation is the same as that for STG2. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for STGC. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (12/78).

SN: Seaman (E-3). *STG3:* Sonar Technician, Surface, Third Class (E-4). *STG2:* Sonar Technician, Surface, Second Class (E-5). *STG1:* Sonar Technician, Surface, First Class (E-6). *STGC:* Chief Sonar Technician, Surface (E-7). *STGCS:* Senior Chief Sonar Technician, Surface (E-8). *STGCM:* Master Chief Sonar Technician, Surface (E-9).

Description

Summary: Operates, troubleshoots, repairs, and performs maintenance on shipboard sonar, oceanographic, and underwater antisubmarine weapons control systems. *STG3:* Performs operational tests and makes external adjustments on equipment; uses schematic and wiring/circuitry diagrams; performs preventative and corrective maintenance on sonar equipment; operates sonar equipment to detect submarine and other underwater objects; operates a bathythermograph to obtain water temperature versus depth; prepares and interprets sonar messages; completes maintenance data forms. *STG2:* Able to perform the duties required for STG3; tests and repairs or replaces electrical/electronic components and parts; localizes equipment malfunctions to systems, subsystems, circuits, or parts; installs minor modifications to electronic sonar equipment; operates analog/digital sonar computer; inventories tools, portable test equipment, and installed equipment; completes maintenance reports. *STG1:* Able to perform the duties required for STG2; supervises maintenance and repair of sonar equipment; repairs and calibrates electronic test equipment; trains and supervises personnel in the operation of equipment; prepares weekly maintenance schedules. *STGC:* Able to perform the duties required for STG1; supervises training of personnel in operation, maintenance, and repair of equipment; administers a long-range maintenance program; prepares quarterly maintenance schedules. *STGCS:* Able to perform the duties required for STGC; organizes and schedules training programs; prepares directives and instructions for attaining organizational objectives; establishes and implements a program for interviewing, evaluating, and assigning personnel to assure maximum utilization; prepares correspondence. *STGCM:* Able to perform the duties required for STGCS; serves as technical advisor for operations, maintenance, and training; reviews personnel, equipment, and material requirements, and forecasts future requirements; plans, organizes, implements, and controls activities; develops operating budgets and monitors expenditures.

Recommendation, STG3

In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting and maintenance, 3 in basic electronics laboratory, 1 in digital electronics, and 1 in solid state electronics (12/89).

Recommendation, STG2

In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting and maintenance, 3 in basic electronics laboratory, 2 in digital electronics, and 2 in solid state electronics (12/89).

Recommendation, STG1

In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting and maintenance, 3 in basic electronics laboratory, 2 in digital electronics, 2 in solid state electronics, and 3 in personnel supervision (12/89).

Recommendation, STGC

In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting and maintenance, 3 in basic electronic laboratory, 2 in digital electronics, 2 in solid state electronics, 3 in personnel supervision, and 3 in maintenance management (12/89).

Recommendation, STGCS

In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for STCG. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (12/89).

Recommendation, STGCM

In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for STGC. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 3 in management problems (12/89).

NER-SW-001

STEELWORKER

SW3
SW2
SW1
SWC
SWCS

Exhibit Dates: 6/71–Present.

Occupational Field: 13 (Construction).

Career Pattern

CN: Constructionman (E-3). *SW3:* Steelworker Third Class (E-4). *SW2:* Steelworker Second Class (E-5). *SW1:* Steelworker First Class (E-6). *SWC:* Chief Steelworker (E-7). *SWCS:* Senior Chief Steelworker (E-8). *CUCM:* Master Chief Constructionman (E-9).

Description

Summary: Fabricates, assembles, erects, positions, and joins structural members and fabricated sections. *SW3:* Reads shop drawings and sketches; uses simple hoisting devices; cuts, forms, places, and ties reinforcing steel; works with erection crew as a connector or tagman; performs gas cutting, gas welding, and electric arc welding in all positions; identifies types and uses of electrodes, gas rods, and fluxes for welding, soldering, and brazing; identifies types of welded joints; identifies compressed gas cylinders; splices line and wire rope; computes safe working load of lines, wire rope, and block and tackle arrangements; erects common types of metal and swinging scaffolds; identifies types and shapes of structural and reinforcing steel; identifies types of pre-engineered buildings and structures; computes areas of polygons, circles, and cylinders; computes volume of prisms, pyramids, cones, spheres, and cylinders; fabricates elementary designs and shapes in sheet metal by using soldering, brazing and riveting. *SW2:* Able to perform the duties required for SW3; draws simple shop drawings and sketches; prepares requisitions; welds ferrous/nonferrous matels in all positions, using gas metal arc and gas tungsten arc welding procedures; applies methods of controlling metal expansion during welding operations; applies field straightening techniques to damaged structural shapes; applies principles and methods of cutting, chamfering, and scarfing metal, using carbon-arc chamfer-type rod and air-arc processes; performs gas-welding and electric arc welding to build up and wearface metal parts; determines mechanical advantage of block and tackle arrangements; determines types and use of drive pins, studs, and power charges for powder-assisted or powder-actuated tools; performs layout and fabrication of simple steel structures for teams and crews; rigs wire rope, using poured sockets, clips, and related attachments; performs operator maintenance on powder-actuated (low and high velocity) stud guns and on diesel or gasoline driven air compressors. *SW1:* Able to perform the duties required for SW2;

prepares as-built drawings; prepares work progress reports; provides material usage data; conducts training for teams and crews; designs and erects simple hoisting devices, such as 'A' frames, ginpoles, tripods, and derricks; directs the movement of cranes and other hoisting devices in moving and positioning objects; directs crews involved in cutting, bending, and placing reinforcing steel; directs teams and crews in erecting rigid frame and other pre-engineered buildings, structures, and airfield matting; directs teams and crews engaged in metal work and fabrication; knows the principles and assembly methods of the various pontoon systems; assigns daily work to teams and crews; prepares equipment, manpower, and material estimates from drawings and specifications; uses principles and techniques of Critical Path Method (CPM) scheduling; performs duties of shop planner or maintenance scheduler; performs construction and maintenance inspections; performs non-destructive metal tests. *SWC:* Able to perform the duties required for SW1; drafts letters and instructions; prepares reports; administers accident prevention program; makes personnel assignments; provides technical advice on plans and specifications and on construction and maintenance techniques; implements maintenance and cost control program; prepares and uses network analysis; prepares and maintains project progress charts; organizes and controls the site development of materials and equipment. *SWCS:* Able to perform the duties required for SWC; prepares correspondence and local directives and instructions for attaining organizational objectives and improving operations; provides information and advice on utilization, capabilities, reliability, and operations in own area of responsibility; implements a program for assigning and evaluating personnel; coordinates equipment assignment among various projects; administers construction force tool inventory and inspection program; prepares and maintains visual status boards; is capable of directing the operation and maintenance of all utilities in the Public Works Department; directs transportation and equipment services; establishes a maintenance and cost control program; coordinates and evaluates labor reporting, material and equipment usage, and maintenance data and coordinates the preparation and submission of related reports; organizes, schedules, and evaluates training programs.

Recommendation, SW3

In the vocational certificate category, 9 semester hours in welding, 1 in rigging, and 1 in steel layout and fabrication. In the lower-division baccalaureate/associate degree category, 3 semester hours in welding and additional credit in welding on the basis of institutional evaluation (1/77).

Recommendation, SW2

In the vocational certificate category, 15 semester hours in welding, 2 in rigging, and 2 in steel layout and fabrication. In the lower-division baccalaureate/associate degree category, 5 semester hours in welding and 1 in steel layout and fabrication, and additional credit in welding on the basis of institutional evaluation (1/77).

Recommendation, SW1

In the vocational certificate category, 15 semester hours in welding, 6 in advanced welding, 3 in rigging, 3 in technical mathematics, and 3 in steel layout and fabrication. In the lower-division baccalaureate/associate degree category, 7 semester hours in welding, 2 in steel layout and fabrication, and 2 in personnel supervision, and additional credit in welding on the basis of institutional evaluation (1/77).

Recommendation, SWC

In the vocational certificate category, the recommendation is the same as that for SW1. In the lower-division baccalaureate/associate degree category, 7 semester hours in welding, 3 in personnel supervision, 3 in industrial technology, 2 in steel layout and fabrication, and 1 in technical writing, and additional credit in welding on the basis of institutional evaluation (1/77).

Recommendation, SWCS

In the vocational certificate category, the recommendation is the same as that for SW1. In the lower-division baccalaureate/associate degree category, 7 semester hours in welding, 3 in personnel supervision, 3 in records administration, 3 in technical writing, 3 in industrial technology, and 2 in steel layout and fabrication, and additional credit in welding on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours for a practicum in management, 3 in construction management, and 3 in human relations (1/77).

Recommendation, TDC

In the vocational certificate category, the recommendation is the same as that for TD1. In the lower-division baccalaureate/associate degree category, 2 semester hours in record keeping, 3 in personnel supervision, 3 in basic electricity, 3 in basic electronics, 3 in basic mathematics, and 6 in applied physics. In the upper-division baccalaureate category, 3 semester hours in audio-visual education and 3 in instructional techniques and materials (2/77).

Recommendation, TDCS

In the vocational certificate category, the recommendation is the same as that for TD1. In the lower-division baccalaureate/associate degree category, 2 semester hours in record keeping, 3 in personnel supervision, 3 for management electives, 3 in basic electricity, 3 in basic electronics, 3 in basic mathematics, and 6 in applied physics. In the upper-division baccalaureate category, 3 semester hours in audio-visual education, 3 in instructional techniques and materials, and 3 for field experience in management (2/77).

Recommendation, TDCM

In the vocational certificate category, the recommendation is the same as that for TD1. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for TDCS. In the upper-division baccalaureate category, 3 semester hours in audio-visual education, 3 in instructional techniques and materials, 3 in management problems, and 3 for field experience in management, and additional credit in human relations, personnel management, and for a practicum in management on the basis of institutional evaluation (2/77).

NER-TM-001

TORPEDOMAN'S MATE (TECHNICIAN)

TM3
TM2
TM1
TMC
TMCS
TMCM

Exhibit Dates: 6/71-Present.

Occupational Field: 9 (Ordnance Systems).

Career Pattern

SN: Seaman (E-3). *TM3:* Torpedoman's Mate, Third Class (E-4). *TM2:* Torpedoman's Mate, Second Class (E-5). *TM1:* Torpedoman's Mate, First Class (E-6). *TMC:* Chief Torpedoman's Mate (E-7). *TMCS:* Senior Chief Torpedoman's Mate (E-8). *TMCM:* Master Chief Torpedoman's Mate (E-9).

Description

NOTE: Torpedoman's Mates may serve as either Technicians or Operators. Technicians are identified by a four-digit NEC code which indicates the weapons systems specialty. Operators are identified by an NEC code of '0000.' (See Appendix A for information about NEC's.) Refer to exhibit NER-TM-002 for Torpedoman's Mate (Operator). *Summary:* Assembles, repairs, and performs maintenance on underwater electronics torpedoes that are launched from surface ships and submarines; troubleshoots, tests, and replaces defective elements and components in the torpedo electronic systems; uses instrumentation and test equipment. TM3 (Technician) Handles, transfers, loads, and off-loads torpedoes; operates oscilloscopes, frequency counters, and signal generators; uses multimeter; solders electrical leads and terminals; tests and replaces electronic components; uses technical maintenance publications, schematics, and drawings; maintains torpedo records; uses and cares for handtools. *TM2:* (Technician) Able to perform the duties required for TM3; performs electronic mantenance; disassembles, cleans, adjusts, reassembles, and tests propulsion and control mechanisms of torpedoes; effects all electronic and electrical circuit tests and makes required adjustments; completes deficiency reports on torpedoes and associated equipment. *TM1:* (Technician) Able to perform the duties required for TM2; tests internal circuits of major units; uses working drawing in making modification to torpedo; maintains a technical library; trains subordinates to perform maintenance on weapons; prepares preventive maintenance schedule. NOTE: If NEC was TM-0747, Advanced Undersea MK 46 Test Equipment Weaponsman, or TM-0749, Advanced Undersea MK 48 Test Equipment Weaponsman, also performs the following duties: Performs maintenance on test equipment (a sophisticated computer system with a number of interfaces to the torpedoes and instrumentation) used by Torpedoman's Mates Technicians; has a thorough knowledge of interfacing, of the interfaced equipment, and of digital and computer electronics. *TMC:* (Technician) Able to perform the duties required for TM1; supervises the upkeep and assembly of torpedoes; administers periodic inspection to ensure quality control. NOTE: If NEC was TM-0747, Advanced Undersea MK 46 Test Equipment Weaponsman, or TM-0749, Advanced Undersea MK 48 Test Equipment Weaponsman, refer to the note in the TM1 (Technician) description. *TMCS:* (Technician) Able to perform the duties required for TMC; prepares local directives and correspondence; organizes and schedules training programs; administers long-range planned maintenance programs; controls expenditure of material and funds used in procurement. NOTE: If NEC was TM-0747, Advanced Undersea MK 46 Test Equipment Weaponsman, or TM-0749, Advanced Undersea MK 48 Test Equipment Weaponsman, refer to the note in the TM1 (Technician) description. *TMCM:* (Technician) Able to perform the duties required for TMCS; plans, organizes, implements, and controls activities in compliance with policies and directives; establishes goals and objectives in area of responsibility; develops operating budgets and monitors expenditures. NOTE: If NEC was TM-0747, Advanced Undersea MK 48 Test Equipment Weaponsman, refer to the note in the TM1 (Technician) description.

Recommendation, TM3

(Technician) In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity/electronics and 3 in computer operations (10/87).

Recommendation, TM2

(Technician) In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity/electronics and 3 in computer operations (10/87).

Recommendation, TM1

(Technician) In the vocational certificate category, 3 semester hours in basic electricity/electronics and 3 in computer operations. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity/electronics, 3 in computer operations, 2 in personnel supervision, 2 in maintenance management, and 3 in human relations; if NEC was TM-0747, Advanced Undersea MK 46 Test Equipment Weaponsman, or TM-0749, Advanced Undersea MK 48 Test Equipment Weaponsman, additional credit as follows: 2 semester hours in applied mathematics, 4 in digital electronics, 4 in computer organization, 3 in electromechanical systems, and 8 in systems maintenance (10/87).

Recommendation, TMC

(Technician) In the vocational certificate category, the recommendation is the same as that for TM1 (Technician). In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity/electronics, 3 in computer operations, 3 in personnel supervision, 3 in maintenance management, and 3 in human relations; if NEC was TM-0747, Advanced Undersea MK 46 Test Equipment Weaponsman, or TN-0749, Advanced, Undersea MK 48 Test Equipment Weaponsman, additional credit as follows: 2 semester hours in applied mathematics, 4 in digital electronics, 4 in computer organization, 3 in electromechanical systems, and 8 in systems maintenance (10/87).

Recommendation, TMCS

(Technician) In the vocational certificate category, the recommendation is the same as that for TM1 (Technician). In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for TMC (Technician). In the upper-division baccalaureate category, 3 semester hours for field experience in management, 3 in personnel management, and 3 in management problems (10/87).

Recommendation, TMCM

(Technician) In the vocational certificate category, the recommendation is the same as that for TM1 (Technician). In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for TMC (Technician). In the upper-division baccalaureate category, 6 semester hours for field experience in management, 3 in personnel management, and 3 in management problems (10/87).

CN: Constructionman (E-3). *UT3:* Utilitiesman Third Class (E-4). *UT2:* Utilitiesman Second Class (E-5). *UT1:* Utilitiesman First Class (E-6). *UTC:* Chief Utilitiesman (E-7). *UTCS:* Senior Chief Utilitiesman (E-8). *UTCM:* Master Chief Utilitiesman (E-9).

Description

Summary: Plans, supervises, and performs tasks involved in the installation, maintenance, and repair of plumbing, heating, steam, compressed-air, fuel storage, and distribution systems, water treatment and distribution systems, air-conditioning and refrigeration equipment, and sewage collection and disposal facilities. *UT3:* Installs immersion can heaters and space heaters, fuel lines, and piping and pressure vessel insulation materials; performs pre-start checks, and maintains and operates assigned vehicles; maintains boilers, water plants, air-conditioning and refrigeration equipment, and pumps and air compressors; performs minor repairs on immersion can heaters and space heaters; solders/brazes soft and hard drawn copper tubing and fittings; measures, cuts, and threads galvanized steel pipe, cast iron soil pipe, black iron gas pipe, cast iron water pipe, clay and concrete pipe, cement-asbestos pipe, and plastic pipe; identifies color coding used on piping systems and compressed gas cylinders; cleans watersides and firesides of boilers; handles chemicals used in treating water and sewage. *UT2:* Able to perform the duties required for UT3; reads and works from drawings and specifications; prepares simple shop drawings and sketches; prepares time cards and material requisitions; installs water systems, packaged refrigeration and air-conditioning systems, and pressure, check, and shut-off valves; installs laundry equipment, heating systems, galley equipment, plumbing fixtures, water heaters, and sewage systems; performs water treatment and purification tests; maintains and repairs laundry equipment; tests, adjusts, and recalibrates gauges; repairs valves. *UT1:* Able to perform the duties required for UT2; prepares work progress and material usage reports; conducts personnel readiness interviews; implements training for team/crew members; constructs septic tanks, cess pools, and leaching fields; installs fire protection systems, advanced-base type boilers and pressure vessels, stationary refrigeration and air-conditioning systems, and compressed air systems; organizes work schedules; prepares estimates; performs inspections; tests boilers and pressure vessels; serves as supervisor for steam, sewage, and water plants. *UTC:* Able to perform the duties required for UT1; drafts letters and reports; administers safety program; assigns personnel based on readiness reports; supervises and coordinates all unit tasks; provides technical advice; implements maintenance and cost control program; organizes and controls the site deployment of materials and equipment. *UTCS:* Able to perform the duties required for UTC; provides information and advice on utilization, capabilities, reliability, and operations in area of responsibility; prepares local directives and instructions for attaining objectives and improving operations; prepares correspondence; establishes and implements a program for interviewing, evaluating, and assigning personnel for maximum utilization; determines requirement for advanced base planning; coordinates equipment assignment; directs operation and maintenance of all utilities; establishes a maintenance/cost control program. *UTCM:* Able to perform the duties required for UTCS or CECS (Senior Chief Construction Electrician); plans, organizes, implements, and controls work activities in compliance with policy statements and directives; establishes goals and sets priorities; reviews personnel, equipment, and material requirements; develops procedures for work improvement and simplification through organizational analysis; serves as a construction inspector; manages a contract inspection branch; implements energy conservation and pollution control programs; assists in the management and operation of a public works department; develops operating budgets and monitors expenditures; forecasts future personnel, equipment, and material requirements and takes action necessary to satisfy them; is responsible for the administration of a department or company.

Recommendation, UT3

In the vocational certificate category, 3 semester hours in introduction to construction, 3 in utilities maintenance, and 3 in plumbing. In the lower-division baccalaureate/associate degree category, 3 semester hours in utilities construction and maintenance (1/77).

Recommendation, UT2

In the vocational certificate category, 3 semester hours in introduction to construction, 3 in utilities maintenance, 3 in plumbing, 3 in utilities installation, and 2 in blueprint reading and sketching. In the lower-division baccalaureate/associate degree category, 3 semester hours in utilities construction and maintenance, 3 in applied science, and 2 in general plans and specifications (1/77).

Recommendation, UT1

In the vocational certificate category, 6 semester hours in utilities installation, 3 in introduction to construction, 3 in utilities maintenance, 3 in plumbing, and 2 for blueprint reading and sketching. In the lower-division baccalaureate/associate degree category, 4 semester hours in utilities construction and maintenance, 3 in applied science, 3 in utilities construction estimating, 3 in water and sewage treatment systems, 2 in general plans and specifications, and 2 in personnel supervision (1/77).

Recommendation, UTC

In the vocational certificate category, the recommendation is the same as that for UT1. In the lower-division baccalaureate/associate degree category, 4 semester hours in utilities construction and maintenance, 3 in applied science, 3 in utilities construction estimating, 3 in water and sewage treatment systems, 3 in personnel supervision, 2 in general plans and specifications, 2 in shop management, and 1 in safety management (1/77).

Recommendation, UTCS

In the vocational certificate category, the recommendation is the same as that for UT1. In the lower-division baccalaureate/associate degree category, 4 semester hours in utilities construction and maintenance, 3 in applied science, 3 in utilities construction estimating, 3 in water and sewage treatment systems, 3 in personnel supervision, 2 in introduction to management, 2 in general plans and specifications, 2 in shop management, and 1 in safety management. In the upper-division baccalaureate category, 3 semester hours for a practicum in management and 3 in human relations (1/77).

Recommendation, UTCM

In the vocational certificate category, use the recommendation for UT1 or CE1 (Construction Electrician First Class) in exhibit NER-CE-001, as appropriate. In the lower-division baccalaureate/associate degree category, 3 semester hours in principles of administration, 3 in construction contracts and agreements, and 3 in government budgeting; add either the 23 semester hours for UTCS, or the 17 semester hours for CECS (Senior Chief Construction Electrician) in exhibit NER-CE-001, as appropriate. In the upper-division baccalaureate category, 6 semester hours for a practicum in management, 3 in human relations, 3 in management problems, and 3 in forecasting (1/77).

WEAPONS TECHNICIAN

WT3
WT2
WT1
WTC
WTCS
WTCM

Exhibit Dates: 1/86–Present.

Occupational Field: 9 (Ordnance Systems).

Career Pattern

SN: Seaman (E-3). *WT3:* Weapons Technician Third Class (E-4). *WT2:* Weapons Technician Second Class (E-5). *WT1:* Weapons Technician First Class (E-6). *WTC:* Chief Weapons Technician (E-7). *WTCS:* Senior Chief Weapons Technician (E-8). *WTCM:* Master Chief Weapons Technician (E-9).

Description

Summary: Performs organizational, intermediate and depot maintenance on nuclear weapons and components; stores, inspects, tests, adjusts, repairs, and packages nuclear weapon components and associated equipment; assembles, disassembles, and converts nuclear weapons, warheads, and/or components; maintains magazines, assembly and stowage areas; maintains sprinkler and alarm systems. *WT3:* Packages, unpackages, handles and stows nuclear weapons; operates handling equipment applicable to nuclear weapons; inspects magazines and records temperatures; performs modernization and stowage monitoring tests on nuclear weapons and components; operates torquing tools; repairs sealing surfaces, mating areas and threads; replaces fastening hardware and seals, pipe, fittings, seals and gaskets; inspects and cleans components of electrical equipment; solders, wire wraps connections, tests for shorts, grounds, and continuity; replaces electrical components; installs and removes dust covers and shorting plugs; uses and cares for pneumatic and electrical power tools; operates measuring devices; detects and treats corrosion; performs preventive maintenance; operates magazine firefighting systems; performs nuclear weapons accident response and decontamination procedures; completes maintenance data system forms; uses drawings; inventories tools and portable test equipment. *WT2:* Able to perform the duties required for WT3; replaces nuclear weapons components; inspects nuclear weapons, components and equipment; tests alarm and sensing devices; troubleshoots and repairs ordnance electrical systems; maintains nuclear weapons test equipment; installs components in hydraulic systems; troubleshoots and repairs hydraulic pumps; repairs magazine firefighting systems; maintains publications; complies with requirements for nuclear weapons tactical inspections. *WT1:* Able to perform the duties required for WT2; identifies damaged explosive ordnance components; repairs hydraulic system components; prepares planned maintenance schedules; supervises response to nuclear accidents and incidents; supervises modernizations, alterations and modifications. *WTC:* Able to perform the duties required for WT1; inspects completed modernizations; inspects nuclear weapons material stowage, space layout and storeroom maintenance; coordinates repair and calibration of test equipment; prepares reports; supervises training programs. *WTCS:* Able to perform the duties required for WTC; administers long-range planned maintenance programs; prepares ordnance loading and stowage plans; coordinates weapon overhaul and repair; writes correspondence, directives and instructions; organizes and schedules training programs and evaluates effectiveness. *WTCM:* Able to perform the duties required for WTCS; establishes goals, objectives and priorities; plans, organizes, implements and controls activities; reviews personnel, equipment and material requirements; evaluates new trends in weapons systems; develops operating budgets and monitors expenditures; forecasts future requirements.

Recommendation, WT3

Credit is not recommended because of the limited or specialized nature of the skills, competencies, and knowledge (10/87).

Recommendation, WT2

Credit is not recommended because of the limited or specialized nature of the skills, competencies, and knowledge (10/87).

Recommendation, WT1

In the lower-division baccalaureate/associate degree category, 2 semester hours in personnel supervision, 3 in human relations, and 2 in maintenance management (10/87).

Recommendation, WTC

In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision, 3 in human relations, and 3 in maintenance management (10/87).

Recommendation, WTCS

In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for WTC. In the upper-division baccalaureate category, 3 semester hours for field experience in management, 3 in personnel management, and 3 in management problems (10/87).

Recommendation, WTCM

In the lower-division baccalaureate/associate degree category, the recommendation is the same is that for WTC. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 3 in management problems (10/87).

Exhibit Dates: 6/72–12/89.

Occupational Field: 15 (Administration).

Career Pattern

SN: Seaman (E-3). *YN3:* Yeoman Third Class (E-4). *YN2:* Yeoman Second Class (E-5). *YN1:* Yeoman First Class (E-6). *YNC:* Chief Yeoman (E-7). *YNCS:* Senior Chief Yeoman (E-8). *YNCM:* Master Chief Yeoman (E-9).

Description

Summary: Performs general office clerical duties, including typewriting, office machine operations, office communications, and filing and records maintenence. *YN3:* Maintains files; operates duplicating, adding, calculating, and copying machines; types correspondence, reports, and other communications from rough draft (a stright-copy typing rate of at least 30 words per minute is required). *YN2:* Able to perform the duties required for *YN3*,: organizes and monitors filing and records maintenance, retention, and disposal; maintains officer personnel records; routes correspondence; types records, correspondence, and reports (a straight-copy typing rate of at least 40 words per minute is required); sends, receives, and accounts for official and registered mail. *YN1:* Able to perform the duties required for YN2; drafts correspondence, instructions, and notices (a straight-copy typing rate of at least 50 words per minute is required); verifies accuracy of job orders and work requests; assists in the supervision of clerical functions. *YNC:* Able to perform the duties required for YN1; maintains classified materials control system; verifies accuracy of official correspondence and reports; monitors submission and maintenance of officer fitness reports; supervises and directs clerical functions. *YNCS:* Able to perform the duties required for YNC; interviews, assigns, supervises, and evaluates office personnel; recommends office procedures improvements; procures and allocates office materials and equipment; supervises and controls the security of sensitive records; trains office personnel; functions as office supervisor. *YNCM:* Able to perform the duties required for YNCS; establishes goals, objectives, and priorities in the administration of the office function; reviews and makes recommendations concerning office personnel, equipment, and supply requirements, develops operating budget for the office and monitors office expenditures.

Recommendation, YN3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 2 semester hours in typing, 1 in filing and records management, 1 in general clerical procedures, and 1 in office machines (12/76).

Recommendation, YN2

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in typing, 2 in filing and records management, 2 in general clerical procedures, and 1 in office machines (12/76).

Recommendation, YN1

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in typing, 2 in filing and records management, 2 in general clerical procedures, 2 in communication (written), and 1 in office machines, and additional credit in typing on the basis of institutional evaluation (12/76).

Recommendation, YNC

In the vocational certificate category, 3 semester hours in typing, 3 in general clerical procedures, 3 in communication (written), 2 in filing and records management, 1 in office machines, and 1 in office management, and additional credit in typing on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 3 semester hours in typing, 3 in general clerical procedures, 3 in communication (written), 2 in filing and records management, 1 in personnel supervision, 1 in office machines, and 1 in office management, and additional credit for field experience in management and typing on the basis of institutional evaluation (12/76).

Recommendation, YNCS

In the vocational certificate category, 3 semester hours in typing, 3 in general clerical procedures, 3 in communication (written), 3 in office management, 3 in administration electives, 2 in filing and records management, and 1 in office machines, and additional credit in typing on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 3 semester hours in typing, 3 in general clerical procedures, 3 in communication (written), 3 in office management, 3 in management electives, 3 in personnel supervision, 2 in filing and records management, and 1 in office machines, and additional credit for field experience in management and in typing on the basis of institutional evaluation. In the upper-division baccalaureate category, credit in human relations and for a practicum in management on the basis of institutional evaluation (12/76).

Recommendation, YNCM

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, the recommendation is the same as that for YNCS. In the upper-division baccalaureate category, 3 semester hours in management problems, and additional credit in human relations, in personnel management, and for a practicum in management on the basis of institutional evaluation (12/76).

Exhibit Dates: 1/90–Present

Occupational Field: 1* (Administration).

Career Pattern

SN: Seaman (E-3). *YN3:* Yeoman, Third Class (E-4). *YN2:* Yeoman, Second Class (E-5). *YN1:* Yeoman, First Class (E-6). *YNC:* Chief Yeoman (E-7). *YNCS:* Senior Chief Yeoman (E-8). *YNCM:* Master Chief Yeoman (E-9).

Description

Summary: Performs general office clerical and administrative duties, including typewriting, office machine operations, office communications, filing and records maintenance. *YN3:* Maintains files; operates duplicating, adding, calculating, and copying machines; serves as paralegal counselor when a legalman is not available; types correspondence, reports, and other communications from rough draft (a straight-copy typing rate of at least 30 words per minute is required). *YN2:* Able to perform the duties required for YN3; organizes and monitors filing and records; maintenance, retention, and disposal; maintains officer personnel records; routes correspondence; types records, correspondence, and reports (a straight-copy typing rate of at least 40 words per minute is required); sends, receives, and accounts for official and registered mail; advises personnel of benefits, types of duty, and resolution of personal problems. *YN1:* Able to perform the duties required for YN2; drafts correspondence, instructions, and notices (a straight-copy typing rate of at least 50 words per minute is required); verifies accuracy of job orders and work requests; assists in the supervision of clerical functions. *YNC:* Able to perform the duties required for YN1; maintains classified materials controls system; verifies accuracy of official correspondence and reports; monitors submission and maintenance of officer fitness reports; supervises and directs clerical functions. *YNCS:* Able to perform the duties required for YNC; interviews, assigns, supervises, and evaluates office personnel; recommends office procedures improvements; procures and allocates office materials and equipment; supervises and controls the security of sensitive records; trains office personnel; functions as office supervisor. *YNCM:* Able to perform the duties required for YNCS; establishes goals, objectives, and priorities in the administration of the office function; plans, organizes, implements, coordinates, and controls activities; reviews and makes recommendations concerning office personnel, equipment, and supply requirements; develops operating budget for the office and monitors office expenditures; prepares staff studies.

Recommendation, YN3

In the lower-division baccalaureate/associate degree category, 2 semester hours in typing, 1 in recordkeeping, 1 in clerical procedures, 1 in automatic data processing (ADP) operations, 1 in interpersonal communications, and 1 in military legal practices and procedures (3/90).

Recommendation, YN2

In the lower-division baccalaureate/associate degree category, 2 semester hours in typing, 1 in recordkeeping, 2 in clerical procedures, 2 in automatic data processing (ADP) operations, 1 in interpersonal communications, and 1 in military legal practices and procedures (3/90).

Recommendation, YN1

In the lower-division baccalaureate/associate degree category, 3 semester hours in typing, 2 in recordkeeping, 2 in clerical procedures, 2 in automatic data processing (ADP) operations, 2 in technical writing, 2 in interpersonal communications, and 2 in military legal practices and procedures. In the upper-division baccalaureate category, 2 semester hours in management problems (3/90).

Recommendation, YNC

In the lower-division baccalaureate/associate degree category, 3 semester hours in typing, 2 in recordkeeping, 3 in clerical procedures, 2 in automatic data processing (ADP) operations, 3 in technical writing, 1 in office administration, 1 in principles of supervision, 2 in interpersonal communications, and 2 in military legal practices and procedures. In the upper-division baccalaureate category, 2 semester hours for field experience in management, 2 in management problems, and 2 in human resource management (3/90).

Recommendation, YNCS

In the lower-division baccalaureate/associate degree category, 3 semester hours in typing, 2 in recordkeeping, 3 in clerical procedures, 2 in automatic data processing (ADP) operations, 3 in technical writing, 2 in office administration, 2 in principles of supervision, 3 in interpersonal communications, and 3 in military legal practices and procedures. In the upper-division baccalaureate category, 2 semester hours for field experience in management, 3 in management problems, and 3 in human resource management (3/90).

Recommendation, YNCM

In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for YNCS. In the upper-division baccalaureate category, 3 semester hours for field experience in management, 3 in management problems, and 3 in human resource management (3/90).

Navy Warrant Officer Exhibits

NWO-711X-001

Boatswain (Surface)

711X

Exhibit Dates: 4/75–Present.

Career Pattern

May have progressed to Boatswain (Surface) Warrant Officer from Boatswain's Mate (BM), Quartermaster (QM), or Signalman (SM).

Description

Serves as an officer technical specialist in the field of seamanship and navigation; plans, supervises and directs activities of deck and navigation personnel in performance of operational and maintenance functions; plans, develops, and administers deck navigation training programs; assists in organizing, scheduling, and supervising seamanship and navigation exercises and drills; assigns and coordinates activities of personnel under their command.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in personnel supervision, and 3 for field experience in general ship operations. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (3/85).

NWO-712X-001

Operations Technician Surface
Operations Technician
(Operations Technician (Surface))

712X

Exhibit Dates: 4/75–Present.

Career Pattern

May have progressed to Operations Technician (Surface) Warrant Officer from: Electronics Warfare Technician (EW), Operations Specialist (OS), Ocean Systems Technician (OT), Quartermaster (QM), Radioman (RM), Signalman (SM), or Sonar Technician (ST).

Description

Serves as an officer technical specialist in the operation, employment, and application of techniques, equipment, systems, and procedures in operations and communications; supervises and trains personnel in the operation and maintenance of operations and communications equipment and systems; plans, directs, and controls operations and communication activities; advises and assists commands in the above areas and in the employment and utilization of associated facilities and installations.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in personnel supervision, and 3 for field experience in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (3/85).

NWO-713X-001

Boatswain (Surface)

713X

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Boatswain (Surface) Warrant Officer from Boatswain's Mate (BM), Quartermaster (QM), or Signalman (SM).

Description

Serves as an officer technical specialist in the field of seamanship and navigation; plans, supervises and directs activities of deck and navigation personnel in performance of operational and maintenance functions; plans, develops, and administers deck navigation training programs; assists in organizing, scheduling, and supervising seamanship and navigation exercises and drills; assigns and coordinates activities of personnel under their command.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in personnel supervision, and 3 for field experience in general ship operations. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (3/85).

NWO-713X-002

Boatswain (Submarine)

713X

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Boatswain (Submarine) Warrant Officer from Boatswain's Mate (BM), Quartermaster (QM), or Signalman (SM).

Description

Serves as an officer technical specialist in the field of seamanship, navigation, and deep sea diving; plans, supervises, and directs activities of deck, navigation, and deep sea diving personnel in performance of operational and maintenance functions; plans, develops, and administers deck, navigation, and diver programs; assists in organizing, scheduling, and supervising seamanship and navigation exercises and drills; assigns and coordinates activities of personnel under their commmand.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in personnel supervision, and 3 for field experience in general ship operations. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (3/85).

NWO-713X-003

Engineering Technician (Surface)

713X

Exhibit Dates: 4/75–Present.

Career Pattern

May have progressed to Engineering Technician (Surface) Warrant Officer from: Boiler Technician (BT), Electrician's Mate (EM), Engineman (EN), Gas Turbine System Technician, Electrical (GSE), Gas Turbine System Technician, Mechanical (GSM), Instrumentman (IM), Interior Communications Electrician (IC), Machinery Repairman (MR), Machinist's Mate (MM), Opticalman (OM), or Precision Instrumentman, Master Chief (PICM).

Description

Serves as an officer technical specialist in ship's machinery, electrical power, lighting, and interior communications systems, maintenance of optical equipment, instruments, and office machinery; supervises and trains personnel in the operation and maintenance of main propulsion systems (gas turbine, diesel, and steam), refrigeration systems, fuel systems, and shipboard electrical systems; analyzes problems with equipment and operations, finds solutions, and takes corrective action; has knowledge of supervision and training, personnel policies, legal procedures, leadership and management techniques, and communication methods; writes reports and provides technical advice.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 4 for field experience in management (10/84).

NWO-714X-001

Operations Technician (Surface)

714X

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Operations Technician (Surface) Warrant Officer from: Electronics Warfare Technician (EW), Operations Specialist (OS), Ocean Systems Technician (OT), Quartermaster (QM), Radioman (RM), Signalman (SM), or Sonar Technician (ST).

Description

Serves as an officer technical specialist in the operation, employment, and application of techniques, equipment, systems, and procedures in operations and communications; supervises and trains personnel in the operation and maintenance of operations and communications equipment and systems; plans, directs, and controls operations and communication activities; advises and assists commands in the above areas and in the employment and utilization of associated facilities and installations.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in personnel supervision, and 3 for field experience in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (3/85).

NWO-714X-002

Operations (Submarine)

714X

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Operations Technician (Submarine) Warrant Officer from Electronics Warfare Technician (EW), Operations Specialist (OS), Ocean Systems Technician (OT), Quartermaster (QM), Radioman (RM), Signalman (SM), or Sonar Technician (ST).

Description

Serves as an officer technical specialist in the operation, employment, and application of techniques, equipment, systems and procedures in operations and communications, with practical experience in these areas; assists and advises commands in operations and communications planning, direction and control, and in the employment and utilization of associated facilities and installations; organizes, supervises, and directs performance of operations and communications personnel; assists in the administration of onboard taining programs, facilities, and services; plans, develops, and administers training programs; writes technical reports and personnel evaluation reports; develops operating budgets and monitors expenditures; provides leadership and coordinates activities of technical personnel.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in personnel supervision, and 3 for field experience in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 in field experience for management (10/85).

NWO-714X-003

Repair Technician (Surface)

714X

Exhibit Dates: 4/75–Present.

Career Pattern

May have progressed to Repair Technician (Surface) Warrant Officer from: Hull Maintenance Technician (HT), Molder (MT), or Patternmaker (PM).

Description

Serves as officer technical specialist in ship repair and maintenance, damage control, and firefighting procedures, techniques, and equipment; supervises and trains personnel whose duties involve electric arc-welding, oxyacetalene welding and cutting, woodworking, metalworking, boat repairs, foundry operations, patternmaking, piping and drainage, and nuclear, biological, and chemical warfare defense; analyzes problems with equipment and operations, finds solutions, and takes corrective action; has knowledge of supervision and training, personnel policies, legal procedures, leadership and management techniques, and communication methods; writes reports and provides technical advice.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 4 for field experience in management (10/84).

NWO-715X-001

Nuclear Power Technician, Surface

715X

Description

Use the recommendation in exhibit NWO-740X-001.

NWO-715X-002

Special Warfare Technician

715X

Exhibit Dates: 3/90–Present. Pending evaluation.

NWO-716X-001

Explosive Ordnance Disposal
Technician

716X

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Explosive Ordnance Disposal Technician Warrant Officer from any rating; must be qualified in Explosive Ordnance Disposal (EOD).

Description

Serves as an officer technical specialist in the methods of detection, identification, field evaluation, recovery, removal, disposal, and rendering safe of all types of U.S. and foreign explosive ordnance, explosives, and demolition materials and in the technical escort of chemical and biological warfare agents; plans and supervises the activities of personnel engaged in diving and explosive ordnance disposal operations, involving all types of U.S. and foreign munitions, conventional and improvised; supervises the repair and modification of explosive ordnance disposal tools, equipment, and material; supervises the procurement, storage, issue, security, and preservation of explosive ordnance disposal equipment, material, and components; inspects and evaluates unidentified explosive ordnance items and determines the proper method of recovery, removal, disposal, or rendering safe of such items; supervises technical escort missions; performs airborne techniques; provides Secret Service with explosive ordnance disposal support for presidential and other VIP protection; supervises the activities of personnel engaged in diving and/or underwater recovery operations; plans, develops, and administers training programs; writes technical reports and personnel evaluation reports; develops operating budgets and monitors expenditures; provides leadership and coordinates activities of technical personnel.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in personnel supervision, and 3 for field experience in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (10/85).

NWO-716X-002

Surface Ordnance Technician

716X

Exhibit Dates: 4/75–Present.

Career Pattern

May have progressed to Surface Ordance Technician Warrant Officer from Fire Control Technician (FT), Fire Control Technician, Ballistic Missile Fire Control (FTB), Fire Control Technician, Gun Fire Control (FTG), Fire Control Technician, Surface Missile Fire Control (FTM), Gunner's Mate (GM), Gunner's Mate, Guns (GMG), Gunner's Mate, Missiles (GMM), Gunner's Mate Technician (GMT), Missile Technician (MT), or Torpedoman's Mate (TM).

Description

Serves as an officer technical specialist in ballistic missile weapons systems including missile, missile launch, missile fire control and warhead subsystems; trains and supervises personnel engaged in assembly, installation, operations, testing, maintenance and repair of ballistic missile systems; plans, develops, and administers training programs; writes technical reports and personnel evaluation reports; develops operating budgets and monitors expenditures; provides leadership and coordinates activities of technical personnel.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in personnel supervision, and 3 for field experience in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (10/85).

NWO-717X-001

Surface Underwater Ordnance
Technician

717X

Exhibit Dates: 4/75–6/86. (Effective 6/86, 717X was discontinued.)

Career Pattern

May have progressed to Surface Underwater Ordnance Technician Warrant Officer from Mineman (MN) or Torpedoman's Mate (TM).

Description

Serves as an officer technical specialist in underwater mines, including the MK 60 anti-submarine mine; trains and supervises personnel engaged in assembly, installation, operation, test, maintenance, and repair of bottom and moored mines, mobile mine propulsion units, and mine surface launch equipment; plans, develops, and administers training programs; writes technical reports and personnel evaluation reports; develops operating budgets and monitors expenditures; provides leadership and coordinates activities of technical personnel.

Recommendation
In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in personnel supervision, and 3 for field experience in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (10/85).

NWO-718X-001

Electronics Technician (Surface)
718X

Exhibit Dates: 4/75–Present.

Career Pattern
May have progressed to Electronics Technician (Surface) Warrant Officer from: Data Systems Technician (DS), Electronics Technician (ET), Electronics Warfare Technician (EW), Fire Control Technician (FT), Fire Control Technician, Ballistic Missile Fire Control Technician, (FTB), Fire Control Technician, Gun Fire Control (FTG), Fire Control Technician, Surface Missile Fire Control (FTM), Operations Specialist (OS), Ocean Systems Technician (OT), or Sonar Technician (ST).

Description
Serves as an officer technical specialist in the field of non-nuclear electronics including electronic theory and equipment and systems used in navigation; directs the detection, tracking, recognition and identification of ship, aircraft and missiles; supervises the installation, operation, and maintenance of all non-nuclear electronics systems installed in units of the surface force; supervises those persons involved in installing, modifying, testing, calibrating, maintaining, and repairing electronics equipment; serves as expert troubleshooter who analyzes problems with equipment and operations, finds solutions, and takes corrective action; has knowledge of supervision and training, personnel policies, legal procedures, leadership and management techniques and communication methods; writes reports and provides technical advice about electronic systems.

Recommendation
In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 3 for field experience in management, and 2 for field experience in electronics (1/84).

NWO-719X-001

Surface Communications Technician
719X

Exhibit Dates: 5/84–1/87. (Effective 1/87, the designator 719X was combined with the discontinued designator 729X; see exhibit NWO-719X-002.)

Career Pattern
May have progressed to Surface Communications Technician Warrant Officer from Radioman (RM).

Description
Serves as an officer technical specialist in the operation, employment, and application of techniques, equipment, systems and procedures in surface communications, with practical experience in these areas; assists and advices commands in communication planning, direction and control, and in the employment and utilization of associated facilities and installations; organizes, supervises, and directs performance of communication personnel; assists in administration of on-board training programs, facilities, and services; plans, develops, and administers training programs; writes technical reports and personnel evaluation reports; develops operating budgets and monitors expenditures; provides leadership and coordinates activities of technical personnel.

Recommendation
In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in personnel supervision, and 3 for field experience in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (10/85).

NWO-719X-002

Communications Technician
719X

Exhibit Dates: 1/87–Present.

Career Pattern
May have progressed to Communications Technician Warrant Officer from Radioman (RM).

Description
Serves as an officer technical specialist in the operation, employment, and application of techniques, equipment, systems and procedures in surface communications, with practical experience in these areas; assists and advices commands in communication planning, direction and control, and in the employment and utilization of associated facilities and installations; organizes, supervises, and directs performance of communication personnel; assists in administration of on-board training programs, facilities, and services; plans, develops, and administers training programs; writes technical reports and personnel evaluation reports; develops operating budgets and monitors expenditures; provides leadership and coordinates activities of technical personnel.

Recommendation
In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in personnel supervision, and 3 for field experience in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (10/85).

NWO-720X-001

Diving Officer
720X

Exhibit Dates: 3/90–Present. Pending evaluation.

NWO-721X-001

Aviation Ordnance Technician
721X

Exhibit Dates: 1/65–3/75.

Career Pattern
May have progressed to Aviation Ordnance Technician Warrant Officer from Aviation Ordnanceman (AO) or Gunner's Mate Technician (GMT).

Description
Serves as an officer technical specialist in the uses, capabilities, limitations, and reliability of aviation ordnance, handling equipment, and aircraft armament; supervises and directs the arming/dearming of aircraft and the requistioning, stowing, handling, testing, disassembly, assembly, installation, operation, maintenance, and repair of aviation ordnance, handling equipment and aircraft armament; supervises and directs the stowage, testing, and installation of aircraft missiles; interprets, publicizes, and ensures compliance with regulations and safety precautions governing the handling and stowing of aircraft ammunition, aircraft missiles, pyrotechnics, and explosives; plans, develops, and administers training programs; writes technical reports and personnel evaluation reports; develops operating budgets and monitors expenditures; provides leadership and coordinates the activities of technical personnel.

Recommendation
In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in personnel supervision, and 3 for field experience in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (10/85).

NWO-721X-002

Boatswain (Submarine)
721X

Exhibit Dates: 4/75–Present.

Career Pattern
May have progressed to Boatswain (Submarine) Warrant Officer from Boatswain's Mate (BM), Quartermaster (QM), or Signalman (SM).

Description
Serves as an officer technical specialist in the field of seamanship, navigation, and deep sea diving; plans, supervises, and directs activities of deck, navigation, and deep sea diving personnel in performance of operational and maintenance functions; plans, develops, and administers deck, navigation, and diver programs; assists in organizing, scheduling, and supervising seamanship and navigation exercises and drills; assigns and coordinates activities of personnel under their commmand.

Recommendation
In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in personnel supervision, and 3 for field experience in general ship operations. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (3/85).

NWO-722X-001

Operations Technician (Submarine)
722X

Exhibit Dates: 4/75–4/84.

Career Pattern

May have progressed to Operations Technician (Submarine) Warrant Officer from Electronics Warfare Technician (EW), Operations Specialist (OS), Ocean Systems Technician (OT), Quartermaster (QM), Radioman (RM), Signalman (SM), or Sonar Technician (ST).

Description

Serves as an officer technical specialist in the operation, employment, and application of techniques, equipment, systems and procedures in operations and communications, with practical experience in these areas; assists and advises commands in operations and communications planning, direction and control, and in the employment and utilization of associated facilities and installations; organizes, supervises, and directs performance of operations and communications personnel; assists in the administration of onboard training programs, facilities, and services; plans, develops, and administers training programs; writes technical reports and personnel evaluation reports; develops operating budgets and monitors expenditures; provides leadership and coordinates activities of technical personnel.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in personnel supervision, and 3 for field experience in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience for management (10/85).

NWO-723X-001

Ordnance Technican (Surface)

723X

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Surface Ordnance Technician Warrant Officer from Fire Control Technician (FT), Fire Control Technician, Ballistic Missile Fire Control (FTB), Fire Control Technician, Gun Fire Control (FTG), Fire Control Technician, Surface Missile Fire Control (FTM), Gunner's Mate (GM), Gunner's Mate, Guns (GMG), Gunner's Mate, Missiles (GMM), Gunner's Mate Technician (GMT), Missile Technician (MT), or Torpedoman's Mate (TM).

Description

Serves as an officer technical specialist in ballistic missile weapons systems including missile, missile launch, missile fire control and warhead subsystems; trains and supervises personnel engaged in assembly, installation, operations, testing, maintenance and repair of ballistic missile systems; plans, develops, and administers training programs; writes technical reports and personnel evaluation reports; develops operating budgets and monitors expenditures; provides leadership and coordinates activities of technical personnel.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in personnel supervision, and 3 for field experience in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (10/85).

NWO-723X-002

Engineering Technician (Submarine)

723X

Exhibit Dates: 4/75–Present.

Career Pattern

May have progressed to Engineering Technician (Submarine) Warrant Officer from: Boiler Technician (BT), Electrician's Mate (EM), Engineman (EN), Gas Turbine System Technician, Electrical (GSE), Gas Turbine System Technician, Mechanical (GSM), Instrumentman (IM), Interior Communications Electrician (IC), Machinery Repairman (MR), Machinist's Mate (MM), Opticalman (OM), or Precision Instrumentman, Master Chief (PICM).

Description

Serves as an officer technical specialist in ship's machinery, electrical power, lighting, and interior communications systems, maintenance of optical equipment, instruments, and office machinery; supervises and trains personnel in the operation and maintenance of main propulsion systems (gas turbine, diesel, and steam), refrigeration systems, fuel systems and shipboard electrical systems; analyzes problems with equipment and operations, finds solutions, and takes corrective action; has knowledge of supervision and training, personnel policies, legal procedures, leadership and management techniques, and communication methods; writes reports and provides technical advice.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 4 for field experience in management (10/84).

NWO-724X-001

Ordnance Technician (Surface)

724X

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Surface Ordnance Technician Warrant Officer from Fire Control Technician (FT), Fire Control Technician, Ballistic Missile Fire Control (FTB), Fire Control Technician, Gun Fire Control (FTG), Fire Control Technician, Surface Missile Fire Control (FTM), Gunner's Mate (GM), Gunner's Mate, Guns (GMG), Gunner's Mate, Missiles (GMM), Gunner's Mate Technician (GMT), Missile Technician (MT), or Torpedoman's Mate (TM).

Description

Serves as an officer technical specialist in ballistic missile weapons systems including missile, missile launch, missile fire control and warhead subsystems; trains and supervises personnel engaged in assembly, installation, operations, testing, maintenance and repair of ballistic missile systems; plans, develops, and administers training programs; writes technical reports and personnel evaluation reports; develops operating budgets and monitors expenditures; provides leadership and coordinates activities of technical personnel.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in personnel supervision, and 3 for field experience in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (10/85).

NWO-724X-002

Ordnance Technician (Submarine)

724X

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Submarine Ordnance Technician Warrant Officer from Fire Control Technician (FT), Fire Control Technician, Ballistic Missile Fire Control (FTB), Fire Control Technician, Gun Fire Control (FTG), Fire Control Technician, Surface Missile Fire Control (FTM), Gunner's Mate (GM), Gunner's Mate, Guns (GMG), Gunner's Mate Missiles (GMM), Gunner's Mate Technician (GMT), Missile Technician (MT), or Torpedoman's Mate (TM).

Description

Serves as an officer technical specialist in ballistic missile weapons systems including missile, missile launch, missile fire control and warhead subsystems; trains and supervises personnel engaged in assembly, installation, operation, testing, maintenance and repair of ballistic missile systems; plans, develops, and administers training programs; writes technical reports and personnel evaluation reports; develops operating budgets and monitors expenditures; provides leadership and coordinates activities of technical personnel.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in personnel supervision, and 3 for field experience in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (10/85).

NWO-724X-003

Repair Technician (Submarine)

724X

Exhibit Dates: 4/75–Present.

Career Pattern

May have progressed to Repair Technician (Submarine) Warrant Officer from Hull Maintenance Technician (HT), Molder (ML), or Patternmaker (PM).

Description

Serves as an officer technical specialist in the maintenance and repair of submarine hull, structure, and associated fittings; supervises and trains personnel whose duties involve woodworking, metalworking, foundry operations, patternmaking, piping and drainage, plate welding, pressure hull welding, high pressure pipe welding, nuclear power plant component welding, nondestructive test inspections, visual test, magnetic particle test, penetrant test, and ultrasonic test operations and radiography; analyzes problems with equipment and operations, finds solutions, and takes corrective action; has knowledge of supervision and training, personnel policies, legal procedures, leadership and management techniques, and communication methods; writes reports and provides technical advice.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 4 for field experience in management (10/84).

NWO-725X-001

Nuclear Power Technician, Submarine

725X

Description

Use the recommendation in exhibit NOW-740X-001.

NWO-726X-001

Submarine Ordnance Technician

726X

Exhibit Dates: 4/75–Present.

Career Pattern

May have progressed to Submarine Ordnance Technician Warrant Officer from Fire Control Technician (FT), Fire Control Technician, Ballistic Missile Fire Control (FTB), Fire Control Technician, Gun Fire Control (FTG), Fire Control Technician, Surface Missile Fire Control (FTM), Gunner's Mate (GM), Gunner's Mate, Guns (GMG), Gunner's Mate Missiles (GMM), Gunner's Mate Technician (GMT), Missile Technician (MT), or Torpedoman's Mate (TM).

Description

Serves as an officer technical specialist in ballistic missile weapons systems including missile, missile launch, missile fire control and warhead subsystems; trains and supervises personnel engaged in assembly, installation, operation, testing, maintenance and repair of ballistic missile systems; plans, develops, and administers training programs; writes technical reports and personnel evaluation reports; develops operating budgets and monitors expenditures; provides leadership and coordinates activities of technical personnel.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in personnel supervision, and 3 for field experience in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (10/85).

NWO-727X-001

Submarine Underwater Ordnance Technician

727X

Exhibit Dates: 4/75–6/86. (Effective 6/86, 727X was discontinued.)

Career Pattern

May have progressed to Submarine Underwater Ordnance Technician Warrant Officer from Mineman (MN) or Torpedoman's Mate (TM).

Description

Serves as an officer technical specialist in submarine underwater ordnance, including torpedoes, nuclear weapons, mines, signalling and evasion devices; trains and supervises personnel engaged in assembly, installation, operation, testing, maintenance, and repair of torpedoes, torpedo tubes, torpedo handling equipment, nuclear weapons, mines, signalling and evasion devices; plans, develops, and administers training programs; writes technical reports and personnel evaluation reports; develops operating budgets and monitors expenditures; provides leadership and coordinates activities of technical personnel.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in personnel supervision, and 3 for field experience in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (10/85).

NWO-728X-001

Electronics Technician (Submarine)

728X

Exhibit Dates: 4/75–Present.

Career Pattern

May have progressed to Electronics Technician (Submarine) Warrant Officer from: Data Systems Technician (DS), Electronics Technician (ET), Electronics Warfare Technician (EW), Fire Control Technician (FT), Fire Control Technician, Ballistic Missile Fire Control (FTB), Fire Control Technician, Gun Fire Control (FTG), Fire Control Technician, Surface MIssile Fire Control (FTM), Operations Specialist (OS), Ocean Systems Technician (OT), or Sonar Technician (ST).

Description

Serves as an officer technical specialist in the field of electronics; supervises those persons involved with the installation, operation, and maintenance of electronic systems; plans, organizes, and manages the activities of technical personnel; provides leadership necessary to guide personnel and develop individual responsibility; provides technical expertise to lower level personnel; writes reports and provides advice about electronic systems.

Recommendation

In the lower-division baccalaureate/associate degree category, 1 semester hour in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 for field experience in management, and 4 for field experience in electronics (1/84).

NWO-729X-001

Submarine Communication Technician

729X

Exhibit Dates: 6/83–1/87. (Effective 1/87, the designator 729X was combined with 719X; see exhibit NWO-719X-002.)

Career Pattern

May have progressed to Submarine Communication Technician Warrant Officer from Radioman (RM).

Description

Serves as an officer technical specialist in the operation, employment, and application of techniques, equipment, systems and procedures in submarine communications, with practical experience in these areas; assists and advises commands in communication planning, direction and control, and in the employment and utilization of associated facilities and installations; organizes, supervises, and directs performance of communications personnel; assists in the administration of on-board training programs, facilities, and services; plans, develops, and administers training programs; writes technical reports and personnel evaluation reports; develops operating budgets and monitors expenditures; provides leadership and coordinates activities of technical personnel.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in personnel supervision, and 3 for field experience in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (10/85).

NWO-731X-001

Aviation Boatswain

731X

Exhibit Dates: 4/75–Present.

Career Pattern

May have progressed to Aviation Boatswain Warrant Officer from: Aviation Boatswain's Mate (AB), Aviation Boatswain's Mate, Launching and Recovery Equipment (ABE), Aviation Boatswain's Mate Fuels (ABF), or Aviation Boatswain's Mate, Aircraft Handling (ABH).

Description

Serves as an officer technical specialist in aircraft handling and support operations aboard ship; plans and supervises loading, spotting, launching, recovering, and fueling aboard aircraft carriers and other aircraft-capable ships; supervises the maintenance and operation of aircraft catapults, arresting gear, aircraft fueling systems, and aircraft crash, fire, and salvage operations; writes technical reports and personnel evaluation reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in personnel supervision, and 3 for field experience in aviation management. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (3/85).

NWO-732X-001

Aviation Operations Technician

732X

Exhibit Dates: 4/75–Present.

Career Pattern

May have progressed to Aviation Operations Technician Warrant Officer from: Aviation Antisubmarine Warfare Operator (AW) Acoustic, Non-acoustic, or Helicopter.

Description

Serves as a officer technical specialist in either the field or air traffic control or air antisubmarine welfare. If serves in the field of air traffic control, control, performs the following duties: organizes and supervises control tower operations, base operations, heliport operations, surveillance and approach radars, approach/departure control radars, planning airspace utilization, air traffic control procedures and training programs for qualifications of air traffic controller; coordinates operational procedures with F.A.A., U.S. military and foreign air traffic control facilities; employs a broad knowledge of federal air regulations, terminal and enroute air traffic control procedures and planning, and must have a knowledge of ground to air communications, radar operations, recording equipment, teletype and land line communications, navigational aids and weather. IF serves in the field of air antisubmarine warfare, performs the following duties: briefs and debriefs operational flight crews; evaluates and determines inflight operational efficiency of sensor system components and sensor operations; supervises preflight, inflight, and postflight inspections of Antisubmarine warfare equipment, collection, preparation and transmisson of data to appropriate analysis agencies; flies in support of mission of unit to which assigned; has board knowledge of the characteristics and employment of U.S. and foreign submarines, warships, small craft, merchant ships and principles of radar, magnetic detection, electronic countermeasures, and underwater acoustics; writes technical reports and personnel evaluation reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in personnel supervision, and 3 for field experience in aviation management. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (3/85).

NWO-733X-001

UNDERWATER ORDNANCE TECHNICIAN (SURFACE)

733X

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Surface Underwater Ordnance Technician Warrant Officer from Mineman (MN) or Torpedoman's Mate (TM).

Description

Serves as an officer technical specialist in underwater mines, including the MK 60 Anti-Submarine mine; trains and supervises personnel engaged in assembly, installation, operation, test, maintenance, and repair of bottom and moored mines, mobile mine propulsion units, and mine surface launch equipment; plans, develops, and administers training programs; writes technical reports and personnel evaluation reports; develops operating budgets and monitors expenditures; provides leadership and coordinates activities of technical personnel.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in personnel supervision, and 3 for field experience in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (10/85).

NWO-733X-002

UNDERWATER ORDNANCE TECHNICIAN (SUBMARINE)

733X

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Submarine Underwater Ordnance Technician Warrant Officer from Mineman (MN) or Torpedoman's Mate (TM).

Description

Serves as an officer technical specialist in submarine underwater ordnance, including torpedoes, nuclear weapons, mines, signalling and evasion devices; trains and supervises personnel engaged in assembly, installation, operation, testing, maintenance, and repair of torpedoes, torpedo tubes, torpedo handling equipment, nuclear weapons, mines, signalling and evasion devices; plans, develops, and administers training programs; writes technical reports and personnel evaluation reports; develops operating budgets and monitors expenditures; provides leadership and coordinates activities of technical personnel.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in personnel supervision, and 3 for field experience in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (10/85).

NWO-734X-001

AVIATION MAINTENANCE TECHNICIAN

734X

Exhibit Dates: 4/75–Present.

Career Pattern

May have progressed to Aviation Maintenance Technician Warrant Officer from: Aviation Machinist's Mate (AD), Aviation Machinist's Mate, Jet Engine Mechanic (ADJ), Aviation Machinist's Mate, Reciprocating Engine Mechanic (ADR), Aviation Structural Mechanic (AM), Aviation Structural Mechanic, Safety Equipment (AME), Aviation Structural Mechanic, Hydraulics (AMH), Aviation Structural Mechanic, Structures (AMS), Aviation Support Equipment Technician (AS), Aviation Support Equipment Technician, Electrical (ASE), Aviation Support Equipment Technician, Hydraulics and Structures (ASH), Aviation Support Equipment Technician, Mechanical (ASM), Aviation Maintenance Administrationman (AZ), Aircraft Maintenanceman (AF), or Aircrew Survival Equipmentman (PR).

Description

Serves as an officer technical specialist in the field of aircraft maintenance aboard ship and ashore; plans, organizes, and manages the activities of aviation maintenance personnel; may serve as assistant to aircraft maintenance officers or as power plant division officers; may work as technical advisors concerning the capabilities, limitations and reliability of aircraft engines, accessories, air frames and ground support, safety and survival equipment; has responsibility for the operation and upkeep of the aircraft shops and for the coordination of shop activities; plans and directs schedules of maintenance of aircraft; conducts inspections and provides necessary training; writes technical reports and personnel evaluation reports; keeps equipment maintenance records; develops operating budgets and monitors expenditures, may supervise and evaluate from 30-200 personnel.

Recommendation

In the lower-division baccalaureate/associate degree category, 6 semester hours in personnel supervision, 3 in human relations, 3 in technical report writing, and 3 in record keeping. In the upper-division baccalaureate category, 6 semester hours for field experience in management, 3 in management problems, and additional credit for field experience in management on the basis of institutional evaluation (5/83).

NWO-736X-001

AVIATION ORDNANCE TECHNICIAN

736X

Exhibit Dates: 4/75–Present.

Career Pattern

May have progressed to Aviation Ordnance Technician Warrant Officer from Aviation Ordnanceman (AO) or Gunner's Mate Technician (GMT).

Description

Serves as an officer technical specialist in the uses, capabilities, limitations, and reliability of aviation ordnance, handling equipment, and aircraft armament; supervises and directs the arming/dearming of aircraft and the requisitioning, stowing, handling, testing, disassembly, assembly, installation, operation, maintenance, and repair of aviation ordnance, handling equipment and aircraft armament; supervises and directs the stowage, testing, and installation of aircraft missiles; interprets, publicizes, and ensures compliance with regulations and safety precautions governing the handling and stowing of aircraft ammunition, aircraft missiles, pyrotechnics, and explosives; plans, develops, and administers training programs; writes technical reports and personnel evaluation reports; develops operating budgets and monitors expenditures; provides leadership and coordinates the activities of technical personnel.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in personnel supervision, and 3 for field experience in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (10/85).

NWO-738X-001

AVIATION ELECTRONICS TECHNICIAN

738X

Exhibit Dates: 4/75–Present.

Career Pattern

May have progressed to Aviation Electronics Technician Warrant Officer from:

Aviation Electrician's Mate (AE), Aviation Electronic's Technician (AT), Aviation Fire Control Technician (AQ), Aviation Antisubmarine Warfare Technician (AX), or Tradevman (TD).

Description

Serves as an officer technical specialist in the field of aviation electronics (avionics) in supervisory positions on aircraft aboard ship and at shore facilities; serves as technical specialist/advisor to higher authority; supervises and directs practices and procedures for servicing, testing, and maintaining aviation electrical, electronic, instrument, and test equipment; serves as avionic officer, support officer, electronics officer, and avionic/weapons division officer; organizes, supervises, and directs avionic/electronic maintenance facilities; conducts active maintenance and repair programs; coordinates avionic work with other aircraft maintenance work; trains others in the use of avionic equipment, their capabilities, and limitations; writes reports and provides advice about electronic systems.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications and 3 in aviation maintenance systems. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (1/84).

NWO-739X-001

AIR TRAFFIC CONTROL TECHNICIAN

739X

Exhibit Dates: 1/78–6/86. (Effective 6/86, 739X was discontinued.)

Career Pattern

May have progressed to Air Traffic Control Technician Warrant Officer from Air Traffic Controller (AC).

Description

Serves as an officer technical specialist in the field of air traffic control; supervises control towers, base operations, heliport operations, surveillance and precision approach radars, approach/departure control radars, carrier air traffic control center (CATTC) operations, airspace acquisition, training programs for qualifications of air traffic controllers; assists in planning air traffic control procedures; assists in coordination of operational procedures with FAA, U.S. military and foreign air traffic control facilities; employs a broad knowledge of federal air regulations, terminal and enroute air traffic control procedures, air traffic control planning, and Navy procedural criteria, and international civil aviation organization procedures; demonstrates knowledge of ground to air communications, radar operations, recording equipment, teletype and land line communications, navigational aids and weather; plans, develops, and administers training programs; writes technical reports and personnel evaluation reports; develops operating budgets and monitors expenditures; provides leadership and coordinates activities of technical personnel.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in personnel supervision, and 3 for field experience in air traffic management. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management. In addition, see the credit recommendation in exhibit NER-AC-001; grant credit for the most recent enlisted rank the individual held before progressing to warrant officer (10/85).

NWO-740X-001

NUCLEAR POWER TECHNICIAN

740X

Exhibit Dates: 4/75–Present.

Career Pattern

This LDO designator was formerly 715X, Nuclear Power Technician, Surface and 725X Nuclear Power Technician, Submarine. May have progressed to Nuclear Power Technician Warrant Officer from Electrician's Mate (EM), Electronics Technician (ET), Interior Communications Electrician (IC), or Machinist's Mate (MM).

Description

Serves as an officer technical specialist in the repair, maintenance, and operation of Naval nuclear propulsion plants, nuclear ship systems, and associated equipment; coordinates and supervises skilled craftsmen and administrative support personnel; provides technical assistance in the overhaul, refueling, and decontamination of nuclear propulsion plants; monitors and supervises nuclear propulsion plant, chemical analysis and chemistry control practices and procedures, as well as quality assurance of nuclear work; plans, develops, and administers training programs; writes technical reports and personnel evaluation reports; develops operating budgets and monitors expenditures; provides leadership and coordinates activities of technical personnel.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in personnel supervision,and 3 for field experience in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (10/85).

NWO-741X-001

AVIATION MAINTENANCE TECHNICIAN

741X

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Aviation Maintenance Technician Warrant Officer from: Aviation Machinist's Mate (AD), Aviation Machinist's Mate, Jet Engine Mechanic (ADJ), Aviation Machinist's Mate, Reciprocating Engine Mechanic (ADR), Aviation Structural Mechanic (AM), Aviation Structural Mechanic, Safety Equipment (AME), Aviation Structural Mechanic, Hydraulics (AMH), Aviation Structural Mechanic, Structures (AMS), Aviation Support Equipment Technician (AS), Aviation Support Equipment Technician, Electrical (ASE), Aviation Support Equipment Technician, Hydraulics and Structures (ASH), Aviation Support Equipment Technician, Mechanical (ASM), Aviation Maintenance Administrationman (AZ), Aircraft Maintenanceman (AF), or Aircrew Survival Equipmentman (PR).

Description

Serves as an officer technical specialist in the field of aircraft maintenance aboard ship and ashore; plans, organizes, and manages the activities of aviation maintenance personnel; may serve as assistant to aircraft maintenance officers or as power plant division officers; may work as technical advisors concerning the capabilities, limitations and reliability of aircraft engines, accessories, air frames and ground support, safety and survival equipment; has responsibility for the operation and upkeep of the aircraft shops and for the coordination of shop activities; plans and directs schedules of maintenance of aircraft; conducts inspections and provides necessary training; writes technical reports and personnel evaluation reports; keeps equipment maintenance records; develops operating budgets and monitors expenditures; may supervise and evaluate from 30-200 personnel.

Recommendation

In the lower-division baccalaureate/associate degree category, 6 semester hours in personnel supervision, 3 in human relations, 3 in technical report writing, and 3 in record keeping. In the upper-division baccalaureate category, 6 semester hours for field experience in management, 3 in management problems, and additional credit for field experience in management on the basis of institutional evaluation (5/83).

NWO-741X-002

SHIP'S CLERK

741X

Exhibit Dates: 4/75–Present.

Career Pattern

May have progressed to Ship's Clerk from Lithographer (LI), Journalist (JO), Postal Clerk (PC), Personnelman (PN), Yeoman (YN), Legalman (LN), or Religious Program Specialist (RP).

Description

Serves as an officer technical specialist in manpower arrangement or general administration; plans, organizes, and manages activities of personnel in one or more related management areas such as postal office, print shops, or mail department; develops management plans; reviews records and assigns personnel; prepares reports; writes directives and correspondence; serves as administrator of captain's office; reviews and edits regulations; may plan training programs and assist in career planning; analyzes data and makes recommendations; serves as specialist in Naval administration, personnel administration, and office organization.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in human relations, and 3 in office management. In the upper-division baccalaureate category, 3 semester hours in personnel management, 3 for field experience in management, 3 in management problems, and 3 in principles of management (11/83).

NWO-742X-001

DATA PROCESSING TECHNICIAN

742X

Exhibit Dates: 4/75–Present.

Career Pattern

May have progressed to Data Processing Technician from Data Processing Technician (DP) or Data Systems Technician (DS).

Description

Serves as an officer technical specialist in the field of automatic data processing utilizing both electronic digital computer and electronic accounting machine equipment; supervises personnel concerned with the preparation of data processing and operation of all automatic data processing equipment; programs, debugs, and operates interactive and batch programs; develops policy for job processing priorities; develops processing evaluation methods, work standards, and procedures manuals for programmers and analysts; prepares budgets and performs cost analysis for computer operations; provides leadership necessary to guide personnel and develop individual responsibility; responsibilities include strategic and tactical, scientific, business, and logistics data; provides technical advice on equipment and processing techniques; prepares an automatic data processing site and monitors the installation of computer hardware; ensures data integrity and computer security; orders, issues, and inventories computer supplies and repair parts; handles cost control duties; writes reports on operations; conducts training for staff and systems users in specific applications; duties vary depending on the size of the organization and the specific computer installation; writes technical reports and personnel evaluation reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in college algebra, and 1 in statistics. In the upper-division baccalaureate category, 3 semester hours in management problems, 3 in principles of management, 3 for field experience in data processing, and 3 for field experience in management (11/83).

NWO-743O-001

NUCLEAR POWER TECHNICIAN

7430

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Nuclear Power Technician Warrant Officer from Electrician's Mate (EM), Electronics Technician (ET), Interior Communications Electrician (IC), or Machinist's Mate (MM).

Description

Serves as an officer technical specialist in the repair, maintenance, and operation of Naval nuclear propulsion plants, nuclear ship systems, and associated equipment; coordinates and supervises skilled craftsmen and administrative support personnel; provides technical assistance in the overhaul, refueling, and decontamination of nuclear propulsion plants; monitors and supervises nuclear propulsion plant, chemical analysis and chemistry control practices and procedures, as well as quality assurance of nuclear work; plans, develops, and administers training programs; writes technical reports and personnel evaluation reports; develops operating budgets and monitors expenditures; provides leadership and coordinates activities of technical personnel.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in personnel supervision, and 3 for field experience in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (10/85).

NWO-743X-001

ENGINEERING TECHNICIAN (SURFACE)

743X

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Engineering Technician (Surface) Warrant Officer from: Boiler Technician (BT), Electrician's Mate (EM), Engineman (EN), Gas Turbine System Technician, Electrical (GSE), Gas Turbine System Technician, Mechanical (GSM), Instrumentman (IM), Interior Communications Electrician (IC), Machinery Repairman (MR), Machinist's Mate (MM), Opticalman (OM), or Precision Instrumentman, Master Chief (PICM).

Description

Serves as an officer technical specialist in ship's machinery, electrical power, lighting, and interior communications systems, maintenance of optical equipment, instruments, and office machinery; supervises and trains personnel in the operation and maintenance of main propulsion systems (gas turbine, diesel, and steam), refrigeration systems, fuel systems, and shipboard electrical systems; analyzes problems with equipment and operations, finds solutions, and takes corrective action; has knowledge of supervision and training, personnel policies, legal procedures, leadership and management techniques, and communication methods; writes reports and provides technical advice.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 4 for field experience in management (10/84).

NWO-743X-002

ENGINEERING (SUBMARINE)

743X

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Engineering Technician (Submarine) Warrant Officer from: Boiler Technician (BT), Electrician's Mate (EM), Engineman (EN), Gas Turbine System Technician, Electrical (GSE), Gas Turbine System Technician, Mechanical (GSM), Instrumentman (IM), Interior Communications Electrician (IC), Machinery Repairman (MR), Machinist's Mate (MM), Opticalman (OM), or Precision Instrumentman, Master Chief (PICM).

Description

Serves as an officer technical specialist in ship's machinery, electrical power, lighting, and interior communications systems, maintenance of optical equipment, instruments, and office machinery; supervises and trains personnel in the operation and maintenance of main propulsion systems (gas turbine, diesel, and steam), refrigeration systems, fuel systems and shipboard electrical systems; analyzes problems with equipment and operations, finds solutions, and takes corrective action; has knowledge of supervision and training, personnel policies, legal procedures, leadership and management techniques, and communication methods; writes reports and provides technical advice.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 4 for field experience in management (10/84).

NWO-743X-003

BANDMASTER

743X

Exhibit Dates: 4/75–6/86. (Effective 6/86, 743X was discontinued.)

Career Pattern

May have progressed to Bandmaster Warrant Officer from Musician (MU).

Description

Serves as a specialist in the fields of music and management; responsible for equipment, personnel budgets, public relations, and operations; employs a broad knowledge of instrumental and vocal techniques, band administration, musical techniques, theories, and literature; may serve as program managers, leaders of Navy bands, officers-in-charge of Navy bands providing information and administrative assistance in music matters.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in principles of public relations and 3 in operational management. In the upper-division baccalaureate category, 3 semester hours in personnel management, 3 in financial and budget management, 3 in advanced conducting, and 3 in score reading and analysis (2/86).

NWO-744X-001

CRYPTOLOGIC TECHNICIAN

744X

Exhibit Dates: 4/75–Present.

Career Pattern

May have progressed to Cryptologic Technician Warrant Officer from Cryptologic Technician, Administrative (CTA), Cryptologic Technician, Interpretive (CTI), Crypotologic Technician, Maintenance (CTM), Cryptologic Technician, Communications (CTO), Cryptologic Technician, Collection (CTR), or Cryptologic Technician, Technical (CTT).

Description

Serves as an officer technical specialist in all phase of operations conducted by the Naval Security Group Command, including signals intelligence, signals security and electronic warfare; responsible for administration, personnel support, electronic maintenance, communications, and technical research in support of the operating forces and the national cryptologic effort; provides the overall technical supervision, in accordance with appropriate directives required in employing equipment and manpower resources; supervises the installation and maintenance of electrical, electro-mechanical, and electronic equipment, and the conduct of communications, administrative, or communications security functions; writes technical reports and personnel evaluation reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (2/86).

NWO-745X-001

Aviation Operations Technician

745X

Exhibit Dates: 1/65-3/75.

Career Pattern

May have progressed to Aviation Operations Technician Warrant Officer from: Aviation Antisubmarine Warfare Operator (AW) Acoustic, Non-acoustic, or Helicopter.

Description

Serves as an officer technical specialist in either the field of air traffic control or air antisubmarine warfare. If serves in the field of air traffic control, performs the following duties: organizes and supervises control tower operations, base operations, heliport operations, surveillance and approach radars, approach/departure control radars, planning airspace utilization, air traffic control procedures and training programs for qualifications of air traffic controller; coordinates operational procedures with F.A.A., U.S. military and foreign air traffic control facilities; employs a broad knowledge of federal air regulations, terminal and enroute air traffic control procedures and planning, and must have a knowledge of ground to air communications, radar operations, recording equipment, teletype and land line communications, navigational aids and weather. If serves in the field of air antisubmarine warfare, performs the following duties: briefs and debriefs operational flight crews; evaluates and determines inflight operational efficiency of sensor system components and sensor operations; supervises preflight, inflight, and postflight inspections of Antisubmarine warfare equipment, collection, preparation and transmisson of data to appropriate analysis agencies; flies in support of mission of unit to which assigned; has board knowledge of the characteristics and employment of U.S. and foreign submarines, warships, small craft, merchant ships and principles of radar, magnetic detection, electronic countermeasures, and underwater acoustics; writes technical reports and personnel evaluation reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in personnel supervision, and 3 for field experience in aviation management. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (3/85).

NWO-745X-002

Intelligence Technician

745X

Exhibit Dates: 4/75-Present.

Career Pattern

Progressed to Intelligence Technician Warrant Officer from Intelligence Specialist (IS).

Description

Supervises and directs personnel in assembling and analyzing data from a wide variety of sources and the application and employment of such data; supervises and directs personnel in preparation of material and use in planning missions and preparation of graphics including annotated photographs, plot sheets, mosaics, and overlays; plots and prepares imagery and intelligence reports; provides input to and receives data from computerized intelligence systems; maintains files including photographs, maps and charts, and photographic interpretation keys; maintains and updates intelligence libraries.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications and 3 in personnel supervision; and based on institutional evaluation of the student's experiences, an additional 3 semester hours in any of the following areas: computer science, cultural geography, political science, or principles of cartography. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (4/86).

NWO 746X-001

Aerographer

746X

Exhibit Dates: 4/75-6/86. (Effective 6/86, 746X was discontinued.)

Career Pattern

May have progressed to Aerographer Warrant Officer from Aerographer's Mate (AG).

Description

Serves as an officer technical specialist in the field of meteorology; directs, supervises, and trains military and civilian meteorological personnel in the use, operation, and operational maintenance of meteorological and oceanographic equipment, in the observation, recording, computation, analysis and prognosis of meteorological and oceanographic data, and in the preparation and dissemination of information on current and forecast meteorological and oceanographic conditions; provides technical advice concerning the capabilities, limitations, installation modification, operation, and operational maintenance of meteorological and oceanographic equipment; writes technical reports and personnel evaluation reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in personnel supervision, and 3 for field experience in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (2/86).

NWO-747X-001

Photography

747X

Exhibit Dates: 4/75-Present.

Career Pattern

May have progressed to Photography Warrant Officer from Illustrator Draftsman (DM), Intelligence Specialist (IS), Journalist (JO), and Photographer's Mate (PH).

Description

Serves as an officer technical specialist in the field of photographic and other imaging systems and equipment; directs, supervises, and trains military personnel in the use of still, motion picture, and video systems in aerial, surface and sub-surface imaging; supervises in the operation of imaging commands and activities, combat camera groups and aerial reconnaissance imaging systems; provides technical advice and assistance on all photographic and other imaging and imaging support matters; write technical reports and personnel evaluation reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in personnel supervision, and 3 for field experience in photographic (or image) theory and technology. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (3/86).

NWO-748X-001

Explosive Ordnance Disposal
Technician

748X

Exhibit Dates: 4/75-Present.

Career Pattern

May have progressed to Explosive Ordnance Disposal Technician Warrant Officer from any rating; must be qualified in Explosive Ordnance Disposal (EOD).

Description

Serves as an officer technical specialist in the methods of detection, identification, field evaluation, recovery, removal, disposal, and rendering safe of all types of U.S. and foreign explosive ordnance, explosives, and demolition materials and in the technical escort of chemical and biological warfare agents; plans and supervises the activities of personnel engaged in diving and explosive ordnance disposal operations, involving all types of U.S. and foreign munitions, conventional and improvised; supervises the repair and modification of explosive ordnance disposal tools, equipment, and material; supervises the procurement, storage, issue, security, and preservation of explosive ordnance disposal equipment, material, and components; inspects and evaluates unidentified explosive ordnance items and determines the proper method of recovery, removal, disposal, or rendering safe of such items; supervises technical escort missions; performs airborne techniques; provides Secret Service with explosive ordnance disposal support for presidential and other VIP protection; supervises the activities of personnel engaged in diving and/or underwater recovery operations; plans, develops, and administers training programs; writes technical reports and personnel evaluation reports; develops operating budgets and monitors expenditures; provides leadership and coordinates activities of technical personnel.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in personnel supervision, and 3 for field experience in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (10/85).

NWO-749X-001

Security Technician

749X

Exhibit Dates: 4/81–Present.

Career Pattern

May have progressed to Security Technician Warrant Officer from Master-At-Arms (MA).

Description

Serves as an officer technical specialist in matters of law enforcement, physical security, and corrections; plans, organizes, and supervises physical security programs aboard naval ships and activities; establishes and maintains access/egress systems providing for detection/prevention of sabotage and theft; plans and directs law enforcement programs to include aggressive contraband control initiatives; supervises operations of brigs afloat; plans, develops, and administers training programs; writes technical reports and personnel evaluation reports; develops operating budgets and monitors expenditures; provides leadership and coordinates activities of technical personnel.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in principles of security organization and administration and 3 in personnel distribution and deployment. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in budget administration, and 6 for field experience in management (12/85).

NWO-751X-001

Supply Corps

751X

Exhibit Dates: 4/75–Present.

Career Pattern

May have progressed to Supply Corps Warrant Officer from Aviation Storekeeper (AK), Disbursing Clerk (DK) Mess Management Specialist (MS), Ship's Serviceman (SH), or Storekeeper (SK).

Description

Serves as an officer technical specialist in the field of supply, including fiscal accounting and disbursing, material distribution and control, operation of ship's stores, Navy exchanges, and commissary stores; directs and administers supply activities; interprets department regulations and determines policies and procedures; responsible for the accounting and disbursing of funds and distribution of supplies; develops and maintains proper budgeting fiscal policies; directs stock accounting systems and inventory control methods and systems; disposes of excess and obsolete stock; stores and distributes material; utilizes a broad knowledge of logistics procedures, transportation systems, distribution concepts, budgeting and accounting policies, retail operations, inventory control techniques, and material management; writes technical reports and personnel evaluation reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in personnel supervision, and 3 for field experience in supply management. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 3 in budget administration, and 3 for field experience in management (3/86).

NWO-752X-001

Food Service

752X

Exhibit Dates: 4/75–Present.

Career Pattern

May have progressed to Food Service Warrant Officer from Mess Management Specialist (MS).

Description

Serves as an officer technical specialist in the field of food service and the administration of messing activities afloat and ashore; directs and administers food service activities; interprets department regulations, and determines policies and procedures; responsible for the receipt, issue, storage, and preservation of food items; administers financial and operational controls of food service operations; responsible for the auditing and rendering of financial returns; manages food service operations; utilizes a broad knowledge of proper budgeting and fiscal policies, management accounting, progress and statistical reporting, menu and nutritional planning, food handling and storage, and sanitation requirements and techniques.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in nutrition planning and menu planning, and 3 for field experience in food service operations. In the upper-division baccalaureate category, 3 semester hours in personnel management, 3 in food service management, 3 in budget administration, and 3 for field experience in management (3/86).

NWO-753X-001

Civil Engineer Corps

753X

Exhibit Dates: 4/75–Present.

Career Pattern

May have progressed to Civil Engineer Corps Warrant Officer from Builder (BU), Construction Electrician (CE), Construction Mechanic (CM), Illustrator Draftsman (DM), Engineering Aid (EA), Equipment Operator (EO), Steelworker (SW), Utilitiesman (UT), Master Chief Constructionman (CUCM), or Master Chief Equipmentman (EQCM).

Description

Serves as an officer technical specialist in the field of horizontal and vertical construction, facilities maintenance, utilities, and automotive and construction equipment; helps plan, coordinate, direct and supervise the technical, operational, training and administrative responsibilities of Naval construction force units; assists in the planning, scheduling, operational and technical responsibilities of public works departments within the Navy shore establishment; supervises personnel engaged in horizontal and vertical construction, maintenance, and repair of buildings, airfields, hardstands, waterfront structures, and utilities systems, and in the operation, testing, maintenance, and repair of allied plants and automotive and construction equipment; writes technical reports and personnel evaluation reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in personnel supervision, and 3 for field experience in civil engineering. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 3 in budget administration, and 3 for field experience in management (3/86).

NWO-754O-001

Nuclear Power Technician

7540

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Nuclear Power Technician Warrant Officer from Electrician's Mate (EM), Electronics Technician (ET), Interior Communications Electrician (IC), or Machinist's Mate (MM).

Description

Serves as an officer technical specialist in the repair, maintenance, and operation of Naval nuclear propulsion plants, nuclear ship systems, and associated equipment; coordinates and supervises skilled craftsmen and administrative support personnel; provides technical assistance in the overhaul, refueling, and decontamination of nuclear propulsion plants; monitors and supervises nuclear propulsion plant, chemical analysis and chemistry control practices and procedures, as well as quality assurance of nuclear work; plans, develops, and administers training programs; writes technical reports and personnel evaluation reports; develops operating budgets and monitors expenditures; provides leadership and coordinates activities of technical personnel.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in personnel supervision,and 3 for field experience in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (10/85).

NWO-754X-001

Engineering Technician (Surface)

754X

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Engineering Technician (Surface) Warrant Officer from: Boiler Technician (BT), Electrician's Mate (EM), Engineman (EN), Gas Turbine System Technician, Electrical (GSE), Gas Turbine System Technician, Mechanical (GSM), Instrumentman (IM), Interior Communications Electrician (IC), Machinery

Repairman (MR), Machinist's Mate (MM), Opticalman (OM), or Precision Instrumentman, Master Chief (PICM).

Description

Serves as an officer technical specialist in ship's machinery, electrical power, lighting, and interior communications systems, maintenance of optical equipment, instruments, and office machinery; supervises and trains personnel in the operation and maintenance of main propulsion systems (gas turbine, diesel, and steam), refrigeration systems, fuel systems, and shipboard electrical systems; analyzes problems with equipment and operations, finds solutions, and takes corrective action; has knowledge of supervision and training, personnel policies, legal procedures, leadership and management techniques, and communication methods; writes reports and provides technical advice.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 4 for field experience in management (10/84).

NWO-754X-002

Engineering Technician (Submarine)

754X

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Engineering Technician (Submarine) Warrant Officer from: Boiler Technician (BT), Electrician's Mate (EM), Engineman (EN), Gas Turbine System Technician, Electrical (GSE), Gas Turbine System Technician, Mechanical (GSM), Instrumentman (IM), Interior Communications Electrician (IC), Machinery Repairman (MR), Machinist's Mate (MM), Opticalman (OM), or Precision Instrumentman, Master Chief (PICM).

Description

Serves as an officer technical specialist in ship's machinery, electrical power, lighting, and interior communications systems, maintenance of optical equipment, instruments, and office machinery; supervises and trains personnel in the operation and maintenance of main propulsion systems (gas turbine, diesel, and steam), refrigeration systems, fuel systems and shipboard electrical systems; analyzes problems with equipment and operations, finds solutions, and takes corrective action; has knowledge of supervision and training, personnel policies, legal procedures, leadership and management techniques, and communication methods; writes reports and provides technical advice.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 4 for field experience in management (10/84).

NWO-754X-003

Physician's Assistant

754X

Exhibit Dates: 4/75–4/89. (Effective 4/89, 754X was discontinued.)

Career Pattern

May have progressed to Physician's Assistant Warrant Officer from Hospital Corpsman (HM).

Description

Serves as an officer technical specialist, qualified by academic and practical training to provide patient service under the supervision and direction of a licensed physician; performs diagnostic and therapeutic tasks; in support of a primary care physician, engages in continuing medical education, health maintenance, and community health; has practical training in principles of education and applied psychology as it relates to their day-to-day clinical activities; may serve in Naval hospitals, clinics, and branch clinics. NOTE: Appointment to Physician's Assistant Warrant Officer is based upon graduation from an accredited Physician's Assistant program and satisfactory completion of the appropriate licensing examination.

Recommendation

In the upper-division baccalaureate category, 6 semester hours for field experience in management, 6 in methods of instruction, and 2 in applied psychology. In the graduate degree category, 3 semester hours in educational principles (2/86).

NWO-757X-001

Operations Technician (Submarine)

757X

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Operations Technician (Submarine) Warrant Officer from Electronics Warfare Technician (EW), Operations Specialist (OS), Ocean Systems Technician (OT), Quartermaster (QM), Radioman (RM), Signalman (SM), or Sonar Technician (ST).

Description

Serves as an officer technical specialist in the operation, employment, and application of techniques, equipment, systems and procedures in operations and communications, with practical experience in these areas; assists and advises commands in operations and communications planning, direction and control, and in the employment and utilization of associated facilities and installations; organizes, supervises, and directs performance of operations and communications personnel; assists in the administration of onboard training programs, facilities, and services; plans, develops, and administers training programs; writes technical reports and personnel evaluation reports; develops operating budgets and monitors expenditures; provides leadership and coordinates activities of technical personnel.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in personnel supervision, and 3 for field experience in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience for management (10/85).

NWO-760X-001

Aviation Boatswain

760X

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Aviation Boatswain Warrant Officer from: Aviation Boatswain's Mate (AB), Aviation Boatswain's Mate, Launching and Recovery Equipment (ABE), Aviation Boatswain's Mate Fuels (ABF), or Aviation Boatswain's Mate, Aircraft Handling (ABH).

Description

Serves as an officer technical specialist in aircraft handling and support operations aboard ship; plans and supervises loading, spotting, launching, recovering, and fueling aboard aircraft carriers and other aircraft-capable ships; supervises the maintenance and operation of aircraft catapults, arresting gear, aircraft fueling systems, and aircraft crash, fire, and salvage operations; writes technical reports and personnel evaluation reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in personnel supervision, and 3 for field experience in aviation management. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (3/85).

NWO-761X-001

Aviation Electronics Technician

761X

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Aviation Electronics Technician Warrant Officer from: Aviation Electrician's Mate (AE), Aviation Electronic's Technician (AT), Aviation Fire Control Technician (AQ), Aviation Antisubmarine Warfare Technician (AX), or Tradevman (TD).

Description

Serves as an officer technical specialist in the field of aviation electronics (avionics) in supervisory positions on aircraft aboard ship and at shore facilities; serves as technical specialist/advisor to higher authority; supervises and directs practices and procedures for servicing, testing, and maintaining aviation electrical, electronic, instrument, and test equipment; serves as avionic officer, support officer, electronics officer, and avionic/weapons division officer; organizes, supervises, and directs avionic/electronic maintenance facilities; conducts active maintenance and repair programs; coordinates avionic work with other aircraft maintenance work; trains others in the use of avionic equipment, their capabilities, and limitations; writes reports and provides advice about electronic systems.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications and 3 in aviation maintenance systems. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (1/84).

NWO-762X-001

INTELLIGENCE TECHNICIAN

762X

Exhibit Dates: 1/65–3/75.

Career Pattern

Progressed to Intelligence Technician Warrant Officer from Intelligence Specialist (IS).

Description

Supervises and directs personnel in assembling and analyzing data from a wide variety of sources and the application and employment of such data; supervises and directs personnel in preparation of material and use in planning missions and preparation of graphics including annotated photographs, plot sheets, mosaics, and overlays; plots and prepares imagery and intelligence reports; provides input to and receives data from computerized intelligence systems; maintains files including photographs, maps and charts, and photographic interpretation keys; maintains and updates intelligence libraries.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications and 3 in personnel supervision; and based on institutional evaluation of the student's experiences, an additional 3 semester hours in any of the following areas: computer science, cultural geography, political science, or principles of cartography. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (4/86).

NWO-763X-001

AVIATION OPERATIONS TECHNICIAN

763X

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Aviation Operations Technician Warrant Officer from Aviation Antisubmarine Warfare Operator (AW) Acoustic, Non-acoustic, or Helicopter.

Description

Serves as an officer technical specialist in either the field or air traffic control or air antisubmarine welfare. If serves in the field of air traffic control, control, performs the following duties: organizes and supervises control tower operations, base operations, heliport operations, surveillance and approach radars, approach/departure control radars, planning airspace utilization, air traffic control procedures and training programs for qualifications of air traffic controller; coordinates operational procedures with F.A.A., U.S. military and foreign air traffic control facilities; employs a broad knowledge of federal air regulations, terminal and enroute air traffic control procedures and planning, and must have a knowledge of ground to air communications, radar operations, recording equipment, teletype and land line communications, navigational aids and weather. If serves in the field of air antisubmarine warfare, performs the following duties: briefs and debriefs operational flight crews; evaluates and determines inflight operational efficiency of sensor system components and sensor operations; supervises preflight, inflight, and postflight inspections of antisubmarine warfare equipment, collection, preparation and transmisson of data to appropriate analysis agencies; flies in support of mission of unit to which assigned; has broad knowledge of the characteristics and employment of U.S. and foreign submarines, warships, small craft, merchant ships and principles of radar, magnetic detection, electronic countermeasures, and underwater acoustics; writes technical reports and personnel evaluation reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in personnel supervision, and 3 for field experience in aviation management. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (3/85).

NWO-764X-001

COMMUNICATIONS TECHNICIAN

764X

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Cryptologic Technician Warrant Officer from Cryptologic Technician, Administrative (CTA), Cryptologic Technician, Interpretive (CTI), Crypotologic Technician, Maintenance (CTM), Cryptologic Technician, Communications (CTO), Cryptologic Technician, Collection (CTR), or Cryptologic Technician, Technical (CTT).

Description

Serves as an officer technical specialist in all phase of operations conducted by the Naval Security Group Command, including signals intelligence, signals security and electronic warfare; responsible for administration, personnel support, electronic maintenance, communications, and technical research in support of the operating forces and the national cryptologic effort; provides the overall technical supervision, in accordance with appropriate directives required in employing equipment and manpower resources; supervises the installation and maintenance of electrical, electro-mechanical, and electronic equipment, and the conduct of communications, administrative, or communications security functions; writes technical reports and personnel evaluation reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (2/86).

NWO-766O-001

NUCLEAR POWER TECHNICIAN

766O

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Nuclear Power Technician Warrant Officer from Electrician's Mate (EM), Electronics Technician (ET), Interior Communications Electrician (IC), or Machinist's Mate (MM).

Description

Serves as an officer technical specialist in the repair, maintenance, and operation of Naval nuclear propulsion plants, nuclear ship systems, and associated equipment; coordinates and supervises skilled craftsmen and administrative support personnel; provides technical assistance in the overhaul, refueling, and decontamination of nuclear propulsion plants; monitors and supervises nuclear propulsion plant, chemical analysis and chemistry control practices and procedures, as well as quality assurance of nuclear work; plans, develops, and administers training programs; writes technical reports and personnel evaluation reports; develops operating budgets and monitors expenditures; provides leadership and coordinates activities of technical personnel.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in personnel supervision, and 3 for field experience in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (10/85).

NWO-766X-001

ELECTRONICS TECHNICIAN (SURFACE)

766X

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Electronics Technician (Surface) Warrant Officer from: Data Systems Technician (DS), Electronics Technician (ET), Electronics Warfare Technician (EW), Fire Control Technician (FT), Fire Control Technician, Ballistic Missile Fire Control Technician, (FTB), Fire Control Technician, Gun Fire Control (FTG), Fire Control Technician, Surface Missile Fire Control (FTM), Operations Specialist (OS), Ocean Systems Technician (OT), or Sonar Technician (ST).

Description

Serves as an officer technical specialist in the field of non-nuclear electronics including electronic theory and equipment and systems used in navigation; directs the detection, tracking, recognition and identification of ship, aircraft and missiles; supervises the installation, operation, and maintenance of all non-nuclear electronics systems installed in units of the surface force; supervises those persons involved in installing, modifying, testing, calibrating, maintaining, and repairing electronics equipment; serves as expert troubleshooter who analyzes problems with equipment and operations, finds solutions, and takes corrective action; has knowledge of supervision and training, personnel policies, legal procedures, leadership and management techniques and communication methods; writes reports and provides technical advice about electronic systems.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 3 for field experience in management, and 2 for field experience in electronics (1/84).

NWO-766X-002

ELECTRONICS TECHNICIAN (SUBMARINE)

766X

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Electronics Technician (Submarine) Warrant Officer from: Data Systems Technician (DS), Electronics Technician (ET), Electronics Warfare Technician (EW), Fire Control Technician (FT), Fire Control Technician, Ballistic Missile Fire Control (FTB), Fire Control Technician, Gun Fire Control (FTG), Fire Control Technician, Surface MIssile Fire Control (FTM), Operations Specialist (OS), Ocean Systems Technician (OT), or Sonar Technician (ST).

Description

Serves as an officer technical specialist in the field of electronics; supervises those persons involved with the installation, operation, and maintenance of electronic systems; plans, organizes, and manages the activities of technical personnel; provides leadership necessary to guide personnel and develop individual responsibility; provides technical expertise to lower level personnel; writes reports and provides advice about electronic systems.

Recommendation

In the lower-division baccalaureate/associate degree category, 1 semester hour in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 for field experience in management, and 4 for field experience in electronics (1/84).

NWO-774X-001

REPAIR TECHNICIAN (SURFACE)

774X

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Repair Technician (Surface) Warrant Officer from Hull Maintenance Technician (HT), Molder (ML), or Patternmaker (PM).

Description

Serves as an officer technical specialist in ship repair and maintenance, damage control, and firefighting procedures, techniques, and equipment; supervises and trains personnel whose duties involve electric arc-welding, oxyacetalene welding and cutting, woodworking, metalworking, boat repairs, foundry operations, patternmaking, piping and drainage, and nuclear, biological, and chemical warfare defense; analyzes problems with equipment and operations, finds solutions, and takes corrective action; has knowledge of supervision and training, personnel policies, legal procedures, leadership and management techniques, and communication methods; writes reports and provides technical advice.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 4 for field experience in management (10/84).

NWO-774X-002

REPAIR TECHNICIAN (SUBMARINE)

774X

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Repair Technician (Submarine) Warrant Officer from Hull Maintenance Technician (HT), Molder (ML), or Patternmaker (PM).

Description

Serves as an officer technical specialist in the maintenance and repair of submarine hull, structure, and associated fittings; supervises and trains personnel whose duties involve woodworking, metalworking, foundry operations, patternmaking, piping and drainage, plate welding, pressure hull welding, high pressure pipe welding, nuclear power plant component welding, nondestructive test inspections, visual test, magnetic particle test, penetrant test, and ultrasonic test operations and radiography; analyzes problems with equipment and operations, finds solutions, and takes corrective action; has knowledge of supervision and training, personnel policies, legal procedures, leadership and management techniques, and communication methods; writes reports and provides technical advice.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 4 for field experience in management (10/84).

NWO-782X-001

SHIP'S CLERK

782X

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Ship's Clerk from Lithographer (LI), Journalist (JO), Postal Clerk (PC), Personnelman (PN), Yeoman (YN), Legalman (LN), or Religious Program Specialist (RP).

Description

Serves as an officer technical specialist in manpower arrangement or general administration; plans, organizes, and manages activities of personnel in one or more related management areas such as postal office, print shops, or mail department; develops management plans; reviews records and assigns personnel; prepares reports; writes directives and correspondence; serves as administrator of captain's office; reviews and edits regulations; may plan training programs and assist in career planning; analyzes data and makes recommendations; serves as specialist in Naval administration, personnel administration, and office organization.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in human relations, and 3 in office management. In the upper-division baccalaureate category, 3 semester hours in personnel management, 3 for field experience in management, 3 in management problems, and 3 in principles of management (11/83).

NWO-783X-001

DATA PROCESSING TECHNICIAN

783X

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Data Processing Technician from Data Processing Technician (DP) or Data Systems Technician (DS).

Description

Serves as an officer technical specialist in the field of automatic data processing utilizing both electronic digital computer and electronic accounting machine equipment; supervises personnel concerned with the preparation of data processing and operation of all automatic data processing equipment; programs, debugs, and operates interactive and batch programs; develops policy for job processing priorities; develops processing evaluation methods, work standards, and procedures manuals for programmers and analysts; prepares budgets and performs cost analysis for computer operations; provides leadership necessary to guide personnel and develop individual responsibility; responsibilities include strategic and tactical, scientific, business, and logistics data; provides technical advice on equipment and processing techniques; prepares an automatic data processing site and monitors the installation of computer hardware; ensures data integrity and computer security; orders, issues, and inventories computer supplies and repair parts; handles cost control duties; writes reports on operations; conducts training for staff and systems users in specific applications; duties vary depending on the size of the organization and the specific computer installation; write technical reports and personnel evaluation reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in college algebra, and 1 in statistics. In the upper-division baccalaureate category, 3 semester hours in management problems, 3 in principles of management, 3 for field experience in data processing, and 3 for field experience in management (11/83).

NWO-785X-001

BANDMASTER

785X

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Bandmaster Warrant Officer from Musician (MU).

Description

Serves as a specialist in the fields of music and management; responsible for equipment, personnel budgets, public relations, and operations; employs a broad knowledge of instrumental and vocal techniques, band administration, musical techniques, theories, and literature; may serve as program managers, leaders of Navy bands, officers-in-charge of Navy bands providing information and administrative assistance in music matters.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in principles of public relations and 3 in operational management. In the upper-division baccalaureate category, 3 semester hours in personnel management, 3 in financial and budget management, 3 in advanced conducting, and 3 in score reading and analysis (2/86).

NWO-798X-001

Supply Corps

798X

Exhibit Dates: 1/65-3/75.

Career Pattern

May have progressed to Supply Corps Warrant Officer from Aviation Storekeeper (AK), Disbursing Clerk (DK) Mess Management Specialist (MS), Ship's Serviceman (SH), or Storekeeper (SK).

Description

Serves as an officer technical specialist in the field of supply, including fiscal accounting and disbursing, material distribution and control, operation of ship's stores, Navy exchanges, and commissary stores; directs and administers supply activities; interprets department regulations and determines policies and procedures; responsible for the accounting and disbursing of funds and distribution of supplies; develops and maintains proper budgeting fiscal policies; directs stock accounting systems and inventory control methods and systems; disposes of excess and obsolete stock; stores and distributes material; utilizes a broad knowledge of logistics procedures, transportation systems, distribution concepts, budgeting and accounting policies, retail operations, inventory control techniques, and material management; writes technical reports and personnel evaluation reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in personnel supervision, and 3 for field experience in supply management. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 3 in budget administration, and 3 for field experience in management (3/86).

NWO-799X-001

Food Service

799X

Exhibit Dates: 1/65-3/75.

Career Pattern

May have progressed to Food Service Warrant Officer from Mess Management Specialist (MS).

Description

Serves as an officer technical specialist in the field of food service and the administration of messing activities afloat and ashore; directs and administers food service activities; interprets department regulations, and determines policies and procedures; responsible for the receipt, issue, storage, and preservation of food items; administers financial and operational controls of food service operations; responsible for the auditing and rendering of financial returns; manages food service operations; utilizes a broad knowledge of proper budgeting and fiscal policies, management accounting, progress and statistical reporting, menu and nutritional planning, food handling and storage, and sanitation requirements and techniques.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in nutrition planning and menu planning, and 3 for field experience in food service operations. In the upper-division baccalaureate category, 3 semester hours in personnel management, 3 in food service management, 3 in budget administration, and 3 for field experience in management (3/86).

NWO-816X-001

Physician's Assistant

816X

Exhibit Dates: 4/71-3/75.

Career Pattern

May have progressed to Physician's Assistant Warrant Officer from Hospital Corpsman (HM).

Description

Serves as an officer technical specialist, qualified by academic and practical training to provide patient service under the supervision and direction of a licensed physician; performs diagnostic and therapeutic tasks; in support of a primary care physician, engages in continuing medical education, health maintenance, and community health; has practical training in principles of education and applied psychology as it relates to their day-to-day clinical activities; may serve in Naval hospitals, clinics, and branch clinics. NOTE: Appointment to Physician's Assistant Warrant Officer is based upon graduation from an accredited Physician's Assistant program and satisfactory completion of the appropriate licensing examination.

Recommendation

In the upper-division baccalaureate category, 6 semester hours for field experience in management, 6 in methods of instruction, and 2 in applied psychology. In the graduate degree category, 3 semester hours in educational principles (2/86).

NWO-821X-001

Aerographer

821X

Exhibit Dates: 1/65-3/75.

Career Pattern

May have progressed to Aerographer Warrant Officer from Aerographer's Mate (AG).

Description

Serves as an officer technical specialist in the field of meteorology; directs, supervises, and trains military and civilian meteorological personnel in the use, operation, and operational maintenance of meteorological and oceanographic equipment, in the observation, recording, computation, analysis and prognosis of meteorological and oceanographic data, and in the preparation and dissemination of information on current and forecast meteorological and oceanographic conditions; provides technical advice concerning the capabilities, limitations, installation, modification, operation, and operational maintenance of meteorological and oceanographic equipment; writes technical reports and personnel evaluation reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in personnel supervision, and 3 for field experience in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (2/86).

NWO-831X-001

Photography

831X

Exhibit Dates: 1/65-3/75.

Career Pattern

May have progressed to Photography Warrant Officer from Illustrator Draftsman (DM), Intelligence Specialist (IS), Journalist (JO), or Photographer's Mate (PH).

Description

Serves as an officer technical specialist in the field of photographic and other imaging systems and equipment; directs, supervises, and trains military personnel in the use of still, motion picture, and video systems in aerial, surface and sub-surface imaging; supervises in the operation of imaging commands and activities, combat camera groups and aerial reconnaissance imaging systems, provides technical advice and assistance on all photographic and other imaging and imaging support matters, write technical reports and personnel evaluation reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in personnel supervision, and 3 for field experience in photographic (or image) theory and technology. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (3/86).

NWO-849X-001

Civil Engineer

849X

Exhibit Dates: 1/65-3/75.

Career Pattern

May have progressed to Civil Engineer Warrant Officer from Builder (BU), Construction Electrician (CE), Construction Mechanic (CM), Illustrator Draftsman (DM), Engineering Aid (EA), Equipment Operator (EO), Steelworker (SW), Utilitiesman (UT), Master Chief Constructionman (CUCM), or Master Chief Equipmentman (EQCM).

Description

Serves as an officer technical specialist in the field of horizontal and vertical construction, facilities maintenance, utilities, and automotive and construction equipment; helps plan, coordinate, direct and supervise the technical, operational, training and administrative responsibilities of Naval construction force units; assists in the planning, scheduling, operational and technical responsibilities of public works departments within the Navy shore establishment; supervises personnel engaged in horizontal and vertical construction, maintenance, and repair of buildings, airfields, hardstands, waterfront structures, and utilities systems, and in the operation, testing, maintenance, and repair of allied plants and automotive and construction equipment; writes technical reports and personnel evaluation reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in personnel supervision, and 3 for field experience in civil engineering. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 3 in budget administration, and 3 for field experience in management (3/86).

Navy Limited Duty Officer Exhibits

LDO-370X-001

SUPPLY CORPS

370X

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Supply Corps Limited Duty Officer from Aviation Storekeeper (AK), Disbursing Clerk (DK), Mess Management Specialist (MS), Ship's Serviceman (SH), Storekeeper (SK), Supply Corps Warrant Officer (798X), or Food Service Warrant Officer (799X).

Description

Serves as an officer technical manager in the field or supply, including fiscal accounting and disbursing, material distribution and control, food service, ships' exchanges, and commissary stores; directs and administers supply activities; interprets department regulations and determines policies and procedures; responsible for the accounting and disbursing of funds and the distribution of supplies; develops and maintains proper budgeting and fiscal policies; directs stocks accounting system and inventory control methods and systems; disposes of excess and obsolete stock; stores and distributes material; utilizes a broad knowledge of logistics procedures, transportation systems, distribution concepts, budgeting and accounting policies, retail operations, inventory control techniques, and material management.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 3 in budget administration, and 3 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (3/86).

LDO-570X-001

CIVIL ENGINEER CORPS

570X

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Civil Engineer Corps Limited Duty Officer from Builder (BU), Construction Electrician (CE), Construction Mechanic (CM), Illustrator Draftsman (DM), Engineering Aid (EA), Equipment Operator (EO), Steelworker (SW), Utilitiesman (UT), Master Chief Equipmentman (EQCM), or Civil Engineer Corps Warrant Officer (849X).

Description

Serves as an officer technical manager in the operational field of horizontal and vertical construction, facilities maintenance, utilities, and automotive and construction equipment; helps to plan, coordinate, direct, and supervise the technical, operational, training, and administrative responsibilities of Naval construction force (NCF) units; assists in the planning, scheduling, operational and technical responsibilities of public works departments within the Navy shore establishment; supervises personnel engaged in horizontal and vertical construction, maintenance and repair of buildings, airfields, hardstands, waterfront structures, and utilities systems, and in the operation, testing, maintenance, and repair of allied plants and automotive and construction equipment.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semesters hours in technical communications and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 3 in budget management, and 3 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: leadership, project management, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (3/86).

LDO-600X-001

DECK (SURFACE)

600X

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Deck (Surface) Limited Duty Officer from Boatswain's Mate (BM), Quartermaster (QM), Signalman (SM), or Boatswain (Surface) Warrant Officer (713X).

Description

Serves as an officer technical manager in the field of seamanship and navigation; plans, supervises, and directs activities of deck and navigation personnel in performance of operational and maintenance functions; plans, develops, and administers deck navigation training programs; assists in organizing, scheduling, and supervising seamanship and navigation exercises and drills; assigns and coordinates activities of personnel under their command; writes technical reports and personnel evaluation reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (3/85).

LDO-600X-002

DECK (SUBMARINE)

600X

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Deck (Submarine) Limited Duty Officer from Boatswain's Mate (BM), Quartermaster (QM), Signalman (SM), or Boatswain (Submarine) Warrant Officer (713X).

Description

Serves as an officer technical manager in the field of seamanship, navigation, and deep sea diving; plans, supervises, and directs activities of deck, navigation, and deep sea diving personnel in performance of operational and maintenance functions; plans, develops, and administers deck, navigation, and diver training programs; assists in organizing, scheduling, and supervising seamanship and navigation exercises and drills; assigns and coordinates activities of personnel under their command; writes technical reports and personnel evaluation reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (3/85).

LDO-601X-001

OPERATIONS (SURFACE)

601X

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Operations (Surface) Limited Duty Officer from: Electronics Warfare Technician (EW), Operations Specialist (OS), Ocean Systems Technician (OT), Quartermaster (QM), Radioman (RM), Signalman (SM), Sonar Technician (ST), or Operations Surface Technician Warrant Officer (714X).

Description

Serves as an officer technical manager in the operation, employment, and application of techniques, equipment, systems, and procedures in operations and communications;

supervises and trains personnel in the operation and maintenance of operations and communications equipment and systems; plans, directs, and controls operations and communications activities; advises and assists commands in the above areas and in the employment and utilization of associated facilities and installations; writes technical reports and personnel evaluation reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (3/85).

LDO-611X-001

Deck (Surface)

611X

Exhibit Dates: 4/75–Present.

Career Pattern

May have progressed to Deck (Surface) Limited Duty Officer from Boatswain's Mate (BM), Quartermaster (QM), Signalman (SM), or Boatswain (Surface) Warrant Officer (711X).

Description

Serves as an officer technical manager in the field of seamanship and navigation; plans, supervises, and directs activities of deck and navigation personnel in performance of operational and maintenance functions; plans, develops, and administers deck navigation training programs; assists in organizing, scheduling, and supervising seamanship and navigation exercises and drills; assigns and coordinates activities of personnel under their command; writes technical reports and personnel evaluation reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (3/85).

LDO-612X-001

Operations
(Operations (Surface))

612X

Exhibit Dates: 4/75–Present.

Career Pattern

May have progressed to Operations (Surface) Limited Duty Officer from: Electronics Warfare Technician (EW), Operations Specialist (OS), Ocean Systems Technician (OT), Quartermaster (QM), Radioman (RM), Signalman (SM), Sonar Technician (ST), or Operations Surface Technician Warrant Officer (712X).

Description

Serves as an officer technical manager in the operation, employment, and application of techniques, equipment, systems, and procedures in operations and communications; supervises and trains personnel in the operation and maintenance of operations and communications equipment and systems; plans, directs, and controls operations and communications activities; advises and assists commands in the above areas and in the employment and utilization of associated facilities and installations; writes technical reports and personnel evaluation reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (3/85).

LDO-613X-001

Engineering/Repair (Surface)

613X

Exhibit Dates: 4/75–Present.

Career Pattern

May have progressed to Engineering/Repair (Surface) Limited Duty Officer from: Boiler Technician (BT), Electrician's Mate (EM), Engineman (EN), Gas Turbine System Technician, Electrical (GSE), Gas Turbine System Technician, Mechanical (GSM), Hull Maintenance Technician (HT), Instrumentman (IM), Interior Communications Electrician (IC), Machinery Repairman (MR), Machinist's Mate (MM), Molder (ML), Opticalman (OM), Patternmaker (PM), Precision Instrumentman, Master Chief (PICM), Engineering Technician (Submarine) Warrant Officer (723X), Engineering Technician (Surface) Warrant Officer (713X), Repair Technician (Submarine) Warrant Officer (724X), or Repair Technician (Surface) Warrant Officer (714X).

Description

Serves as an officer technical manager in the field of surface ship marine engineering including maintenance and repair of main propulsion (gas turbine, diesel, and steam), electrical, and auxiliary machinery and systems, ship's hull, structure and associated fittings, and practical and theoretical damage control procedures; plans, administers, and supervises the installation, operation, maintenance, and repair of equipment; makes ship alterations or designs modification; formulates, directs, and evaluates training programs; writes reports and provides technical assistance and advice; plans, organizes, and controls industrial shop production; develops and administers policy and procedures for regulating and integrating work or repair facilities.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 4 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (10/84).

LDO-615X-001

Nuclear Power, Surface

615X

Recommendation

Use the recommendation in exhibit LDO-640X-003.

LDO-615X-002

Surface Ordnance

615X

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Surface Ordnance Limited Duty Officer from Fire Control Technician (FT), Fire Control Technician, Ballistic Missile Fire Control (FTB), Fire Control Technician, Gun Fire Control (FTG), Fire Control Technician, Surface Missile Fire Control (FTM), Gunner's Mate (GM), Gunner's Mate, Guns (GMG), Gunner's Mate, Missiles (GMM), Gunner's Mate Technician (GMT), Missile Technician (MT), Torpedoman's Mate (TM), or Ordnance Technician Warrant Officer (723X or 724X).

Description

Serves as an officer technical manager with practical experience in ordnance operations; plans, supervises, trains, and directs subordinates in the operation, maintenance, and repair of ordnance equipment and related systems; assists, plans, coordinates, and advises commands and staffs in ordnance management, logistics, repair, and safety; formulates, directs, and evaluates training programs; writes reports and provides technical assistance and advice; plans, supervises, and directs activities of personnel under their command.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (10/85).

LDO-615X-003

Ordnance (Submarine)

615X

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Submarine Ordnance Limited Duty Officer from Fire Control technician (FT), Fire Control Technician, Ballistic Missile Fire Control (FTB), Fire Control Technician, Gun Fire Control (FTG), Fire Control Technician, Surface Missile Fire Control (FTM), Gunner's Mate (GM), Gunner's Mate, Guns (GMG), Gunner's Mate, Missiles (GMM), Gunner's Mate Technician (GMT), Missile Technician (MT), Torpedoman's Mate (TM), or Submarine Ordnance Technician Warrant Officer (724X).

Description

Serves as an officer technical manager in the strategic weapons and ordnance field, with practical experience in related areas; plans, supervises, trains, and directs subordinate personnel in the operation and maintenance of ordnance and related equipment; assists, plans, coordinates, advises, commands in operational, maintenance, and technical ordnance related matters; formulates, directs, and evaluates training programs; writes reports and provides technical assistance and advice; plans, supervises, and directs activities of personnel under their command.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (10/85).

LDO-616X-001

Explosive Ordnance Disposal

616X

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Explosive Ordnance Disposal Limited Duty Officer from any enlisted rating or Warrant Officer Explosive Ordnance Disposal Technician (716X); must be qualified in Explosive Ordnance Disposal (EOD).

Description

Serves as an officer technical manager in the methods of detection, identification, field evaluation, rendering safe, recovery, and disposal of all types of U.S. and foreign ordnance, explosives, and demolition materials; provides technical escort for transportation or movement, detoxification, and disposal of chemical, biological, toxicological, and etiological agents; conducts technical evaluations or ordnance for intelligence information through disassembly and stripping; may perform airborne techniques, and provide U.S. Secret Service with explosive ordnance disposal support for presidential and other VIP protection as directed; provides fleet training services on emergency destruct procedures, detection and monitoring of nuclear, biological or chemical agents; provides technical guidance, training assistance in minor underwater repair, hull inspection, and propeller replacements; plans and supervises the activities of personnel engaged in diving and explosive ordnance disposal operations, involving all types of U.S. and foreign munitions, conventional and improvised; supervises the repair and modification of explosive ordnance disposal tools, equipment and material; supervises the stowage, issue, procurement, security and preservation of explosive ordnance disposal equipment, materials and components; formulates, directs, and evaluates training programs; writes reports and provides technical assistance and advice; plans, supervises, and directs activities of personnel under their command.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (10/85).

LDO-616X-002

Surface Ordnance

616X

Exhibit Dates: 4/75–Present.

Career Pattern

May have progressed to Surface Ordnance Limited Duty Officer from Fire Control Technician (FT), Fire Control Technician, Ballistic Missile Fire Control (FTB), Fire Control Technician, Gun Fire Control (FTG), Fire Control Technician, Surface Missile Fire Control (FTM), Gunner's Mate (GM), Gunner's Mate, Guns (GMG), Gunner's Mate, Missiles (GMM), Gunner's Mate Technician (GMT), Missile Technician (MT), Torpedoman's Mate (TM), or Ordnance Technician Warrant Officer (716X).

Description

Serves as an officer technical manager with practical experience in ordnance operations; plans, supervises, trains, and directs subordinates in the operation, maintenance, and repair of ordnance equipment and related systems; assists, plans, coordinates, and advises commands and staffs in ordnance management, logistics, repair, and safety; formulates, directs, and evaluates training programs; writes reports and provides technical assistance and advice; plans, supervises, and directs activities of personnel under their command.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (10/85).

LDO-618X-001

Electronics (Surface)

618X

Exhibit Dates: 4/75–Present.

Career Pattern

May have progressed to Electronics (Surface) Limited Duty Officer from Data Systems Technician (DS), Electronic Warfare Technician (EW), Electronics Technician (ET), Fire Control Technician (FT), Fire Control Technician, Ballistic Missile Fire Control (FTB), Fire Control Technician, Gun Fire Control (FTG), Fire Control Technician, Surface Missile Fire Control (FTM), Ocean Systems Technician (OT), Operations Specialist (OS), Sonar Technician (ST), or Electronics Technician (Surface) Warrant Officer (718X).

Description

Serves as an officer technical manager in the field of non-nuclear electronics; plans, coordinates, directs, and supervises the installation, operation, and maintenance of all non-nuclear electronics systems installed in units of the surface force; conducts operational evaluations of new installations and modifications to existing systems; provides operational and technical input to the research and development community for consideration in the design and testing of electronics systems or components; prepares and distributes operator training courses and operation guidance for electronics systems; plans, schedules, and conducts training for electronics personnel; writes reports and provides technical advice about electronic systems.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 5 for field experience in management, and 2 for field experience in electronics. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (1/84).

LDO-619X-001

Surface Communications

619X

Exhibit Dates: 5/84–Present.

Career Pattern

May have progressed to Surface Communications Limited Duty Officer from Radioman (RM), or Surface Communications Technician Warrant Officer (719X).

Description

Serves as an officer technical manager in the operation, employment, and application of techniques, equipment, systems, and procedures in surface communications, with practical experience in these areas; assists and advises commands in communication planning, direction and control, and in the employment and utilization of associated facilities and installations; organizes, supervises, and directs performance of communications personnel; assists in the administration of on-board training programs, facilities, and services; formulates, directs, and evaluates training program; writes reports and provides technical assistance and advice; plans, supervises, and directs activities of personnel under their command.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (10/85).

LDO-620X-001

ADMINISTRATION

620X

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Administration Limited Duty Officer from Lithographer (LI), Journalist (JO), Postal Clerk (PC), Personnelman (PN), Yeoman (YN), Legalman (LN), Religious Program Specialist (RP) or Ship's Clerk Warrant Officer (782X).

Description

Serves as an officer technical manager in the fields of Naval and personnel administration; directs administrative and personnel offices employing a broad knowledge of navy department/fleet staff organizations and regulations; personnel responsibilities include recruitment, selection, promotion, transfer, career development, training, job analysis and discipline; administrative tasks include office organization and procedures, legal work, budget and fiscal control, space planning, work progress reporting and information dissemination, public relations activities and liaison with other military services; responsible for the preparation, publication, and distribution of manuals, handbooks, reports, newspapers and correspondence; duties vary depending on technical experience and the size of the organization; writes technical reports and personnel evaluation reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in office management, and 3 in human relations. In the upper-division baccalaureate category, 3 semester hours in personnel management, 3 in management problems, 6 for field experience in management, and 3 in principles of management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (11/83).

LDO-621X-001

DECK (SUBMARINE)

621X

Exhibit Dates: 4/75–Present.

Career Pattern

May have progressed to Deck (Submarine) Limited Duty Officer from Boatswain's Mate (BM), Quartermaster (QM), Signalman (SM), or Boatswain (Submarine) Warrant Officer (721X).

Description

Serves as an officer technical manager in the field of seamanship, navigation, and deep sea diving; plans, supervises, and directs activities of deck, navigation, and deep sea diving personnel in performance of operational and maintenance functions; plans, develops, and administers deck, navigation, and diver training programs; assists in organizing, scheduling, and supervising seamanship and navigation exercises and drills; assigns and coordinates activities of personnel under their command; writes technical reports and personnel evaluation reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 6 for field experinece in management. If the rank of lieutenant commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (3/85).

LDO-623X-001

DATA PROCESSING

623X

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Data Processing Limited Duty Officer from Data Processing Technician (DP), Data Systems Technician (DS), or Data Processing Technician Warrant Officer (783X).

Description

Serves as an officer technical specialist in the field of automatic data processing utilizing both electronic digital computer and electronic accounting machine equipment; administers the operation and maintenance of data processing installations; programs, debugs, and operates interactive and batch programs; advises in the selection of equipment; develops policy for job processing priorities; ensures data integrity and computer security; develops processing evaluation methods, work standards, and procedures manuals for programmers and analysts; conducts training for staff and for systems users; analyzes costs and prepares budget estimates for computer operations; reviews equipment design and updates hardware in use; provides the leadership necessary to guide personnel and develop individual responsibility; duties vary depending on the size of the organization and the specific computer installation; writes technical reports and personnel evaluation reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in college algebra, and 1 in statistics. In the upper-division baccalaureate category, 3 semester hours in management problems, 3 in principles of management, 3 for field experience in management, and 5 for field experience in data processing. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (11/83).

LDO-623X-002

ENGINEERING/REPAIR (SUBMARINE)

623X

Exhibit Dates: 4/75–Present.

Career Pattern

May have progressed to Engineering/Repair (Submarine) Limited Duty Officer from: Boiler Technician (BT), Electrician's Mate (EM), Engineman (EN), Gas Turbine System Technician, Electrical (GSE), Gas Turbine System Technician, Mechanical (GSM), Hull Maintenance Technician (HT), Instrumentman (IM), Interior Communications Electrician (IC), Machinery Repairman (MR), Machinist's Mate (MN), Molder (ML), Opticalman (OM), Patternmaker (PM), Precision Instrumentman, Master Chief (PICM), Engineering Technician (Submarine) Warrant Officer (723X), Engineering Technician (Surface) Warrant Officer (713X), Repair Technician (Submarine) Warrant Officer (724X), or Repair Technician (Surface) Warrant Officer (714X).

Description

Serves as an officer technical manager in the field of ship marine engineering including maintenance and repair of main propulsion (gas turbine, diesel, and steam), electrical, and auxiliary machinery and systems, ship's hull, structure and associated fittings, and practical and theoretical damage control proceures; plans, administers, and supervises the installation, operation, maintenance, and repair of equipment; makes ship alteration or designs modification; formulates, directs, and evaluates training programs; writes reports and provides technical assistance and advice; plans, organizes and controls industrial shop production; develops and administers policy and procedures for regulating and integrating work at auxiliary or repair facilities.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 4 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (10/84).

LDO-625X-001

NUCLEAR POWER, SUBMARINE

625X

Recommendation

Use the recommendation in exhibit LDO-640X-003.

LDO-626X-001

BANDMASTER

626X

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Bandmaster Limited Duty Officer from Musician (MU) or Bandmaster Warrant Officer (785X).

Description

Serves as a specialist in the fields of music and management; responsible for equipment, personnel, budgets, public relations, and operations; employs a broad knowledge of instrumental and vocal techniques, band administration, musical techniques, theories, and literature; may serve as program managers, leaders of Navy bands, officers-in-charge of Navy bands providing information and administration and assistance in music matters.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in principles of public relations and 3 in operational management. In the upper-division baccalaureate category, 3 semester hours in personnel management, 3 in financial and budget management, 3 in advanced conducting, and 3 in score reading and analysis. If the rank of Lieutenant Commander has been attained, add 3 semester hours in advanced management problems; if the rank of Commander has been attained, add 6 semester hours in advanced management problems (2/86).

LDO-626X-002

SUBMARINE ORDNANCE

626X

Exhibit Dates: 4/75–Present.

Career Pattern

May have progressed to Submarine Ordnance Limited Duty Officer from Fire Control Technician (FT), Fire Control Technician, Ballistic Missile Fire Control (FTB), Fire Control Technician, Gun Fire Control (FTG), Fire Control Technician, Surface Missile Fire Control (FTM), Gunner's Mate (GM), Gunner's Mate, Guns (GMG), Gunner's Mate, Missiles (GMM), Gunner's Mate Technician (GMT), Missile Technician (MT), Torpedoman's Mate (TM), or Submarine Ordnance Technician Warrant Officer (726X).

Description

Serves as an officer technical manager in the strategic weapons and ordnance field, with practical experience in related areas; plans, supervises, trains, and directs subordinate personnel in the operation and maintenance of ordnance and related equipment; assists, plans, coordinates, advises, commands in operational, maintenance, and technical ordnance related matters; formulates, directs, and evaluates training programs; writes reports and provides technical assistance and advice; plans, supervises, and directs activities of personnel under their command.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (10/85).

LDO-628X-001

ELECTRONICS (SUBMARINE)

628X

Exhibit Dates: 4/75–Present.

Career Pattern

May have progressed to Electronics Technician (Submarine) Limited Duty Officer 628X from: Data Systems Technician (DS), Electronics Technician (ET), Electronics Warfare Technician (EW), Fire Control Technician (FT), Fire Control Technician, Ballistic Missile Fire Control (FTB), Fire Control Technician, Gun Fire Control (FTG), Fire Control Technician, Surface Missile Fire Control (FTM), Operations Specialist (OS), Ocean Systems Technician (OT), Sonar Technician (ST), or Electronics Technician (Submarine) Warrant Officer (728X).

Description

Serves as an officer technical manager in the field of electronics; plans, coordinates, directs, and supervises the installation, operation, and maintenance of electronics systems; plans, organizes, and manages the activities of technical personnel; provides the leadership necessary to guide personnel and develop individual responsiblity for the training and growth of assigned personnel; writes reports and provides advice about electronic systems.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 3 for field experience in management, and 4 for field experience in electronics. If the rank of lieutenant commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (1/84).

LDO-629X-001

SUBMARINE COMMUNICATIONS

629X

Exhibit Dates: 6/83–Present.

Career Pattern

May have progressed to Submarine Communications Limited Duty Officer from Radioman (RM), or Submarine Communication Technician Warrant Officer (729X).

Description

Serves as an officer technical manager in the operation, employment, and application of techniques, equipment, systems and procedures in submarine communications, with practical experience in these areas; assists and advises commands in communication planning, direction and control, and in the employment and utilization of associated performance of communications personnel; assists in administration of on-board training programs, facilities, and services; formulates, directs, and evaluates training program; writes reports and provides technical assistance and advice; plans, supervises, and directs activities of personnel under their command.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (10/85).

LDO-630O-001

NUCLEAR POWER (SURFACE)

6300

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Nuclear Power (Surface) Limited Duty Officer from Electrician's Mate (EM), Electronics Technician (ET), Interior Communications Electrician (IC), Machinist's Mate (MM) or Nuclear Power Technician Warrant Officer (Surface) (7430, 7540, 7250 or 7660).

Description

Serves as an officer technical manager in the repair, maintenance, and operation of naval nuclear propulsion plants, nuclear ship systems and associated equipment; coordinates and supervises skilled craftsmen and administrative support personnel; provides technical assistance in the overhaul, refueling and decontamination of nuclear propulsion plants; monitors and supervises nuclear propulsion plant, chemical analysis, and chemistry control practices and procedures as well as quality assurance of nuclear work; formulates, directs, and evaluates training programs; writes reports and provides technical assistance and advice; plans, supervises, and directs activities of personnel under their command.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (10/85).

LDO-630O-002

Nuclear Power (Submarine)

630O

Exhibit Dates: 1/65-3/75.

Career Pattern

May have progressed to Nuclear Power (Submarine) Limited Duty Officer from Electrician's Mate (EM), Electronics Technician (ET), Interior Communications Electrician (IC), Machinist's Mate (MM) or Nuclear Power Technician Warrant Officer (Submarine) (743X, 754X, or 766X).

Description

Serves as an officer technical manager in the repair, maintenance, and operation of naval nuclear propulsion plants, nuclear ship systems and associated equipment; coordinates and supervises skilled craftsmen and administrative support personnel; provides technical assistance in the overhaul, refueling and decontamination of nuclear propulsion plants; monitors and supervises nuclear propulsion plant, chemical analysis, and chemistry control practices and procedures as well as quality assurance of nuclear work; formulates, directs, and evaluates training programs; writes reports and provides technical assistance and advice; plans, supervises, and directs activities of personnel under their command.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (10/85).

LDO-630X-001

Engineering/Repair (Surface)

630X

Exhibit Dates: 1/65-3/75. (Effective 4/75, LDO 630X was redesignated 613X (see exhibit LDO-613X-001); effective 4/81, the Aviator LDO was designated 630X (see exhibit LDO-630X-003).

Career Pattern

May have progressed to Engineering/Repair (Surface) Limited Duty Officer from: Boiler Technician (BT), Electrician's Mate (EM), Engineman (EN), Gas Turbine System Technician, Electrical (GSE), Gas Turbine System Technician, Mechanical (GSM), Hull Maintenance Technician (HT), Instrumentman (IM), Interior Communications Electrician (IC), Machinery Repairman (MR), Machinist's Mate (MM), Molder (ML), Opticalman (OM), Patternmaker (PM), Precision Instrumentman, Master Chief (PICM), Engineering Technician (Submarine) Warrant Officer (743X or 754X), Engineering Technician (Surface) Warrant Officer (743X or 754X), Repair Technician (Submarine) Warrant Officer (774X), or Repair Technician (Surface) Warrant Officer (774X).

Description

Serves as an officer technical manager in the field of surface ship marine engineering including maintenance and repair of main propulsion (gas turbine, diesel, and steam), electrical, and auxiliary machinery and systems, ship's hull, structure and associated fittings, and practical and theoretical damage control procedures; plans, administers, and supervises the installation, operation, maintenance, and repair of equipment; makes ship alterations or designs modification; formulates, directs, and evaluates training programs; writes reports and provides technical assistance and advice; plans, organizes, and controls industrial shop production; develops and administers policy and procedures for regulating and integrating work or repair facilities.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 4 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (10/84).

LDO-630X-002

Engineering/Repair (Submarine)

630X

Exhibit Dates: 1/65-3/75.

Career Pattern

May have progressed to Engineering/Repair (Submarine) Limited Duty Officer from: Boiler Technician (BT), Electrician's Mate (EM), Engineman (EN), Gas Turbine System Technician, Electrical (GSE), Gas Turbine System Technician, Mechanical (GSM), Hull Maintenance Technician (HT), Instrumentman (IM), Interior Communications Electrician (IC), Machinery Repairman (MR), Machinist's Mate (MN), Molder (ML), Opticalman (OM), Patternmaker (PM), Precision Instrumentman, Master Chief (PICM), Engineering Technician (Submarine) Warrant Officer (743X or 754X), Engineering Technician (Surface) Warrant Officer (743X or 754X), Repair Technician (Submarine) Warrant Officer (774X), or Repair Technician (Surface) Warrant Officer (774X).

Description

Serves as an officer technical manager in the field of ship marine engineering including maintenance and repair of main propulsion (gas turbine, diesel, and steam), electrical, and auxiliary machinery and systems, ship's hull, structure and associated fittings, and practical and theoretical damage control procedures; plans, administers, and supervises the installation, operation, maintenance, and repair of equipment; makes ship alteration or designs modification; formulates, directs, and evaluates training programs; writes reports and provides technical assistance and advice; plans, organizes and controls industrial shop production; develops and administers policy and procedures for regulating and integrating work at auxiliary or repair facilities.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 4 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (10/84).

LDO-630X-003

Aviator

630X

Exhibit Dates: 4/81-5/86. (Effective 5/86, 630X was discontinued.)

Career Pattern

May have progressed to Aviator Limited Duty Officer from any enlisted rating or Warrant Officer Speciality.

Description

Serves as a flight training specialist in naval aviation flight training programs; provides flight instruction in aircraft and ground (academic and simulator) training for prospective naval aviators in the primary flight training environment; writes reports and provides assistance and advice; plans, supervises, and directs activities of personnel under their command.

Recommendation

Aviation programs vary considerably at different institutions. Forty to sixty semester hours in an aviation flight technology program may be awarded. In the lower-division baccalaureate/associate degree category, 3 semester hours may be awarded in some or all of the following areas, which are generally included in aviation programs: history of aviation, aviation safety, safety of flight, physiology of flight, general aviation, aircraft weather, airframe structures and/or systems, powerplant structures and/or systems, federal aviation regulations, aircraft transportation, aircraft business organization and management, corporate and business aviation, government and aviation, aviation insurance, aviation law, air cargo operation, air carrier operation, aircraft navigation, advanced aircraft navigation, and air traffic control procedures. (See NOTE.) For individuals holding military pilot ratings (equivalent to FAA ratings), 3 semester hours may be awarded in some or all of the following areas: student pilot rating, private pilot ground school, private pilot rating, commercial pilot ground school, commercial pilot rating (up to 9 semester hours), instrument pilot ground school, and instrument pilot rating. For individuals holding military instructor pilot ratings (equivalent to FAA ratings), an additional 3 semester hours may be awarded in some or all of the following areas: flight instructor FAA regulations, flight instructor rating, instrument flight instructor ground school, instrument flight instructor rating, and multi-engine flight instructor rating. NOTE: All Aviator LDO's should receive the following credit: In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in personnel supervision, and 3 in general mathematics. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 3 for field experience in aviation administration. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (10/85).

LDO-631X-001

Aviation (Deck)

631X

Exhibit Dates: 4/75–Present.

Career Pattern

May have progressed to Aviation (Deck) Limited Duty Officer from: Aviation Boatswain's Mate (AB), Aviation Boatswain's Mate, Launching and Recovery Equipment (ABE), Aviation Boatswain's Mate, Fuels (ABF), Aviation Boatswain's Mate, Aircraft Handling (ABH), or Aviation Boatswain Warrant Officer (731X).

Description

Serves as an officer technical manager in aircraft handling and support operations aboard ship; plans and supervises loading, spotting, launching, recovering, and fueling aboard aircraft carriers and other aircraft-capable ships; supervises the maintenance and operation of aircraft catapults, arresting gear, aircraft fueling systems, and aircraft crash, fire, and salvage operations; writes technical reports and personnel evaluation reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in managememt problems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (3/85).

LDO-632X-001

Aviation Operations

632X

Exhibit Dates: 4/75–Present.

Career Pattern

May have progressed to Aviation Operations Limited Duty Officer from Aviation Antisubmarine Warfare Operator (AW) Acoustic, Non-acoustic, or Helicopter, or Aviation Operations Technician Warrant Officer (732X).

Description

Serves as an officer technical manager in either the field of air traffic control or air antisubmarine warfare. If serves in the field of air traffic control, performs the following duties: organizes and supervises control tower operations, base operations, heliport operations, surveillance and approach radars, approach/departure control radars, planning airspace utilization, air traffic control procedures and training programs from qualifications of air traffic controller; coordinates operational procedures with F.A.A., U.S. military and foreign air traffic control facilities; employs a broad knowledge of federal air regulations, terminal and enroute air traffic control procedures and planning, and must have a knowledge of ground to air communications, radar operations, recoding equipment, teletype and land line communications, navigational aids and weather. If serves in the field of air antisubmarine warfare, performs the following duties: assists in organization, supervision, and direction of tactical support center operations; briefs and debriefs operational flight crews; evaluates and determines inflight operational efficiency of sensor system components and sensor operations; supervises preflight, inflight, and postflight inspections of antisubmarine warfare equipment, collection, preparation and transmission of data to appropriate analysis agencies; flies in support of mission of unit to which assigned; has broad knowledge of the characteristics and employment of U.S. and foreign submarines, warships, small craft, merchant ships and principles of radar, magnetic detection, electronic countermeasures, and underwater acoustics; writes technical reports and personnel evaluation reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (3/85).

LDO-633X-001

Aviation Maintenance

633X

Exhibit Dates: 4/75–Present.

Career Pattern

May have progressed to Aviation Maintenance Limited Duty Officer from Aviation Machinist's Mate (AD), Master Chief Aircraft Maintenanceman (AFCM), Aviation Structural Mechanic (AM), Aviation Structural Mechanic, Safety Equipment (AME), Aviation Structural Mechanic, Hydraulics (AMH), Aviation Structural Mechanic, Structures (AMS), Aviation Support Equipment Technician (AS), Aviation Maintenance Administrationman (AZ), Aircrew Survival Equipmentman (PR), or Aviation Maintenance Technician Warrant Officer (734X).

Description

Serves as an officer technical manager in the field of aviation maintenance; plans and supervises the execution of aviation maintenance programs at the organizational, intermediate, and depot levels; develops quality assurance standards and procedures to ensure flight safety and proper material condition of aircraft; develops and administers programs for the development, testing, and evaluation of aircraft maintenance systems and methods; develops, reviews, and verifies aircraft maintenance logs, records, and reports; analyzes new developments and technological advances in aviation maintenance; administers aeronautical material procurement programs; formulates, directs, and evaluates training programs; writes reports and provides technical assistance and advice; plans, supervises, and directs activities of personnel under their command.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (10/85).

LDO-635X-001

Engineering/Repair (Surface)

635X

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Engineering/Repair (Surface) Limited Duty Officer from: Boiler Technician (BT), Electrician's Mate (EM), Engineman (EN), Gas Turbine System Technician, Electrical (GSE), Gas Turbine System Technician, Mechanical (GSM), Hull Maintenance Technician (HT), Instrumentman (IM), Interior Communications Electrician (IC), Machinery Repairman (MR), Machinist's Mate (MM), Molder (ML), Opticalman (OM), Patternmaker (PM), Precision Instrumentman, Master Chief (PICM), Engineering Technician (Submarine) Warrant Officer (743X or 754X), Engineering Technician (Surface) Warrant Officer (743X or 754X), Repair Technician (Submarine) Warrant Officer (774X), or Repair Technician (Surface) Warrant Officer (774X).

Description

Serves as an officer technical manager in the field of surface ship marine engineering including maintenance and repair of main propulsion (gas turbine, diesel, and steam), electrical, and auxiliary machinery and systems, ship's hull, structure and associated fittings, and practical and theoretical damage control procedures; plans, administers, and supervises the installation, operation, maintenance, and repair of equipment; makes ship alterations or designs modification; formulates, directs, and evaluates training programs; writes reports and provides technical assistance and advice; plans, organizes, and controls industrial shop production; develops and administers policy and procedures for regulating and integrating work or repair facilities.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 4 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (10/84).

LDO-635X-002

ENGINEERING/REPAIR (SUBMARINE)

635X

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Engineering/Repair (Submarine) Limited Duty Officer from: Boiler Technician (BT), Electrician's Mate (EM), Engineman (EN), Gas Turbine System Technician, Electrical (GSE), Gas Turbine System Technician, Mechanical (GSM), Hull Maintenance Technician (HT), Instrumentman (IM), Interior Communications Electrician (IC), Machinery Repairman (MR), Machinist's Mate (MM), Molder (ML), Opticalman (OM), Patternmaker (PM), Precision Instrumentman, Master Chief (PICM), Engineering Technician (Submarine) Warrant Officer (743X or 754X), Engineering Technician (Surface) Warrant Officer (743X or 754X), Repair Technician (Submarine) Warrant Officer (774X), or Repair Technician (Surface) Warrant Officer (774X).

Description

Serves as an officer technical manager in the field of ship marine engineering including maintenance and repair of main propulsion (gas turbine, diesel, and steam), electrical, and auxiliary machinery and systems, ship's hull, structure and associated fittings, and practical and theoretical damage control proceures; plans, administers, and supervises the installation, operation, maintenance, and repair of equipment; makes ship alteration or designs modification; formulates, directs, and evaluates training programs; writes reports and provides technical assistance and advice; plans, organizes and controls industrial shop production; develops and administers policy and procedures for regulating and integrating work at auxiliary or repair facilities.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 4 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (10/84).

LDO-636X-001

AVIATION ORDNANCE

636X

Exhibit Dates: 4/75–Present.

Career Pattern

May have progressed to Aviation Ordnance Limited Duty Officer from Aviation Ordnanceman (AO), Gunner's Mate Technician (GMT), or Aviation Ordnance Technician Warrant Officer (736X).

Description

Serves as an officer technical manager in the field of operations and maintenance of aviation ordnance and aircraft armament; manages and directs the activities of aviation ordnance personnel in the performance of aviation operational, test, research, and maintenance functions involving aviation ordnance and aircraft armament; establishes new aviation ordnance and armament maintenance procedures and methods; plans, organizes and directs the operation of aviation ordnance activities; provides technical assistance and advice pertaining to aviation ordnance and armament; formulates, directs, and evaluates training programs; writes reports and provides technical assistance and advice; plans, supervises, and directs activities of personnel under their command.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (10/85).

LDO-637O-001

NUCLEAR POWER (SURFACE)

6370

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Nuclear Power (Surface) Limited Duty Officer from Electrician's Mate (EM), Electronics Technician (ET), Interior Communications Electrician (IC), Machinist's Mate (MM) or Nuclear Power Technician Warrant Officer (Surface) (7430, 7540, 7250 or 7660).

Description

Serves as an officer technical manager in the repair, maintenance, and operation of naval nuclear propulsion plants, nuclear ship systems and associated equipment; coordinates and supervises skilled craftsmen and administrative support personnel; provides technical assistance in the overhaul, refueling and decontamination of nuclear propulsion plants; monitors and supervises nuclear propulsion plant, chemical analysis, and chemistry control practices and procedures as well as quality assurance of nuclear work; formulates, directs, and evaluates training programs; writes reports and provides technical assistance and advice; plans, supervises, and directs activities of personnel under their command.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (10/85).

LDO-637O-002

NUCLEAR POWER (SUBMARINE)

637O

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Nuclear Power (Submarine) Limited Duty Officer from Electrician's Mate (EM), Electronics Technician (ET), Interior Communications Electrician (IC), Machinist's Mate (MM) or Nuclear Power Technician Warrant Officer (Submarine) (743X, 754X, or 766X).

Description

Serves as an officer technical manager in the repair, maintenance, and operation of naval nuclear propulsion plants, nuclear ship systems and associated equipment; coordinates and supervises skilled craftsmen and administrative support personnel; provides technical assistance in the overhaul, refueling and decontamination of nuclear propulsion plants; monitors and supervises nuclear propulsion plant, chemical analysis, and chemistry control practices and procedures as well as quality assurance of nuclear work; formulates, directs, and evaluates training programs; writes reports and provides technical assistance and advice; plans, supervises, and directs activities of personnel under their command.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (10/85).

LDO-637X-001

ENGINEERING/REPAIR (SURFACE)

637X

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Engineering/Repair (Surface) Limited Duty Officer from: Boiler Technician (BT), Electrician's Mate (EM), Engineman (EN), Gas Turbine System Technician, Electrical (GSE), Gas Turbine System Technician, Mechanical (GSM), Hull Maintenance Technician (HT), Instrumentman (IM), Interior Communications Electrician (IC), Machinery Repairman (MR), Machinist's Mate (MM), Molder (ML), Opticalman (OM), Patternmaker (PM), Precision Instrumentman, Master Chief (PICM), Engineering Technician (Submarine) Warrant Officer (743X or 754X), Engineering Technician (Surface) Warrant Officer (743X or 754X), Repair Technician (Submarine) Warrant Officer (774X), or Repair Technician (Surface) Warrant Officer (774X).

Description

Serves as an officer technical manager in the field of surface ship marine engineering including maintenance and repair of main propulsion (gas turbine, diesel, and steam), electrical, and auxiliary machinery and systems, ship's hull, structure and associated fittings, and practical and theoretical damage control procedures; plans, administers, and supervises the installation, operation, maintenance, and repair of equipment; makes ship alterations or designs modification; formulates, directs, and evaluates training programs; writes reports and provides technical assistance and advice; plans, organizes, and controls industrial shop production; develops and administers policy and procedures for regulating and integrating work or repair facilities.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 4 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (10/84).

LDO-637X-002

ENGINEERING/REPAIR (SUBMARINE)

637X

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Engineering/Repair (Submarine) Limited Duty Officer from: Boiler Technician (BT), Electrician's Mate (EM), Engineman (EN), Gas Turbine System Technician, Electrical (GSE), Gas Turbine System Technician, Mechanical (GSM), Hull Maintenance Technician (HT), Instrumentman (IM), Interior Communications Electrician (IC), Machinery Repairman (MR), Machinist's Mate (MM), Molder (ML), Opticalman (OM), Patternmaker (PM), Precision Instrumentman, Master Chief (PICM), Engineering Technician (Submarine) Warrant Officer (743X or 754X), Engineering Technician (Surface) Warrant Officer (743X or 754X), Repair Technician (Submarine) Warrant Officer (774X), or Repair Technician (Surface) Warrant Officer (774X).

Description

Serves as an officer technical manager in the field of ship marine engineering including maintenance and repair of main propulsion (gas turbine, diesel, and steam), electrical, and auxiliary machinery and systems, ship's hull, structure and associated fittings, and practical and theoretical damage control proceures; plans, administers, and supervises the installation, operation, maintenance, and repair of equipment; makes ship alteration or designs modification; formulates, directs, and evaluates training programs; writes reports and provides technical assistance and advice; plans, organizes and controls industrial shop production; develops and administers policy and procedures for regulating and integrating work at auxiliary or repair facilities.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 4 for field experience in management. IF the rank of lieutenant commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; IF the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (10/84).

LDO-638X-00

AVIATION ELECTRONICS (AVIONICS)

638X

Exhibit Dates: 4/75–Present.

Career Pattern

May have progressed to Avionics Limited Duty Officer from: Aviation Electronics Technician (AT), Aviation Electrician's Mate (AE), Aviation Fire Control Technician (AQ), Aviation Antisubmarine Warfare Technician (AX), Tradevman (TD), or Aviation Electronics Technician Warrant Officer (738X).

Description

Serves as an officer technical manager in the field of avionics and aircraft systems operation and maintenance; organizes, manages, and directs all phases of installation, maintenance, repair, and operation of avionics equipment and other aircraft systems/components; participates in programs for the development, testing, and evaluation of equipment and systems; establishes new maintenance procedures and methods; directs the assignment of material, equipment, and systems; plans, develops, and administers training programs for systems and maintenance; writes reports and provides technical advice about aircraft systems.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications and 3 in aviation maintenance systems. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 3 in aviation maintenance management, and 3 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (1/84).

LDO-639X-001

AIR TRAFFIC CONTROL

639X

Exhibit Dates: 1/78–Present.

Career Pattern

May have progressed to Air Traffic Control Limited Duty Officer from Air Traffic Controller (AC) or Air Traffic Control Technician Warrant Officer (739X).

Description

Serves as an officer technical manager in the field or air traffic control; responsible for control tower operation, base operations, heliport operations, surveillance and precision approach radars, approach/departure control radars and airspace acquisition, training programs for qualifications of air traffic controllers, and developing air traffic control procedures; coordinates operational procedures with FAA and U.S. military and foreign air traffic control facilities; employs a broad knowledge of federal air regulations, terminal and enroute air traffic control procedures, air traffic control (ATC) planning, Navy procedural criteria, and international civil aviation organization procedures; demonstrates knowledge of ground to air communications, radar operations, recording equipment, teletype and land line communications, navigational aids, and weather; formulates, directs, and evaluates training programs; writes reports and provides technical assistance and advice; plans, supervises, and directs activities of personnel under their command.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, 3 for field experience in management, and 3 for field experience in aviation administration. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration. In addition, see the credit recommendation in exhibit NER-AC-001; grant credit for the most recent enlisted rank the individual held before progressing to Limited Duty Officer (10/85).

LDO-640O-001

NUCLEAR POWER (SURFACE)

6400

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Nuclear Power (Surface) Limited Duty Officer from Electrician's Mate (EM), Electronics Technician (ET), Interior Communications Electrician (IC), Machinist's Mate (MM) or Nuclear Power Technician Warrant Officer (Surface) (7430, 7540, 7250 or 7660).

Description

Serves as an officer technical manager in the repair, maintenance, and operation of naval nuclear propulsion plants, nuclear ship systems and associated equipment; coordinates and supervises skilled craftsmen and administrative support personnel; provides technical assistance in the overhaul, refueling and decontamination of nuclear propulsion plants; monitors and supervises nuclear propulsion plant, chemical analysis, and chemistry control practices and procedures as well as quality assurance of nuclear work; formulates, directs, and evaluates training programs; writes reports and provides technical assistance and advice; plans, supervises, and directs activities of personnel under their command.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (10/85).

LDO-640O-002

NUCLEAR POWER (SUBMARINE)

640O

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Nuclear Power (Submarine) Limited Duty Officer from Electrician's Mate (EM), Electronics Technician (ET), Interior Communications Electrician (IC), Machinist's Mate (MM), or Nuclear Power Technician Warrant Officer (Submarine) (743X, 754X, or 766X).

Description

Serves as an officer technical manager in the repair, maintenance, and operation of naval nuclear propulsion plants, nuclear ship systems and associated equipment; coordinates and supervises skilled craftsmen and administrative support personnel; provides technical assistance in the overhaul, refueling and decontamination of nuclear propulsion plants; monitors and supervises nuclear propulsion plant, chemical analysis, and chemistry control practices and procedures as well as quality assurance of nuclear work; formulates, directs, and evaluates training programs; writes reports and provides technical assistance and advice; plans, supervises, and directs activities of personnel under their command.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (10/85).

LDO-640X-001

ELECTRONICS (SURFACE)

640X

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Electronics (Surface) Limited Duty Officer from Data Systems Technician (DS), Electronic Warfare Technician (EW), Electronics Technician (ET), Fire Control Technician (FT), Fire Control Technician, Ballistic Missile Fire Control (FTB), Fire Control Technician, Gun Fire Control (FTG), Fire Control Technician, Surface Missile Fire Control (FTM), Ocean Systems Technician (OT), Operations Specialist (OS), Sonar Technician (ST), or Electronics Technician (Surface) Warrant Officer (766X).

Description

Serves as an officer technical manager in the field of non-nuclear electronics; plans, coordinates, directs, and supervises the installation, operation, and maintenance of all non-nuclear electronics systems installed in units of the surface force; conducts operational evaluations of new installations and modifications to existing systems; provides operational and technical input to the research and development community for consideration in the design and testing of electronics systems or components; prepares and distributes operator training courses and operation guidance for electronics systems; plans, schedules, and conducts training for electronics personnel; writes reports and provides technical advice about electronic systems.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 5 for field experience in management, and 2 for field experience in electronics. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (1/84).

LDO-640X-002

ELECTRONICS (SUBMARINE)

640X

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Electronics Technician (Submarine) Limited Duty Officer 640X from: Data Systems Technician (DS), Electronics Technician (ET), Electronics Warfare Technician (EW), Fire Control Technician (FT), Fire Control Technician, Ballistic Missile Fire Control (FTB), Fire Control Technician, Gun Fire Control (FTG), Fire Control Technician, Surface Missile Fire Control (FTM), Operations Specialist (OS), Ocean Systems Technician (OT), Sonar Technician (ST), or Electronics Technician (Submarine) Warrant Officer (766X).

Description

Serves as an officer technical manager in the field of electronics; plans, coordinates, directs, and supervises the installation, operation, and maintenance of electronics systems; plans, organizes, and manages the activities of technical personnel; provides the leadership necessary to guide personnel and develop individual responsibility for the training and growth of assigned personnel; writes reports and provides advice about electronic systems.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 3 for field experience in management, and 4 for field experience in electronics. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (1/84).

LDO-640X-003

NUCLEAR POWER

640X

Exhibit Dates: 4/75–Present.

Career Pattern

This LDO designator was formerly 615X, Nuclear Power, Surface or 625X, Nuclear Power, Submarine. May have progressed to Nuclear Power Limited Duty Officer from Electrician's Mate (EM), Electronics Technician (ET), Interior Communications Electrician (IC), Machinist's Mate (MM), or Nuclear Power Technician Warrant Officer (740X, 715X, or 725X).

Description

Serves as an officer technical manager in the repair, maintenance, and operation of naval nuclear propulsion plants, nuclear ship systems and associated equipment; coordinates and supervises skilled craftsmen and administrative support personnel; provides technical assistance in the overhaul, refueling and decontamination of nuclear propulsion plants; monitors and supervises nuclear propulsion plant, chemical analysis, and chemistry control practices and procedures as well as quality assurance of nuclear work; formulates, directs, and evaluates training programs; writes reports and provides technical assistance and advice; plans, supervises, and directs activities of personnel under their command.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (10/85).

LDO-641X-001

Administration

641X

Exhibit Dates: 4/75–Present.

Career Pattern

May have progressed to Administration Limited Duty Officer from Lithographer (LI), Journalist (JO), Postal Clerk (PC), Personnelman (PN), Yeoman (YN), Legalman (LN), Religious Program Specialist (RP) or Ship's Clerk Warrant Officer (741X).

Description

Serves as an officer technical manager in the fields of Naval and personnel administration; directs administrative and personnel offices employing a broad knowledge of navy department/fleet staff organizations and regulations; personnel responsibilities include recruitment, selection, promotion, transfer, career development, training, job analysis and discipline; administrative tasks include office organization and procedures, legal work, budget and fiscal control, space planning, work progress reporting and information dissemination, public relations activities and liaison with other military services; responsible for the preparation, publication, and distribution of manuals, handbooks, reports, newspapers and correspondence; duties vary depending on technical experience and the size of the organization; writes technical reports and personnel evaluation reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in office management, and 3 in human relations. In the upper-division baccalaureate category, 3 semester hours in personnel management, 3 in management problems, 6 for field experience in management, and 3 in principles of management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (11/83).

LDO-642X-001

Data Processing

642X

Exhibit Dates: 4/75–Present.

Career Pattern

May have progressed to Data Processing Limited Duty Officer from Data Processing Technician (DP), Data Systems Technician (DS), or Data Processing Technician Warrant Officer (742X).

Description

Serves as an officer technical specialist in the field of automatic data processing utilizing both electronic digital computer and electronic accounting machine equipment; administers the operation and maintenance of data processing installations; programs, debugs, and operates interactive and batch programs; advises in the selection of equipment; develops policy for job processing priorities; ensures data integrity and computer security; develops processing evaluation methods, work standards, and procedures manuals for programmers and analysts; conducts training for staff and for systems users; analyzes costs and prepares budget estimates for computer operations; reviews equipment design and updates hardware in use; provides the leadership necessary to guide personnel and develop individual responsibility; duties vary depending on the size of the organization and the specific computer installation; writes technical reports and personnel evaluation reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in college algebra, and 1 in statistics. In the upper-division baccalaureate category, 3 semester hours in management problems, 3 in principles of management, 3 for field experience in management, and 5 for field experience in data processing. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (11/83).

LDO-643X-001

Bandmaster

643X

Exhibit Dates: 4/75–Present.

Career Pattern

May have progressed to Bandmaster Limited Duty Officer from Musician (MU) or Bandmaster Warrant Officer (743X).

Description

Serves as a specialist in the fields of music and management; responsible for equipment, personnel, budgets, public relations, and operations; employs a broad knowledge of instrumental and vocal techniques, band administration, musical techniques, theories, and literature; may serve as program managers, leaders of Navy bands, officers-in-charge of Navy bands providing information and administration and assistance in music matters.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in principles of public relations and 3 in operational management. In the upper-division baccalaureate category, 3 semester hours in personnel management, 3 in financial and budget management, 3 in advanced conducting, and 3 in score reading and analysis. If the rank of Lieutenant Commander has been attained, add 3 semester hours in advanced management problems; if the rank of Commander has been attained, add 6 semester hours in advanced management problems (2/86).

LDO-644X-001

Cryptology

644X

Exhibit Dates: 4/75–Present.

Career Pattern

May have progressed to Cryptology Limited Duty Officer from Cryptologic Technician, Administrative (CTA), Cryptologic Technician, Interpretive (CTI), Cryptologic Technician, Maintenance (CTM), Cryptologic Technician, Communications (CTO), Cryptologic Technician, Collection (CTR), Cryptologic Technician, Technical (CTT), or Crypotologic Technician Warrant Officer (744X).

Description

Serves as an officer technical specialist in all phases of operations conducted by the Naval Security Group Command, including signals intelligence, signals security, and electronic warfare; responsible for administration, personnel support, electronic maintenance, communications, and technical research in support of the operating forces and the national cryptologic effort; plans and manages in accordance with appropriate directives, the employment of equipment and manpower resources; has managerial responsibility for the installation and maintenance of electrical, electro-mechanical, and electronic equipment, and the conduct of communications, administrative or communications security functions.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (2/86).

LDO-645X-001

Intelligence

645X

Exhibit Dates: 4/75–Present.

Career Pattern

May have progressed to Intelligence Limited Duty Officer from Intelligence Specialist (IS) or Intelligence Technician Warrant Officer (745X).

Description

Serves as an officer technical manager responsible for the material readiness of the intelligence collection equipment, publications, and supplies; supervises enlisted Intelligence Specialists in their various intelligence collection, processing, dissemination duties and in the preparation of intelligence materials for briefings.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications and 3 in personnel supervision; and based on institutional evaluation of the student's experiences, an additional 3 semester hours in any of the following areas: computer science, cultural geography, political science or principles of cartography. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (4/86).

LDO-646X-001

METEOROLOGY/OCEANOGRAPHY

646X

Exhibit Dates: 4/75–Present.

Career Pattern

May have progressed to Meteorology/Oceanography Limited Duty Officer from Aerographer's Mate (AG) or Aerographer Warrant Officer (746X).

Description

Serves as an officer technical manager, providing meteorological and oceanographic support for fleet operations, and for planning and directing various activities within the Naval Oceanography Command; trains military and civilian meteorological/oceanographic personnel in the use and operational maintenance of meteorological and oceanographic equipment; trains and supervises Navy weather observers and forecasters; performs regional coordination for operational and administrative matters within regional areas of responsibility; manages the Meteorological and Oceanographic Equipment Program.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (2/86).

LDO-646X-002

CRYPTOLOGY

646X

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Cryptology Limited Duty Officer from Cryptologic Technician, Administrative (CTA), Cryptologic Technician, Interpretive (CTI), Crypotologic Technician, Maintenance (CTM), Cryptologic Technician, Communications (CTO), Cryptologic Technician, Collection (CTR), Cryptologic Technician, Technical (CTT), or Crypotologic Technician Warrant Officer (764X).

Description

Serves as an officer technical specialist in all phases of operations conducted by the Naval Security Group Command, including signals intelligence, signals security, and electronic warfare; responsible for administration, personnel support, electronic maintenance, communications, and technical research in support of the operating forces and the national cryptologic effort; plans and manages in accordance with appropriate directives, the employment of equipment and manpower resources; has managerial responsibility for the installation and maintenance of electrical, electro-mechanical, and electronic equipment, and the conduct of communications, administrative or communications security functions.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (2/86).

LDO-647X-001

PHOTOGRAPHY

647X

Exhibit Dates: 4/75–Present.

Career Pattern

May have progressed to Photography Limited Duty Officer from Illustrator Draftsman (DM), Intelligence Specialist (IS), Journalist (JO), Photographer's Mate (PH), or Photography Warrant Officer (747X).

Description

Serves as an officer technical manager responsible for all photographic, optical, digital, electronic, and other imaging systems and equipment, including still, motion picture, and video systems used in aerial, surface, and sub-surface imaging; plans and manages the operation of imaging commands and activities, combat camera groups, and aerial reconnaissance imaging systems; develops, reviews, and maintains support facilities which deal with photographic and image recording requirements; provides technical advice and assistance on all photographic and other imaging support matters to commanders and subordinate units; requires an extensive photographic background and technical knowledge in all phases of imaging theory and technology, equipment, support equipment, image recording and processing and the application and employment of imaging systems.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 3 for field experience in management, and 3 in budget management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (3/86).

LDO-648X-001

EXPLOSIVE ORDNANCE DISPOSAL

648X

Exhibit Dates: 4/75–Present.

Career Pattern

May have progressed to Explosive Ordnance Disposal Limited Duty Officer from any enlisted rating or Warrant Officer Explosive Ordnance Disposal Technician (748X), must be qualified in Explosive Ordnance Disposal (EOD).

Description

Serves as an officer technical manager in the methods of detection, identification, field evaluation, rendering safe, recovery, and disposal of all types of U.S. and foreign ordnance, explosives, and demolition materials; provides technical escort for transportation or movement, detoxification, and disposal of chemical, biological, toxicological, and etiological agents; conducts technical evaluations or ordnance for intelligence information through disassembly and stripping; may perform airborne techniques, and provide U.S. Secret Service with explosive ordnance disposal support for presidential and other VIP protection as directed; provides fleet training services on emergency destruct procedures, detection and monitoring of nuclear, biological or chemical agents; provides technical guidance, training assistance in minor underwater repair, hull inspection, and propeller replacements; plans and supervises the activities of personnel engaged in diving and explosive ordnance disposal operations, involving all types of U.S. and foreign munitions, conventional and improvised; supervises the repair and modification of explosive ordnance disposal tools, equipment and material; supervises the stowage, issue, procurement, security and preservation of explosive ordnance disposal equipment, materials and components; formulates, directs, and evaluates training programs; writes reports and provides technical assistance and advice; plans, supervises, and directs activities of personnel under their command.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (10/85).

LDO-649X-001

SECURITY

649X

Exhibit Dates: 4/81–Present.

Career Pattern

May have progressed to Security Limited Duty Officer from Master-At-Arms (MA) or Security Technician Warrant Officer (749X).

Description

Serves as an officer technical manager in matters of law enforcement, physical security, and corrections; plans, organizes and supervises physical security programs and activities aboard ships; establishes and maintains access/egress system providing for detection/prevention of sabotage and theft; plans and directs law enforcement programs to include aggressive contraband control initiatives; supervises operation of brigs afloat; formulates, directs, and evaluates training programs; writes reports and provides technical assistance and advice; plans, supervises, and directs activities of personnel under their command.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in principles of security organization and administration and 3 in personnel distribution and deployment. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in budget administration, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (12/85).

LDO-651X-001

SUPPLY (SC)
(SUPPLY CORPS)
651X

Exhibit Dates: 4/75–Present.

Career Pattern

May have progressed to Supply Corps Limited Duty Officer from Aviation Storekeeper (AK), Disbursing Clerk (DK), Mess Management Specialist (MS), Ship's Serviceman (SH), Storekeeper (SK), Supply Corps Warrant Officer (751X), or Food Service Warrant Officer (752X).

Description

Serves as an officer technical manager in the field of supply, including fiscal accounting and disbursing, material distribution and control, food service, ships' exchanges, and commissary stores; directs and administers supply activities; interprets department regulations and determines policies and procedures; responsible for the accounting and disbursing of funds and the distribution of supplies; develops and maintains proper budgeting and fiscal policies; directs stocks accounting system and inventory control methods and systems; disposes of excess and obsolete stock; stores and distributes material; utilizes a broad knowledge of logistics procedures, transportation systems, distribution concepts, budgeting and accounting policies, retail operations, inventory control techniques, and material management.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 3 in budget administration, and 3 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (3/86).

LDO-653X-001

CIVIL ENGINEER CORPS (CEC)
653X

Exhibit Dates: 4/75–Present.

Career Pattern

May have progressed to Civil Engineer Corps Limited Duty Officer from Builder (BU), Construction Electrician (CE), Construction Mechanic (CM), Illustrator Draftsman (DM), Engineering Aid (EA), Equipment Operator (EO), Steelworker (SW), Utilitiesman (UT), Master Chief Equipmentman (EQCM), or Civil Engineer Corps Warrant Officer (753X).

Description

Serves as an officer technical manager in the operational field of horizontal and vertical construction, facilities maintenance, utilities, and automotive and construction equipment; helps to plan, coordinate, direct, and supervise the technical, operational, training, and administrative responsibilities of Naval construction force (NCF) units; assists in the planning, scheduling, operational and technical responsibilities of public works departments within the Navy shore establishment; supervises personnel engaged in horizontal and vertical construction, maintenance and repair of buildings, airfields, hardstands, waterfront structures, and utilities systems, and in the operaion, testing, maintenance, and repair of allied plants and automotive and construction equipment.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semesters hours in technical communications and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 3 in budget management, and 3 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: leadership, project management, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (3/86).

LDO-655X-001

LAW
655X

Exhibit Dates: 3/82–Present.

Career Pattern

May have progressed to Limited Duty Officer Law from Legalman (LN).

Description

Serves as an officer technical manager in the legal field, specializing in the administration of legal services; advises and assists commanding officers in matters pertaining to military law and the administration of military justice; directs or conducts investigations; drafts charges; makes recommendations concerning forum selection for the disposition of offenses; serves as trial counsel and conducts prosecutions of persons brought to trial by special court-martial; prepares records of proceedings and post trial actions; acts as summary courts-martial; conducts Article 32, Uniform Code of Military Justice (UCMJ) investigations; acts as recorder for administrative discharge boards, and supervises personnel performing legal duties; performs other non-lawyer paralegal functions including claims, civilian personnel matters, and financial and budgetary matters; provides legal assistance; plans and manages the employment of equipment and manpower.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in case analysis and reasoning, 3 in law office management, 3 for field experience in management, 3 in trial and case preparation, and credit in legal research on the basis of institutional evaluation. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (12/85).

LDO-657X-001

OPERATIONS (SURFACE)
657X

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Operations (Surface) Limited Duty Officer from Electronics Warfare Technician (EW), Operations Specialist (OS), Ocean Systems Technician (OT), Quartermaster (QM), Radioman (RM), Signalman (SM), Sonar Technician (ST), or Operations Surface Technician Warrant Officer (714X).

Description

Serves as an officer technical manager in the operation, employment, and application of techniques, equipment, systems, and procedures in operations and communications; supervises and trains personnel in the operation and maintenance of operations and communications equipment and systems; plans, directs, and controls operations and communications activities; advises and assists commands in the above areas and in the employment and utilization of associated facilities and installations; writes technical reports and personnel evaluation reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (3/85).

LDO-660X-001

AVIATION (DECK)
660X

Exhibit Dates: 1/65–3/75

Career Pattern

May have progressed to Aviation (Deck) Limited Duty Officer from: Aviation Boatswain's Mate (AB), Aviation Boatswain's Mate, Launching and Recovery Equipment (ABE), Aviation Boatswain's Mate, Fuels (ABF), Aviation Boatswain's Mate, Aircraft Handling (ABH), or Aviation Boatswain Warrant Officer (760X).

Description

Serves as an officer technical manager in aircraft handling and support operations aboard ship; plans and supervises loading, spotting, launching, recovering, and fueling aboard aircraft carriers and other aircraft-capable ships; supervises the maintenance and operation of aircraft catapults, arresting gear, aircraft fueling systems, and aircraft crash, fire, and salvage operations; writes technical reports and personnel evaluation reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in managememt problems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (3/85).

LDO-661X-001

AVIATION OPERATIONS

661X

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Aviation Operations Limited Duty Officer from Aviation Antisubmarine Warfare Operator (AW) Acoustic, Non-acoustic, or Helicopter, or Aviation Operations Technician Warrant Officer (745X or 763X).

Description

Serves as an officer technical manager in either the field of air traffic control or air antisubmarine warfare. If serves in the field of air traffic control, performs the following duties: organizes and supervises control tower operations, base operations, heliport operations, surveillance and approach radars, approach/departure control radars, planning airspace utilization, air traffic control procedures and training programs from qualifications of air traffic controller; coordinates operational procedures with F.A.A., U.S. military and foreign air traffic control facilities; employs a broad knowledge of federal air regulations, terminal and enroute air traffic control procedures and planning, and must have a knowledge of ground to air communications, radar operations, recoding equipment, teletype and land line communications, navigational aids and weather. If serves in the field of air antisubmarine warfare, performs the following duties: assists in organization, supervision, and direction of tactical support center operations; briefs and debriefs operational flight crews; evaluates and determines inflight operational efficiency of sensor system components and sensor operations; supervises preflight, inflight, and postflight inspections of antisubmarine warfare equipment, collection, preparation and transmission of data to appropriate analysis agencies; flies in support of mission of unit to which assigned; has broad knowledge of the characteristics and employment of U.S. and foreign submarines, warships, small craft, merchant ships and principles of radar, magnetic detection, electronic countermeasures, and underwater acoustics; writes technical reports and personnel evaluation reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (3/85).

LDO-662X-001

INTELLIGENCE

662X

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Intelligence Limited Duty Officer from Intelligence Specialist (IS) or Intelligence Technician Warrant Officer (762X).

Description

Serves as an officer technical manager responsible for the material readiness of the intelligence collection equipment, publications, and supplies; supervises enlisted Intelligence Specialists in their various intelligence collection, processing, dissemination duties and in the preparation of intelligence materials for briefings.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications and 3 in personnel supervision; and based on institutional evaluation of the student's experiences, an additional 3 semester hours in any of the following areas: computer science, cultural geography, political science, or principles of cartography. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (4/86).

LDO-663X-001

PHOTOGRAPHY

663X

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Photography Limited Duty Officer from Illustrator Draftsman (DM), Intelligence Specialist (IS), Journalist (JO), Photographer's Mate (PH), or Photography Warrant Officer (831X).

Description

Serves as an officer technical manager responsible for all photographic, optical, digital, electronic, and other imaging systems and equipment, including still, motion picture, and video systems used in aerial, surface, and sub-surface imaging; plans and manages the operation of imaging commands and activities, combat camera groups, and aerial reconnaissance imaging systems; develops, reviews, and maintains support facilities which deal with photographic and image recording requirements; provides technical advace and assistance on all photographic and other imaging support matters to commanders and subordinate units; requires an extensive photographic background and technical knowledge in all phases of imaging theory and technology, equipment, support equipment, image recording and processing and the application and employment of imagin systems.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 3 for field experience in management, and 3 in budget management. IF the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; IF the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (3/86).

LDO-665X-001

METEOROLOGY/OCEANOGRAPHY

665X

Exhibit Dates: 1/65–3/75.

Career Pattern

May have progressed to Meteorology/Oceanography Limited Duty Officer from Aerographer's Mate (AG) or Aerographer Warrant Officer (821X).

Description

Serves as an officer technical manager, providing meteorological and oceanographic support for fleet operations, and for planning and directing various activities within the Naval Oceanography Command; trains military and civilian meteorological/oceanographic personnel in the use and operational maintenance of meteorological and oceanographic equipment; trains and supervises Navy weather observers and forecasters; performs regional coordination for operational and administrative matters within regional areas of responsibility; manages the Meteorological and Oceanographic Equipment Program.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (2/86).

LDO-670X-001

Aviation Ordnance

670X

Exhibit Dates: 1/65-3/75.

Career Pattern

May have progressed to Aviation Ordnance Limited Duty Officer from Aviation Ordnanceman (AO), Gunner's Mate Technician (GMT), or Aviation Ordnance Technician Warrant Officer (721X).

Description

Serves as an officer technical manager in the field of operations and maintenance of aviation ordnance and aircraft armament; manages and directs the activities of aviation ordnance personnel in the performance of aviation operational, test, research, and maintenance functions involving aviation ordnance and aircraft armament; establishes new aviation ordnance and armament maintenance procedures and methods; plans, organizes and directs the operation of aviation ordnance activities; provides technical assistance and advice pertaining to aviation ordnance and armament; formulates, directs, and evaluates training programs; writes reports and provides technical assistance and advice; plans, supervises, and directs activities of personnel under their command.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 6 for field experience in management. IF the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; IF the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (10/85).

LDO-680X-001

Avionics

680X

Exhibit Dates: 1/65-3/75.

Career Pattern

May have progressed to Avionics Limited Duty Officer from: Aviation Electronics Technician (AT), Aviation Electrician's Mate (AE), Aviation Fire Control Technician (AQ), Aviation Antisubmarine Warfare Technician (AX), Tradevman (TD), or Aviation Electronics Technician Warrant Officer (761X).

Description

Serves as an officer technical manager in the field of avionics and aircraft systems operation and maintenance; organizes, manages, and directs all phases of installation, maintenance, repair, and operation of avionics equipment and other aircraft systems/components; participates in programs for the development, testing, and evaluation of equipment and systems; establishes new maintenance procedures and methods; directs the assignment of material, equipment, and systems; plans, develops, and administers training programs for systems and maintenance; writes reports and provides technical advice about aircraft systems.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications and 3 in aviation maintenance systems. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 3 in aviation maintenance management, and 3 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (1/84).

LDO-681X-001

Aviation Operations

681X

Exhibit Dates: 1/65-3/75.

Career Pattern

May have progressed to Aviation Operations Limited Duty Officer from Aviation Antisubmarine Warfare Operator (AW) Acoustic, Non-acoustic, or Helicopter, or Aviation Operations Technician Warrant Officer (745X or 763X).

Description

Serves as an officer technical manager in either the field of air traffic control or air antisubmarine warfare. If serves in the field of air traffic control, performs the following duties: organizes and supervises control tower operations, base operations, heliport operations, surveillance and approach radars, approach/departure control radars, planning airspace utilization, air traffic control procedures and training programs from qualifications of air traffic controller; coordinates operational procedures with F.A.A., U.S. military and foreign air traffic control facilities; employs a broad knowledge of federal air regulations, terminal and enroute air traffic control procedures and planning, and must have a knowledge of ground to air communications, radar operations, recoding equipment, teletype and land line communications, navigational aids and weather. If serves in the field of air antisubmarine warfare,performs the following duties: assists in organization, supervision, and direction of tactical support center operations; briefs and debriefs operational flight crews; evaluates and determines inflight operational efficiency of sensor system components and sensor operations; supervises preflight, inflight, and postflight inspections of antisubmarine warfare equipment, collection, preparation and transmission of data to appropriate analysis agencies; flies in support of mission of unit to which assigned; has broad knowledge of the characteristics and employment of U.S. and foreign submarines, warships, small craft, merchant ships and principles of radar, magnetic detection, electronic countermeasures, and underwater acoustics; writes technical reports and personnel evaluation reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (3/85).

LDO-685X-001

Aviation Maintenance

685X

Exhibit Dates: 1/65-3/75.

Career Pattern

May have progressed to Aviation Maintenance Limited Duty Officer from Aviation Machinist's Mate (AD), Master Chief Aircraft Maintenanceman (AFCM), Aviation Structural Mechanic (AM), Aviation Structural Mechanic, Safety Equipment (AME), Aviation Structural Mechanic, Hydraulics (AMH), Aviation Structural Mechanic, Structures (AMS), Aviation Support Equipment Technician (AS), Aviation Maintenance Administrationman (AZ), Aircrew Survival Equipmentman (PR), or Aviation Maintenance Technician Warrant Officer (741X).

Description

Serves as an officer technical manager in the field of aviation maintenance; plans and supervises the execution of aviation maintenance programs at the organizational, intermediate, and depot levels; develops quality assurance standards and procedures to ensure flight safety and proper material condition of aircraft; develops and administers programs for the development, testing, and evaluation of aircraft maintenance systems and methods; develops, reviews, and verifies aircraft maintenance logs, records, and reports; analyzes new developments and technological advances in aviation maintenance; administers aeronautical material procurement programs; formulates, directs, and evaluates training programs; writes reports and provides technical assistance and advice; plans, supervises, and directs activities of personnel under their command.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (10/85).

Navy Enlisted Classification (NEC) Exhibits

The Navy Enlisted Classification (NEC) structure supplements the enlisted rating structure in identifying personnel with special qualifications. NECs can be earned either through formal training, on-the-job training, or factory training (if appropriate). The code consists of four digits which follow the individual's rating. For example, on military records a code of EA-5501 indicates that the individual holds the rating of Engineering Aid and the NEC Construction Inspector.

Documentation for verifying NECs includes:

NAVPERS 1616/24, Enlisted Performance Evaluation Report. See Section 54 for the NEC title and description of duties; Section 2 carries the rating designator, but the evaluation is based on performance in the NEC.

NAVPERS 1070/613, Page 13, Administrative Remarks. Indicates the date of certification and the NEC title.

Letter of Designation. Letter from the commanding officer designating the NEC title.

For sample copies of these forms see Appendix G.

NEC-2186-001

Career Recruiter

Exhibit Dates: 12/75–Present.

Career Pattern

NEC 2186 is awarded to proven successful recruiters (NEC 9585) who are selected for assignment to recruiting duty for the remainder of their naval career. Individuals with NEC 9585 may apply to the Career Recruiting Force and are chosen by a Selection Board. Four steps are involved in the certification process toward the award of the NEC:

1. Successful completion of the Navy Recruiter Orientation course (NV-1406-0016)
2. A minimum of six months of supervised on-the-job training; during this time the Recruiter Qualification Standards must be completed and verified by the immediate supervisor
3. Completion of an open-book test
4. A two-hour oral examination before the Qualification Board.

Advancement within the NEC is achieved through a certification process. The four levels in the NEC are: Recruiter, Recruiter-In-Charge, Zone Supervisor, and Chief Recruiter. Before advancing to the next level, the individual must meet the qualification standards and pass an oral examination before the Qualification Board.

Advancement as a petty officer is separate from advancement in the NEC. Individuals must maintain the skills and competencies necessary to perform the occupational standards required for their rating. The rating advancement examination must be passed in order to qualify for advancement.

Documentation

NAVPERS 1070/604, Navy Occupation/Training and Awards History. See Section 1 for the NEC designator and the date it was awarded. This form is commonly referred to as page 4 of the service record.

NAVPERS 1616/24, Enlisted Performance Evaluation Report. See Section 54 for the NEC title and description of duties; Section 2 carries the rating designator, but the evaluation is based on performance in the NEC.

NAVPERS 1070/613, Page 13, Administrative Remarks. Indicates the date of certification and the title.

Letter of Designation. Letter from the Commanding Officer designating NEC and/or position title.

Descriptions and Recommendations

Recruiter. Provides qualified civilians for enlistment into the Navy; identifies target market populations; selects and uses appropriate supporting resources; prospects recruits; conducts interviews; enlists individuals; completes enlistment records; counsels rejected applicants; analyzes recruiting results and formulates plans for improving recruiting, marketing, and processing. ***Recommendation:*** In the lower-division baccalaureate/associate degree category, 3 semester hours in sales techniques and 3 in oral communications. In the upper-division baccalaureate category, 3 semester hours for field experience in marketing (2/88).

Recruiter-In-Charge. Able to perform the duties required for recruiter; provides leadership and supervision of Navy Recruiters at a recruiting station; utilizes resources to provide sufficient numbers of qualified applicants for enlistment; supervises office routines; directs office personnel; manages resources; conducts training of recruiters; processes documents; supervises the use of government vehicles; insures the orderly flow of qualified applicants into the Navy. ***Recommendation:*** In the lower-division baccalaureate/associate degree category, 3 semester hours in sales techniques, 3 in oral communications, 3 in office administration, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours for field experience in marketing (2/88).

Zone Supervisor. Able to perform the duties required for Recruiter-In-Charge; manages and supervises use of resources in assigned recruiting zone; performs administrative and management functions; supervises subordinates at recruiting stations within a geographic region; develops and conducts training programs; provides input for budget; manages procurement effort within the region; evaluates functions of recruiting stations and their personnel. ***Recommendation:*** In the lower-division baccalaureate/associate degree category, 3 semester hours in sales techniques, 2 in oral communications, 3 in office administration, and 3 in personnel supervision. In the upper-division baccalaureate category, 2 semester hours in vocational counseling, 3 in operations management, 3 in personnel management, and 4 for field experience in marketing (2/88).

Chief Recruiter. Able to perform the duties required for Zone Supervisor; manages, supervises and coordinates the use of all resources in a recruiting district, which may include portions of several states; performs administrative and management functions of planning, organizing, coordinating, training and evaluating; writes reports; manages current budget and submits proposed budget; plans recruiting program; counsels zone and regional personnel; inspects recruiting stations; manages regional office. ***Recommendation:*** In the lower-division baccalaureate/associate degree category, 3 semester hours in sales techniques, 3 in oral communications, 3 in office administration, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in sales management, 2 in vocational counseling, 3 in operations management, 3 in personnel management, and 6 for field experience in marketing (2/88).

NEC-2612-001

Classification Interviewer

Exhibit Dates: 12/75–Present.

Career Pattern

Classification Interviewers are selected from the top 10% of any rating (paygrade E-4 through E-9). Four steps are involved in the certification process toward the award of the NEC:

1. Successful completion of the Classification Interviewer course
2. A minimum of six months of supervised on-the-job training; during this time the Qualification Standards must be completed and verified by the immediate supervisor
3. Completion of an open-book test
4. A two-hour oral examination before the Qualification Board.

Serves as a member of a staff of a Navy Recruiting District; a district comprises parts of one or more states, based on population centers. The district staff may have responsibility for assisting from 30 to 100 recruiting centers in matters of training, analyzing, processing, and managing resources. Specific staff assignments include: Classifier, Enlisted Processing Division Supervisor, and Military Entrance Processing System (MEPS) Liaison Petty Officer.

Advancement as a petty officer is separate from advancement in the NEC. Individuals must maintain the skills and competencies necessary to perform the occupational standards required for their rating. The rating advancement examination must be passed in order to qualify for advancement.

Documentation

NAVPERS 1070/604, Navy Occupation/Training and Awards History. See Section 1 for the NEC designator and the data it was awarded. The form is commonly referred to as page 4 of the service record.

NAVPERS 1616/24, Enlisted Performance Evaluation Report. See Section 54 for the NEC title and description of duties; Section 2 carries the rating designator, but the evaluation is based on performance in the NEC.

NAVPERS 1070/613, Page 13, Administrative Remarks. Indicates the date of certification and the title.

Letter of Designation. Letter from the Commanding Officer designating NEC and/or position title.

Descriptions and Recommendations

Classifier. Interviews potential enlistees to determine aptitudes and interests for military assignments; determines educational and occupational background, hobbies, abilities, and interests of personnel; administers and scores basic battery and other classification tests; screens personnel training assignments; makes reservations for training program. ***Recommendation:*** In the upper-division baccalaureate category, 2 semester hours in vocational counseling and 2 for field experience in sales techniques (6/89).

Enlisted Processing Division Supervisor. Manages and supervises the processing of qualified applicants for enlistments within a district; interprets and submits reports; supervises and counsels assigned personnel; submits input to annual training plans, including an evaluation of training effectiveness; monitors production and statistical evaluation; prepares the workload schedule for processing applicants. ***Recommendation:*** In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision. In the upper-division baccalaureate/associate degree category, 1 semester hour in training and development (6/89).

Military Entrance Processing Station (MEPS) Liaison Petty Officer. Coordinates prequalification processing of potential recruits, and is the final "quality control" checkpoint prior to actual enlistment or re-enlistment; performs liaison functions between the Military Entrance Processing Station (MEPS) and the Recruiting district; verifies accuracy and completeness of applicant paperwork; identifies enlistment requirements, waiver requirements, and specific program eligibility requirements; explains enlistment obligations to applicants. ***Recommendation:*** In the lower-division baccalaureate/associate degree category, 3 semester hours in office administration (6/89).

NEC-9502-001

Instructor

Exhibit Dates: 1/80–Present.

Career Pattern

Individuals holding NEC 9502 generally volunteer for instructor duty. Persons selected are in paygrade E-6 or above, and must be mature, stable, outgoing individuals who communicate effectively and are strongly motivated. A screening process for suitability is followed by interview with and recommendation by the Commanding Officer. Five steps are part of the certification process for award of the NEC:

1. Successful completion of Basic Instructor Training Course (A-012-0011)
2. Successful completion of a curriculum development course
3. Favorable interview by a Qualification Board
4. Attendance at instructor workshops, with accompanying classroom observations
5. Six months of successful supervised teaching.

The regular tour in the NEC is three or four years. Advancement as a petty officer is separate from advancement in the NEC. Individuals must maintain the skills and competencies necessary to perform the occupational standards required for their rating. The rating advancement examination must be passed in order to qualify for advancement.

Documentation

NAVPERS 1070/640, Navy Occupation/Training and Awards History. See Section 1 for the NEC designator and the date it was awarded. This form is commonly referred to as page 4 of the service record.

NAVPERS 1616/24, Enlistment Performance Evaluation Report. See Section 54 for the NEC title and description of duties; Section 2 carries the rating designator, but the evaluation is based on performance in the NEC.

NAVPERS 1070/613, Page 13, Administrative Remarks. Indicates the date of certification and the title.

Letter of Designation. Letter from the Commanding Officer designating NEC and/or position title.

Description

Knows lesson planning, instructional strategies, selection of visual aids, and teaching skills; can design lessons from a body of content; develops behavioral objectives; prepares test items; evaluates instructional materials and the results of instruction; presents material clearly and possesses platform (teaching) skills.

Recommendation

In the lower-division baccalaureate/associate degree category, 2 semester hours in learning theory, 3 in interpersonal communications, 3 in principles of speech, and 3 in instructional media. In the upper-division baccalaureate category, 1 semester hour in curriculum design and 2 in instructional strategy (3/90).

NEC-9519-001

Certified Navy Drug and Alcoholism Counselor

Exhibit Dates: 1/87–Present.

Career Pattern

May have been selected for NEC 9519 from paygrade E-4 through E-9 in any rating; will have completed all the requirements of the Navy Drug and Alcoholism Certification Program, including successful completion of the Navy Drug and Alcohol Counselor school (NV-0801-0011), a minimum one-year internship as a Drug and Alcoholism Counselor Intern (NEC 9522), and successful completion of comprehensive oral and written certification examinations.

Description

Serves as a drug and alcoholism counselor; conducts assessment and intake interviews; conducts group counseling; prepares aftercare planning and referrals; conducts prevention, outreach, and other educational services related to alcohol and drug abuse, and eating disorders; conducts program management and referral activities as required; must maintain the highest code of standards as required by the Counselor Code of Ethics; must maintain a current knowledge about alcohol abuse, alcoholism, drug abuse and addiction, and eating disorders.

Recommendation

In the upper-division baccalaureate category, 6 semester hours in a counseling or social work practicum (7/87).

NEC-9585-001

Recruiter Canvasser

Exhibit Dates: 12/75–Present.

Career Pattern

Recruiter Canvassers are selected from the top 10% of any rating (paygrade E–4 through E–9). Four steps are involved in the certification process toward the award of the NEC:

1. Successful completion of the Navy Recruiter Orientation course (NV-1406-0016)
2. A minimum of six months of supervised on-the-job training; during this time the Recruiter Qualification Standards must be completed and verified by the immediate supervisor
3. Completion of an open-book test
4. A two-hour oral examination before the Qualification Board.

The regular tour in this NEC is three years. Individuals in paygrade E–6 and above wishing to continue working in NEC 9585 may apply to the Career Recruiting Force and are chosen by a Selection Board. Advancement within the NEC is achieved through a certification process. The four levels in the NEC are: Recruiter, Recruiter-In-Charge, Zone Supervisor, and Chief Recruiter. Before advancing to the next level, the individual must meet the qualification standards and pass an oral examination before the Qualification Board.

May also have served as a member of a staff of a Navy Recruiting District; a district comprises parts of one or more states, based on population centers. The district staff may have responsibility for assisting from 30 to 100 recruiting centers in matters of training, analyzing, processing and managing resources. Specific staff assignments include: 6-year Obligor/Nuclear Field Recruiter; Prior Service (RZ) Recruiter; Leads Supervisor; and Delayed Entry Program (DEP) Coordinator.

Advancement as a petty officer is separate from advancement in the NEC. Individuals must maintain the skills and competencies necessary to perform the occupational standards required for their rating. The rating advancement examination must be passed in order to qualify for advancement.

Documentation

NAVPERS 1070/604, Navy Occupation/Training and Awards History. See Section 1 for the NEC designator and the date it was awarded. The form is commonly referred to as page 4 of the service record.

NAVPERS 1616/24, Enlisted Performance Evaluation Report. See Section 54 for the NEC title and description of duties; Section 2 carries the rating designator, but the evaluation is based on performance in the NEC.

NAVPERS 1070/613, Page 13, Administrative Remarks. Indicates the date of certification and the title.

Letter of Designation. Letter from the Commanding Officer designating NEC and/or position title.

Descriptions and Recommendations

Recruiter: Provides qualified civilians for enlistment into the Navy; identifies target market populations; selects and uses appropriate supporting resources; prospects recruits; conducts interviews; enlists individuals; completes enlistment records; counsels rejected applicants; analyzes recruiting results and formulates plans for improving recruiting, marketing, and processing. ***Recommendation:*** In the lower-division baccalaureate/associate degree category, 3 semester hours in sales techniques and 3 in oral communications. In the upper-division baccalaureate category, 3 semester hours for field experience in marketing (2/88).

Recruiter-In-Charge: Able to perform the duties required for recruiter; provides leadership and supervision of Navy Recruiters at a recruiting station; utilizes resources to provide sufficient numbers of qualified applicants for enlistment; supervises office routines; directs office personnel; manages resources; conducts training of recruiters; processes documents; supervises the use of government vehicles; insures the orderly flow of qualified applicants into the Navy. ***Recommendation:*** In the lower-division baccalaureate/associate degree, 3 semester hours in sales techniques, 3 in oral communications, 3 in office administration, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours for field experience in marketing (2/88).

Zone Supervisor: Able to perform the duties required for Recruiter-In-Charge; manages and supervises use of resources in assigned recruiting zone; performs administrative and management functions; supervises subordinates at recruiting stations within a geographic region; develops and conducts training programs; provides input for budget; manages procurement effort within the region; evaluates functions of recruiting stations and their personnel. ***Recommendation:*** In the lower-division baccalaureate/associate degree category, 3 semester hours in sales techniques, 3 in oral communications, 3 in office administration, and 3 in personnel supervision. In the upper-division baccalaureate category, 2 semester hours in vocational counseling, 3 in operations management, 3 in personnel management, and 4 for field experience in marketing (2/88).

Chief Recruiter: Able to perform the duties required for Zone Supervisor; manages, supervises and coordinates the use of all resources in a recruiting district, which may include portions of several states; performs administrative and management functions of planning, organizing, coordinating, training and evaluating; writes reports; manages current budget and submits proposed budget; plans recruiting program; counsels zone and regional personnel; inspects recruiting stations; manages regional office. ***Recommendation:*** In the lower-division baccalaureate/associate degree category, 3 semester hours in sales techniques, 3 in oral communications, 3 in office administration, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in sales management, 2 in vocational counseling, 3 in operations management, 3 in personnel management, and 6 for field experience in marketing (2/88).

6-Year Obligor/Nuclear Field Recruiter. Manages and coordinates the use of Navy recruiting resources to provide sufficient numbers of qualified applicants for enlistment in all six-year advanced programs, including nuclear field programs; submits input to annual training plan; uses sales skills from pre-approach to closing the sale; submits funding requests; directs activities to enhance recruiting efforts including local advertising, planning and implementing promotional activities and conducting market analysis; manages the processing of waivers and qualifies applicants for selected programs. ***Recommendation:*** In the lower-division baccalaureate/associate degree category, 3 semester hours in sales techniques, and 3 in oral communications. In the upper-division baccalaureate category, 3 semester hours for field experience in sales techniques and 4 for field experience in marketing (6/89).

NF/Prior Service (RZ) Recruiter. Manages the processing of qualified prior-service applicants for re-enlistment; submits input to annual training plans; conducts market analysis and provides input to district marketing plans; verifies accuracy and completeness of applicants' paperwork; processes waiver requirements. ***Recommendation:*** In the lower-division baccalaureate/associate degree category, 3 semester hours in sales techniques, 3 in oral communications, and 2 in office administration. In the upper-division baccalaureate category, 5 semester hours for field experience in marketing (6/89).

Leads Supervisor. Supervises the processing and tracking of all national and local leads forwarded to the field as prospects for enlistment/selection; compiles and submits reports; supervises personnel and operations in the Tracking Center; submits input to annual training plan including determining level of on-the-job training required; schedules and implements training and determines training effectiveness; manages resources including budget and personnel; monitors the accuracy and completeness of advertising and direct mail campaigns. ***Recommendation:*** In the lower-division baccalaureate/associate degree category, 3 semester hours in sales techniques, 3 in oral communications, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours for field experience in marketing, 1 in advertising, and 1 in training and development (6/89).

Delayed Entry Program (DEP) Coordinator. Provides liaison with recruiters involving persons who will have delayed entry into the Navy; establishes and maintains positive relationships on behalf of the recruiting district with members of the DEP; identifies potential problems with individuals in the DEP in order to retain enlisted personnel. ***Recommendation:*** In the lower-division baccalaureate/associate degree category, 3 semester hours in sales techniques, 3 in oral communications, and 2 in office administration. In the upper-division baccalaureate category, 3 semester hours for field experience in marketing, 1 in vocational counseling (6/89).

NEC-9588-01

Collateral Duty Career Information Coordinator

Exhibit Dates: 12/75–Present.

Description

Counsels individuals and presents information concerning career opportunities, incentives, rights and benefits, and advantages of a Navy career; processes forms, documents, and records; advises and assists commands in organizing and implementing an agressive enlisted retention program.

Recommendation

In the lower-division baccalaureate/associate degree category, 2 semester hours in record keeping and 1 in sales techniques. In the upper-division baccalaureate category, 3 semester hours for field experience in vocational counseling (6/89).

NEC-9589-00

Command Career Information Retention Counselor/Coordinator

Exhibit Dates: 12/75–Present.

Career Pattern

Individuals holding NEC 9589 are selected from the top 10% of any rating (paygrade E-4 through E-9). Four steps are involved in the certification process toward the award of the NEC:

1. Successful completion of course # A-501-0011
2. A minimum of six months of supervised on-the-job training; during this time the Qualification Standards must be completed and verified by the immediate supervisor
3. Completion of an open-book test
4. A two-hour oral examination before the Qualification Board.

The regular tour in this NEC is three years. Advancement as a petty officer is separate from advancement in the NEC. Individuals must maintain the skills and competencies necessary to perform the occupational standards required for their rating. The rating advancement examination must be passed in order to qualifiy for advancement.

Documentation

NAVPERS 1070/604, Navy Occupation/Training and Awards History. See Section 1 for the NEC designator and the date it was awarded. The form is commonly referred to as page 4 of the service record.

NAVPERS 1616/24, Enlisted Performance Evaluation Report. See Section 54 for the NEC title and description of duties; Section 2 carries the rating designator, but the evaluation is based on performance in the NEC.

NAVPERS 1070/613, Page 13, Administrative Remarks. Indicates the date of certification and the title.

Letter of Designation. Letter from the Commanding Officer designating NEC and/or position title.

Description

Performs career retention duties afloat and ashore and coordinates the Navy-wide career retention program; explains re-enlistment options, benefits, and obligations; and discusses individual goals, job satisifaction, and military life with enlisted personnel; supervises and instructs career counselor; maintains a tickler file system to ensure that all personnel are counseled; processes forms, documents, and records for re-enlistment; maintains command retention statistics; maintains publications and materials; coordinates and arranges for group interviews; serves as the command's principal advisor on policies and regulations related to Navy career planning matters.

Recommendation

In the lower-division baccalaureate/associate degree category, 2 semester hours in instructional methods. In the upper-division baccalaureate category, 3 semester hours for field experience in counseling and 3 for field experience in management (6/89).

Appendix A

The Evaluation Systems

The American Council on Education has developed and refined comprehensive procedures and criteria for the evaluation of military learning experiences. This appendix outlines the historical development of the *Guide;* defines which courses can be found in the *Guide;* provides background information on Navy general rates, ratings, and limited duty and warrant officer specialties; describes the evaluation systems used to prepare the recommendations for military formal courses and Navy ratings; and includes definitions and guidelines pertaining to categories of educational credit, the semester hour standard, categories of apprentice training, and clock hours and contact hours.

BACKGROUND

Early editions of the *Guide to the Evaluation of Educational Experiences in the Armed Services* were prepared in response to specific needs. Immediately after World War II, the consensus in the civilian educational community was that the practice of granting blanket credit to World War I veterans as a reward for length of service was educationally unsound. Educators concluded that military learning experiences applicable to civilian curricula should be assessed by faculty for potential credit. Therefore, in December 1945, at the request of civilian educational institutions and the regional accrediting associations, the American Council on Education established the Commission on Accreditation of Service Experiences—renamed the Commission on Educational Credit and Credentials in 1979—to evaluate military educational programs and to assist institutions in granting credit for such experiences. Accordingly, the first edition of the *Guide* was published to assist educational institutions in evaluating service courses completed by returning veterans.

The extension of the World War II G.I. Bill to include veterans of the Korean conflict, and the subsequent enrollment of many veterans in colleges and universities, created a need for the second edition, published in 1954.

The 1968 edition was prepared in anticipation of the increased enrollment of veterans resulting from the educational assistance provided under the Veterans Readjustment Benefits Act of 1966, and with the expectation that many would apply for educational credit for their learning experiences in the armed services. In addition, technological advances had necessitated major changes in service training, with a resuting need for new or revised educational credit recommendations.

The 1974 edition was prepared primarily to respond to three emerging considerations. First, because of the growth in vocational and technical programs and the emergence of the concept of postsecondary education, there was a need to evaluate courses for possible credit in the vocational and technical categories in addition to the baccalaureate and graduate categories of previous editions. Second, active-duty service men and women were enrolling in increasing numbers in civilian educational programs and were seeking credit for military formal courses soon after completing their service school training. Third, credit recommendations were needed for the many courses initiated or revised by the military since 1968.

The 1974 edition marked the beginning of a new approach to reporting evaluations of formal military training. At its fall 1973 meeting, the Commission approved the concept of an ongoing *Guide* system. Elements of that system include the publication of biennial editions of the *Guide* through computerized composition, continual staff review of courses, and the computerized storage of course information for a more rapid updating of credit recommendations and for an improved ability to respond to inquiries related to course identification and credit recommendations.

Over the years the recommendations contained in the *Guide* have assisted education institutions in granting credit to hundreds of thousands of service men and women. Surveys conducted by ACE showed that most of the nation's colleges and universities use the formal course recommendations in awarding credit to veterans and active-duty service personnel. The recommendations have been widely accepted because military formal courses share certain key elements with traditional postsecondary programs: they are formally approved and administered, are designed for the express purpose of achieving learning outcomes, are conducted by qualified persons with specific subject-matter expertise, and are structured to provide for the reliable and valid assessment of student learning.

Until 1975, however, no mechanism existed for providing recognition for the learning a service man or woman attained through such learning experiences as self-instruction, on-the-job training, and work experience. As a first step in providing recognition for such learning experiences, the Commission in 1975 implemented a program for the evaluation of learning represented by demonstrated proficiency in Army enlisted military occupational

specialties (MOS's). The MOS evaluation procedures were developed, tested, and refined during a feasibility study conducted by the Council and sponsored by the U.S. Department of the Army. Evaluators made recommendations for educational credit and advanced standing in apprentice training programs. Subsequently, the occupational assessment program of the Commission was expanded to include Navy general rates, ratings, warrant officers and limited duty officers, Army warrant officer MOS's, Navy warrant officer and limited duty officer specialties, Coast Guard enlisted ratings and warrant officers and selected Marine Corps MOS's. A small number of Navy Enlisted Classifications (NECs) have also been evaluated.

The recommendations for advanced standing in apprentice training programs are the result of the cooperative efforts of the American Council on Education and labor and industry. Since the Navy programs are now registered with the Bureau of Apprenticeship and Training, recommendations are no longer made for advanced standing in apprenticeship programs.

The recommendations reflect the Commission's belief that it is sound educational practice to give recognition for learning, no matter how or where that learning has been attained, provided that the learning is at the appropriate level, is in the appropriate area, and is applicable to an individual's postsecondary program of study or apprenticeship program.

THE COURSES

Courses listed in the *Guide* are normally service school courses conducted on a formal basis, i.e., approved by a central authority within each service and listed by the service in its catalog. These courses are conducted for a specified period of time with a prescribed course of instruction, in a structured learning situation, and with qualified instructors.

Most courses are given on a full-time basis. After 1981 The Center began limited evaluation of courses that are 45 academic hours in length. Prior to that time courses evaluated were at least of two weeks duration; or, if less than two weeks in length, the course had to include a minimum of sixty contact hours of instruction. Before 1973 the minimum length requirement was three weeks or 90 contact hours.

Recommendations for formal courses offered between World War II and 1954 are available in the 1954 edition of the *Guide* or from The Center for Adult Learning and Educational Credentials upon written request by education officials. Courses in this *Guide* have a start date no earlier than 1954. In addition, military Subject Standardized Tests (SSTs) are evaluated by the American Council on Education, and are found in the *Handbook to the Guide*.

THE COURSE EVALUATION SYSTEM

In the fall of 1973, the Commission on Educational Credit and Credentials of the American Council on Education approved the following procedures and guidelines for the evaluation of military formal courses.

The Evaluation Process

Courses are evaluated by teams of at least three subject-matter specialists (college and university professors, deans, and other academicians). Through discussion and the application of evaluation procedures and guidelines, team members reach a consensus on the amount and category of credit to be recommended.

Evaluation materials include the course syllabus, training materials, tests, textbooks, technical manuals, and examinations. Additional information is obtained from interviews with instructors and program administrators, classroom observations, and examination of instructional equipment and laboratory facilities.

Each team of evaluators has two major tasks for each course: the formulation of a credit recommendation and the preparation of the course's description. The credit recommendation consists of the category of credit, the number of semester hours recommended, and the appropriate subject area. Using the information provided in the military syllabus, evaluators phrase the course description (which appears in the *Guide* exhibits under the headings "Objectives" or "Learning Outcomes" and "Instruction") in terms meaningful to civilian educators. The course description supplements the credit recommendations by summarizing the nature of a given course.

Throughout the evaluation process, evaluators exercise professional judgment in applying the evaluative criteria and procedures. This position reflects the Commission's belief that sound educational evaluation is more dependent on professional judgment and expertise than on rigid application of criteria.

The Commission on Educational Credit and Credentials continually reviews its criteria and procedures. Evaluators are encouraged to provide feedback and recommendations for consideration by the Commission.

Selection of Evaluators

Nominations for course evaluators are requested from postsecondary institutions, professional and disciplinary societies, education associations, and regional accrediting associations.

The criteria for the selection of formal course evaluators are as follows:

1. Area of an evaluator's competence, as evidenced by formal training and experiences, will closely approximate area of student training to be evaluated.

2. Preference will be given to candidates with five or more years of postsecondary teaching or administrative experience, including curriculum development.

3. Preference will be given to candidates who are generally receptive to the recognition of learning that occurs in a variety of settings.

THE NAVY ENLISTED OCCUPATIONAL CLASSIFICATION SYSTEM

The Navy Enlisted Rating Structure is used for classifying enlisted personnel, identifying personnel qualifications, and reporting personnel requirements and resources. It also provides the framework for enlisted career development through paths of advancement from paygrades E–1 (recruit) through E–9 (master chief petty officer). For ACE purposes, there are two main types of occupational classifications in the Enlisted Ratings Structure:

1. *General Rates (Apprenticeships)*—Identifications assigned to personnel at paygrades E–1, E–2, and E–3. There are six general rates: Airman, Constructionman, Dentalman, Fireman, Hospitalman, and Seaman. Each general rate involves the performance of entry-level tasks and leads to one or more ratings.

2. *Ratings*—Broad enlisted occupations that encompass similar duties and functions and that, in most instances, provide paths of advancement and career development for personnel from paygrades E–4 (petty officer third class) to E–9 (master chief petty officer). **Figure 1** shows the relationships between petty officer designations and paygrades. A complete list of ratings and the occupational fields to which they belong are included as **Appendix B**. Ratings require performance of routine tasks at the lower paygrades and more difficult tasks at progressively higher paygrades.

General rates and ratings are organized in career patterns. A career pattern provides the normal path of advancement from recruit (paygrade E–1) to master chief petty officer (paygrade E–9). An example of a career pattern is shown in **Figure 2**.

Figure 1: *Relationships between petty officer designations and paygrades*

Petty officer classifications:	Paygrade
Petty Officer Third Class (PO3)	E–4
Petty Officer Second Class (PO2)	E–5
Petty Officer First Class (PO1)	E–6
Chief Petty Officer (CPO)	E–7
Senior Chief Petty Officer (SCPO)	E–8
Master Chief Petty Officer (MCPO)	E–9

Figure 2: *Example of a Navy enlisted career pattern*

General rate:		Paygrade
Airman (AN)	Airman Recruit	E–1
	Airman Apprentice	E–2
	Airman	E–3
Rating:		
Air Controlman (AC)	Air Controlman Third Class (AC3)	E–4
	Air Controlman Second Class (AC2)	E–5
	Air Controlman First Class (AC1)	E–6
	Chief Air Controlman (ACC)	E–7
	Senior Chief Air Controlman (ACCS)	E–8
	Master Chief Air Controlman (ACCM)	E–9

To supplement occupational information contained in the Navy Enlisted Rating Structure and to provide the necessary requirements for general rates and ratings, the Navy has developed two sets of standards: naval standards and occupational standards. Naval standards are tasks that are essential to the overall effectiveness of enlisted personnel in the performance of their duties. They include standards pertaining to military requirements, professional development, and naval tradition. Occupational standards identify the minimum tasks required for proficiency in general rates and ratings and provide the basis for the development of training and advancement requirements and of personnel policies and procedures. For both naval standards and occupational standards, each higher paygrade represents more complex duties, increased skills, and greater responsibility. Proficiency in a higher paygrade includes the ability to perform the tasks and meet the standards required for the preceding paygrades, as well as those required for the higher paygrade. The naval standards for all paygrades are given in **Appendix D**. A complete set of occupational standards for one rating, Air Controlman, is given in **Appendix C**.

In addition to the Enlisted Rating Structure, the Navy Enlisted Occupational Classification System includes two other subsystems: The Navy Enlisted Classification (NEC) Structure and Special Qualifications. The NEC Structure supplements the Enlisted Rating Structure by identifying skills requiring more specific identification than that provided by general rates and ratings and which are not rating-wide requirements. Special Qualifications identify highly specialized occupational entities which cross several occupational areas and define the requirements of these areas. Selected NECs have been evaluated by ACE.

The Navy Enlisted Evaluation and Advancement System

The Navy regularly evaluates the occupational proficiency of its men and women. In fact, the demonstration of occupational proficiency is directly linked to the *advancement system*. Only those individuals who have (1) demonstrated that they can perform the tasks required for the next higher paygrade, (2) completed the appropriate correspondence and/or residence courses for the next higher paygrade, (3) served a minimum length of time in their paygrade and in the service, and (4) been recommended by their commanding officer are allowed to take the advancement examination.

One of the primary advancement processes is the Navy-wide written examination for paygrades E-4 through E-7 of each rating. It is a 150-item multiple choice test that is based on the occupational standards and tasks for each paygrade of a given rating. In addition, the applicable military/leadership examination must also be passed by the candidates. Personnel are not advanced in their rating until they have demonstrated that they are proficient in the next higher paygrade of the rating.

Examinations for Petty Officer Third Class, Petty Officer Second Class, and Petty Officer First Class (paygrades E-4, E-5, and E-6) are administered semiannually. For Chief Petty Officer (E-7), the examination is administered annually and determines whether the person's military record will be screened by the Chief Petty Officer Selection Board. This selection board, which meets annually, ultimately determines a person's advancement to paygrade E-7. Promotion to Senior Chief Petty Officer (E-8) and Master Chief Petty Officer (E-9) is through the Senior/Master Chief Petty Officers Selection Board which meets annually. Examinations for paygrade E-3 are administered by unit commanding officers when the individual has demonstrated readiness to take it. Written examinations are not used for paygrade E-2. Make-up tests are made available for personnel who cannot take the test on the specified date because of extenuating circumstances.

A final multiple score is computed for each individual who takes the Navy-wide advancement examination. The final multiple score is composed of the following factors:

Factor	*E–4/5*	*E–6*	*E–7*
Written Examination Score	80	80	80
Performance Examination Score	70	92	52
Number of Years in Service	30	34	—
Number of Years in Paygrade	30	34	—
Medals and Awards	10	12	—
Passed-but-not-advanced (PNA) Points	10	12	—
TOTAL	230	264	132

The last factor included above, PNA points, applies to those individuals who passed the previous written examination and demonstrated they were qualified for advancement but were not advanced. This situation occurs when there is a scarcity of openings for advancement in a paygrade of a given rating and a person's final multiple score is not high enough for him or her to compete successfully with others in that paygrade.

It was determined by The Center staff that the written testing techniques and procedures used by the Army and Navy are very similar. Because of the similarities and because the Army testing system had already been favorably reviewed by measurement specialists retained by ACE, it was not necessary to have them review the Navy written tests. As with the Army, subject-matter and apprenticeship specialists confirmed the content validity of the tests in the course of conducting evaluations.

Further information about the Navy Enlisted Occupational Classification System and the Navy Advancement System can be obtained by contacting the Advisory Service.

THE NAVY WARRANT OFFICER AND LIMITED DUTY OFFICER CLASSIFICATION SYSTEM

Warrant officers are technical officer specialists who perform duties that are technically oriented and acquired through experience and training, and that are limited in scope in relation to other officer categories.

Limited duty officers (LDOs) are technically oriented officers who perform duties that are limited to specific occupational fields, that require authority greater than that normally expected of a warrant officer, and that require strong managerial skills.

Warrant officer and LDO specialties are normally identified by four digits, with each successively providing more precise identification of the individual holder.

As shown in **Figure 4**, a warrant officer can be identified by a "7" in the first digit, and an LDO by a "6". Only the first three characters are evaluated by ACE; the fourth digit, representing Naval status, appears in the exhibits as an "X". (See Appendixes E and F for information on occupational fields and status in the Navy.)

There are four grades of warrant officers: Warrant Officer, W–1 (WO1) (discontinued in 1975); Chief Warrant Officer, W–2 (CWO-2); Chief Warrant Officer, W–3, (CWO-3); and Chief Warrant Officer, W–4 (CWO-4).

Skills, Competencies, and Knowledge Evaluated			
1st character	2nd character	3rd character	4th character
number 6 or 7	number 1–5	number 1–8	number 0–9
Designator 6 = Limited Duty Officer 7 = Warrant Officer	Platform of Operation 1 = Surface 2 = Submarine 3 = Aviation 4 = General 5 = Staff Corps	Occupational Field See Appendix E	Status in Navy Or Naval Reserve See Appendix F

Figure 4: *Navy Warrant Officer and Limited Duty Officer Structure*

The grades reflect salary increases and are normally indicative of the length of time a person has served as a warrant officer. The grades do not signify differences in job duties. A position requiring a warrant officer may be filled by any qualified warrant from CWO-2 to CWO-4.

LDOs are commissioned officers in the ranks of ensign (0–1) through captain (0–6).

Selection and Evaluation

The warrant officer program provides an opportunity for appointment to commissioned warrant officer status for select senior enlisted personnel. The LDO program provides an opportunity for appointment to regular commissioned status for selected male warrant officers and senior male enlisted personnel. Competition is keen and individuals generally start preparing early in their careers. Potential candidates normally improve their skills through on-the-job training and specialized training through schools and correspondence courses.

Selection boards, composed of senior officers of experience, maturity, and varied backgrounds, are convened by the Secretary of the Navy annually. Each candidate's qualfications are evaluated and the board recommends those deemed best qualified.

Selection boards also meet annually to recommend those qualified for promotion. Performance is the major key to promotion. The Navy's selection procedure for promotion has always recognized the outstanding performer; mediocre performers are judged not to be competitive enough. Evaluations are recorded on *Fitness Reports*, an objective appraisal of performance by the senior reporting officer.

Time-in-grade is another criterion for promotion. Until 1975, the time-in-grade requirements were:

Promotion to W–2: 1 year in grade W–1
Promotion to W–3: 4 years in grade W–2
Promotion to W–4: 4 years in grade W–3.

After 1975, grade W–1 was discontinued; time-in-grade requirements are now:

Promotion to CW0–3 (temporary):
3 years in grade CWO–2
Promotion to CW0–3 (permanent):
6 years in grade CWO–2
Promotion to CW0–4 (temporary):
3 years in grade CWO–3
Promotion to CW0–4 (permanent):
6 years in grade CWO–3.

ACE OCCUPATIONS EVALUATION SYSTEM

The ACE evaluation system for occupations has three major components: the selection of evaluators, the materials required for evaluation, and the procedures and guidelines evaluators use in reaching decisions and making recommendations.

Selection of Evaluators

Nominations for evaluators are requested from postsecondary institutions; professional associations; disciplinary societies; education associations; regional accrediting associations; state departments of education; and state credentialing, licensing, and certifying agencies.

The criteria for selection of evaluators are as follows:

1. The area of an evaluator's competency, as evidenced by formal occupational training, knowledge, and experience, will closely approximate the skills, competencies, and knowledge required for proficiency in the occupation being evaluated.

2. When recommendations were made for apprenticeship programs, preference was given to candidates who were experienced in administration of apprentice training programs when an occupation was related to an apprenticeable trade.

3. Preference will be given to candidates with five or more years of postsecondary teaching or administrative experience, including curriculum development.

4. Preference will be given to candidates who are generally receptive to the recognition of learning that occurs in a variety of settings.

An evaluator candidate is interviewed by a staff member to determine whether the individual meets the selection criteria.

Evaluations are conducted by teams of at least three specialists. An effort is also made to attain a diverse geographic representation among evaluators. Teams are formed based on the occupations to be evaluated. Because skills required for proficiency in an occupational specialty do not always fall neatly into civilian educational and occupational fields and often encompass two or more fields, most evaluation teams include a curriculum generalist. Provision is also made for an evaluation team, when it finds it cannot thoroughly evaluate a specialty, to refer it to another team or other specialists for further evaluation.

Materials Required for Evaluation

In order to make a recommendation, evaluators first identify the skills, competencies, and knowledge associated with a given occupational specialty. The materials relevant for each evaluation are made available to staff members and evaluators by the Navy. Materials include the official Navy manuals that describe the duties and qualifications for each occupation; the ***Bibliography for Advancement Study;*** rate training manuals and other publications used by Navy enlisted men and women in the day-to-day performance of their duties and to prepare for their advancement examinations; and the advancement examination. Additional information is obtained by observing and interviewing Navy men and women during site visits to bases and units.

Evaluation Procedures and Guidelines

Evaluators identify the skills, competencies, and knowledge required of Navy men and women who are qualified in a given occupational specialty and relate that demonstrated learning to the same attributes acquired by students who have completed a comparable postsecondary course or curriculum and by tradesmen and apprentices who have completed a related apprentice training program. Because the evaluations are based on a comparison of learning outcomes, the amount of time a given enlisted man or woman may have spent acquiring occupational proficiency is not taken into consideration. The emphasis is on translating the learning demonstrated through occupational proficiency into terms used in formal civilian postsecondary education systems to recognize the same learning. This reflects the belief of the Commission on Educational Credit and Credentials that the value of learning is not dependent on where or how the learning occurs.

Evaluation teams are assigned four tasks in the evaluation process: (1) to identify the learning represented by occupational proficiency by reviewing the pertinent written materials and by observing men and women performing their occupation and interviewing them and their supervisors; (2) to prepare a description of the duties, skills, competencies, and knowledge required for each specialty; (3) to make recommendations for each specialty based on discussion and consensus; and (4) to make specific comments and suggestions about the specialties (especially in those instances when neither educational credit nor advanced standing in an apprentice training program is recommended), which are forwarded to the Chief of Naval Education and Training.

THE RECOMMENDATIONS

In order to interpret exhibits correctly, readers should become thoroughly familiar with the definitions and guidelines utilized by evaluators in formulating the recommendations. The following paragraphs include definitions and guidelines pertaining to categories of educational credit, and the semester hour standard.

Categories of Credit

Educational credit is a concept used by postsecondary institutions to quantify and record a student's successful completion of a unit of study. Postsecondary education consists of courses and programs of instruction for persons who are high school graduates or the equivalent, or who are beyond compulsory school age. ACE evaluators utilize the following categories of educational credit when formulating credit recommendations:

Vocational Certificate. This category describes course work of the type normally found in certificate or diploma (nondegree) programs that are usually a year or less in length and designed to provide students with occupational skills. This course work can also be found in curricula leading to associate degrees in applied science. Course content is specialized and the accompanying shop, laboratory, or similar practical components emphasize procedural more than analytical skills.

Lower-Division Baccalaureate/Associate Degree. This category describes course work of the type normally found in the first two years of a baccalaureate program and in programs leading to the Associate in Arts, the Associate in Science, or the Associate in Applied Science degree, the traditional transfer associate degrees. The instruction stresses development of analytical abilities at the introductory level. Verbal, mathematical, and scientific concepts associated with an academic discipline are introduced, as are basic principles. Occupationally oriented courses in this category are normally designed to prepare a student to function as a technician in a particular field.

Upper-Division Baccalaureate. This category describes courses of the type found in the last two years of a baccalaureate program. The courses involve specialization of a theoretical or analytical nature beyond the introductory level. Successful performance by students normally requires prior study in the area.

Graduate Degree. This category describes courses with content of the type found in graduate programs. These courses often require independent study, original research, critical analysis, and the scholarly and professional application of the specialized knowledge or discipline. Students enrolled in such courses normally have completed a baccalaureate program.

Semester Hours

Credit recommendations for courses are not derived by simple arithmetic conversion. Evaluators exercise professional judgment and consider only those portions of a course that can be equated with civilian postsecondary curricula. Intensive courses offered by the military do not necessarily require as much outside preparation as many regular college courses. Evaluators consider the factors of pre- and post-course assignments, prior work-related experience, the concentrated nature of the learning experience, and the reinforcement of the course material gained in the subsequent work setting.

The recommendations for Navy ratings are based on the skills, competencies, and knowledge gained, as demonstrated through proficiency in the rating, without reference to how much time elapsed during the learning process. The semester hour is used as a standard to express how many semester hours of appropriate course work a student would normally complete to attain the same learning outcomes or attest to the same level of competency.

Credit recommendations are expressed in semester credit hours. In determining semester hour recommendations, evaluators will be guided by, but not restricted to, the following standard definitions:

1. One semester credit hour for the equivalent of 15 hours of classroom contact plus 30 hours of outside preparation; or
2. One semester credit hour for the equivalent of 30 hours of laboratory work plus necessary outside preparation, normally expected to be 15 hours; or
3. One semester credit hour for the equivalent of not less than 45 hours (contact hours) of shop instruction.

Apprentice Training

Apprentice training is the composite series of progressively more difficult learning experiences in the technology and skills of a tradesman. Apprentice training may be identified in clock hours or years of reasonably continuous on-the-job training and in contact hours of related instruction. On-the-job training and work experience focus on the performance of basic skills under the direct supervision of a journeyman. Related and supplemental instruction is normally closely correlated with on-the-job training, and the subject matter stresses practical application of technology. An *apprentice* is a person who is engaged in learning a trade by working with, and under the direct supervision of, a qualified journeyman in all phases of the trade for a specified period of time. A *journeyman* is a tradesman who has satisfactorily completed an apprentice training program or achieved proficiency in a given industry and who works without direct job supervision.

Clock Hours and Contact Hours

A recommendation for advanced standing in an apprentice training program is stated in clock hours of occupational experience and contact hours of related instruction. *Clock hours* are based on hours worked at a trade; *Contact hours* are based on hours spent in the presence of a qualified instructor.

The Navy ratings recommendations are based on the skills, competencies, and knowledge gained, as demonstrated through proficiency in the rating, without reference to how much time elapsed during the learning process. Clock hours and contact hours are used to express how much of an apprentice training program an apprentice would normally complete to attain the same learning outcomes or attest to the same level of competency.

Since Navy apprenticeship programs are now registered with the U.S. Bureau of Apprenticeship and Training (BAT), general rates and ratings are no longer evaluated in terms of apprenticeship programs, although academic credit recommendations are still provided.

Other Recommendations

The Defense Activity for Non-Traditional Education Support (DANTES) maintains the educational records of the service men and women who have completed SSTs, CLEP examinations, and GED Tests.

The results of courses and tests that were taken under the auspices of USAFI (United States Armed Forces Institute, disestablished 1974) which carry academic credit and were submitted prior to June 30, 1974, are available from DANTES Contractor Representative (transcripts), P.O. Box 2879, Princeton, New Jersey 08541. Service members and veterans are required to pay a $10.00 fee for USAFI transcripts. Military education personnel can obtain them free of charge.

Results of Subject Standardized Tests and CLEP examinations taken under the auspices of DANTES after July 1, 1974, are available at a nominal charge from DANTES Contractor Representative (CLEP), Educational Testing Service, P.O. Box 2819, Princeton, New Jersey 08541.

Test reports for GED Tests taken after July 1, 1974, can be obtained from DANTES Contractor Representative (GED), GED Testing Service, American Council on Education, One Dupont Circle, Washington, DC 20036-1193.

In addition, credit recommendations for USAFI courses and tests and for DANTES Subject Standardized Tests are available from The Center and are published in the *Handbook to the Guide*.

Appendix B

Navy Enlisted Occupational Fields and Ratings

Navy enlisted ratings are grouped into 24 occupational fields. Each field provides opportunities for advancement and career progression among closely related ratings. The 24 occupational fields and the ratings which each field encompasses are as follows:

1 **General Seamanship**
Boatswain's Mate (BM)
Signalman (SM)

2 **Ship Operations**
Operations Specialist (OS)
Quartermaster (QM)

3 **Marine Engineering**
Boiler Technician (BT)
Electrician's Mate (EM)
Engineman (EN)
Gas Turbine System Technician (GS)
Interior Communications Electrician (IC)
Machinist's Mate (MM)

4 **Ship Maintenance**
Damage Controlman (DC)
Hull Maintenance Technician (HT)
Instrumentman (IM)
Machinery Repairman (MR)
Molder (ML)
Opticalman (OM)
Patternmaker (PM)

5 **Aviation Maintenance/Weapons**
Aircrew Survival Equipmentman (PR)
Aviation Antisubmarine Warfare Technician (AX)
Aviation Electrician's Mate (AE)
Aviation Electronics Technician (AT)
Aviation Fire Control Technician (AQ)
Aviation Machinist's Mate (AD)
Aviation Maintenance Administrationman (AZ)
Aviation Ordnanceman (AO)
Aviation Structural Mechanic (AM)

6 **Aviation Ground Support**
Aviation Boatswain's Mate (AB)
Aviation Support Equipment Technician (AS)

7 **Air Traffic Control**
Air Controlman (AC)

8 **Weapons Control**
Electronics Technician (ET)
Fire Control Technician (FT)
Fire Controlman (FC)

9 **Ordnance Systems**
Gunner's Mate (GM)
Mineman (MN)
Missile Technician (MT)
Torpedoman's Mate (TM)
Weapons Technician (WT)

10 **Sensor Operations**
Electronics Warefare Technician (EW)
Ocean Systems Technician (OT)
Sonar Technician (ST)

11 **Weapons Systems Support**
Tradevman (TD)

12 **Data Systems**
Data Processing Technician (DP)
Data Systems Technician (DS)

13 **Construction**
Builder (BU)
Construction Electrician (CE)
Construction Mechanic (CM)
Engineering Aid (EA)
Equipment Operator (EO)
Steelworker (SW)
Utilitiesman (UT)

14 **Health Care**
Dental Technician (DT)
Hospital Corpsman (HM)

15 **Administration**
Legalman (LN)
Navy Counselor (NC)
Personnelman (PN)
Postal Clerk (PC)
Yeoman (YN)
Religious Program Specialist (RP)

16 **Logistics**
Aviation Storekeeper (AK)
Disbursing Clerk (DK)
Mess Management Specialist (MS)
Ship's Serviceman (SH)
Storekeeper (SK)

17 **Media**
Illustrator Draftsman (DM)
Journalist (JO)
Lithographer (LI)
Photographer's Mate (PH)

18 **Musician**
Musician (MU)

19 **Master-at-Arms**
Master-at-Arms (MA)

20 **Cryptology**
Cryptologic Technician (CT)

21 **Communications**
Radioman (RM)

22 **Intelligence**
Intelligence Specialist (IS)

23 **Meteorology and Oceanography**
Aerographer's Mate (AG)

24 **Aviation Sensor Operations**
Aviation Antisubmarine Warfare Operator (AW)

Appendix C

Naval Occupational Standards

Occupational Standards define the tasks enlisted personnel must perform to be proficient in their ratings. Knowledge required to perform a given task is assumed to be inherent in the proper performance of the task. Occupational Standards are written as task statements which are derived by personnel experts from the data resulting from a thorough analysis of the task and the rating.

The task statements are listed under topic titles. The topic titles provide a method of grouping similar standards for various ratings. Examples of topic titles are administration, publications, and maintenance planning and quality assurance. An example of a task statement for the air traffic controller second class administration is: "maintain air traffic operations logs and records."

Task statements are identified by five-digit numbers. The first two digits identify the topic title (38 for administration, for example). The remaining three digits identify the specific task statement. For example, the five-digit number that identifies the topic title and task statement for the air traffic controller second class mentioned in the preceding paragraph is 38235.

The occupational standards for the general rating, Air Traffic Controller, follow:

GENERAL INFORMATION

Career Pattern

ACCM

ACCS

ACC

AC1

AC2

AC3

Airman Apprenticeship

Normal path of advancement to Warrant Officer and Limited Duty Officer categories is to Aviation Operations Technician (732X) and LDO Aviation Operations (632X).

Special Physical Requirements

Vision 20/200 correctable in each eye to 20/20; normal color perception; normal hearing; no speech impediment; pass examination for Class II FAA Medical Certificate (Part 67, FAA Regulations). Refer to Articles 15.10, 15.13A, 15.21 and 15.69 of the Manual of the Medical Department, U.S. Navy for details on hearing, color perception and speech requirements.

Citizenship/Security Requirements

Must be eligible for access to classified information.

Air Traffic Controllers (AC) perform air traffic control duties in air control towers, radar air traffic control facilities, and air operations offices ashore and afloat; operate radiotelephones, light signals and systems, and direct aircraft under VFR and IFR conditions; operate surveillance radar, precision radar, and identification equipment (IFF); operate ground- and carrier-controlled approach systems; assist pilots in the preparation and processing of flight plans and clearances; and maintain current flight planning information and reference materials.

Air Traffic Controller Third Class (AC3)

12 AIR TRAFFIC CONTROL

12251	Perform flight following, provide advisory services and control aircraft using air surveillance radar
12252	Process flight plans
12257	Inform necessary units and direct fire, crash and rescue personnel to emergency sites
12258	Issue instructions to and coordinate communications between vehicular traffic and aircraft on the ground
12259	Locate, identify and track aircraft
12260	Maintain flight data and status board
12261	Obtain, record and relay air traffic control clearances to aircraft
12266	Control aircraft using precision approach radar
12270	Correct for effects of weather and topography on radar, IFF and related equipment
12271	Direct air traffic under instrument flight rules
12272	Direct air traffic under visual flight rules
12273	Direct ground and air traffic using signal light gun
12275	Provide Air Traffic Control (ATC) services to aircraft that have experienced an emergency situation in flight
12276	Identify standard airfield requirements and associated equipment
12277	Select various radar presentations that will reduce clutter

32 SECURITY

32002	Comply with communications security requirements

33 COMMUNICATIONS

33323	Obtain and relay weather information to aircraft and local weather facilities

40 ELECTRICAL SYSTEMS OPERATIONS

40283	Operate airfield lighting systems

43 ELECTRONIC SYSTEMS OPERATION

43251	Perform equipment operation checks
43268	Monitor electronic aids to air navigation

46 ELECTRO/MECHANICAL MAINTENANCE

46254	Perform operator preventive maintenance on ATC control tower equipment
46255	Perform operator preventive maintenance on ATC radar equipment
46256	Perform operator preventive maintenance on telecommunications equipment

68 GENERAL ADMINISTRATION

68023	Maintain logs
68026	Maintain records
68049	Use publications
68546	Make corrections to publications

69 TECHNICAL ADMINISTRATION

69067	Use charts
69267	Prepare and process ATC data
69268	Prepare and process notices to all airmen (NOTAMS)

79 LOGISTICS

79379	Issue flight planning material, charts and publications

Air Traffic Controller Second Class (AC2)

12 AIR TRAFFIC CONTROL

12254	Supervise air traffic control (ATC) facility base operations
12269	Coordinate search and rescue operations
12278	Direct aircraft under special VFR conditions
12279	Coordinate air space usage within restricted/warning areas

68 GENERAL ADMINISTRATION

68033	Order publications

69 TECHNICAL ADMINISTRATION

69052	Order charts

70 TRAINING

70281	Conduct ATC Training

Air Traffic Controller First Class (AC1)

12 AIR TRAFFIC CONTROL

12256	Supervise control tower operations
12268	Coordinate functions of radar air traffic control (ATC) facility
12280	Provide ATC services to aircraft conducting flight checks
12281	Apply non-radar separation to IFR aircraft

67 MANAGEMENT AND SUPERVISION

67353	Schedule operator preventive maintenance on ATC facility equipment

68 GENERAL ADMINISTRATION

68024	Maintain publications

70 TRAINING

70355	Supervise ATC training
70356	Evaluate controllers on each position within the facility for qualification

Chief Air Traffic Controller (ACC)

12 AIR TRAFFIC CONTROL

12253	Serve as air traffic control (ATC) facility watch supervisor
12255	Supervise ATC facility flight checks

67 MANAGEMENT AND SUPERVISION

67004	Conduct and supervise safety and inspection programs
67284	Serve as ATC facility branch manager
67364	Supervise radar ATC operations
67647	Supervise use, filing and maintenance of publication, logs and records

68 GENERAL ADMINISTRATION

68051	Write correspondence
68066	Prepare reports

69 TECHNICAL ADMINISTRATION

69415	Coordinate work within a division
69423	Disseminate U.S. Navy and FAA regulations, directives, correspondence and other information governing the operations of ATC facilities
69527	Conduct controller proficiency reviews

70 TRAINING

70260	Supervise the ATC facility training program
70357	Test/qualify tower and radar controllers for position qualifications

79 LOGISTICS

79299	Requisition and account for ATC equipment
79403	Prepare operational capability improvement request (OCIR)

Senior Chief Air Traffic Controller (ACCS)

12 AIR TRAFFIC CONTROL

12267	Coordinate Air Traffic Control (ATC) facility flight checks

57 MAINTENANCE PLANNING

57269	Coordinate and ensure maintenance of ATC facility equipment

67 MANAGEMENT AND SUPERVISION

67015	Establish and implement a program for interviewing, evaluating and assigning personnel
67017	Evaluate effectiveness of safety and inspection programs
67031	Provide information and advise on utilization, capabilities, reliability and operations
67474	Evaluate existing airspace requirements and provide recommendations for restructuring airspace to meet a facility's operational requirements

68 GENERAL ADMINISTRATION

68052	Write directives and instructions

69 TECHNICAL ADMINISTRATION

69259	Plan, organize and prepare runway use and noise abatement programs
69340	Review and process ATC facility reports
69347	Review and verify facility compliance with planning standards for approach zone criteria, obstruction lighting and field marking

70 TRAINING

70015	Organize and schedule training programs and evaluate effectiveness

Master Chief Air Traffic Controller (ACCM)

12 AIR TRAFFIC CONTROL

11262	Administer an air traffic control (ATC) facility

67 MANAGEMENT AND SUPERVISION

67016	Establish goals, objectives and priorities
67030	Plan, organize, implement and control activities
67032	Review personnel, equipment and material requirements
67033	Review policy statements, operation orders and directives

68 GENERAL ADMINISTRATION

68067	Prepare staff studies
68297	Prepare and interpret letters of agreement, directives and memoranda

78 FINANCIAL CONTROL

78001	Develop operating budgets and monitor expenditures

98 PLANNING AND ESTIMATING

98003	Forecast furture requirements

Appendix D

Naval Standards

Naval standards are tasks—skills and knowledge—other than those defined by occupational standards, that are essential to the overall effectiveness of enlisted personnel in the performance of their duties. They pertain to general rates and ratings for paygrades E-2 through E-9. They include standards pertaining to military requirements, professional development, and Naval tradition.

Naval standards are identified by six-digit numbers. The first three digits, always in the 900s, identify the standard topic title. The remaining three digits identify the specific task statement. For example, the number 901 indicates that the standard topic title is "Watch, Quarter and Station Bill" and the specific task is "Purpose and content of watch, quarter and station bill."

Apprentice (E-2)

900 Military Requirements

901 WATCH, QUARTER AND STATION BILL

901201 Purpose and content of watch, quarter and station bill

902 SEAMANSHIP

902201 Terminology used in deck and boat seamanship

902202 Procedures for locating and reporting an object by relative bearing and position angle

902203 Difference between true and relative bearings

902204 Nomenclature of deck equipment

902205 Splicing line and tying basic knots

902206 Types, sizes and maintenance of line

903 DRILL

903201 Individual positions and facings without arms

904 UNIFORMS

904201 Meaning and significance of the service stripes

904202 Sleeve insignia and collar device identification of U.S. Navy enlisted rates and ratings

904203 Grade insignia and corps devices of U.S. Naval officers

904204 Regulations for correct upkeep, wearing and marking of U.S. Navy enlisted uniforms

904205 Regulations concerning identification tags and identification cards

904206 Rank insignia of other U.S. armed service paygrades and comparative U.S. Navy officer ranks and enlisted rates

904207 Regulations for correct wearing of U.S. Navy awards

904208 Regulations concerning proper grooming standards

905 SMALL ARMS

905201 Procedures for firing the service rifle and pistol in prescribed positions

905202 Precautions required to prevent hearing loss when exposed to small arms fire

906 WATCHSTANDING

906201 Procedures for relieving an armed watch

906202 Procedures for standing a proper military watch

906203 Eleven general orders of a sentry (watch)

906204 Duties and responsibilities of a lookout

906205 Duties and responsibilities of a military watch

907 COMMUNICATIONS

907201 Standard telephone procedures and phraseology when using sound-powered telephones, dial telephones and intercoms

907202 Procedures to break-out, man, test and secure a shipboard sound-powered headset

907203 Pronunciation of numbers and phonetic alphabet

907204 Communications security

907205 General administrative and emergency signal flags and pennants

908 SHIPS AND AIRCRAFT CHARACTERISTICS

908201 Major types of ships and aircraft of the U.S. Navy

908202 Nomenclature of superstructure, decks and components of the hull

908203 Numbering system for decks

908204 General characteristics and mission of U.S. ships and aircraft

908205 Lettering and numbering system for compartments

910 Personnel Safety

911 SAFETY

911201 Hazards when entering or working in unventilated spaces

911202 Hazards when using CO_2 and Halon 1301 as fire extinguishing agents

911203 Precautions when handling and stowing fire extinguishers

911204 Dangers involved in handling a charged fire hose

911205 Dangers involved in the operations of an internal combustion engine in an unventilated space

911206 Dangers of energizing and using electrical equipment in a space filled with explosive vapors

911207 Safety precautions when embarked in small boats

911208 Safety precautions for recreation and sports

911209 Safety precautions when in the vicinity of aircraft

911210 Safety precautions involved in working with or in the vicinity of:

A. fuels, paints, approved cleaning agents and flammables
B. weapons, ammunition and pyrotechnics
C. electric and electronic equipment
D. compressed gases
E. compressed air
F. liquids under pressure
G. steam
H. lifelines, ladders and scaffolding
I. heavy weight and moving equipment
J. personnel aloft or over the side
K. voids, tanks and closed compartments
L. cutting and welding operations
M. power tools
N. antennas
O. suspended loads
P. fiberglass and asbestos
Q. high noise level

  R. lines under tension
  S. rotating machinery
  T. caustic liquids
  U. marine sanitation systems
  V. electromagnetic radiation
  W. heat and cold stress areas

911211 Safety precautions when operating motor vehicles
911212 Deck safety precautions
911213 Hazards when entering spaces where CO_2 or Halon 1301 extinguishers have been discharged
911214 Labels, signs and symbols used to identify hazardous material
911215 Procedures for reporting safety hazards and violations
911216 Use and maintenance of personal protective equipment
911217 Purpose, use and procedures of the Navy tag out system
911218 Safety procedures to follow when lifting objects
911219 Safety precautions in handling firearms

912 FIRST AID AND PERSONAL HYGIENE

912201 Procedures for applying a battle dressing
912202 Procedures for control of arterial and venous bleeding by compress, finger pressure and tourniquet
912203 Symptoms of and procedures to prepare and apply an improvised splint for closed and open fractures
912204 Procedures for cardiopulmonary resuscitation
912205 Procedures to transport an injured person by fireman's lift, tied-hands crawl and standard shipboard litters
912206 Prevention and symptoms of sexually transmitted diseases
912207 Purpose, general rules and limitations of first aid
912208 Symptoms of and immediate treatment for shock
912209 Procedures for rescuing a person in contact with an energized electrical circuit and subsequent treatment for electrical shock
912210 Symptoms of and first aid treatment for heat exhaustion and heat stroke
912211 Symptoms, classification and first aid treatment of burns
912212 Reasons for maintaining sanitary conditions
912213 Body cleanliness and personal care of the feet, hair and scalp
912214 Procedures and required equipment to maintain good oral hygiene
912215 Procedures for abdominal/chest thrust to remove foreign body obstruction
912216 Procedures for artificial ventilation by mouth-to-mouth and alternate methods

913 SURVIVAL

913201 Perform prescribed minimum swimming qualifications
913202 Use of clothing and buoyant objects for staying afloat
913203 Care and use of personal flotation devices
913204 Techniques of swimming through oil, flames and debris
913205 Preparation and methods for abandoning ships
913206 Use of desalting equipment and methods of obtaining fresh water
913207 Evasion, resistance and escape while in enemy-held territory
913208 Use of life boats and associated survival gear
913209 Concepts of land and sea survival

914 CHEMICAL, BIOLOGICAL AND RADIOLOGICAL (CBR) DEFENSE

914201 Care and use of protective mask
914202 Use of equipment and clothing to protect against CBR contamination
914203 Markers used to indicate CBR contamination
914204 Purpose of monitoring and decontamination teams
914205 Methods of dissemination of chemical and biological agents
914206 Personnel decontamination
914207 Use of atropine as an antidote for nerve agents
914208 Self aid and first aid methods in countering the effects of nerve, blister, blood, choking and chemical agents
914209 Effects of nuclear radiation (alpha, beta, gamma and neutrons)
914210 Area decontamination procedures ashore and afloat
914211 Properties of chemical warfare (CW) agents
914212 Protection afforded by each level of mission oriented protective posture (MOPP)

920 Material Condition

921 DAMAGE CONTROL

921201 The four classes of fire and how each class is determined
921202 Recommended extinguishing agents for each class of fire
921203 Procedures to report a fire or other casualty
921204 Letters and symbols that designate the material conditions of readiness
921205 Compartmentation and its use in maintaining watertight integrity
921206 Fire triangle in terms of fire prevention and firefighting
921207 Conditions that cause spontaneous combustion
921208 Good housekeeping practices for fire prevention
921209 Duties and responsibilities of a repair party
921210 Shipboard piping identification coding system
921211 Use and stowage of damage control equipment and systems
921212 Function and use of the oxygen breathing apparatus (OBA)
921213 The three major material conditions of readiness
921214 Procedures for breaking watertight integrity and darken ship
921215 Damage control organization
921216 Identification of damage control lockers and use of contents
921217 Methods and procedures for communications in a damage control situation
921218 Procedure and reason for setting material conditions of readiness
921219 Use and stowage of emergency escape breathing device (EEBD)
921220 Shipboard emergency procedures
921221 Purpose and precedence of shipboard emergency alarms
921222 Action taken when emergency alarm is sounded

922 SURFACE PRESERVATION

922201 Cleaning and stowing of painting equipment
922202 Purpose for cleaning and preservation
922203 Equipment, methods and procedures for preparing and painting a surface
922204 Methods and procedures for preserving surfaces not to be painted

930 Military Conduct and Justice

930201 Authority and functions of military police
930202 Content and responsibilities stated in Articles I through VI of the code of conduct for members of the Armed Forces of the United States
930203 General content of Navy Regulations, Chapter 8 (Articles 0801–0803, 0810–0816, 0825–0826, 0829–0830, 0834 and 0847) and Chapter 11
930204 Purpose of military discipline and punishment
930205 General content of UCMJ Articles 2, 3, 7–15, 25, 27, 31, 37, 38, 55, 77–134 and 137–139

940 Professional Development

941 CAREER INFORMATION

941201 Personal financial management
941202 Reasons for and consequences of the various types of discharges
941203 Enlisted career structure
941204 Enlisted performance evaluation system
941206 Requirements for advancement of nonrated personnel
941207 Educational and training opportunities

941208 Contents of the enlisted service record
941210 Government insurance benefits
941212 Incentives for a Navy career
941213 Sea duty, shore duty and neutral duty

944904 Procedures for preparing staff studies

944905 Procedures for reviewing and monitoring implementation of policy statements, operation orders and directives

944906 Procedures for developing, establishing and monitoring goals and objectives

Appendix E

Navy Warrant Officer and Limited Duty Officer Occupational Fields

The third digit of a warrant officer and limited duty officer designator code represents the occupational field. It is always a number from 1–8. This third digit will represent one of three different occupational fields. Depending on the second digit, (the platform of operation), the title of the occupational field will vary. Refer to **Figure 1**. If a person's specialty is 741X, the "4" indicates that the platform of operation is "general," and the "1" stands for "Ship's Clerk." However, if the specialty is 731X, the "3" represents "aviation," and the "1" will stand for "Boatswain." The five platforms of operation are: 1 = surface; 2 = submarine; 3 = aviation; 4 = general; and 5 = staff corps.

The following figure lists the definitions for the occupational field designator according to the platform of operation for warrant officers.

Occ. Field	Platform of Operation		
	1 Surface 2 Submarine 3 Aviation	**4 General**	**5 Staff Corps**
1	Boatswain	Ship's Clerk	Supply Corps
2	Operations Technician	Data Processing	Food Service
3	Engineering Technician (surface and submarine)	Bandmaster	Civil Engineer Corps
4	Repair Technician (surface and submarine) Maintenance Technician (aviation)	Cryptologic Technician	Physician's Assistant
5	Nuclear Power Technician (surface and submarine)	Intelligence Technician	
6	Ordnance Technician	Aerographer	
7	Underwater Ordnance Technician	Photographer	
8	Electronics Technician	Explosive Ordance Disposal Technician	

Figure 1: *Warrant Officer Occupational Fields*

The following figure lists the definitions for the occupational field designator according to the platform of operation for limited duty officers.

Occ. Field	Platform of Operation		
	1 Surface 2 Submarine 3 Aviation	**4 General**	**5 Staff Corps**
1	Deck	Administration	Supply Corps
2	Operations	Data Processing	Mess Management (Supply Corps)
3	Engineering (surface) Repair (submarine) Maintenance (aviation)	Bandmaster	Civil Engineering Corps
4		Cryptology	
5	Nuclear Power (surface and submarine)	Intelligence	
6	Ordance	Meteorology	
7		Photography	
8	Electronics (surface and submarine) Avionics (aviation)	Explosive Ordance Disposal	

Figure 2: *Limited Duty Officer Occupational Fields*

Appendix F

Navy Warrant Officer and Limited Duty Officer Status Codes

The fourth digit of a warrant officer and limited duty officer designator code represents the individuals status in the Navy or Naval Reserve. A digit from 0–9, it appears in the exhibits as an "X."

Officer Designator Code	Status
0	An officer of the Regular Navy whose permanent grade is Ensign or above.
1	An officer of the Regular Navy whose permanent status is warrant officer.
2	A temporary officer of the Regular Navy whose permanent status is enlisted.
3	An officer of the Regular Navy who is on the retired list.
4	An officer of the Naval Reserve whose permanent status is enlisted.
5	An officer of the Naval Reserve. Exceptions: note fourth digit 4, 6, 7, and 8.
6	An officer of the Naval Reserve who was appointed in the Naval Reserve Integration Program from enlisted status.
7	An officer of the Naval Reserve on active duty in the TAR program (Training and Administration of Reserves), including officers of the TAR program rotated to other TAR billets.
8	An officer of the Naval Reserve whose permanent status is warrant officer.
9	An officer of the Naval Reserve who is on the retired list.

APPLICATION FOR THE EVALUATION OF LEARNING EXPERIENCES DURING MILITARY SERVICE

(Date)

TO: (Name and address of educational institution, agency, or employer)

EVALUATION REQUEST FOR:

(Name of Applicant)

(Social Security Number)

ATTENTION:

Dear Official:

The applicant named above has requested that the attached summary of educational achievements, accomplished while in the Armed Forces of the United States, be forwarded to you for review and evaluation.

The American Council on Education publishes the *Guide to the Evaluation of Educational Experiences in the Armed Services* which includes postsecondary credit evaluations of military learning experiences. The 1954 edition of the *Guide* contains recommendations for formal courses offered by the Armed Services during the period 1941 to 1954. The current edition contains credit recommendations for (1) military training courses offered after 1954; (2) Army military occupational specialties (MOS's) for enlisted personnel and warrant officers; (3) ratings held by Navy and Coast Guard enlisted personnel; and (4) occupational designators held by Navy and Coast Guard warrant officers and Navy limited duty officers. In addition to recommendations for semester hour credits, some Army enlisted MOS's and Navy ratings also have recommendations for advanced standing in apprentice training programs.

The American Council on Education maintains an advisory service to provide credit recommendations for courses and tests, MOS's, ratings, and other occupations evaluated after the publication date of the current *Guide*. Credit recommendations are provided to officials of schools, state departments of education or other educational institutions, employers, apprenticeship training directors, labor union and trade association officials, military education officers and applicants. *Credit recommendations are not provided to officials at the applicant's request.* Authorized persons may write directly to the Military Evaluations Program Office, American Council on Education, One Dupont Circle, N.W., Washington, D.C. 20036-1193.

The evaluation of this applicant's learning experiences, as well as any guidance which you may provide, should be sent directly to the applicant at the address shown in block 6 on page 3. Your interest is genuinely appreciated.

Sincerely,

(Education Officer)

DD Form 295, NOV 86 *Previous editions are obsolete* Page 1 of 4 Pages
1207/330

Privacy Act Statement

AUTHORITY: 5 USC 301 and EO 9397, November 1943 (SSN).

PRINCIPAL PURPOSE: To permit authorized agencies to evaluate military experience for academic placement and/or employment.

ROUTINE USES: Used at the request of the individual for the evaluation of military training.

DISCLOSURE: Voluntary; however, failure to provide requested information impedes the evaluation process by educational institutions or potential employers.

INSTRUCTIONS TO APPLICANT

DD Form 295 is for your convenience in applying for evaluation of your educational experiences during military service. Give as much detailed information as possible. Include additional information on separate sheets, if necessary.

You are encouraged to write a preliminary letter to the school or agency concerned, explaining your interest in its evaluation of your records for the continuance of your education. Training, correspondence study, or special experiences not described on this form, which you believe would be of interest to those reviewing your case, should be included in this letter.

The applicant should:

a. Complete items 1 through 15.

b. If you have attended college or completed any college correspondence courses, ask that college to send a transcript to the Registrar of the evaluating agency that this form is addressed to. DO NOT LIST ANY COLLEGE OR UNIVERSITY COURSES ON THIS FORM.

c. If you have completed any college-level standardized examinations for credit, such as USAFI or DANTES Subject Standardized Tests, or CLEP, ask the appropriate agency to send a score report to the Registrar of the evaluating agency that this form is addressed to. DO NOT LIST ANY EXAMINATIONS ON THIS FORM.

d. After completion, submit this DD Form 295 to the Certifying Officer.

INSTRUCTIONS TO CERTIFYING OFFICER

(Custodian of Personnel Records)

DD Form 295 is intended to provide factual information that schools and other evaluating agencies require for evaluation of the applicant's educational achievement. CERTIFYING OFFICERS WILL NOT MAKE RECOMMENDATIONS REGARDING CREDIT TO BE AWARDED.

The certifying officer should:

a. Complete items 16 through 18.

b. Insure that the information provided in Section II is documented in the applicant's Service Record. Names of schools or courses should not be abbreviated.

c. Send this DD Form 295 to the Education Officer.

INSTRUCTIONS TO EDUCATION OFFICER

The education officer should:

a. Complete item 19.

b. Counsel the service member.

c. Complete page 1. The name and address of the evaluating agency should be the same as that listed at the top of page 3 of this form.

PAGE 1 IS IN ADDITION TO, AND NOT A SUBSTITUTE FOR, THE LETTER TO BE WRITTEN TO THE EVALUATING AGENCY BY THE APPLICANT.

d. Mail DD Form 295 directly to the designated evaluating agency.

Naval Reserve Center Pensacola

3MAY90: Qualified for Recruiter in Charge in accordance with COMNAVRESFORINST 1130.11

Commanding Officer

NAME *(Last First Middle)*	**SSN**	**BRANCH AND CLASS** USN

13 ☐

G-16 Letter of Designation

DEPARTMENT OF THE NAVY
NAVAL RESERVE CENTER
PENSACOLA, FLORIDA 32509

IN REPLY REFER TO

1100
Ser 08/17
3 May 90

From: Commanding Officer, Naval Reserve Center Pensacola
To:

Subj: DESIGNATION AS RECRUITER IN CHARGE (RINC)

Ref: (a) COMNAVRESFORINST 1130.11
(b) COMNAVRESFORINST 1133.1A

1. In accordance with reference (a), you are designated as the Recruiter in Charge (RINC) for the Naval Reserve Center, Pensacola, Florida. You will report directly to the Commanding Officer in all matters concerning recruiting and other recruiters assigned to this command. Additionally, you will be responsible for the following:

a. Thoroughly familiarize yourself with references (a) and (b) and information pertaining to the qualifications for enlistments, reenlistments, and affiliations.

b. Be familiar with all aspects of the recruiting mission.

2. As Recruiter in Charge, it is your primary responsibility to provide the best quality of applicants for an enlistment in the U. S. Navy while accomplishing your assigned yearly goals.

Navy Enlisted Classification Index

(Exhibits begin on page 5–1.)

Career Recruiter*	NEC-2186-001
Certified Navy Drug and Alcoholism Counselor	NEC-9519-001
Classification Interviewer**	NEC-2612-001
Collateral Duty Career Information Coordinator	NEC-9588-001
Command Career Information Retention Counselor/Coordinator	NEC-9589-001
Instructor	NEC-9502-001
Recruiter Canvasser***	NEC-9585-001

* Includes descriptions and recommendations for *Recruiter, Recruiter-In-Charge, Zone Supervisor,* and *Chief Recruiter.*

** Includes descriptions and recommendations for *Classifier, Enlisted Processing Division Supervisor,* and *Military Entrance Processing Station (MEPS) Liaison Petty Officer.*

*** Includes descriptions and recommendations for *Recruiter, Recruiter-In-Charge, Zone Supervisor, Chief Recruiter, 6-Year Obligor/Nuclear Field Recruiter, NF/Prior Service (RZ) Recruiter, Leads Supervisor,* and *Delayed Entry Program (DEP) Coordinator.*

Keyword Index

This index is designed to provide rapid access to the courses described in the course exhibit section. Titles of courses are arranged alphabetically under keywords which have been extracted verbatim from the titles. For example, the keyword *Data Processing* is followed by all titles containing the words *Data Processing.*

To locate a specific course, identify a word or group of words in the title which seems to be unique of descriptive. For example, the title *Data Processing Specialist, COBOL* can be found under the keywords *Data Processing* or *COBOL.* Similarly, the title *Russian Technician* can be found under the keyword *Russian.*

The ID number for each course is displayed to the right of the title. Refer to that number in the course exhibit section for a full description of the course.

A-3
- A-3 Bombing Data Computer CP-66A/ASB-1 Maintenance NV-1715-0263
- A-3 Related Avionics System (AT/AQ) Organizational Level Maintenance NV-1715-0279

Aviation Squadron Electronic Warfare (EW) Officer, Class A2 NV-1715-0831
Aviation Storekeeper Advanced Training Class C NV-1405-0020
Aviation Storekeeper, Class A NV-1405-0004
Aviation Storekeeper, Class B NV-1408-0019
Aviation Structural Mechanic (Hydraulic) Class A1 NV-1704-0128
Aviation Structural Mechanic (Safety Equipment), Class A1 NV-1704-0325
Aviation Structural Mechanic (Structures) Class A1 NV-1704-0132
Aviation Structural Mechanic E (Safety Equipment) Class C7 NV-1704-0116
Aviation Structural Mechanic E (Safety Equipment), Class A NV-1704-0130
Aviation Structural Mechanic E (Safety Equipment), Class B NV-1704-0116
Aviation Structural Mechanic H (Hydraulics), Class A NV-1704-0128
Aviation Structural Mechanic H (Hydraulics), Class B NV-1704-0087
Aviation Structural Mechanic S (Structures), Class A NV-1704-0132
Aviation Structural Mechanic S (Structures), Class C7 NV-1704-0177
Aviation Structural Mechanic S (Structures, Class B NV-1704-0177
Aviation Structural Mechanic, Class B NV-1704-0239
Aviation Support Equipment A/S 32P-16 Fire Fighting Truck Intermediate Maintenance NV-1703-0016
Aviation Support Equipment A/S32A-33 Aircraft Towing Tractor Intermediate Maintenance NV-1703-0015
Aviation Support Equipment Automatic Transmission Intermediate Maintenance NV-1703-0010
Aviation Support Equipment Cryogenic Intermediate Maintenance NV-1704-0255
Aviation Support Equipment LHA-1 Pallet Transporter Intermediate Maintenance NV-1703-0017
Aviation Support Equipment Mobile Air Conditioning Intermediate Maintenance NV-1701-0008
Aviation Support Equipment Mobile Electric Power Plant Intermediate Maintenance NV-1715-0541
Aviation Support Equipment NC-10B Mobile Electric Power Plant Systems Intermediate Maintenance NV-1715-0698
Aviation Support Equipment NC-10B/C Mobile Electric Power Plant Systems Intermediate Maintenance NV-1715-0698
Aviation Support Equipment NC-2A Mobile Electric Power Plant Intermediate Maintenance NV-1715-0700
Aviation Support Equipment Technician (Mechanical) Class A NV-1704-0246
Aviation Support Equipment Technician Electrical NV-1714-0019
Aviation Support Equipment Technician, Class A (Electrical Specialty) NV-1704-0111
Aviation Support Equipment Technician, Class A1 NV-1704-0326
Basic Naval Aviation Officer NV-1606-0044
Carrier Aviation Antisubmarine Warfare Acoustic Operator (Passive) NV-2202-0096
Class A Aviation Guided Missileman NV-1715-0629
E-2A Aviation Electrician Organizational Maintenance NV-1704-0081
E-2B/C-2A Aviation Electrician Organizational Maintenance NV-1704-0224
Enlisted Basic Aviation Training NV-1704-0157
Flight Preparation, Naval Aviation Cadet and Aviation Officer Candidate NV-1606-0046
Helicopter Aviation Antisubmarine Warfare (AASW) Air Sonar Operator (AN/AQS-13) NV-2202-0080
Intermediate Aviation Antisubmarine Warfare (AASW) Technician, Class B NV-1715-0167
Intermediate Aviation Fire Control Technician, Class B NV-1715-0646
Joint Aviation Supply and Maintenance Material Management NV-1405-0009
Marine Aviation Operations Clerical, Class C NV-1409-0008
Marine Aviation Supply (Manual), Class C NV-1409-0005
Marine Aviation Supply (Mechanized), Class C NV-1405-0007
Marine Aviation Supply, Class C NV-1405-0008
Marine Corps Aviation Supply Officer Qualification NV-1408-0024
Naval Aviation Logistics Data Analysis (NALDA) NV-1402-0154
Naval Aviation Maintenance/Material Management, Class B NV-1717-0003
Naval Aviation Observer (Controller), Class O NV-1704-0197
P-3 Aviation Machinist's Mate (AD) Entry Level NV-1715-1026
Pre-flight, Naval Aviation Cadets and Aviation Officer Candidates NV-1606-0046
Supply Corps Officer Basic Qualification - Aviation Management NV-1405-0012
SH-2 Aviation Machinist's Mate Power Plant System NV-1704-0289
SH-3 Aviation Machinist's Mate Class A Power Plant Systems NV-1704-0297
Warrant Officer (WO) Aviation Indoctrination NV-2202-0016

Aviation Electronics
Aviation Electronics Fundamentals, Class A NV-1715-0380
Aviation Electronics Intelligence, Class O/C NV-1715-0504
Aviation Electronics Officers, Class O NV-1715-0522
Aviation Electronics Technician N (Navigation), Class A NV-1715-0097
Aviation Electronics Technician R (Radar), Class A NV-1715-0295
Aviation Electronics Technician S (Antisubmarine), Class A NV-1715-0154
Aviation Electronics Technician/ Aviation Fire Control Technician, Advanced Class B NV-1715-0137
Aviation Electronics Technician, Class A NV-1715-0289
Aviation Electronics Technician, Class B NV-1715-0137
Aviation Electronics Warfare Fundamentals NV-1715-1146
Aviation Electronics Warfare Intermediate Level Maintenance NV-1715-1149
Aviation Electronics Warfare O Level Maintenance NV-1715-1147

Aviation Electronics Warfare Tactical Operator
NV-1715-1148

Aviation Support
Aviation Support Equipment Detroit Series 53 Diesel Intermediate Maintenance
NV-1712-0021
Aviation Support Equipment Gasoline Engine Intermediate Maintenance
NV-1703-0006
Aviation Support Equipment GTCP-100 and Enclosures Intermediate Maintenance
NV-1704-0109
Aviation Support Equipment GTCP-100 Engine Intermediate Maintenance
NV-1704-0109
Aviation Support Equipment Mobile Electric Power Plant Intermediate Maintenance
NV-1715-0541
Aviation Support Equipment NC-10B Mobile Electric Power Plant Systems Intermediate Maintenance
NV-1715-0698
Aviation Support Equipment NC-10B/C Mobile Electric Power Plant Systems Intermediate Maintenance
NV-1715-0698
Aviation Support Equipment NC-2A Mobile Electric Power Plant Intermediate Maintenance
NV-1715-0700
Aviation Support Equipment SDID Aircraft Spotting Dolly Intermediate Maintenance
NV-1704-0256
Aviation Support Equipment Technician (Mechanical) Class A
NV-1704-0246
Aviation Support Equipment Technician Hydraulics and Structures, Class A
NV-1704-0138
Aviation Support Equipment Technician Mechanical, Class A
NV-1704-0145
Aviation Support Equipment Technician, Class A (Hydraulic Specialty)
NV-1704-0112
Aviation Support Equipment Technician, Class A (Mechanical Speciality)
NV-1704-0113
Aviation Support Equipment UD-282 and Detroit Series 53 Diesel Engines Intermediate Maintenance
NV-1712-0021

Aviator
Advanced Navigation Training (Postgraduate Coast Guard Aviator)
NV-1606-0033
Advanced Navigation Training (Postgraduate Naval Aviator)
NV-1606-0032
Navigation Flight Training, Naval Aviator and Naval Flight Officer
NV-1606-0045

Avionic
SH-2D Light Airborne Multipurpose Systems (LAMPS) Avionic Equipment Organizational Maintenance
NV-1715-0697

Avionics
A-3 Related Avionics System (AT/AQ) Organizational Level Maintenance

Avionics Officers, Class O
NV-1715-0170
Avionics Repairman, Class C
NV-1704-0228
Avionics Technician (AV), Class A
NV-1715-0380
Avionics Technician Class A1, Modules 1-9
NV-1715-0380
Avionics Technician, Class A
NV-1715-0380
Avionics Technician, Class A1
NV-1715-1439
NV-1715-1440
Avionics, Class B
NV-1715-0137
C-2A Avionics Systems Organizational Maintenance
NV-1715-1217
Integrated Avionics Radar System Technician
NV-1715-0035
Integrated Avionics Weapons System Specialist
NV-1715-0266
Integrated Avionics Weapons System Technician
NV-1715-0267
Intermediate Avionics, Class B
NV-1715-0102
P-3C Integrated Avionics System (Update I) Organizational Maintenance
NV-1715-1025
P-3C Integrated Avionics System Technician
NV-1715-0329
RA-5C Avionics Officers/Supervisors Familiarization
NV-1704-0038
S-2D/E Avionics Systems Organizational Maintenance
NV-1715-0641
S-3A Copilot Avionics
NV-1606-0057
TACAMO Communication and Avionics System Operation
NV-1715-1182

Azimuth
AN/SRN-15 TACAN Distance Azimuth Measuring Equipment (DAME) Maintenance (Electronics Technician, Class C1)
NV-1715-0175

AASW
Aviation Antisubmarine Warfare (AASW) for First Tour Pilots P3A/B/(D)
NV-1715-0270
Aviation Antisubmarine Warfare (AASW) for First Tour Pilots, P-3C
NV-1606-0028
Aviation Antisubmarine Warfare (AASW) for Naval Flight Officers P3A/B(D)
NV-1715-0555
Aviation Antisubmarine Warfare (AASW) for Naval Flight Officers, P3C

Intermediate Level Calibration of Physical/Dimensional Test and Measuring Systems Phases B/D NV-1715-1495

Direction
AN/ALD-2B Direction Finder System Intermediate Maintenance NV-1715-1030
AN/SYR-1 Weapons Direction System (WDS) Mk 14 Maintenance NV-1402-0062
Cryptologic Technician O, High Frequency Direction Finding (HFDF), Communications Technical Control, Class C1 NV-1715-0800
High Frequency Direction Finding (HFDF) Communications Technical Control NV-1715-0800
High Frequency Direction Finding (HFDF) Maintenance NV-1715-1256
OUTBOARD Maintenance Direction Finding (DF) Technician NV-1715-1241
Radio Direction Finder AN/BRD-6 Combined Maintenance NV-1715-0903
Radio Direction Finder AN/BRD-6 Operational Maintenance NV-1715-0903
Tartar Weapons Direction System (WDS) Mk 4 WDE Mk 1 NV-1715-1121 NV-1715-1391
Tartar Weapons Direction System Mk 13 Mod 4 NV-1715-1264
Universal Cryptologic Processor Training (UNCRYPT) High Frequency Direction Finding (HFDF) Maintenance NV-1402-0112

Director
Mk 68 Director and Computer Mk 47 Mods 8 and 11 Difference Maintenance NV-1715-0271
Mk 68 Gun Director and AN/SPG-53F Radar Maintenance NV-1715-0239

Disaster
Disaster Recovery Training I and II NV-0801-0003
Staff Disaster Preparedness Officer NV-0801-0002

Disbursing
Disbursing Clerk (Pay Records Maintenance) Class C NV-1401-0001
Disbursing Clerk Financial Returns NV-1408-0001
Disbursing Clerk Financial Returns Class C NV-1408-0001
Disbursing Clerk Travel Payments NV-1408-0002
Disbursing Clerk, Class C (Financial Returns) NV-1408-0001
Disbursing Clerk, Class C (Travel Payments) NV-1408-0002
Disbursing Clerks, Class A NV-1401-0002
Food Services and Disbursing NV-1729-0001
Senior Disbursing Clerk (DK) Enlisted Refresher NV-1401-0005

Disease
Disease Vector and Pest Control Technology NV-0101-0001

Disk
Data Systems Technician, Class C,

Peripherial Group RD-281(V)/UYK Recorder Reproducer Magnetic Disk File Equipment Maintenance
NV-1715-0656
Magnetic Disk File (MDF) Theory and Electrical Maintenance
NV-1402-0082
NV-1715-1464
Magnetic Disk File (MDF) Theory and Mechanical Maintenance Fire Control (FC) Mk 88
NV-1715-1484
Magnetic Disk File (MDF), Theory and Electrical Maintenance FLS Mk 98 Mod 0.
NV-1402-0140
Magnetic Disk File Theory and Electrical Maintenance Fire Control System Mk 88 MOD 1
NV-1715-1001
Magnetic Disk File Theory and Mechanical Maintenance FCS Mk Mod 0
NV-1402-0122

Display
Aegis Display System Operation and Maintenance
NV-1715-1115
NV-1715-1301
Aviation Electronic Warfare, Receivers, Analyzer, Recorder and Display Intermediate Level Maintenance
NV-1715-1149
AN/ASA-16 Data Display Group Maintenance Training
NV-1715-0488
AN/ASM-398 Projected Map Display Set (PMDS) Intermediate Maintenance
NV-1715-0529
AN/ASM-461 Mini-SACE Display Test Console Intermediate Maintenance
NV-1715-0949
AN/ASN-99 Projected Map Display Set Intermediate Maintenance
NV-1715-0162
AN/ASN-99(V) Projected Map Display Set Intermediate Maintenance
NV-1715-0162
AN/AVM-11 (V) Head Up Display Test Set Intermediate Maintenance (A-7E)
NV-1704-0229
AN/AVQ-7A/B Head Up Display Set Intermediate Maintenance
NV-1704-0253
AN/UYA-4 Display Maintenance Includes Beacon Video Processor
NV-1715-1259
Basic AN/UYA-4 Display Equipment Maintenance
NV-1715-1049
Display Console OJ-326(V) 1-4/UYK and Digital Display Indicator IP-1181/UYK Maintenance Phase I
NV-1402-0127
Display Console OJ-326(V)/UYK and Digital Display Indicator IP-1181/UYK Maintenance Phase III
NV-1402-0128
Display Console OJ-326(V)/UYK and Digital Display Indicator IR-1181/UYK Maintenance Phase II
NV-1402-0126
Flat Panel Display Terminal Maintenance
NV-1402-0139
IP-722F/AVA-1 Analog Display Indicator Intermediate Maintenance
NV-1715-1420
Missile Test and Readiness Equipment (MTRE) Mk 3 Measurement, Display and Simulation Groups Advanced Training
NV-1715-0908
Missile Test and Readiness Equipment (MTRE) Mk 3 Mods 4 and 5 Measurement, Display and Simulation Groups Advanced Training, Class F1
NV-1715-0908
Naval Tactical Data Systems (NTDS)—Data Collection and Display (Basic Enlisted)
NV-1402-0003
P-3 AN/ASA-16 Display System Intermediate Maintenance
NV-1715-0463
Plotting System PT-512/S Tactical Display Maintenance
NV-1715-1136

Displays
F-14A Communications, Navigation/ Displays, Electronic Warfare Organizational Maintenance Technician
NV-1704-0217

Disposal
Nuclear Weapons Disposal
NV-0802-0007

Distiller
Vapor Compression Distiller Maintenance and Operation
NV-1601-0028

Distilling
Submarine Low Pressure and Vapor Compression Distilling Units, Enlisted
NV-1710-0025

Distribution
Electrical Distribution and Control
NV-1714-0005
Electrical Distribution and Control Equipment Combined Maintenance
NV-1714-0005
Submarine Electrical Control and Distribution Equipment Combined Maintenance
NV-1714-0054

Distributor
Teletypewriter Reperforator TT-253/UG Series and Teletypewriter Distributor TT187/UG Series
NV-1715-0664
Teletypewriter Reperforator TT-253/UG Series and Transmitter Distributor TT-187/UG Series Teletype machines
NV-1715-0664

Disturbed
Disturbed Line of Sight Gunfire Control System Maintenance
NV-1715-0759

Diver
Diver First Class
NV-1606-0008
EOD Diver Candidates
NV-1606-0010
Master Diver Evaluation
NV-1606-0016
Master Diver Qualification
NV-1606-0016
Navy Diver Second Class
NV-1606-0010
Scuba Diver
NV-1606-0011
Underwater Photographer/Scuba Diver
NV-1606-0013

Divers
Deep Sea Divers
NV-1606-0014

Diving
Basic Diving Officer
NV-1606-0064
Deep Sea Helium-Oxygen Diving Officer
NV-1606-0009
Medical Deep Sea Diving Technic
NV-1606-0014
Medical Deep Sea Diving Technician
NV-1606-0014
Medical Department Diving Officers
NV-1606-0017
Ship Salvage Diving Officer
NV-1606-0015
NV-1606-0065
Steering/Diving Ship's Control Station and Variable Ballast and Trim Electrical Maintenance
NV-1715-1312

Documentary
Still Documentary Photography
NV-1709-0031
Still Documentary Photography C1
NV-1709-0010

Doppler
A-7 AN/APN-190 Doppler Radar Navigation System Intermediate Maintenance
NV-1715-0200
AN/APM 341 (V) Doppler Test Set Intermediate Maintenance
NV-1715-0360
AN/APN-122 Doppler Navigation System Maintenance
NV-1715-0483
AN/APN-153(V) Doppler Radar Navigation System Intermediate Maintenance
NV-1715-0507
AN/APN-190(V) Doppler Radar Navigation System Intermediate Maintenance
NV-1715-0200
AN/ASA-47 Doppler/Airmass Navigational Computer System Intermediate Maintenance
NV-1715-0582
S-2D/E AN/APN-122 Doppler Radar Navigation System Maintenance
NV-1715-0422
SH-3A AN/APN-130 Doppler Radar Navigation Maintenance
NV-1715-0237

Douglas
Douglas Model D-704 and Sargent-Fletcher Model 31-300 Air Refueling Stores Organizational Maintenance
NV-1704-0046

Draft
Forced Draft Blower Maintenance
NV-1710-0087
NV-1710-0110

Draftsman
Illustrator Draftsman, Class A
NV-1713-0002

Drone
Target Drone, Class C
NV-1704-0044

Drug
Drug and Alcohol Program Advisor
NV-0799-0005

Drug Abuse Education Specialist
NV-0799-0004
Drug Abuse Program Officers
NV-0801-0006
Navy Alcohol/Drug Safety Action Program (NASAP/NDSAP)
NV-0799-0007
Navy Drug and Alcohol Counselor School
NV-0801-0011
Navy Drug Abuse Counselor
NV-0801-0007
Navy Drug Safety Action Program (NDSAP)
NV-0799-0006

Duplex
Electrostatically Supported Gyro Monitor (ESGM) Duplex Platform Interface Buffer
NV-1715-1157

Dynalec
Dynalec Automatic Telephone System Maintenance, Class C1
NV-1404-0007
Dynalec 200/700 Line Automatic Telephone Maintenance
NV-1404-0010

Dynamics
Dynamics Alignment Test Set (DATS) Intermediate Maintenance
NV-1715-1199
Dynamics Alignment Test Set (DATS) Operator
NV-1715-1200

DAIR
Air Traffic Control Maintenance, Interrogator Set AN/TPX-42A BASIC DAIR, Class C1
NV-1715-0959
AN/TPX-42A Basic Direct Altitude Identity Readout (DAIR) Maintenance, Class, C1.
NV-1715-1432
AN/TPX-42A(V)10 Radar Air Traffic Control Facility (RATCF) Direct Altitude Identity Readout (DAIR) Maintenance, Class C1
NV-1715-1435
AN/TPX-42A(V)10 RATCF DAIR, Class C1
NV-1704-0282
AN/TPX-42A(V)5 Direct Altitude Identity Readout (DAIR) Maintenance, Class C1
NV-1715-1433
AN/TPX-42A(V)8 Carrier Air Traffic Control Center (CATCC) Direct Altitude Identity Readout (DAIR) Maintenance Class C1
NV-1715-1434

DAME
AN/SRN-15 TACAN Distance Azimuth Measuring Equipment (DAME) Maintenance (Electronics Technician, Class C1)
NV-1715-0175

DATC
DATC Machinist's Mate Maintenance
NV-1732-0005

DD 963
AN/UYK-7 DD 963 Computer/Peripheral Technician
NV-1715-1261

DD-963
DD-963 Auxiliary Systems Technician
NV-1704-0265
DD-963 Basic Circuit Concepts for Gas Turbine Controls, Class C1
NV-1402-0020
DD-963 Centralized Damage Control Console Operator, Class C1
NV-1601-0015
DD-963 Centralized Damage Control System Console Maintenance, Class C1
NV-1601-0016
DD-963 Centralized Damage Control/Fuel Control System Operator
NV-1601-0015
DD-963 Combat System Maintenance Management
NV-1715-1046
DD-963 Engineering Department Division Officer
NV-1704-0267
DD-963 Facilities Control Quality Monitoring and Message Processing (FCQM) Operators, Class F-1
NV-1715-0869
DD-963 Facilities Control Quality Monitoring Processing Unit Operators
NV-1715-0869
DD-963 Main Propulsion Assistant
NV-1704-0267
DD-963 Naval Tactical Data System (NTDS) Data Utilization
NV-1402-0023
DD-963 Naval Tactical Data Systems (NTDS) Data Input
NV-1402-0010
DD-963 PCO/PXO Gas Turbine Engineering
NV-1601-0024
DD-963 Ship Service Gas Turbine Generator Set Operator and Waste Heat Boiler Operator
NV-1601-0025
DD-963 Spruance Class Destroyer Radio Communications Systems Maintenance
NV-1715-0870
FFG-7/DD-963 60/40 Hz Static Frequency Converter Maintenance
NV-1714-0029
Radio Communications System Maintenance for DD-963 Class Ships, Class C-1
NV-1715-0870
SSM Automatic Degaussing Equipment Maintenance for the DD-963
NV-1601-0017
SSM Degaussing System for DD-963 Class Destroyer, Class C1
NV-1601-0017

DDG-993
CGN-38/DDG-993 (SM-2) Combat Systems Operator
NV-2202-0119

DECM
A-3B, RA3B, EA3B AN/ALQ-35 DECM System Maintenance
NV-1715-0525
RA-5C AN/ALQ-55 DECM System
NV-1715-0687
RA-5C Communication, Navigation, Identification (CNI) and DECM Organizational Maintenance
NV-1704-0075

DIFAR
DIFAR Training for Acoustic Operators P-3A/B(D) and P3C
NV-1715-0704
Jezebel Gram Analysis for AW's P-3A/B (DIFAR Retrofit)
NV-1715-0704
P-3A/B (DIFAR) Weapons Systems Technician Organizational Maintenance
NV-1715-1024

DIU/MIU
Digital Interface Unit/Message Interface Unit (DIU/MIU)
NV-1402-0081

DLCS
AN/BSC-2 Data Link Communications System (DLCS) Equipment Combined Maintenance
NV-1715-1469

DLG
DLG 6-16 (MOD) Terrier Weapons System Missile Fire Control System (MFCS) Mk 76 Mod 5
NV-2202-0073
DLG 6-16 Combat System
NV-1715-0764
DLG-16 (MOD) Terrier Weapons System
NV-2202-0073

DLG-28
Terrier Weapon System DLG-28 (Class System Level Maintenance)
NV-1715-0804

DMINS
Dual Miniature Inertial Navigation System (DMINS) AN/WSN-1(V)2 Combined Maintenance
NV-1715-0994

DP-890A
Computer DP-890A and B/UYK Processor Maintenance II
NV-1402-0080

DRAI
Mk 9 Mod 4 Dead Reckoning Analyzer Indicator (DRAI) and Mk 6 Mod 4B Dead Reckoning Tracer (DRT) Maintenance, Class C1
NV-1715-0344

DRT
Mk 9 Mod 4 Dead Reckoning Analyzer Indicator (DRAI) and Mk 6 Mod 4B Dead Reckoning Tracer (DRT) Maintenance, Class C1
NV-1715-0344

DS
Data Systems Technician, Class A (DS "A")
NV-1715-0753

DSOT
Tartar DSOT Analysis Missile Fire Control System (MFCS) Mk 74 Mod 0
NV-1715-0072

DSSCS
AUTODIN/DSTE/DSSCS/Mode V Maintenance, Class C1
NV-1715-0284

DSTE
AUTODIN/DSTE/DSSCS/Mode V Maintenance, Class C1
NV-1715-0284

DVARS
AN/APN-187 DVARS Intermediate Maintenance
NV-1715-0299

E-1B
E-1B Aircraft Pilot Training
NV-1606-0053
E-1B Airframe and Hydraulic Systems Organizational Maintenance
NV-1704-0195
E-1B AN/APS-82 Radar System Maintenance
NV-1715-0287
E-1B AN/ASN-28 Central Gyro Reference System Maintenance
NV-1715-0164
E-1B ARC-97 Radio Repeater System Maintenance
NV-1715-0195
E-1B Electrical and Instrument Systems Organizational Maintenance
NV-1714-0013
E-1B Electronic Systems Organizational Maintenance
NV-1715-0498
E-1B Integrated Electrical System Organizational Maintenance
NV-1715-0498
E-1B MH-67 Automatic Flight Control System Intermediate Maintenance
NV-1704-0034
E-1B Naval Flight Officer and Aircrewman
NV-1704-0233
E-1B Power Plants and Related Systems Organizational Maintenance
NV-1704-0227

E-2A
E-2A Aircraft Familiarization (Pilots)
NV-1704-0054
E-2A Automatic Flight Control System (AN/ASW-15) and Air Data Computer (A/A24G-13)
NV-1715-0460
E-2A Automatic Flight Control System and Air Data Computer Semi-Automatic Check-out Equipment Operation and Maintenance
NV-1715-0478
E-2A Aviation Electrician Organizational Maintenance
NV-1704-0081
E-2A AN/ACQ-2 and AN/ACQ-2A Data Terminal Sets Intermediate Maintenance
NV-1715-0254
E-2A AN/APS-96 Search Radar Intermediate Maintenance
NV-1715-0672
E-2A AN/ARC-80 Radio Set Intermediate Maintenance
NV-1715-0190

E-2B Navigational Systems Organizational Maintenance
NV-1715-1215
E-2B OA-8206/ASA-27A Difference Organizational Maintenance
NV-1715-0508
E-2B Weapon System Specialist Organizational Maintenance
NV-1715-0757
E-2B Weapon System Trainer (WST)
NV-1704-0232
E-2B/C-2A Aviation Electrician Organizational Maintenance
NV-1704-0224

E, E & H
Electricity, Electronics and Hydraulics, Class P (E, E & H, Class P)
NV-1715-0565

Ear
Eye, Ear, Nose and Throat Technician, Class C
NV-0709-0009

Early Warning
Airborne Early Warning/Electronics Countermeasures Evaluator, Class O
NV-1715-0599
Airborne Early Warning, Class O
NV-2202-0036

Echo
AN/UQN-4 Echo Sounder Maintenance
NV-1715-0425

Economics
Defense Economics and Decision Making Off-Campus Graduate Seminar
NV-1511-0006
Defense Economics and Decision Making Self-Administered Seminar (Naval War College)
NV-1511-0008
Naval War College Correspondence Course in Defense Economics and Decision Making
NV-1511-0005

Education
Drug Abuse Education Specialist
NV-0799-0004
Leadership and Management Education and Training (LMET) for Machinist's

Mate/Boiler Technician Six-Year Obligator (6YO) Petty Officer NV-1717-0022
Leadership Management Education and Training (LMET) Instructor NV-1717-0021
Leadership Management Education and Training, Class C1 NV-1717-0021

Effectiveness
Organizational Effectiveness Advanced Consultant Course NV-0326-0004
Organizational Effectiveness Specialist NV-0326-0003

Egress
F-4B/J Egress and Environmental Control Systems Maintenance NV-1704-0106
F-4B/J Egress and Environmental Control Systems Organizational Maintenance NV-1704-0106
S-3A Environmental Control, Miscellaneous Utilities and Egress Systems Organizational Maintenance NV-1730-0007

Electronics Technician Class C, AN/VCC-2 Shipboard System
NV-1715-0016

Electronics Technician Class C, AN/WRT-2 and AN/WRR-2
NV-1715-0011

Electronics Technician Class C, Data Transmission Group, Transmission Equipment Maintenance
NV-1715-0026

Electronics Technician Class C, High Power Independent Single Sideband Transmitter (AN/FRT-39; AN/URT-19; AN/URA-30)
NV-1715-0027

Electronics Technician Class C, R-1524(P)/WRR Countermeasures Receiver Maintenance
NV-1715-0028

Electronics Technician Communications Basic, Class A1
NV-1715-0851

Electronics Technician Communications Equipment Fundamentals, Class A1
NV-1715-0852

Electronics Technician Communications—Nuclear Field, Class A1
NV-1715-0853

Electronics Technician Maintenance
NV-1715-1010

Electronics Technician Nuclear Field Class A1
NV-1715-1070

Electronics Technician Radar Basic
NV-1715-0854

Electronics Technician Radar Equipment Fundamentals, Class A1
NV-1715-0855

Electronics Technician Radar—Nuclear Field, Class A1
NV-1715-0856

Electronics Technician Radar, Class A1
NV-1715-0854

Electronics Technician Submarine/Reserve Class A1
NV-1715-1071

Electronics Technician, AN/SPA-34 Indicator Group, Class C
NV-1715-0310

Electronics Technician, AN/SRC-20, AM/SRC-21 Radio Set Maintenance
NV-1715-0088

Electronics Technician, AN/SRN-14, Omega Receiver Maintenance, Class C
NV-1715-0590

Electronics Technician, AN/URC-9, AN/SRC-20, AN/SRC-21 Radio Sets with AN/ SRA-33 Antenna Coupler Maintenance
NV-1715-0088

Electronics Technician, Class A (Communications)
NV-1715-0730

Electronics Technician, Class A (Communications, Radar and Sonar Specialties)
NV-1715-0727

Electronics Technician, Class A (Radar)
NV-1715-0731

Electronics Technician, Class A—A-1 (Electronic Fundamentals)
NV-1715-0722

Electronics Technician, Class A—A-2 (Electronic Circuit Applications)
NV-1715-0723

Electronics Technician, Class A—A-3 (Communications)
NV-1715-0724

Electronics Technician, Class A—A-3 (Radar)
NV-1715-0725

Electronics Technician, Class A, Phase SEIN (Shipboard Equipment Indoctrination, Communications)
NV-1715-0639

Electronics Technician, Class A, Phase SEIR (Shipboard Equipment Indoctrination, Radar)
NV-1715-0638

Electronics Technician, Class B
NV-1715-0754

Electronics Technician, Class C Shipboard Equipment Indoctrination (Communications)
NV-1715-0639

Electronics Technician, Class C, AN/FGC-60; AN/FTA-15 Multichannel Voice Frequency Telegraph Terminal Equipment
NV-1715-0194

Electronics Technician, Class C, AN/SPN-38 Loran Receiving Set Maintenance
NV-1715-0364

Electronics Technician, Class C, AN/SPS-29 Radar Set
NV-1715-0024

Electronics Technician, Class C, AN/SPS-37/A Radar Set and AN/SPA-63 Countermeasures Receiving Group
NV-1715-0298

Electronics Technician, Class C, AN/SPS-37, 37A Radar Sets and AN/SPA-63 Countermeasures Receiving Group
NV-1715-0298

Electronics Technician, Class C, AN/SPS-8 Radar Maintenance
NV-1715-0305

Electronics Technician, Class C, AN/SRN-12 Omega Receiving Set Maintenance
NV-1715-0201

Electronics Technician Class C, AN/SRN-9 Radio Navigation Set
NV-1715-0099

Electronics Technician, Class C, AN/SSM-5 Monitor Test Set Maintenance
NV-1715-0008

Electronics Technician, Class C, AN/UPN-12 Loran Receiving Set Maintenance, Class F-1
NV-1715-0814

Electronics Technician, Class C, AN/UXH-2B Facsimile Recording Equipment Maintenance
NV-1715-0012

Electronics Technician, Class C, Electronics Material Officer
NV-1715-0007

Electronics Technician, Class C, Fleet Ballistic Missile (FBM) Tender Navigation Maintenance
NV-1715-0182

Electronics Technician, Class C, Indicator Group AN/SPA-41 Maintenance
NV-1715-0018

Electronics Technician, Class C, Microwave Fundamentals
NV-1715-0186

Electronics Technician, Class C, Shipboard Equipment Indoctrination (Radar)
NV-1715-0638

Electronics Technician, Class C, Solid State Fundamentals
NV-1715-0103

Electronics Technician, Class C, SSBN CNC Technician Maintenance
NV-1715-0085

Electronics Technician, Class C, SSBN Naval Data Automated Computer (NAVDAC) Fleet Ballistic Missile (FBM) Tender Navigation Maintenance
NV-1715-0168

Electronics Technician, Class C, SSBN Navigation Aids Technician Maintenance
NV-1715-0063

Electronics Technician, Class C, SSBN Navigation Aids, Fleet Ballistic Missile (FBM) Tender Navigation Maintenance
NV-1715-0064

Electronics Technician, Class C, SSBN Ship's Inertial Navigation System (SINS) Mk 2 Mod 0-6 Technician
NV-1715-0066

Electronics Technician, Class C, SSBN Ship's Inertial Navigation System (SINS) Mk 2 Mod 2/3 Technician
NV-1715-0130

Electronics Technician, Class C, SSBN Ship's Inertial Navigation, Fleet Ballistic Missile (FBM) Tender Navigation Maintenance
NV-1715-0065

Electronics Technician, Class C, TACAN Maintenance
NV-1715-0197

Electronics Technician, Class C, Wideband Synthesized Independent Sideband Receiver
NV-1715-0523

Electronics Technician, Class C1
NV-1715-0745

Electronics Technician, Class C7
NV-1715-0754

Electronics Technician, Indicator Group AN/SPA-40, Class C
NV-1715-0013

Electronics Technician, Ship's Navigation and Aircraft Inertial Alignment System (SNAIAS), Class C Operator

Maintenance
NV-1715-0014
Fleet Satellite Communications Fleet Broadcast Control Subsystem Maintenance (Electronics Technician, Class C1)
NV-1715-0874
Ground Controlled Approach Electronics Technician, AN/MPN-5, Class C
NV-1715-0080
Ground Controlled Approach Electronics Technician, Radar Set AN/MPN-1B, Class C
NV-1715-0078
Radar Repeater Systems Maintenance (Electronics Technician, Class C1)
NV-1715-0029
Trident Command and Control System (CCS) Electronics Technician Conversion, Class C
NV-1715-1165

Electrostatically
Electrostatically Supported Gyro Monitor (ESGM) Backfit Navigation Aids Technician Conversion

Submarine Food Service Watchstander
NV-1729-0010

Force
Force/Ship Weapons Coordinator Tactical Training
NV-2202-0121

Freight
Freight Transportation and Traffic Management
NV-0419-0008

Frequency
AN/TRQ-35(V) Tactical Frequency Management System
NV-1715-1352
AN/USM-402(V) Swept Frequency Measurement (SEFT Cart) Test Set Intermediate Maintenance
NV-1715-1208
Cryptologic Technician O, High Frequency Direction Finding (HFDF), Communications Technical Control, Class C1
NV-1715-0800
Cryptologic Technician R High Frequency Direction Finder (HFDF) Operator
NV-1715-0833
FFG-7/DD-963 60/40 Hz Static Frequency Converter Maintenance
NV-1714-0029
High Frequency Direction Finder Operator, Class C3
NV-1715-0833
High Frequency Direction Finding (HFDF) Communications Technical Control
NV-1715-0800
High Frequency Direction Finding (HFDF) Maintenance
NV-1715-1256
High Frequency Surface Communications System Operator
NV-1715-1348
High Frequency Systems Technician Maintenance
NV-1715-1340
OM-55/USC Super High Frequency Satellite Communication Modular Demodulator Group Maintenance
NV-1715-1346
Radio Frequency Distribution Maintenance C1
NV-1402-0109
Ultra High Frequency-Demand Assigned Multiple Access (DAMA)
NV-1715-1347
Universal Cryptologic Processor Training (UNCRYPT) High Frequency Direction Finding (HFDF) Maintenance
NV-1402-0112

Frigate
Guided Missile Frigate (FFG-7) Combat Systems Maintenance
NV-1715-1036

Fuel
Aviation Boatswain's Mate Fuels, Class A1
NV-1704-0306
Aviation Fuel Systems, Class C
NV-1704-0186
NV-1704-0199
Aviation Fuel Systems, Class C1
NV-1704-0309
Damage Control/Fuel Control Console Operator Course
NV-1710-0100
DD-963 Centralized Damage Control/ Fuel Control System Operator
NV-1601-0015
Fuel Gas Welders
NV-1710-0052
FFG-7 Fuel Systems, Mechanical, Class C1
NV-1704-0261
UH-2C Power Plants, Fuel, Transmissions and Related Systems Organizational Maintenance
NV-1704-0176
UH2-A/B Power Plant, Transmission, Fuel, Rotor and Related Systems Maintenance
NV-1704-0061

Fuels
Aviation Boatswain's Mate F (Fuels), Class A
NV-1728-0005

Fundamental
Fundamental Analysis Techniques (P-3)
NV-1715-0275
Fundamental Hydraulic Component Maintenance
NV-1704-0272

Fundamentals
Aegis Computer Fundamentals
NV-1402-0059
Aviation Electronics Warfare Fundamentals
NV-1715-1146
Basic Digital Fundamentals, Class F1
NV-1715-0904

AN/USH-17(V-3)(V-7) Mission Recorder Set and AN/UPQ-5 Display Set with Ground Support Equipment Intermediate Maintenance
NV-1715-0951

Ground Controlled Approach Controller, Class C
NV-1715-0123

Ground Controlled Approach Electronics Maintenance (Radar Set AN/FPN-36), Class C
NV-1715-0217

Ground Controlled Approach Electronics Maintenance, Radar Set AN/CPN-4A, Class C
NV-1715-0079

Ground Controlled Approach Electronics Maintenance, Radar Set AN/MPN-5, Class C
NV-1715-0080

Ground Controlled Approach Electronics Technician, AN/MPN-5, Class C
NV-1715-0080

Ground Controlled Approach Electronics Technician, Radar Set AN/MPN-1B, Class C
NV-1715-0078

Ground Controlled Approach Engineman, Class C, AN/MPN-5
NV-1715-0081

Ground Controlled Approach Maintenance (Engineman), Class C
NV-1715-0081

Ground Controlled Approach Maintenance (Engineman), Radar Sets AN/CPN-4A and AN/MPN-5, Class C
NV-1715-0081

Ground Controlled Approach Operator, Class C
NV-1715-0122

Ground Controlled Approach/Radar Air Traffic Control Center Electronics Maintenance Officers, Class O
NV-1715-0670

Ground Support Equipment GTC-85 Intermediate Maintenance
NV-1703-0011

Ground Support Equipment Tow Tractor Charging, Starting and Ignition Systems Intermediate Maintenance
NV-1704-0028

Marine Air Ground Task Force Intelligence Officer
NV-1511-0018

Marine Air Ground Task Force Intelligence Specialist Reserve (Phases 1 and 2)
NV-1511-0030

Marine Air-Ground Task Force Counterintelligence
NV-1511-0028

Marine Air-Ground Task Force Intelligence Officer Reserve (Phases 1 and 2)
NV-1511-0029

Marine Air/Ground Task Force

Intelligence Specialist Entry NV-1511-0019

Marine Air/Ground Task Force Intelligence Specialist Intermediate NV-1511-0020

Telemetering Ground Station AN/SKQ-2 NV-1715-0791

Group VIII

Group VIII E-6/E-7 Management NV-1408-0006

Group VIII E8/E9 Advanced Management NV-1408-0006

Guard

Navy Security Guard (Class C1) NV-1728-0021

Guidance

AN/ARW-77 Bullpup Guidance Control System NV-1715-0627

Guidance System Mk 3 Mod 0 Theory and Maintenance NV-1715-1456

Guidance System, Mk 3 Mod 0, Operation and Maintenance NV-1715-0245

Missile and Guidance System Testing, Fire Control System (FCS) Mk 88 MOD 1 NV-1715-0999

Guided Missile

Air Launched Weapons Guided Missile Intermediate Maintenance NV-1715-0589

AN/DPM-7 Sparrow III Guided Missile Test Equipment Intermediate Maintenance NV-1715-0628

AN/DSM-32 Sparrow III Guided Missile Test Equipment Intermediate Maintenance NV-1715-0446

Guided Missile Frigate (FFG-7) Combat Systems Maintenance NV-1715-1036

Guided Missile Launcher System Mk 26 NV-1704-0315

Guided Missile Launching System (GMLS) Mk 13 Mod 4 Maintenance NV-1715-1077

Guided Missile Launching System Mk 10 Solid State Control System Difference NV-1715-1298

Gunner's Mate Class C Guided Missile Launching System (GMLS) NV-1715-0620

Mk 91 Mod 0/1 NATO Seasparrow Guided Missile Fire Control System) (FCS) NV-1715-1040

Mk-25 Guided Missile Launching System (GMLS) NV-1715-1038

MK-29 Mod 0 Guided Missile Launching System (GMLS) Maintenance NV-1715-1039

Radar Set AN/SPG-51D Gun and Guided Missile Director Mk 73 Mod 2 and Ancillary Equipments Operation and Maintenance NV-1715-1035

Sparrow III, Sidewinder, Shrike and Walleye Guided Missile Test Equipment (CVA/CVS) Intermediate Maintenance NV-1715-0619

Sparrow III, Sidewinder, Shrike, and Walleye Guided Missile Test Equipment, Intermediate Maintenance (Shore) NV-1715-0702

Talos Guided Missile and Guided Missile Test Set Maintenance NV-1715-0622

Tartar Guided Missile Launching System (GMLS) Mk 11 Maintenance Class C1 NV-1715-1081

Tartar Guided Missile System Mk 13 Maintenance Class C1 NV-1715-1082

Terrier Guided Missile Launching System (GMLS) Mk 10 Maintenance Class C1 NV-1715-1083

Terrier/Tartar Guided Missile and Guided Missile Test Set Maintenance NV-1715-0467

Gun

A-7 M61A1 Gun and Associated Systems Intermediate Maintenance NV-2202-0097

Fire Control Technician Class C, Gun Fire Control System (GFCS) Mk 37 and Target Designation System (TDS) Mk 5 NV-1715-0221

Fire Control Technician Class C, Gun Fire Control System (GFCS) Mk 56 NV-1715-0218

Fire Control Technician Class C, Gun Fire Control System (GFCS) Mk 56 an Target Designation System Mk 5 NV-1715-0216

Fire Control Technician Class C, Gun Fire Control System (GFCS) Mk 68 NV-1715-0219

Gun Fire Control Radar Mk 25 Mod 3 Maintenance NV-1715-0127

Gun Fire Control System (GFCS) (Less Radar) Operation and Maintenance NV-1715-0210

Gun Fire Control System (GFCS) Mk 37 Maintenance (Less Mk 25 Mod 3 Radar) NV-1715-0210

Gun Fire Control System (GFCS) Mk 37/TDS Mk 5 Maintenance, Class C1 NV-1715-0221

Gun Fire Control System (GFCS) Mk 56 Maintenance NV-1715-0207

Gun Fire Control System (GFCS) Mk 63 Maintenance NV-2202-0028

Gun Fire Control System (GFCS) Mk 68 Maintenance NV-1715-0220

Gun Fire Control System (GFCS) Mk 68 Mod 4 Maintenance NV-1715-0208

Gun Fire Control System (GFCS) Mk 86 Consoles and Data Group Equipment Maintenance NV-1402-0114

Gun Fire Control System (GFCS) Mk 86 Mod 3 Maintenance Class C NV-1715-1076

Gun Fire Control System (GFCS) Mk 86 Mods 8,9,10 Radar NV-1715-1228

Gun Fire Control System (GFCS), Mk 37, Mk 68, Mk 56 Radar Signal Processing Equipment (RSPE) Maintenance NV-1715-0728

Gun Maintenance 5"/54 Caliber Rapid Fire Mk 42 NV-1715-0179

Gun Mount 5"/54 Mk 42 Mod 9 and 10, Class C1 NV-2202-0104

Gun Mount 5"/54 Mk 42 Mods 7 and 8 NV-1715-0520

Gun Mount 5"/54 Mk 42 Mods 9 and 10 Maintenance Class C1 NV-1715-1078

Gun Mount 5"/54 Mk 45 Maintenance Class C1 NV-1715-1080

Gun Mount 5'/54 Mk 45 Mod 1 NV-1715-1297

Gun 5"/54 Mk 45 Mod 0 Operational Maintenance NV-1715-1178

Mk 35 Power Drive Maintenance for 3"/50 Caliber Rapid Fire Gun Mount NV-1715-0147

Mk 37 Gun Fire Control System (FCS) NV-1715-1291

Mk 38 Gun Fire Control System (FCS) NV-1715-1290

Mk 56 Gun Fire Control System (GFCS) Maintenance, Class C1 NV-1715-0218

Mk 68 Gun Director and AN/SPG-53F Radar Maintenance NV-1715-0239

Mk 9 and Mk 10 5"/38 Caliber Twin Gun Mount Power Drive Maintenance NV-1715-0654

Radar Set AN/SPG-51D Gun and Guided Missile Director Mk 73 Mod 2 and Ancillary Equipments Operation and Maintenance NV-1715-1035

16"/50 Caliber Gun System NV-1715-1293

3"/50 Caliber Rapid Fire Gun Mount Maintenance NV-2202-0085

3"/50 Caliber Rapid Fire Twin Mount Gun Maintenance (Mk 35) NV-1715-0655

3"/50 Rapid Fire Twin Mount Power Drive and Gun Maintenance NV-1715-0655

5"/54 Rapid Fire Gun and Mount Mk 42 Mods 7 and 8, Class C1 NV-1715-0520

5"38 Caliber Gun System NV-1715-1292

76mm/62 Caliber Mk 75 Mods 0/1 Gun Operation and Maintenance NV-1715-1179

Gunboat

Patrol Gunboat/PG/Engineering Systems Operator and Maintenance NV-1712-0018

Gunfire

Disturbed Line of Sight Gunfire Control System Maintenance NV-1715-0759

Naval Gunfire Air Spotter NV-2202-0053
NV-2202-0059

Naval Gunfire Liaison Officer NV-2202-0058
NV-2202-0060

Naval Gunfire Spotters (Troop Officers) NV-2202-0064
Naval Gunfire Staff Officer NV-2202-0067
Naval Gunfire Support Planning NV-2202-0089
Troop Naval Gunfire Spotter NV-2202-0057

Gunner's
Gunner's Mate Class A Phase II NV-1715-1079
Gunner's Mate Class A, Phase I (A-1) NV-1715-0652
Gunner's Mate Class A, Phase II (A-2) NV-1715-0653
Gunner's Mate Class C ASROC Launching Group NV-1715-0626
Gunner's Mate Class C Guided Missile Launching System (GMLS) NV-1715-0620
Gunner's Mate Class C Rocket Launcher Mk 108 NV-1715-0618
Gunner's Mate Specialized Training NV-2202-0063
Gunner's Mate, Class A1 NV-1715-0652
Gunner's Mate, Class A1, Phase I NV-1715-0652
Gunner's Mate, Class B NV-1715-0802
Navy Nuclear Weapons Electronics, Calibration, and Maintenance (EC) (Gunner's Mate Technician) NV-1715-0171
Talos Gunner's (Missile) Handling NV-1715-0602
Terrier/Tartar Gunner's Mate NV-1715-0603

Gunnery
Gunnery Officers (Relative Rate) NV-1715-0624
Gunnery Officers—Weapons Department Officers NV-1715-0625
Gunnery Petty Officer NV-2201-0113

Gynecology
Obstetrics/Gynecology (OB/GYN) Nurse Clinician NV-0703-0001
Obstetrics/Gynecology (OB/GYN) Nurse Practitioner NV-0703-0001

Gyro
Central Gyro Reference System (AN/AJA-2), Class C NV-1715-0708
E-1B AN/ASN-28 Central Gyro Reference System Maintenance NV-1715-0164
Electrostatically Supported Gyro Monitor (ESGM) Backfit Navigation Aids Technician Conversion NV-1715-1132
Electrostatically Supported Gyro Monitor (ESGM) Backfit Navigation Subsystem NV-2205-0002
Electrostatically Supported Gyro Monitor (ESGM) Backfit Navigation Subsystem Theory NV-1715-1457
Electrostatically Supported Gyro Monitor (ESGM) Backfit Ship's Inertial Navigation System (SINS) Technician Conversion NV-1715-1130
Electrostatically Supported Gyro Monitor (ESGM) Backfit Strategic Weapon System Command Replacement/Navigation NV-1715-1397
Electrostatically Supported Gyro Monitor (ESGM) Backfit Strategic Weapon System Navigation Officer Replacement NV-2205-0001
Electrostatically Supported Gyro Monitor (ESGM) Calibration NV-1715-1375
NV-1715-1458
Electrostatically Supported Gyro Monitor (ESGM) Duplex Platform Interface Buffer NV-1715-1157
Electrostatically Supported Gyro Monitor (ESGM) Theory and Maintenance NV-1715-1158
Electrostically Supported Gyro Monitor (ESGM) Backfit Central Navigation Computer Technician Conversion NV-1715-1131
Gyro Compass Technician Mk 27 Maintenance Class C1 NV-1715-1089
Mechanical Gyro Maintenance and Repair C1 NV-1715-1090
Mk 19/27 Gyro Operator NV-1715-1223
Trident Electrostatically Supported Gyro Monitor (ESGM) Navigation Aids Technician Replacement NV-1715-1370
Trident Electrostatically Supported Gyro Monitor (ESGM) NAVAIDS Technician Replacement NV-1715-1166
Trident Electrostatically Supported Gyro Monitor (ESGM) NAVAIDS Technician Replacements NV-1715-1371
Trident Electrostatically Supported Gyro Monitor ESGM/NAVAIDS Technician Conversion NV-1715-1153

Gyrocompass
AN/WSN-2 Stabilized Gyrocompass Maintenance Class C1 NV-1715-1067
Electrical Gyrocompass Operation Maintenance Technician, Class C NV-1715-0587
Gyrocompass Technician Electrical, Class C1 NV-1715-0587
Gyrocompass Technician Mechanical, Class C1 NV-1721-0008
Gyrocompass Technician—Electrical, Class C NV-1715-0587
Mk 19 Gyrocompass Systems Maintenance NV-1715-1141
Mk 23 Gyrocompass Systems Maintenance NV-1715-1120
Mk 27 Gyrocompass Maintenance, Class C NV-1715-0762
Mk 27 Mod 1 Mk 19 Gyrocompass Systems Advanced Theory and Maintenance NV-1715-1224
Sperry Mk XIX Mod III Gyrocompass NV-1715-0062
Submarine Gyrocompass Mk 19 Mod 3 NV-1715-0062
Submarine Gyrocompass Mk 19 Mod 3 Combined Maintenance NV-1715-0062

GFCS
Fire Control Technician Class C, Gun Fire Control System (GFCS) Mk 37 and Target Designation System (TDS) Mk 5 NV-1715-0221
Fire Control Technician Class C, Gun Fire Control System (GFCS) Mk 56 NV-1715-0218
Fire Control Technician Class C, Gun Fire Control System (GFCS) Mk 56 and Target Designation System Mk 5 NV-1715-0216
Fire Control Technician Class C, Gun Fire Control System (GFCS) Mk 68 NV-1715-0219
Gun Fire Control System (GFCS) (Less Radar) Operation and Maintenance NV-1715-0210
Gun Fire Control System (GFCS) Mk 37 Maintenance (Less Mk 25 Mod 3 Radar) NV-1715-0210
Gun Fire Control System (GFCS) Mk 37/TDS Mk 5 Maintenance, Class C1 NV-1715-0221
Gun Fire Control System (GFCS) Mk 56 Maintenance NV-1715-0207
Gun Fire Control System (GFCS) Mk 63 Maintenance NV-2202-0028
Gun Fire Control System (GFCS) Mk 68 Maintenance NV-1715-0220
Gun Fire Control System (GFCS) Mk 68 Mod 4 Maintenance NV-1715-0208
Gun Fire Control System (GFCS) Mk 86 Mod 3 Maintenance Class C NV-1715-1076
Gun Fire Control System (GFCS) Mk 86 Mods 8,9,10 Radar NV-1715-1228
Gun Fire Control System (GFCS), Mk 37, Mk 68, Mk 56 Radar Signal Processing Equipment (RSPE) Maintenance NV-1715-0728
Mk 56 Gun Fire Control System (GFCS) Maintenance, Class C1 NV-1715-0218

GT-3
GT-3 OK-441/ALM Controller Intermediate Maintenance NV-1715-1415

GTC-85
Ground Support Equipment GTC-85 Intermediate Maintenance NV-1703-0011

GTCP-100
Aviation Support Equipment GTCP-100

and Enclosures Intermediate Maintenance
NV-1704-0109
Aviation Support Equipment GTCP-100 Engine Intermediate Maintenance

NV-1704-0236
H-53 Helicopter Maintenance
NV-1704-0147
H-53 Hydraulic Systems Organizational Maintenance
NV-1704-0063
H-53 Power Plants and Related Systems Organizational Maintenance
NV-1704-0168
H-53 Rotor and Related Systems Organizational Maintenance
NV-1704-0062
H-53, T-64-GE-6/6A Intermediate Maintenance/Complete Engine Repair
NV-1704-0049

Hagan
Hagan Automatic Boiler Control Console (ACC) Operator
NV-1710-0078
Hagan Automatic Boiler Control Maintenance
NV-1710-0073
Steam Plant Automatic Controls Maintenance (Hagan)
NV-1710-0073

Harpoon
Encapsulated Harpoon Command and Launch Subsystem Combined Maintenance
NV-1715-1011

Hazardous
Transportation and Storage of Hazardous Material
NV-0419-0007

Head Up
AN/AVM-11 (V) Head Up Display Test Set Intermediate Maintenance (A-7E)
NV-1704-0229
AN/AVQ-7A/B Head Up Display Set Intermediate Maintenance
NV-1704-0253

Heading
A-7A/B Attitude Heading and Reference System Intermediate Maintenance
NV-1721-0006
AN/ASN-50 Attitude Heading Reference System Intermediate Maintenance
NV-1715-0534

Heat
DD-963 Ship Service Gas Turbine Generator Set Operator and Waste Heat Boiler Operator
NV-1601-0025
Heat Treatment of Metals, Class C
NV-1724-0001

Heavy
Builder/Heavy Construction Technician, Class C
NV-1710-0034
BU "C" Heavy Construction
NV-1710-0034

Helicopter
Aviation Machinist's Mate H (Helicopter), Class A
NV-1704-0238
Basic Helicopter (H-1) Class A1
NV-1704-0283
Basic Helicopter (H-1), Class A1

Basic Helicopter (H-53) Class A1
NV-1704-0285
Basic Helicopter (H-53), Class A1
NV-1704-0328
Basic Helicopter, Class A
NV-1704-0059
Basic Helicopter, Class C
NV-1704-0059
H-53 Helicopter Maintenance
NV-1704-0147
Helicopter (HS) Antisubmarine Warfare (ASW) Operator
NV-2202-0080
Helicopter Aviation Antisubmarine Warfare (AASW) Air Sonar Operator (AN/AQS-13)
NV-2202-0080
Senior Officer Helicopter Training
NV-1704-0196

Helium
Deep Sea Helium-Oxygen Diving Officer
NV-1606-0009

High
Cryptologic Technician O, High Frequency Direction Finding (HFDF), Communications Technical Control, Class C1
NV-1715-0800
Cryptologic Technician R High Frequency Direction Finder (HFDF) Operator
NV-1715-0833
Force High Level Terminal Data Systems Maintenance Technician
NV-1715-1177
High Frequency Direction Finder Operator, Class C3
NV-1715-0833
High Frequency Direction Finding (HFDF) Communications Technical Control
NV-1715-0800
High Frequency Direction Finding (HFDF) Maintenance
NV-1715-1256
High Frequency Surface Communications System Operator
NV-1715-1348
High Frequency Systems Technician Maintenance
NV-1715-1340
High Impact Personnel Overseas Duty Training
NV-1512-0002
High Pressure Pipe Welders
NV-1710-0051
I/R High Pressure Air Compressor Combined Maintenance
NV-1601-0030
OM-55/USC Super High Frequency Satellite Communication Modular Demodulator Group Maintenance
NV-1715-1346
RF-4B AN/ARC-105 High Frequency Communication System and RO-254/ASQ Sound Recorder Maintenance
NV-1715-0368
Ultra High Frequency-Demand Assigned Multiple Access (DAMA)
NV-1715-1347
Universal Cryptologic Processor Training (UNCRYPT) High Frequency Direction Finding (HFDF) Maintenance
NV-1402-0112

Horizon
LAMPS Mk 3 Horizon Reference Set Maintenance,
NV-1714-0048

Horizontal
A-6 Pilots Horizontal Display, Direct View Radar Indicator and Associated Test Set Intermediate Maintenance
NV-1715-0297

Hospital
Advanced Hospital Corps
NV-0709-0008
Advanced Hospital Corps Technician, Class B
NV-0709-0008
Advanced Hospital Corpsman
NV-0709-0008
Advanced Hospital Corpsman Class C
NV-0709-0019
Basic Hospital Corps School, Class A

Course Number Index

The following columns cross-reference military course numbers to ID numbers for the courses listed in the course exhibit section. Readers who desire to trace courses for which they only have military course numbers as references may find the applicable courses by referring to the cross-reference list.

Each ID number begins with prefix initials which identify a specific branch of the Armed Services. The following prefixes are used:

AF—Air Force
AR—Army
CG—Coast Guard
DD—Department of Defense
MC—Marine Corps
NV—Navy

A-193-0337	NV-1402-0024

REQUEST FOR COURSE RECOMMENDATION

The applicant for credit must fill out one form for *each* service school course completed. The institutional official is responsible for verifying from official military records that the student completed the entire course, and for submitting the form to The Center for Adult Learning and Educational Credentials, American Council on Education, One Dupont Circle, Washington, DC 20036-1193. ATTN: Military Evaluations. *Please Print.*

1. *Exact* course title *(do not abbreviate)* ______________________

2. Service branch offering the course:
   - ☐ Air Force
   - ☐ Army
   - ☐ Coast Guard
   - ☐ Department of Defense
   - ☐ Marine Corps
   - ☐ Navy

3. Name of service school attended: ______________________

4. Location (installation, state): ______________________

5. Length of course *(in weeks):* ______________________

6. Dates of attendance: From: __________ (day/month/year) To: __________ (day/month/year)

7. Official military course number: ______________________

8. MOS/AFSC/Rating: ______________________

9. Course was designed for:
   - ☐ Warrant Officers
   - ☐ Officer Candidates
   - ☐ Commissioned Officers
   - ☐ Enlisted Personnel
   - ☐ Aviation Cadets
   - ☐ Noncommissioned Officers

10. Rank or rating upon completion of the course: ______________________

11. Please give some indication of subjects studied in course: ______________________

REQUEST FOR NAVY GENERAL RATE, RATING, WARRANT OFFICER, AND LIMITED DUTY OFFICER EXHIBITS

Officials should use this form only for requesting exhibits that contain the phrase, "Pending evaluation." As general rate or rating are evaluated, they will be listed in the *Update*. When you want to obtain the recommendation for a newly-evaluated general rate or rating, identify the exhibit you are requesting by using the complete *exhibit I.D. number* (e.g., NER-BT-001), and the title of the occupation. Include the applicant's name if you would like the name mentioned in the reply. Submit the form to The Center for Adult Learning and Educational Credentials, American Council on Education, One Dupont Circle, Washington, DC 20036-1193, ATTN: Military Evaluations.

The 1990 GUIDE to the EVALUATION of EDUCATIONAL EXPERIENCES in the ARMED SERVICES

1901

AMERICAN COUNCIL ON EDUCATION One Dupont Circle • Washington, D.C. 20036-1193

BEST COPY AVAILABL

THE CHAIRMAN, JOINT CHIEFS OF STAFF
WASHINGTON, D.C. 20318

5 October 1990

Dear Service Member,

I support the DOD policy of providing postsecondary education opportunities for all active duty and Reserve Service members. I strongly advise you to take advantage of the voluntary education program to catch up with your education before you leave the military. The Military Services need well-trained, educated people. Your pursuit of higher education will not only enhance your military job performance and chance for promotion, but will also improve your job opportunities when you return to civilian life.

The Guide to the Evaluation of Educational Experiences in the Armed Services, published by the American Council on Education, describes how you can receive college credits for your military training and experience and is widely recognized by the colleges and universities that grant credit for this training and experience. This guide is available for your reference at your base or post Education Center.

A number of programs are available through education centers on military installations, including courses taught in the classroom, independent study, testing of all kinds, and education guidance. Take advantage of these resources and educational programs during your military tour, and continue to use educational and Montgomery GI Bill benefits when you return to civilian life.

I wish you good luck and success in pursuit of your educational goals.

Sincerely,

COLIN L. POWELL
Chairman
Joint Chiefs of Staff

Foreword

For nearly 50 years, the *Guide to the Evaluation of Educational Experiences in the Armed Services* has been the standard reference work for recognizing learning acquired in military life. ACE has worked cooperatively with the Department of Defense and the armed services in assisting hundreds of thousands of service men and women to achieve recognition for their learning. The long-term success of the *Guide* evaluation system for military training has resulted in its serving as a model for the evaluation of programs offered by other noncollegiate organizations, including business, industry, government agencies, voluntary and professional associations, and labor unions. These formalized efforts to evaluate noncollegiate-sponsored programs enable students to combine their extrainstitutional learning with study at postsecondary institutions to achieve degree-related educational objectives. Not only is this sound educational practice, it is also an efficient use of educational resources and an incentive for the persons affected to undertake further study.

Special recognition must be paid to hundreds of individuals who have served as evaluators and the many educational institutions, professional and disciplinary associations, and the apprenticeship training community for their wholehearted cooperation in this endeavor. Without their support and assistance, the *Guide* would not have been possible. We are greatly indebted to them.

Once again, we are pleased to commend this work to you in your continuing work with service men and women and veterans.

ROBERT H. ATWELL
President
American Council on Education

How to Find and Use Course Exhibits

This volume contains recommendations for formal courses offered by the Air Force, the Coast Guard, the Marine Corps, and the Department of Defense that have been evaluated through June 1990.

The instructions that follow provide a step-by-step procedure for finding and using the exhibits and recommendations. Readers unfamiliar with the ACE evaluation procedures should read Appendix A. Additional information on using the *Guide* and awarding credit is provided in the Questions and Answers section.

Step 1

Have the applicant complete a Request for Course Recommendation form.

A Request for Course Recommendation form appears at the back of this volume. It may be reproduced and should always be filled out by the applicant, using the information provided on official and personal records, as well as the applicant's own knowledge of the service course. *Applicants should not refer to the **Guide** while completing the form.* (See questions 4–7 in Questions and Answers.)

Step 2

Verify course completion from military records.

It is the responsibility of the school official to verify course completion. The following military records are normally used to verify successful completion of course requirements:

1. DD Form 295, Application for the Evaluation of Educational Experiences During Military Service or Application for the Evaluation of Learning Experiences During Military Service—available to active-duty service personnel from military education officers. (Form must be certified by an authorized commissioned officer or his/her designee in order to be official.)
2. DD Form 214, Armed Forces of the United States Report of Transfer or Discharge—available to veterans, together with other in-service training records, from the General Services Administration, National Personnel Records Center (Military Personnel Records), 9700 Page Boulevard, St. Louis, Missouri 63132.
3. Course Completion Certificates—may be used to complement other records or when service courses are not recorded on official records.

(See questions 1, 3, 11 and 17 in Questions and Answers.)

The following steps refer to a course exhibit. See sample course exhibit, page xi.

Step 3

Find the course exhibit by identifying the American Council on Education (ACE) ID number in the Course Number Index or the Keyword Index.

A. *Course Number Index.* All available military course numbers are listed in the Course Number Index in alphanumeric sequence. If the applicant's military course number cannot be located in the Course Number Index, search for the course title in the Keyword Index.

B. *Keyword Index.* Identify all possible keywords within a formal course title. For example, the keywords in the title "Digital, Analog, and Hybrid Computer Fundamentals" are *Digital, Analog, Hybrid,* and *Computer.* Find one or all of those keywords in the Keyword Index and search the listing under the keyword for the course title. *If the title cannot be found under one keyword, search all other possible keywords.* (See question 16 in Questions and Answers.)

C. *Identify ACE ID number.* When the title or military course number has been located, note the corresponding ACE ID number. This number refers to the course exhibit's location in the *Guide.* The two-letter prefix refers to the section of the Course Exhibits chapter, i.e., CG = Coast Guard section, DD = Department of Defense section, MC = Marine Corps section, AF = Air Force section. Within each section, ACE ID numbers are presented in numeric sequence. (See question 2 in Questions and Answers.)

Step 4

Match the course-identifying information with the corresponding data in the course exhibit.

Course-identifying information includes the official military title, military course number, length of course, dates of attendance, location, etc., and is provided by the applicant on the Request for Course Recommendation form. When the course exhibit consists of multiple versions, determine which version applies to the applicant's course by considering exhibit dates and course length. (See questions 6, 7, 9 and 13 in Questions and Answers.) It is important to match all items.

Step 5

Read the course description.

Consideration should be given not only to the amount of credit and to the subject area, but also to the course objectives, or learning outcomes, and instruction which are part of the course exhibit. (See question 8 in Questions and Answers.) These portions of the exhibit outline the course content and scope and also provide essential information about the nature of the course. (See question 10 in Questions and Answers.) This information will help you determine the appropriate placement of credit for each individual student within the requirements and programs at your school.

Step 6

Award credit as appropriate.

Users are free to modify the credit recommendations in accordance with institutional policy and the educational goals of each individual applicant. (See questions 13–15 in Questions and Answers.)

Step 7

When assistance is required, contact The Center for Adult Learning and Educational Credentials.

Whenever problems arise and assistance is desired, you may submit a properly completed Request for Course Recommendation form (Questions 4–7) to:

The Center for Adult Learning and Educational
Credentials
American Council on Education
One Dupont Circle
Washington, DC 20036-1193
ATTN: Military Evaluations
(202) 939-9470

Sample Course Exhibit

ID Number. A number assigned by ACE to identify each course.

Military Course Number. The number assigned to the course by the military.

Length. The length of the course in weeks.

Exhibit Dates. The start and end dates, by month and year. Date of course materials when the course was first evaluated, and, if applicable, when it was eliminated. "Present" denotes publication cut off for this edition of the *Guide* (6/90).

Instruction. Description of instruction, including teaching methods, facilities, equipment, major subject areas covered.

AF-1728-0045

SECURITY SPECIALIST BY CORRESPONDENCE

Course Number: 81150.

Location: Extension Course Institute, Gunter AFS, AL.

Length: Maximum 52 weeks.

Exhibit Dates: 12/86–Present.

Learning Outcomes: Upon completion of the course, the student will be able to carry out security police functions, observation and investigation, deal with hostage situations, hijacking operations, terrorism, and deal with nuclear security accidents.

Instruction: This is a monitored home study program, including reading, written exercises, and proctored examinations. Topics include requirements of integrity and ethics, legality, conduct of searches, maintaining systems security, how and when to use dogs, methods of riot control, and dealing with terrorism.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in criminal justice (5/88).

Course Title. The official title during the period of the exhibit dates.

Location. The service school, military installation, state, and continent if applicable.

Learning Outcomes. Competencies students acquire through the course. Older courses have *Objectives*. (See question 8 in Questions and Answers.)

Credit Recommendation. Given in four categories: vocational certificate, lower-division baccalaureate/associate degree, upper-division baccalaureate, and graduate degree. Expressed in semester hours. (See Appendix A for detailed explanation of credit categories.)

Evaluation Date. Date when the credit recommendation was established. Month and year are given in parentheses following each recommendation.

How to Find and Use Coast Guard Occupation Exhibits

This volume contains exhibits for Coast Guard occupations evaluated through June 30, 1990.

The following instructions provide a step-by-step procedure for finding and using exhibits for Coast Guard ratings and warrant officer specialties. If you are unfamiliar with the Coast Guard enlisted and warrant officer systems—how they are structured and how occupational proficiency is demonstrated—you should read Appendix A. Additional information is provided in the Questions and Answers section.

Step 1

Have the applicant submit official documentation to you.

For Coast Guard enlisted personnel, institution officials should request DD Form 295 or DD Form 214. Applicants may also submit their Achievement Sheets. Ratings are listed in Section 1 on page 3.

Veterans may obtain copies of the DD Form 214 from General Services Administration, National Personnel Records Center (Military Personnel Records), 9700 Page Boulevard, St. Louis, Missouri 63132.

For Coast Guard warrant officers, occupational history is recorded on Form CG-5316, Warrant Officer Officer Evaluation Report (OER). Refer to Section 1-i for the title of the specialty.

Step 2

By referring to military records, verify each occupational specialty the person has successfully held.

A. Eligibility for the recommendation for ratings is easily determined. Advancement means that the person is automatically eligible for the rating recommendation; that is, to be advanced, the person had to demonstrate occupational proficiency by meeting all the requirements for advancement, including passing written and performance tests. (See questions 18 and 19 in Questions and Answers.)

Warrant officers have normally progressed through the enlisted ranks and are technical specialists in their fields. Determine eligibility by consulting the Warrant Officer Officer Evaluation Report.

B. Find the information necessary for locating the correct exhibit(s): occupational designations and the date of advancement to each. (See question 22 in Questions and Answers.)

Step 3

Find the appropriate exhibit in the Guide.

The exhibit can easily be found when the designation is known. Each exhibit is assigned an ACE ID number that has three components. The first component in a Coast Guard rating exhibit is *CGR*. This identifies the exhibit as one that pertains to Coast Guard enlisted ratings. The second component consists of the rating designation, e.g., AT, GM or ASM. The third component, a three-digit sequentially assigned number, e.g., 001, uniquely identifies the exhibit. The exhibit ID numbers have either eight or nine characters, depending on the rating designation, e.g., CGR-QM-001 and CGR-MST-001. The first component of a warrant officer exhibit is *CGW*. The second component consists of the designator, e.g., ENG, MED. As with the enlisted exhibits, the third component is a three-digit number that uniquely identifies the exhibit (CGW-PERS-001, CGW-FS-001).

When the title of an occupational specialty is known, the exhibit ID number can be found by referring to the *Coast Guard Occupational Title Index*.

Step 4

Read the entire exhibit.

In order to apply a given recommendation to the student's program of study at your institution, you must first read the entire exhibit. Each item in the exhibit has been prepared to help you identify or interpret the recommendations. (See the sample exhibit.) Two items, "Career Pattern" and "Description," will be particularly helpful to you.

The descriptions, which are similar to learning outcome statements of postsecondary courses and programs of study, will provide you with essential information about the learning required for proficiency in the occupation. Comparing the "Description" with a description of the course or program of study that the student will pursue will help you

- determine how much of the recommended credit applies to the course or program of study at your institution;
- identify additional areas of possible credit;
- resolve problems with duplication of credit, when the applicant has applied for credit for more than one military learning experience;
- place the student at the appropriate point in the course sequence or program of study.

Step 5

Award credit as appropriate.

The credit recommendations are advisory. They are intended to assist in formally recognizing the learning of Coast Guard men and women and veterans and in placing them in postsecondary programs of study, apprenticeship programs, and jobs. The recommendations may be modified.

When an applicant has applied for credit for more than one military learning experience, you may find that you will have to reduce the total amount of credit recommended to avoid granting duplicate credit. (See questions 24 and 25 in Questions and Answers.)

You may also wish to increase the recommended credit to account for the learning that the applicant may have acquired in other military or nonmilitary settings. (See questions 27 and 28 in Questions and Answers.)

Step 6

When assistance is required, contact The Center for Adult Learning and Educational Credentials.

The Center operates an advisory service to assist education officials, apprenticeship and training officials, and employers in evaluating the learning experiences of military personnel. Publication of the *Guide* is part of that service. However, there are instances when additional assistance is needed.

When requesting an exhibit, complete the Request for Coast Guard Occupation Exhibits form that appears at the back of this volume. *Use the form only to request recommendations for those that are listed as "Pending evaluation."* (See question 23 in Questions and Answers.)

When assistance in interpretation is needed and it appears that official military records will help staff members in responding to an inquiry, copies should be attached to the letter of inquiry. *Do not send original records.*

When an exhibit or assistance in interpretation is needed urgently, you may telephone The Center at (202) 939-9470. Whether inquiring by letter or telephone, you should always obtain information directly from The Center, not the applicant. (See question 9 in Questions and Answers.)

Inquiries concerning rating exhibits should be addressed to:

The Center for Adult Learning and Educational
Credentials
American Council on Education
One Dupont Circle
Washington, DC 20036-1193
ATTN: Military Evaluations Program

Sample Coast Guard Rating Exhibit

ID Number. A code number assigned by ACE to identify each exhibit.

Exhibit Dates. Start and end dates by month and year. The earliest start date is 6/71, the effective date of the Coast Guard manual regulating the ratings that have been evaluated (start dates may be later than 6/71). The term "Present" indicates that the exhibit is current as of June 1986. "Pending evaluation" means that the rating is scheduled to be evaluated.

Career Pattern. Path of advancement. Shows prerequisite general rate and subsequent progression in a rating; the designation is provided for each rate, followed by the title and paygrade (in parentheses).

Recommendation. By rate. Only the recommendation for the *highest* rate held should be used; the recommendations should not be added.

Educational credit is expressed in semester hours and recommended in four categories: vocational certificate, lower-division baccalaureate/associate degree, upper-division baccalaureate, and graduate degree. (See Appendix A for category definitions.) The recommendation normally specifies the number of semester hours recommended and the appropriate subject area, program of study, or discipline in which the credit might be applied.

Summary: Observes, records, and analyzes environmental and scientific data; conducts field monitoring and laboratory analysis for chemical and oil identification; operates and maintains Coast Guard data processing systems; retrieves and assimilates data from remote sensing and local observations; employs numerical models and provides environmental information for conducting Coast Guard operations. *MST3:* Prepares and maintains user documentation of basic data processing procedures; operates small programmable computers; uses standard meteorological equipment; conducts meteorological observations; works with and maintains standard oceanographic instrumentation; demonstrates safety precautions in operation of a chemistry laboratory in accordance with Coast Guard regulations. *MST2:* Able to perform the duties required for MST3; maintains a tape or disk collection. ... *MSTCS:* Able to perform the duties required for MSTC; serves as enlisted technical or specialty expert; plans ...

Recommendation, MST3

In the lower-division baccalaureate/associate degree category, 3 semester hours in marine instrumentation, 3 in basic computer science, and 3 in basic meteorology (7/84).

Recommendation, MST2

In the lower-division baccalaureate/associate degree category, 3 semester hours in marine instrumentation, 3 in basic computer science, 3 in basic meteorology, 3 in physical science, and 2 in meteorology (7/84).

Recommendation, MST1

In the lower-division baccalaureate/associate degree category, 3 semester hours in marine instrumentation, 3 in basic computer science, 3 in basic meteorology, 3 in physical science, 2 in meteorology, and 2 in personnel supervision (7/84).

Important: Read entire exhibit before awarding educational credit.

Title. The official Coast Guard title of the rating during the period of the exhibit dates.

Rating Designation. The official Coast Guard system of identifying occupations and their levels, listed in ascending order according to rate. (See question 19 in Questions and Answers for definitions of the Coast Guard identifiers.)

Occupational Field. Number and title designating a group of related ratings.

Description. Summary applying to all rates and a separate description of the skills, competencies, and knowledge required for proficiency in each rate.

Date of Evaluation. By month and year. Appears in parentheses following the recommendation for each rate.

Sample Coast Guard Warrant Officer Exhibit

ID Number: A code number assigned by ACE to identify each exhibit. The first three digits for warrant officers are "CGW."

Exhibit Dates: Start and end dates by month and year. The term "Present" indicates that the exhibit is current as of June 1990. "Pending evaluation" means that an evaluation is scheduled.

Career Pattern: Shows the various possible career paths for the warrant officer. Titles and designators are provided.

Description: The skills, competencies, and knowledge required for proficiency in the officer specialty.

CGW-PERS-001

PERSONNEL ADMINISTRATION

Exhibit Dates: 1/65–Present.

Career Pattern

May have progressed to Personnel Administration Warrant Officer from Data Processing Technician (Emergency Rating) or Yeoman (YN).

Description

Serves as a technical specialist in general and personnel administration; provides technical advice and information concerning officer and enlisted personnel regulations and administration; organizes and supervises personnel in an administrative or personnel office of up to 20 persons; supervises personnel in preparing and processing correspondence, reports, personnel records, and accounts; knows and uses computers and their programs for records; administers funds for travel and procurement, and the allocation of officer materials and equipment; prepares office organization, work flow, and layout charts; prescribes procedures and techniques for work improvement; prepares official correspondence, administrative directives, regulations, and orders.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in business communications, 3 in personnel supervision, and 3 for field experience in office management. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 3 in budget administration, and 3 for field experience in management (3/86).

Important: Read entire exhibit before awarding educational credit.

Title: The official Coast Guard title during the period of the exhibit dates.

Recommendation: Educational credit is expressed in semester hours and recommended in four categories: vocational certificate, lower-division baccalaureate/associate degree, upper-division baccalaureate, and graduate degree (see Appendix A for category definitions). The recommendation normally specifies the number of semester hours recommended and the appropriate subject area, program of study, or discipline in which the credit might be applied.

Date of Evaluation: By month and year. Appears in parentheses following the recommendation.

How to Find and Use Marine Corps MOS Exhibits

This volume contains exhibits for selected Marine Corps enlisted Military Occupational Specialties (MOS's) evaluated through June 1990.

The following instructions provide a step-by-step procedure for finding and using Marine Corps MOS exhibits. If you are unfamiliar with the Marine Corps enlisted MOS system—how they are structured and how occupational proficiency is demonstrated—you should read Appendix A. Additional information is provided in the Questions and Answers section.

Step 1

Have the applicant submit official documentation to you.

Institution officials should request the summary sheet for the ITSS MATMEP (Individual Training Standards Systems, Maintenance Training Management and Evaluation Program). See Appendix B for a copy of the form.

Step 2

By referring to the ITSS MATMEP, Individual Duty Area Qualification Summary, verify each MOS the person has successfully held.

When verifying Marine Corps MOS's in the aircraft maintenance and avionics fields, it is important to identify the *level* (I–IV) of training the individual has completed. Refer to the summary sheet and locate the phrase "Completed Level —." When the summary sheet indicates that the Level III has been completed, this indicates that *all* the MOS-requisite tasks have been certified. Credit is only recommended for Levels III and IV.

Step 3

Find the appropriate exhibit in the Guide.

The exhibit can be found when the designation is known. Each exhibit is assigned an ACE ID number that has three components. The first component in a Marine Corps MOS exhibit is *MCE*. This identifies the exhibit as one that pertains to Marine Corps enlisted MOS's. The second component consists of four-digit MOS designation, e.g., 6052 or 6053. The third component, a three-digit sequentially assigned number, e.g., 001, uniquely identifies the exhibit. The exhibit ID numbers have ten characters.

When the title of an MOS is known, the exhibit ID number can be found by referring to the Marine Corps Occupational Title Index.

Step 4

Read the entire exhibit.

In order to apply a given recommendation to the student's program of study at your institution, you must first read the entire exhibit. Each item in the exhibit has been prepared to help you identify or interpret the recommendations. (See the sample exhibit.) Two items, "Career Pattern" and "Description," will be particularly helpful to you.

The "NOTE" found in the item "Career Pattern" explains the levels. The description, which is similar to learning outcome statements of postsecondary courses and programs of study, will provide you with essential information about the learning required for proficiency in the MOS. Comparing the exhibit description with a description of the course or program of study that the student will pursue will help you:

- determine how much of the recommended credit applies to the course or program of study at your institution;
- identify additional areas of possible credit;
- resolve problems with duplication of credit, when the applicant has applied for credit for more than one military learning experience;
- place the student at the appropriate point in the course sequence or program of study.

Step 5

Award credit as appropriate.

The credit recommendations are advisory. They are intended to assist in formally recognizing the learning of Marines in placing them in postsecondary programs of study, apprenticeship programs, and jobs. The recommendations may be modified.

When an applicant has applied for credit for more than one military learning experience, you may find that you will have to reduce the total amount of credit recommended to avoid granting duplicate credit. (See questions 24 and 25 in Questions and Answers.)

You may also wish to increase the recommended credit to account for the learning that the applicant may have acquired in other military or nonmilitary settings. (See questions 27 and 28 in Questions and Answers.)

Step 6

When assistance is required, contact The Center for Adult Learning and Educational Credentials.

The Center operates an advisory service to assist education officials, apprenticeship and training officials, and employers in evaluating the learning experiences of military personnel. Publication of the *Guide* is part of that service. However, there are instances when additional assistance is needed.

When requesting an exhibit, complete the Request for Marine Corps Enlisted MOS Exhibits form that appears at the back of this volume.

When assistance in interpretation is needed and it appears that official military records will help staff members in responding to an inquiry, copies should be attached to the letter of inquiry. *Do not send original records.*

When an exhibit or assistance in interpretation is needed urgently, you may telephone The Center at (202) 939-9470. Whether inquiring by letter or telephone, you should always obtain information directly from The Center, not the applicant. (See question 9 in Questions and Answers.)

Inquiries concerning MOS exhibits should be addressed to:

The Center for Adult Learning and Educational
Credentials
American Council on Education
One Dupont Circle
Washington, DC 20036-1193
ATTN: Military Evaluations Program

Sample Marine Corps Enlisted MOS Exhibit

ID Number: A code number assigned by ACE to identify each exhibit.

MCE-6052-001

Title: The official Marine Corps title during the period of the exhibit dates.

AIRCRAFT HYDRAULIC/PNEUMATIC MECHANIC, A-4/TA-4/OA4

Exhibit Dates: Start and end dates by month and year. The term "Present" indicates that the exhibit is current as of June 1990.

Exhibit Dates: 4/87–Present.

Occupational Field: Number and title designating a group of related MOS's.

Occupational Field: 60 (Aircraft Maintenance).

Career Pattern: Path of advancement. Indicates military rank and paygrade. Special note defines the levels which are the basis for the credit recommendations.

Career Pattern

PVT: Private (E-1). *PFC:* Private First Class (E-2). *LCP:* Lance Corporal (E-3). *CPL:* Corporal (E-4). *SGT:* Sergeant (E-5). *SSGT:* Staff Sergent (E-6). *GYSG:* Gunnery Sergent (E-7). **NOTE:** MOS duties are not defined in terms of rank or paygrade, but by levels. *Level I* identifies tasks that are taught in the classroom; the individual is able to perform simple parts of tasks. *Level II* identifies those tasks that are part of on-the-job training; the trainee can do most tasks pertaining to a particular system . . . *Level III* indicates that the individual can perform all essential tasks without supervision. *Level IV* indicates a high level of proficiency in job performance . . .

Description: Summary applying to all levels and a separate description of the skills, competencies, and knowledge required for proficiency in each level.

Description

Summary: Inspects, maintains, and repairs aircraft hydraulic/pneumatic systems and system components. *Levels I and II:* Uses color code charts of aircraft piping and lines . . . *Level III:* Able to perform duties required for Levels I and II; performs component repair of hydraulic/pneumatic components as required; uses and maintains hydraulic/pneumatic test equipment . . . *Level IV:* Able to perform the duties required for Level III; performs and supervises the maintenance/repair requirements for aircraft hydraulic/pneumatic systems components; supervises an aircraft hydraulic/pneumatic check crew or maintenance unit . . .

Recommendation: Evaluation credit is expressed in semester hours and recommended in four categories: vocational certificate, lower-division baccalaureate/associate degree, upper-division baccalaureate, and graduate degree. (See Appendix A for category definitions.) The recommendation normally specifies the number of semester hours recommended and the appropriate subject area, program of study, or discipline in which the credit might be applied.

Recommendation, Level III

In the lower-division baccalaureate/associate degree category, 6 semester hours in hydraulic/pneumatic systems repair, 3 in aviation maintenance technology, and 3 in industrial safety (8/89).

Date of Evaluation: By month and year. Appears in parentheses following the recommendation.

Recommendation, Level IV

In the lower-division baccalaureate/associate degree category, 9 semester hours in hydraulic/pneumatic systems repair, 6 in aviation maintenance technology, 3 in industrial safety, 3 in personnel supervision, and 3 in maintenance management. In the upper-division baccalaureate category, 2 semester hours for field experience in management . . .

Important: Read entire exhibit before awarding educational credit.

Questions and Answers

This section is designed to answer questions that may arise about using the Guide *and awarding credit.*

1

An applicant at my institution has submitted a DD Form 214 that lists abbreviated course titles which I cannot decipher. The form does not contain enough information for me to find the courses in the *Guide*. What should I do?

Military records often provide insufficient information for civilian education officials to properly identify courses. For that reason, The Center has designed the Request for Course Recommendation form, which can be used to supplement records. Applicants for credit should be responsible for interpreting the information on their records and presenting the data in readable form. You may also use course completion certificates and other training records to verify entries on the DD Forms 214 and 295. It is recommended that you automatically require students to complete the Request for Course Recommendation form. Then, if you need help, authorize the form and submit it to The Center. *No abbreviations please.*

2

When an applicant submits information on a number of courses completed, I can usually find exhibits for only some of the courses in the *Guide*. Am I doing something wrong?

The course evaluations done by The Center probably represent about 60 percent of the total number of courses currently offered by the armed services. The remaining 40 percent cannot be evaluated for one reason or another. In general, courses evaluated and published in the *Guide* are those offered on a full-time basis. After 1981 The Center began evaluation of courses that are 45 academic hours in length. Prior to that time, courses evaluated were at least of two weeks duration; or, if less than two weeks in length, the courses had to include a minimum total of sixty contact hours of academic instruction. Before 1973 the minimum length requirement was three weeks or 90 contact hours. Another requirement for evaluation is that a course be formal as defined by the services, i.e., offered to meet servicewide training requirements and cited in the formal school listing for the service. This requirement generally excludes locally organized and command-level training programs, as well as courses offered on a one-time basis.

Correspondence courses were not evaluated until the mid-1970s. We have begun to evaluate selected Air Force, Coast Guard, and Marine Corps correspondence courses. These courses will be listed in the Keyword Index under "Correspondence" for easy identification. One criterion for reviewing correspondence courses is the establishment of an ongoing proctored end-of-course examination program.

You will find no courses conducted prior to 1954 listed in this guide. You must always submit a Request for Course Recommendation form to this office for assistance with courses taken from the 1940s through 1954. When in doubt about the availability of any evaluation for any service course, contact the Advisory Service by telephone or by submitting a Request for Course Recommendation form.

Keep in mind that the *Guide* is constantly being updated. New courses evaluated after the publication date may be found in the *Handbook to the Guide* or you may obtain them by submitting a Request for Course Recommendation form.

3

I understand many military records were destroyed in a fire at the General Services Administration a number of years ago. What should I do if the applicant's military records were among those destroyed?

Many records were reclaimed or reconstructed and are now available. In addition, the applicant's copies of certificates may be used in lieu of records destroyed in the GSA fire.

4

May I submit a Request for Course Recommendation form that the student has filled out with information from the *Guide*?

A form filled out by a student who copies information from the *Guide* cannot be used by the Advisory Service staff for research purposes because that information only duplicates published data. One of the purposes of the Request for Course Recommendation form is to secure information about a course from students, ideally through official records, but also from their personal knowledge or memory of the course. With this firsthand information, you may find the correct course exhibit in the *Guide*. If you cannot find it, you may send the request form to the Advisory Service.

The Center staff can then use this additional information to search its extensive files for matching information. When students attempt to identify a course taken years ago by extracting *current* titles or course numbers from the *Guide*, they may in fact be identifying a *similar* course but not the one they took. Therefore, a form filled out with material copied from the *Guide* can be misleading and can seriously handicap the research staff. *Only accurate and verified information is to be submitted.*

5

Who should send in the Request for Course Recommendation form?

The form should be completed by the applicant and authorized by you, the institution official or military representative. Credit recommendations will be forwarded to you only when you authorize us to do so. While we do provide credit recommendations to applicants upon receipt of their requests, we encourage them to apply through their schools. We do not normally send a credit recommendation to a college at the request of a student applicant or a military counselor.

6

Why is so much information needed on the Request for Course Recommendation form?

You cannot be sure that you have identified the correct exhibit in the *Guide* unless all the information on the form matches the corresponding items in the course exhibit. The course title, course number, name and location of the service school, and length of the course shown on the form should be identical to the information in the exhibit. In addition, the dates of attendance must fall within the exhibit dates. Credit recommendations are for *specific* courses; therefore, all items must be identical if a positive identification is to be made.

A complete and accurate form will also help the Advisory Service research the course.

7

What do I do when the information on the Request for Course Recommendation form does not exactly match the information in the course exhibit?

Send an authorized form to the Advisory Service. Send the form in yourself; do not give it to the student to submit. If just one item differs from that in the exhibit you have located (for example, "Length"), you should circle the item to bring it to the attention of the research staff. Send *copies* of military records only if you think they will provide useful additional information. If the staff cannot identify the course and supply a credit recommendation, you may still grant credit to the applicant by conducting your own assessment of the applicant's learning. (See question 28 for information about assessment techniques.)

8

I've come across a few exhibits with *Learning Outcomes* instead of *Objectives*. Why the change?

Institutions are increasingly using learning outcomes in their own course descriptions. To make it easier for institutional decision makers to compare competencies acquired in a military course to those competencies acquired in courses offered at their own institutions, the Military Evaluations program adopted this new format in courses evaluated since 1987.

The Council on Postsecondary Accreditation (COPA) and its Committee on Recognition (the committee which recognizes the various accrediting bodies in this country) are placing more emphasis on the use of learning outcomes. The committee expects recognized accrediting bodies to apply COPA's provision regarding the use of learning outcomes and their assessment.

9

How long does it take to receive a response if I submit a properly completed request form?

About three weeks for most requests, longer for those requiring extensive research. Every effort will be made to respond as quickly as possible. If you wish, you may call in requests; be sure to have all pertinent information (see question 6) available to give to the staff person.

10

How can I get additional information about the courses in the *Guide*? Sometimes the descriptive material in the exhibit is not detailed enough for me to make a decision about granting credit. What do I do then?

With the exception of a few computer-taught or classified courses, The Center has the programs of instruction on file for most courses listed in the *Guide*. When necessary, The Center can provide the topic outline from the military syllabus; and when an entire program of instruction is needed, arrangements can be made to photocopy the complete syllabus. Please note that the credit recommendations are based on more information than that cited in the syllabus.

11

What are USAFI and DANTES? Can I grant credit for the courses and tests listed on an applicant's USAFI or DANTES military test reports?

USAFI was the United States Armed Forces Institute, which offered an extensive educational program to active-duty personnel. USAFI correspondence, seminar, and self-study courses, end-of-course tests, and Subject

Standardized Tests (SSTs) were made available to service personnel worldwide until 1974, when USAFI was disestablished. Credit recommendations for USAFI courses and examinations may be found in the *Handbook to the Guide*. Subsequently, the Defense Activity for Non-Traditional Education Support (DANTES) was established in 1974, and that agency continued the development and administration of Subject Standardized Tests and other educational services. The Center continues to recommend credit for USAFI offerings and DANTES SSTs. Credit recommendations for DANTES SSTs are found in the *Handbook to the Guide*. In addition, detailed descriptions are provided in the *Guide to Educational Credit by Examination*, which can be purchased through ACE Publications.

In verifying completion of USAFI or DANTES courses or tests, the military test report should not be considered official. That report is given to all service personnel who have taken a course or test. To obtain official USAFI or DANTES transcripts, refer to the addresses provided in Appendix A, under "Other Recommendations."

12

What is the significance of the date which appears after each credit recommendation?

That date is called the "evaluation date" and represents the month and year the credit recommendation was established. Each time a course or occupation is evaluated, a date is provided to indicate when the course or occupation was last considered for a credit equivalency. The date tells you how recently a recommendation was established so that you can judge the currency of the credit recommended. This information is particularly useful in subject areas where "state of the art" is important in determining the applicability of credit. You can also use the evaluation date when your institution has established a "statute of limitations" for acceptance of transfer credit. The date is provided purely for your information; do not confuse the date with exhibit dates.

13

An applicant completed a course in 1973, but the *Guide* exhibit dates are 5/74 to Present. Should I grant credit based on the *Guide*?

The exhibit dates shown in the *Guide* indicate the time period for which The Center has information on the course. The course may have been offered for several years prior to the exhibit "start" date, but since the service branch did not submit information on the course during that time period, we are not able to backdate the exhibit to cover it. If you can be reasonably sure, from other information provided by the applicant (length, course content description), that the course was the same or similar to the course listed in the *Guide*, then you may want to grant credit based on the *Guide* recommendation. If the applicant's course was a number of weeks longer or shorter than the one covered in the *Guide* exhibit, you may be able to grant credit based on a comparison of the applicant's information with the descriptive information in the *Guide*. The Center encourages you to conduct your own assessment of courses for which no credit recommendation is available. (See question 28 for information about assessment techniques; for information on rating exhibit dates, see questions 22 and 23.) ACE staff may be able to provide you with military formal school catalog course descriptions for periods of time outside the rating exhibit dates. This should help you determine whether you might apply the credit listed in the *Guide* exhibit based on your own comparison.

14

Several courses that I've looked up have an end-date of 12/73, but the student took them in 1976. Why do so many Air Force courses carry an end-date of 12/73?

The courses that are end-dated are part of the Community College of the Air Force (CCAF). ACE has no direct knowledge of the content of the courses beyond December 1973. Accredited by the Southern Association's Commission on Colleges, CCAF grants an Associate in Applied Science degree. Lower-division credit recommendations are no longer listed for those courses. However, you may grant the upper-division credit if the student took the course within the exhibit dates.

Anyone attending an Air Force school or course can obtain a Community College of the Air Force (CCAF) transcript which documents that training if the school or course is recognized by CCAF for credit. The transcript may be used to request transfer of credit to another institution or otherwise document college credit, since non-Air Force personnel cannot enroll in CCAF. CCAF does not award credit for all Air Force courses, but only those regularly attended by Air Force enlisted personnel and taught by CCAF-affiliated schools.

A CCAF transcript may be obtained by sending a completed AF Form 2099 or a brief letter requesting transcript service to CCAF/RRRA, Maxwell Air Force Base, AL 36112-6655. A certificate of training must accompany the request. DD Form 214 is not acceptable. Specify the type of transcript (personal or official) and the address to which the transcript is to be mailed. Provide full name, social security number, and ensure that the person whose transcript is requested signs the request form. The transcripts are free. Official transcripts will be mailed only to institutions.

15

I found the correct exhibit in my 1990 *Guide*, but under "Credit Recommendation" it says "Pending evaluation." My student cannot wait for the 1992 *Guide* to find out what credit she might receive. What should I do in such a case?

Staff members regularly schedule site evaluations. We publish a list of military schools and occupations in the office newsletter so that you may be aware of the availability of recommendations. In addition, colleges and military counselors on The Center and military mailing lists should receive updates for the *Handbook to the Guide*. These updates contain credit recommendations for courses and occupations evaluated since the 1990 *Guide*. (See question 32.) When a course or occupation is listed as "Pending evaluation," and does not appear in the *Handbook*, you may call the office to find out if a credit recommendation is available, or you may simply send in your authorized Request for Course Recommendation or Request for Coast Guard occupations form. The *Guide* system is constantly growing as courses and occupations are added to the data base.

16

The Keyword Index is somewhat confusing. Can you offer some tips on locating courses by title?

You can generally locate an exhibit by searching in the *Keyword Index* under the main words of the title. Generic terms such as "Repair," "Technician," and "Officer" are not keywords.

Some keywords may consist of two words. For example, "Electronics Technician," "Aviation Electronics," and "Aviation Support" are keywords.

The computer's system of alphabetizing places abbreviations and acronyms at the end of a sequence. Numbers are arranged in the following manner:

Mk 1
Mk 1A
Mk 10
Mk 100
Mk 108
Mk 11
Mk 111
Mk 119
Mk 12

As you can see, Mk 12 appears *after* Mk 100. Letters alphabetize before numbers.

It is important to check under more than just one word if you cannot locate a course right away.

17

One of my students completed a formal military course but does not have a DD Form 295 or DD Form 214 because he was not on active-duty service. Can I grant credit for the course, and how can I verify that he actually completed the course?

We recommend that school officials use the DD 295 or DD 214 whenever it is available to verify successful completion of a service course. This suggestion is not intended to exclude those individuals who do not have access to the forms because the individuals were (1) on reserve status, (2) in the National Guard, or (3) civilians attending military courses. In such cases, we suggest that alternative forms of certification, such as course completion certificates or other acceptable records of training, be used to verify eligibility for credit.

Veterans may use *Request Pertaining to Military Records*, Standard form 180, available from Veterans Administration offices to obtain records of their military training.

18

How can I distinguish among the terms paygrade, general rate, rating, and rate?

A *paygrade* is a position from 1 to 9 on the Coast Guard's pay scale for enlisted personnel; in referring to a paygrade, the letter E (enlisted) precedes the number (E–1, E–2, E–3, E–4, E–5, E–6, E–7, E–8, and E–9). A *general rate* is an apprenticeship that indicates eligibility for entrance into various ratings. A *rating* is an occupation composed of a number of related jobs. A *rate* is an identifying term or title associated with a given paygrade, for example, the rate petty officer third class for paygrade E–4. A rate may also be associated with a specific rating; for example, a petty officer third class (paygrade E–4) whose rating is Radioman will usually refer to his or her rate as "Radioman Third Class." Coast Guard men and women usually refer to themselves by their rate. Refer to Appendix A for a description of the Coast Guard Enlisted Rating structure. (See questions 20 and 21 for information on warrant officer and limited duty officer evaluations.)

19

Do all ratings provide paths of advancement and career development for paygrades E–4 through E–9

Although most ratings begin at paygrade E–4 and terminate at paygrade E–9, there are some exceptions. For example, the Legalman rating consists of paygrades E–5 through E–9. In this case, a person progresses to paygrade E–5 from paygrade E–4 of the Yeoman rating. At the other end of the spectrum, some ratings are structured so that a person holding a rating which consists only of paygrade E-9 (e.g., Master Chief Constructionman) may have progressed from any one of several related ratings that terminate at paygrade E-8. This allows personnel who are assigned to ratings that are low in density and in which occupational content is similar to progress to higher levels and scopes of authority and responsibility. Paths of progression are provided in each exhibit in the "Career Pattern" section.

20

Have Coast Guard warrant officer specialties been evaluated?

Yes. Coast Guard warrant officer specialties have been evaluated. The exhibits begin on page 3-1. See Appendix A for more information.

21

May I also grant credit for a warrant officer's enlisted rating?

Yes. You may award credit for any combination of learning experiences. (See question 25.)

22

If a person held an occupational specialty prior to the start date of the exhibit, can I still use the recommendation?

Probably not. You need to do some additional investigating to help you decide whether to accept or modify the recommendation. The start date established by The Center is based on how far back we can verify that the occupation was the same as it was when our evaluation team evaluated it. The verification is based on official documentation given to us by the military services. We do not have the means to confirm that an occupation was the same before the start date, but you might. There are two steps you will need to follow in making your decision:

1. Ask the person to provide a copy of the military regulation pertaining to occupational qualifications or standards that were in effect when he or she held the specialty. Use the qualifications or standards to identify the learning outcomes represented by the general rate or rating.
2. Determine how much credit may be granted to the person. (Remember that advancement connotes occupational proficiency.) A careful comparison of the description in the occupation exhibit and the qualifications or standards obtained in step one may reveal whether there was a substantive difference. If not, the credit recommendation in the exhibit may be used. If specific differences are identified, then the recommended credits may need to be modified accordingly. One approach to modifying the credit recommendation is to have faculty members in appropriate subject areas assess the person's learning. In assessing the learning for educational credit, they should identify the discrete learning outcomes achieved by the person and relate them to the educational objectives of their courses and programs of study. Equivalent credit should be granted when the person has demonstrated the achievement of the same learning outcomes for which the faculty members grant credit to their students. (See question 28 for information about assessment techniques.)

23

When an occupation exhibit includes the statement "Pending evaluation," how will I know when the ACE recommendations will be available?

The abbreviated exhibit format was developed to inform you of the evaluation status of the occupations. Such exhibits include only the ACE ID number, the title, the designation(s), and the exhibit dates with the statement "Pending evaluation." When you encounter this statement, two things are certain: (1) the occupation is one that was in use as of the publication cut-off date of June 1990 and (2) that ACE plans to evaluate it. As recommendations become available, they will be announced in the office newsletter. Inquiries about the evaluation status of an occupation should be directed to the Advisory Service. (See Step 6 in How to Find and Use Coast Guard Exhibits and Step 6 in How to Find and Use Marine Corps MOS Exhibits.)

24

Why is the number of credits recommended for the occupation I just looked up greater than the number recommended for the course that leads to it?

It is rare for the subject matter covered in a course to perfectly coincide with the learning represented by occupational proficiency. In most cases, there is quite a difference in scope: difference in the subject matter mastered by the learner and, when the subject matter is the same, a difference in the depth and breadth of the learning.

Usually the scope of a course is narrower than that of the job. Most military courses are designed to prepare service members to function on the job or to take on additional tasks. As such, the courses normally provide entry-level occupational skills and competencies. Occupational proficiency is predicated on the additional factor(s) of work experience and/or extensive self-instruction.

In awarding credit for related occupations and courses, you need to be aware of the likelihood of overlapping credit recommendations. The term "overlapping" means that at least part of the learning represented by demonstrated occupational proficiency in the occupation is the same as that for the course; therefore, some of the credits recommended may duplicate each other. A suggested procedure for resolving duplication is given in the answer to question 25.

25

I have looked up the exhibits for several courses and occupations for one person. Several of the credit recommendations within a given credit category are in the same subject areas. How can I avoid granting too much or duplicate credit to this person?

In this instance, you have an example of overlapping credit recommendations. Awarding a simple total of the recommended credits could result in the award of more credit than the learning merits.

Credit recommendations may overlap between (1) related courses, (2) related occupations, and (3) related courses and occupations.

Course recommendations will overlap when the individual has participated in several military courses in the same subject area and at the same level. Recommendations (both credit and apprenticeship) for occupations will overlap when the individual has advanced to two or more specialties that require related qualifications and the performance of related or similar duties. Course recommendations and occupation recommendations will overlap when the individual has acquired his or her occupational proficiency, or a significant portion of it, through completion of one or more formal service school courses.

In all the instances cited, when the learning outcomes and courses or programs of study in which recommendations are made are the same or very similar, there is overlap, and you should modify the credit recommendations to avoid granting duplicate credit. To reconcile the overlap in the recommendations, compare the descriptions and recommendations and interview the applicant to obtain additional information. To determine how much credit may be awarded without duplication, use the following steps:

1. Identify the appropriate occupations held and/or formal courses completed by the individual from the official military records the individual provides.
2. Locate all pertinent and available occupation exhibits and/or course exhibits in the *Guide*.
3. Locate the appropriate occupation and course exhibits.
4. Read and compare all the descriptions.
5. On the basis of the person's program of study, identify the appropriate recommendations in each exhibit.
6. Read and compare all the pertinent recommendations. It may be helpful to list the amount of credit and the subject areas or programs of study of each recommendation.
7. If necessary, obtain additional information from the individual through interview or further assessment.
8. When the nature and extent of the individual's learning has been identified, refer to all pertinent recommendations and make decisions on how much credit may be awarded without duplication. Credit should be awarded as appropriate to the educational goals of the individual and the policies of the institution.

If you cannot determine whether duplication exists, write to the Advisory Service.

26

When credit is recommended in more than one category, what should I do?

Credit has frequently been recommended in more than one category. One reason for multiple-category recommendations is that the scope of a given rating or course reflects learning in several subject fields at different levels of complexity. The learning outcomes acquired in a course or rating in one subject field may apply to courses normally included in lower-division baccalaureate/associate degree programs, while those in another subject field may apply to courses normally included in upper-division baccalaureate programs. Another reason for multiple-category recommendations is that learning in a given subject field can be applied to courses and programs of study encompassed by more than one of the categories. That is, learning in business, for example, may apply to the vocational certificate category and to the upper-division baccalaureate category. A thorough reading of the exhibit will help you to determine which category or categories is the best for you to apply. You will need to read the exhibit and compare learning outcomes achieved and course objectives and content with those of your own institution.

In the first instance—learning in several subject fields—the recommended credits may be added as long as all the subjects are applicable to the student's program of study at your institution.

Example A:

In the lower-division baccalaureate/associate degree category, 1 semester hour in communication skills and 1 in principles of management. In the upper-division baccalaureate category, 3 semester hours in personnel management (6/75).

In Example A, up to 5 semester hours may be awarded if they apply to the student's program: 1 in communication skills, 1 in principles of management, and 3 in personnel management.

In the second instance—learning in a given subject field that is applied to two or more categories—the recommended credits probably should not be added. You will have to determine how they apply to the student's program of study at your institution.

Example B:

In the vocational certificate category, 15 semester hours in electricity or electronics. In the lower-division baccalaureate/associate degree category, 10 semester hours in electricity or electronics. In the upper-division baccalaureate category, 5 semester hours in electricity or electronics (6/75).

In Example B, to determine how many credits to award, compare the information in the exhibit description with the desired outcomes of electricity or electronics or related courses and programs of study at your institution. Award credit based on comparison of these outcomes.

In the third instance—a combination of Examples A and B—you may combine the credit categories when the subject areas are different, but should not add subject areas with the same titles.

> *Example C:*
> In the lower-division baccalaureate/associate degree category, 3 semester hours in typing and 3 in office management. In the upper-division baccalaureate category, 3 semester hours in office management and 2 for field experience in management (11/75).

The 3 semester hours in office management recommended in the lower-division baccalaureate/associate degree category and the 3 in office management recommended in the upper-division baccalaureate category should not be combined for a total of 6. Eight semester hours might be granted if they apply to the student's program: 3 in typing, 3 in office management, and 2 for field experience in management. The evaluators have described the course content, and using that description from the course exhibit, you must determine the appropriate application of the credit recommendation.

All three examples are from early evaluations. In recent evaluations, evaluators place the credit in a given subject area in the highest, appropriate category. If credit is placed in more than one category, specific subjects will be cited. For example, if credit in the lower division is in personnel supervision, credit in the upper division might be in human resource management.

As a general rule, you should read the exhibit description and then award credit as it best applies to the student's program of study, as determined through academic counseling.

Credit may be applied to a student's program in various ways: (1) applied to the major to replace a required course, (2) applied as an optional course within the major, (3) applied as a general elective, (4) applied to meet basic degree requirements, or (5) applied to waive a prerequisite. Credit granted by a postsecondary institution will depend on institutional policies and degree requirements.

For additional help in this area, see the Model Policy on page xxxix.

27

Do I have to grant credit *exactly* as it appears in the recommendation?

No. You are under no obligation to grant credit, although most colleges do recognize learning that occurs in a military setting. The use of ACE recommendations is the prerogative of education officials and employers. The recommendations are provided to assist you in assessing the applicability of military learning experiences to educational program or occupation. *You may modify the recommendations in accordance with your institution's policies and practices.*

You should keep in mind that the recommendations are advisory and are designed as a tool for use in giving due recognition to individuals for their learning experiences in the armed services. You should also keep in mind that the learning of some service personnel may exceed the skills, competencies, and knowledge evaluated for a specific course or occupation. In these cases, you may wish to conduct further assessment. (See question 28 for information about assessment techniques.)

28

May I conduct my own assessment of an applicant's learning?

Yes. In a sense, you are *always* conducting your own assessment, even when you use the recommendations in this book. The *Guide* is one of many tools you can use to assess what an applicant has learned and how that learning can be applied to a specific program of study at your institution. When you cannot find a recommendation in the *Guide* or cannot obtain one from the Advisory Service, we encourage you to use other means to assess what the person has learned.

There is a wide variety of assessment techniques that you can use, e.g., written examinations, oral examinations, faculty committee assessment, evaluation of materials supplied by the applicant, personal interviews, performance tests, and standardized examinations such as CLEP. A combination of several techniques will usually result in a reliable assessment of the person's learning.

You may learn more about assessment techniques through the publications of the Council for Adult and Experiential Learning (CAEL), formerly the Cooperative Assessment of Experiential Learning. Their publications may be purchased from CAEL, 223 W. Jackson Blvd., Suite 510, Chicago, IL 60606 (312-922-5909).

The *ACE Guide Series* now comprises this *Guide* and companion volumes, *The National Guide to Educational Credit for Training Programs* (which lists recommendations for courses offered by business and industry, government agencies, professional and voluntary associations, and labor unions), and the *Guide to Educational Credit by Examination* (which provides descriptions and credit recommendations for nationally recognized testing programs). This *Guide* and the *National Guide* may be purchased through Macmillan Professional Books Division, Macmillan Publishing Co., Inc., 866 Third Avenue, New York, NY 10022 (800-257-5755). The *Guide to Educational Credit by Examination* may be purchased from ACE Publications.

29

Should a two-year college use only the lower-division credit recommendations? And, should a four-year college use only upper-division credit recommendations?

Not necessarily. Depending on the recommendation, the programs of study available at the institution, and the objectives of the student, all types of institutions can use any or *all* of the four categories used in the *Guide*, namely the vocational certificate category, the lower-division baccalaureate/associate degree category, the upper-division baccalaureate category, and the graduate degree category. Evaluators now place credit recommendations in the highest appropriate credit category and are instructed to be as general as possible. That is, they place a course recommendation in the category in which it is *generally* taught at most institutions. If your institution teaches a given course at a different level, you are encouraged to grant the credit at that level. Please see "Categories of Credit" in Appendix A.

30

I am an employer. How will the *Guide* be useful to me?

You may find the exhibits helpful in identifying the skills and knowledge of veterans and placing them in jobs. The recommendations and descriptions enable you to compare a veteran's training and experience with the qualifications and requirements for jobs. The recommendations relate learning to postsecondary courses and curricula and, in some cases, to apprentice training programs.

31

We have received a transcript from a military service school listing semester credits and carrying the statement that the school is accredited by one of the six regional accrediting associations. How do we handle this?

At this time we know of no military schools that are accredited above the certificate level other than the following: Community College of the Air Force, which is accredited at the two-year community college level; Army Command and General Staff College at Fort Leavenworth, Kansas, which is accredited to grant an M.A. degree; Air Force Institute of Technology at Wright-Patterson Air Force Base, which is accredited through the doctoral level; Defense Intelligence College, Washington, DC, accredited to grant an M.A. degree; Naval Postgraduate School, Monterey, CA, accredited through the doctoral level; Uniformed Services University of the Health Sciences School of Medicine, Bethesda, MD, accredited through the doctoral level; and the service academies.

We recommend that you handle the certificate-level credit listings in accordance with your institutional policy regarding certificate-level credit.

32

What is the *Handbook to the Guide to the Evaluation of Educational Experiences in the Armed Services?*

The *Handbook to the Guide* was designed to keep institutional and military representatives up to date on the activities of ACE and The Center as well as to provide credit recommendations for courses and occupations evaluated since the latest *Guide* was printed. Revisions are mailed to military education personnel and civilian institutions. Sections most likely to be revised are those on exams, other aids, and evaluation updates.

33

A Coast Guard student I'm counseling has taken an Air Force course. It's not in Volume 4 of the *Guide*. What should I do?

Anyone attending an Air Force school or course can obtain a Community College of the Air Force (CCAF) transcript which documents that training if the school or course is recognized by CCAF for credit. The transcript may be used to request transfer of credit to another institution or otherwise document college credit, since non-Air Force personnel cannot enroll in CCAF. CCAF does not award credit for all Air Force courses, but only those regularly attended by Air Force enlisted personnel and taught by CCAF-affiliated schools.

A CCAF transcript may be obtained by sending a completed AF Form 2099 or a brief letter requesting transcript service to CCAF/RRRA, Maxwell Air Force Base, AL 36112–6655. A certificate of training must accompany the request. A DD Form 214 is not acceptable. Specify the type of transcript (personal or official) and the address to which the transcript is to be mailed. Provide full name, social security number, and ensure that the person whose transcript is requested signs the request form. The transcripts are free. Official transcripts will be mailed only to institutions.

34

I've found exhibits for most enlisted occupations, but not for the Air Force and Marine Corps. How come?

The student may write to the Community College of the Air Force (CCAF) to obtain a transcript which will include credit for the AFSCs held, reported as internship.

The student should write to CCAF/RRRA, Office of the Registrar, Maxwell AFB, AL 36112–6655.

Marine Corps MOS recommendations are included in the *Guide*. Recent evaluations have been conducted for MOS's in the aircraft maintenance and avionics occupational fields. The exhibits begin on page 4-1. Refer to How to Find and Use Marine Corps MOS Exhibits and Appendix A for information on the Marine Corps MOS system.

If you are not already receiving the newsletter, write to the Editor, Update, The Center for Adult Learning and Educational Credentials, American Council on Education, One Dupont Circle, Washington, DC 20036-1193.

1928

Awarding Credit for Extrainstitutional Learning

The following statement by the ACE Commission on Educational Credit and Credentials has been approved by the ACE Board of Directors and endorsed by the Council on Postsecondary Accreditation.

The American Council on Education recommends that postsecondary education institutions develop policies and procedures for measuring and awarding credit for learning attained outside their sponsorship.[1]

American society abounds in resources for learning at the postsecondary level. Public, private, and proprietary education institutions exercise the central but not exclusive responsibility for instruction and learning. Associations, business, government, industry, the military, and unions sponsor formal instruction. In addition, independent study and reading, work experiences, the mass media, and social interaction contribute to learning and competency.

Full and effective use of all educational resources is a worthy educational and social goal. Achieving this goal will depend to a large extent on providing equitable recognition for extrainstitutional learning:

- Educational credentials have a significant bearing on the economic, professional, and social status of the individual. Thus, social equity requires that equivalent learning, regardless of where and how it is achieved, be incorporated into the system of rewards for learning and competency.
- Recognition encourages learning and contributes to pedagogical effectiveness. Teaching students what they already know is both stultifying to them and wasteful of educational and personal resources.

Postsecondary education institutions legally authorized and accredited to award degrees and other educational credentials have a special responsibility to assess extrainstitutional learning as part of their credentialing function.

In the development of institutional policies and procedures, the American Council on Education recommends the following guidelines and resources.

Guidelines

1.

Reliable and valid evaluation of student achievement is the sine qua non in awarding credit. Experience, whether acquired at work, in social settings, in the library, at home, or in the formal classroom, is in itself an inadequate basis for awarding credit. Increased attention in choosing evaluation procedures and techniques and more thorough evaluation are necessary when learning has been attained without participation in a program of study prescribed by an educational institution and offered by its faculty.

2.

In determining whether it is appropriate to accept a student's extrainstitutional learning for credit, the governing considerations should be its applicability to the student's program of study, including graduation requirements, and the relationship of the learning to the institution's mission, curricula and standards for student achievement. Learning should be articulated, documented and measured in these terms.

3.

Institutions should evaluate extrainstitutional learning only in subject-matter fields in which they have or can arrange for faculty expertise or where they can rely on nationally validated examinations or other procedures for establishing credit equivalencies. Institutions should award credit in these areas only if the quality of learning meets their standards for student achievement. Normally, institutions should evaluate learning and award credit only in subject fields in which they offer courses or curricula. However, if the acquisition of college level learning outcomes has been demonstrated in an area not taught by the institution, but related to the student's program of study, an exception may and ought to be made.

4.

Institutions awarding credit for extrainstitutional learning should develop clearly stated policies regarding administrative responsibility, student eligibility, means of assessment, recording of results on transcripts, storage of documentation, student fees, and maximum number of credits allowable. Information on these and related institutional policies and procedures should be disseminated to students and faculty for maximum awareness and utilization.

5.

Institutional policy should include provision that the institution's policies and procedures for awarding credit for extrainstitutional learning should be subject to periodic reevaluation.

---

[1] "Extrainstitutional learning" is defined as learning that is attained outside the sponsorship of legally authorized and accredited postsecondary educational institutions. The term applies to learning acquired from work and life experiences, independent reading and study, the mass media, and participation in formal courses sponsored by associations, business, government, industry, the military, and unions.

Transfer and Award of Credit

The following set of guidelines was developed by the three national associations whose member institutions are directly involved in the transfer and award of academic credit—the American Association of Collegiate Registrars and Admissions Officers, the American Council on Education, and the Council on Postsecondary Accreditation. The need for such a statement came from an awareness of the growing complexity of transfer policies and practices, which have been brought about, in part, by the changing contours of postsecondary education. With increasing frequency, students are pursuing their education in a variety of institutional and extrainstitutional settings. Social equity and the intelligent use of resources require that validated learning be recognized wherever it takes place.

The statement is intended to serve as a guide for institutions developing or reviewing policies dealing with transfer and award of credit. The statement is under periodic review by the three associations, and reactions to it would, of course, be welcome. Comments may be directed to Henry Spille, Vice President, ACE, and Director, The Center for Adult Learning and Educational Credentials.

Robert H. Atwell, President
American Council on Education

This statement is directed to institutions of postsecondary education and others concerned with the transfer of academic credit among institutions and award of academic credit for extrainstitutional learning. Basic to this statement is the principle that each institution is responsible for determining its own policies and practices with regard to the transfer and award of credit. Institutions are encouraged to review their policies and practices periodically to assure that they accomplish the institutions' objectives and that they function in a manner that is fair and equitable to students. Any statements, this one or others referred to, should be used as guides, not as substitutes, for institutional policies and practices.

Transfer of credit is a concept that now involves transfer between dissimilar institutions and curricula and recognition of extrainstitutional learning, as well as transfer between institutions and curricula with similar characteristics. As their personal circumstances and educational objectives change, students seek to have their learning, wherever and however attained, recognized by institutions where they enroll for further study. It is important for reasons of social equity and educational effectiveness, as well as the wise use of resources, for all institutions to develop reasonable and definitive policies and procedures for acceptance of transfer credit. Such policies and procedures should provide maximum consideration for the individual student who has changed institutions or objectives. It is the receiving institution's responsibility to provide reasonable and definitive policies and procedures for determining a student's knowledge in required subject areas. All institutions have a responsibility to furnish transcripts and other documents necessary for a receiving institution to judge the quality and quantity of students' work. Institutions also have a responsibility to advise the students that the work **reflected** on the transcript **may or may not** be accepted by a receiving institution.

INTERINSTITUTIONAL TRANSFER OF CREDIT

Transfer of credit from one institution to another involves at least three considerations:

(1) the educational quality of the institution from which the student transfers

(2) the comparability of the nature, content, and level of credit earned to that offered by the receiving institution

(3) the appropriateness and applicability of the credit earned to the programs offered by the receiving institution, in light of the student's educational goals.

Accredited Institutions

Accreditation speaks primarily to the first of these considerations, serving as the basic indicator that an institution meets certain minimum standards. Users of accreditation are urged to give careful attention to the accreditation conferred by accrediting bodies recognized by the Council on Postsecondary Accreditation (COPA). COPA has a formal process of recognition which requires that all accrediting bodies so recognized must meet the same standards. Under these standards, COPA has recognized a number of accrediting bodies, including:

(1) regional accrediting commissions (which historically accredited the more traditional colleges and universities but which now accredit proprietary, vocational-technical, and single-purpose institutions as well)

(2) national accrediting bodies that accredit various kinds of specialized institutions

1931

(3) certain professional organizations that accredit free-standing professional schools, in addition to programs within multipurpose institutions (COPA annually publishes a list of recognized accrediting bodies, as well as a directory of institutions accredited by these organizations).

Although accrediting agencies vary in the ways they are organized and in their statements of scope and mission, all accrediting bodies that meet COPA's standards for recognition function to assure that the institutions or programs they accredit have met generally accepted minimum standards for accreditation.

Accreditation affords reason for confidence in an institution's or a program's purposes, in the appropriateness of its resources and plans for carrying out these purposes, and in its effectiveness in accomplishing its goals, insofar as these things can be judged. Accreditation speaks to the probability, but does not guarantee, that students have met acceptable standards of educational accomplishment.

Comparability and Applicability

Comparability of the nature, content, and level of transfer credit and the appropriateness and applicability of the credit earned to programs offered by the receiving institution are as important in the evaluation process as the accreditation status of the institution at which the transfer credit was awarded. Since accreditation does not address these questions, this information must be obtained from catalogues and other materials and from direct contact between knowledgeable and experienced faculty and staff at both the receiving and sending institutions. When such considerations as comparability and appropriateness of credit are satisfied, however, the receiving institution should have reasonable confidence that students from accredited institutions are qualified to undertake the receiving institution's educational program.

Admissions and Degree Purposes

At some institutions there may be differences between the acceptance of credit for admission purposes and the applicability of credit for degree purposes. A receiving institution may accept previous work, place a credit value on it, and enter it on the transcript. However, that previous work, because of its nature and not its inherent quality, may be determined to have no applicability to a specific degree to be pursued by the student.

Institutions have a responsibility to make this distinction, and its implications, clear to students before they decide to enroll. This should be a matter of full disclosure, with the best interests of the student in mind. Institutions also should make every reasonable effort to reduce the gap between credits accepted and credits applied toward an educational credential.

Unaccredited Institutions

Institutions of postsecondary education that are not accredited by COPA-recognized accrediting bodies may lack that status for reasons unrelated to questions of quality. Such institutions, however, cannot provide a reliable, third-party assurance that they meet or exceed minimum standards. That being the case, students transferring from such institutions may encounter special problems in gaining acceptance and transferring credits to accredited institutions. Institutions admitting students from unaccredited institutions should take special steps to validate credits previously earned.

Foreign Institutions

In most cases, foreign institutions are chartered and authorized by their national governments, usually through a ministry of education. Although this policy provides for a standardization within a country, it does not produce useful information about comparability from one country to another. No other nation has a system comparable to voluntary accreditation. The Division of Higher Education of the United Nations Educational, Scientific, and Cultural Organization (UNESCO) is engaged in a project to develop international compacts for the acceptance of educational credentials. At the operational level, four organizations—the Council on International Educational Exchange (CIEE), the National Council on the Evaluation of Foreign Student Credentials (CEC), the National Association for Foreign Student Admissions (NAFSA), and the National Liaison Committee on Foreign Student Admissions (NLC)—often can assist institutions by distributing general guidelines on admission and placement of foreign students. Equivalency or placement recommendations are to be evaluated in terms of the programs and policies of the individual receiving institution.

VALIDATION OF EXTRAINSTITUTIONAL AND EXPERIENTIAL LEARNING FOR TRANSFER PURPOSES

Transfer-of-credit policies should encompass educational accomplishment attained in extrainstitutional settings as well as at accredited postsecondary institutions. In deciding on the award of credit for extrainstitutional learning, institutions will find the services of the American Council on Education's Center for Adult Learning and Educational Credentials helpful. One of The Center's functions is to operate and foster programs to determine credit equivalencies for various modes of extrainstitutional learning. The Center maintains evaluation programs for formally structured courses offered by the military, and civilian noncollegiate sponsors such as business, corporations, government agencies, and labor unions. Evaluation services are also available for examination programs, for occupations with validated job proficiency evaluation

systems, and for correspondence courses offered by schools accredited by the National Home Study Council. The results are published in a Guide series. Another resource is the General Education Development (GED) Testing Program, which provides a means for assessing high school equivalency.

For learning that has not been validated through the ACE formal credit recommendations process or through credit-by-examination programs, institutions are urged to explore the Council for Adult and Experiential Learning (CAEL) procedures and processes.

USES OF THIS STATEMENT

This statement has been endorsed by the three national associations most concerned with practices in the area of transfer and award of academic credit—the American Association of Collegiate Registrars and Admissions Officers, the American Council on Education, and the Council on Postsecondary Accreditation.

Institutions are encouraged to use this statement as a basis for discussions in developing or reviewing institutional policies with regard to transfer. If the statement reflects an institution's policies, that institution might want to use this publication to inform faculty, staff, and students.

It is recommended that accrediting bodies reflect the essential precepts of this statement in their criteria.

Approved by the Executive Committee, American Association of Collegiate Registrars and Admissions Officers
November 21, 1978 and reaffirmed in 1989.

Approved by the American Council on Education/Commission on Educational Credit and Credentials
December 5, 1978 and reaffirmed in 1989.

Approved by the COPA Board
October 10, 1978

Elements of a Model Policy on Awarding Credit for Extrainstitutional Learning

Extrainstitutional learning is defined as learning that is attained outside the sponsorship of legally authorized and accredited postsecondary education institutions. The term applies to learning acquired from work and life experiences, independent reading and study, the mass media, and participation in formal courses sponsored by associations, business, government, industry, the military and unions.

I. Example Statement of General Policy

Degree credit shall be awarded for postsecondary-level extrainstitutional learning. Such credit awards shall be made under protocols designed to assure that reliable and valid measures of learning outcomes are or have been applied.

Rationale

Adult students are demanding that their learning acquired in extrainstitutional settings be assessed and that appropriate degree-related credit be awarded. This is a reasonable request and also one in keeping with the national interest. Full and effective use of all educational resources is a worthy educational and social goal. Achieving this goal will depend to a large extent on providing equitable recognition for extrainstitutional learning.

American society abounds in resources for learning at the postsecondary level. Postsecondary education institutions legally authorized and accredited to award degrees and other educational credentials accordingly have a special responsibility to assess extrainstitutional learning as part of their credentialing function.

Educational credentials have a significant bearing on the economic, professional, and social status of the individual. It follows that social equity requires that equivalent learning regardless of where and how it is achieved be incorporated into the system of rewards for learning and competency. Recognition encourages learning and contributes to teaching effectiveness. Teaching students what they already know is both stultifying to them and wasteful of educational and personal resources.

Through reliable and valid assessment of extrainstitutional learning, more persons can be enabled to enter college and work successfully toward degrees and other academic goals. Many of these individuals are those who have been educationally disadvantaged in the past.

II. Example Policy for Administrative Responsibility

Responsibility for administering policies and procedures for awarding credit for extrainstitutional learning rests with the Academic Vice President (or other designated senior academic official).

Rationale

Awarding credit is an academic matter. Therefore, administrative responsibility for the policies and procedures pertaining to awarding credit for extrainstitutional learning should be assigned to the institution's senior academic official. Policy implementation and application may be delegated to other institutional officials such as deans, department chairpersons, and registrars. However, oversight of their policy implementation and application is performed by a senior academic official.

Example of Application of the Policy

The academic vice president delegates to the institutional registrar the responsibility for transcripting credit awarded on the basis of recommendations in the ACE Guides (the policy was approved through the institution's usual governance procedures) and provides the registrar with guidelines for performing this responsibility. Included in the guidelines are a series of steps to follow in determining how to apply the ACE credit recommended for a course whose title is not the same as the title of any course offered by the institution.

The ACE *Guide* recommends 3 semester hours in automotive maintenance, but the institution's courses are more specific and carry titles such as Tune-Up I, Auto Brakes, and Automatic Transmission I. In accordance with the guidelines, the registrar compares course descriptions in the institution's catalog with the course description in the *Guide*, finds that the learning outcomes acquired through Tune-Up I match very closely the learning outcomes acquired through the military's automotive maintenance course, and transcripts 3 semester hours in Tune-Up I.

III. Example Policy on Learning That Will Be Evaluated and Who Will Conduct the Evaluations

Extrainstitutional learning related to subject areas, courses and programs of study will be evaluated for registered students. Established institutional evaluation procedures will be followed, using one or more of the authorized publications and methods for effecting assessment. Students of any age may apply for credit for extrainstitutional learning at any time during a period of enrollment.

Rationale

The learning that is evaluated must be in subject areas in which faculty expertise is available or in which expertise can be arranged. This expertise is essential for conducting evaluations and making credit-award decisions. If subject-matter experts do not conduct the evaluations and make the decisions, the credibility of the activity is suspect.

While the great majority of students requesting credit for extrainstitutional learning will be of relatively mature years, it is possible that "young students" may have acquired learning in extrainstitutional settings. Providing a student can document the attainment of appropriate learning outcomes, he or she should receive credit regardless of age. While most applications for award of extrainstitutional learning credit will be received at the time of enrollment from new students, it is possible that students already enrolled may realize that they, too, have extrainstitutional learning experiences that might qualify for credit awards. It is also possible that enrolled students, especially those who are employed, will continue to learn in noncollegiate settings, and will want their learning assessed. Student initiatives with respect to extrainstitutional learning assessment shall not be limited or restricted to the initial term of enrollment.

Example of Application of the Policy

A 19-year old student has been enrolled at Local College for two years and is about to enter her junior year. At the time of enrollment, it did not occur to her that the foreign language requirement might be satisfied with a language other than one of those taught at the institution. This student's parents were refugees from Hungary who entered the United States in 1958. The Hungarian language is spoken in the home and the student speaks the language fluently. The student is able to document to the satisfaction of the institution's language faculty, through evaluation done by a person in the community fluent in Hungarian, that she is, indeed, proficient in Hungarian. She received 6 credits in Hungarian that satisfy the foreign language requirement for the bachelor's degree.

IV. Example Policy on Publications and Methods for Use in Awarding Credit for Extrainstitutional Learning

Nine publications and methods are permitted for use in awarding credit for extrainstitutional learning. These publications and methods are: (1) ACE *Guide to the Evaluation of Educational Experiences in the Armed Services*, (2) ACE *National Guide to Educational Credit for Training Programs*, (3) ACE *Guide to Educational Credit by Examination*, (4) New York Regents *Guide to Educational Programs in Noncollegiate Organizations*, (5) College Entrance Examination Board Advanced Placement Program (CEEB/AP), (6) department challenge examinations and/or faculty end-of-course examinations, (7) degree-relevant extrainstitutional learning credit awarded and transcripted by other accredited institutions, as well as that credit transcripted by ACE on the Army/ACE Registry Transcript System (AARTS) and the Registry of Credit Recommendations (ROCR), (8) subject-matter experts who are not members of the institution's faculty but who evaluate extrainstitutional learning at the faculty's request, and (9) individual portfolios using Council for Adult and Experiential Learning (CAEL) or other standardized guidelines.

In addition, advice on using other publications and methods for awarding credit for extrainstitutional learning may be sought from the American Council on Education.

Rationale

For nearly 50 years, the *Guide to the Evaluation of Educational Experiences in the Armed Services* has been the standard reference work for recognizing learning acquired in the military. More recently, the *National Guide to Educational Credit for Training Programs* and the *Guide to Educational Credit by Examination* have attained similar stature. ACE has worked cooperatively with the Department of Defense, the armed services, business, industry, labor unions, other organizations providing education and training, and test publishers, as well as with accredited colleges and universities in developing the credit recommendations presented in the *Guide* series. All recommendations carried are the result of careful and periodic review by evaluation teams that consist of university and college faculty members who are subject-matter experts. All evaluation teams work under policies and procedures approved by the ACE Commission on Educational Credit and Credentials and under protocols and supervision provided by the staff of the ACE Center for Adult Learning and Educational Credentials.

The policies and procedures used to develop the exhibits in the New York Regents *Guide to Educational Programs in Noncollegiate Organizations* are similar to those used by the American Council on Education.

The CEEB/AP program permits high school students to demonstrate the attainment of college-level learning outcomes; the important factor is that learning outcomes are attained, not where the learning took place (in a high school) or who taught the course (usually a high school teacher).

The practice of administering departmental or individual faculty member challenge examinations or end-of-course examinations is long-standing and permits the faculty members to make direct judgements about the equivalence of learning for specific courses.

Credit transcripted on the basis of extrainstitutional learning should be treated the same as that transcripted for courses; in both instances the faculty of the sending institution has attested to the student's attainment of required learning outcomes. Credit transcripted on ACE's Army/ACE Registry Transcript System (AARTS) and Registry of Credit Recommendations (ROCR) for the Army component of the Military Evaluations Program and participants in the Program on Noncollegiate Sponsored Instruction (PONSI) should also be treated as that transcripted for courses; in these instances, teams of fac-

ulty members from accredited colleges and universities have evaluated the learning and judged its equivalence to learning acquired on campuses.

Sometimes the expertise to evaluate extrainstitutional learning is not available on the faculty; in these instances, the faculty can designate an expert to conduct the evaluation. Criteria for selection of "outside" experts should be established.

The portfolio assessment guidelines promulgated by CAEL are widely accepted by faculty assessors and are considered exemplary. The portfolio provides a reliable method for evaluating learning outcomes acquired individually, as opposed to a set of learning outcomes acquired by large numbers of persons, such as through a course offered by the U.S. Army for soldiers.

Example of Application of the Policy

A student (soldier), upon entering Local College, provides an AARTS transcript that confirms completion of a course entitled "Advanced Geodetic Surveyor" at the Engineer School, Ft. Belvoir, Virginia, in October 1981, while holding the rank of sergeant in the U.S. Army. Information on the transcript and in the ACE *Guide to the Evaluation of Educational Experiences in the Armed Services* indicates that the soldier completed this course when it was taught at Ft. Belvoir between January 1977 and November 1983. Its objectives were to train warrant officers and senior noncommissioned officers in advanced geodetic survey techniques. The course was delivered by means of lectures and practical exercises in advanced geodetic surveying techniques including map compiling, vertical and horizontal control surveys, gravity, astronomic observations, and mathematics. The *Guide* recommends that a college or university award 6 semester hours in geodesy at the upper-division baccalaureate level; this recommendation also appears on the AARTS transcript. After review of this recommendation, Local College awards this student 6 semester hours of credit in geodesy toward completion of a planned major in mathematics.

V. Example Policy on Maximum Number of Credits That May Be Awarded for Extrainstitutional Learning

The maximum number of credits that may be awarded for extrainstitutional learning is three-fourths the number required for a degree.

Rationale

Most postsecondary education institutions have a requirement that stipulates that a minimum of one-fourth of the credits required for a degree must be earned in residence. The balance of the required credits could be awarded on the basis of extrainstitutional learning. However, the credits awarded for extrainstitutional learning and those earned in residence would have to satisfy all degree requirements before a degree could be awarded. In the absence of a residency requirement, all degree requirements conceivably could be met through extrainstitutional learning.

Example of Application of the Policy

John Smith is a newly registered student at Local College. He is a financial vice president of a major U.S. corporation, CPA, and licensed realtor; he is fluent in three foreign languages—German, French, and Spanish; he has published seven articles in domestic and foreign journals and has contributed chapters in two books on international economics; he is knowledgeable about foreign countries and cultures as a result of having lived abroad for eleven years; and he is proficient in computer programming (COBOL and FORTRAN).

On the basis of Mr. Smith's demonstrated knowledge, skills, and competencies, the faculty awarded him 106 credits. The college requires 124 credits for a degree and has a 24 credit residency requirement. Therefore, Mr. Smith must earn 24 credits in residence. What courses does he take to earn 24 credits? His academic advisers decided, and Mr. Smith concurred, that he lacked knowledge about the environment, a special focus and thrust of the college's general education requirement. He took courses to satisfy this requirement and was awarded a degree.

VI. Example Policy on Recording Credits Awarded for Extrainstitutional Learning on Transcripts

The credit awarded for extrainstitutional learning shall be transcripted in the same manner as credits awarded for course completions.

Rationale

The faculty members have either evaluated the learning or approved the other means by which credit can be awarded. They have verified that learning has occurred and is equivalent to the learning acquired in their courses and programs. Therefore, special notation or differentiation of courses and credits awarded on the basis of extrainstitutional learning is unnecessary.

Example of the Application of the Policy

Examples of the way in which Mr. Smith's credit was transcripted are:

Accounting 261	—Financial Information Systems—3 semester hours
Accounting 360	—Financial Reporting Theory and Practice—3 semester hours
Computer Science 251	—Principles of Programming—FORTRAN—4 semester hours
Computer Science 252	—Principles of Programming—COBOL—4 semester hours
German 101	—Elementary German—4 semester hours
German 201	—Intermediate German—4 semester hours
German 309	—Advanced Conversation—3 semester hours

VII. Example Policy on Retention of the Documentation of Extrainstitutional Learning

Documents used to verify the award of credit for extrainstitutional learning shall be retained for one calendar year.

Rationale

The length of time documentation for the credits awarded for extrainstitutional learning shall be retained should be consistent with the length of time documentation for credits awarded for classroom learning are retained. Consistency facilitates equitable handling of student documents and represents sound recordkeeping practices.

Example of Application of the Policy

Local College keeps students' final exams on file for one calendar year, after which they are shredded. Mr. Smith's documentation—copies of articles and chapters he authored, copies of his computer programs, notes and summaries of interviews faculty members had with him, etc.—were kept on file for one calendar year and were then shredded.

VIII. Student Fees for Assessing Extrainstitutional Learning

A fee for the assessment of extrainstitutional learning shall be charged.

Rationale

Assessing extrainstitutional learning, transcripting the credits awarded, etc., are valuable services to students. These services require faculty and staff time. Students should therefore pay a fee for these services just as they pay fees for other institutional services.

Example of Application of the Policy

The fee for assessing extrainstitutional learning and transcripting the results at Local College is based on its average hourly salaries for various faculty ranks (assistant professor, professor, etc.) and administrative positions plus the costs for benefits and administrative services which are computed as percentages of salaries. The average hourly salaries are multiplied by the amount of time spent in performing the evaluation and administrative functions, rounded up to the half-hour. The fee for assessing Mr. Smith's extrainstitutional learning and transcripting the results was $880.

IX. Example Policy on Oversight of the "Program"/Activity

An Oversight Committee, broadly representative of the institution's divisions/departments, shall be appointed (by the "program" administrator or through the institution's usual means of appointing committees). The major function of this committee is to review the credit award decisions to assure consistency across the institution.

Rationale

To protect the integrity and credibility of the activity, consistency is absolutely necessary. If either the faculty or the students perceive that credit awards are made capriciously, their confidence in the activity will be lost. When this occurs, the activity will no longer be viable.

Example Application of the Policy

The Oversight Committee detected that, when a faculty evaluation team for portfolio assessment was comprised of three specific faculty members, the credit awards seemed overly "generous." The Oversight Committee recommended to the administrator that these three faculty members not comprise a team. The administrator discussed the credit-award information with the three faculty members, and they agreed with the Oversight Committee's recommendation, which was then implemented.

X. Example Policy on "Program" Evaluation

The "program" for assessing extrainstitutional learning shall be evaluated on an annual basis by the academic vice-president or his designee(s).

Rationale

It is sound administrative practice to evaluate "programs" on a regular basis to determine if "program" objectives are being met. It is especially important to evaluate new "programs" so that problems are detected early on and changes can be made, if necessary. Evaluation should probably be done jointly by "program" staff and the staff of the Office of Institutional Research.

Example of Application of the Policy

At Local College, responsibility for "program" evaluation is assigned to the Office of Institutional Research, but the Office involves the "program" staff. "Program" evaluation includes but is not limited to, an indepth look at the academic performance of students who have received credit for extrainstitutional learning. Recent data showed that their overall performance, in terms of GPA, was higher than that of the student body as a whole; the average number of credits carried each semester was equivalent to the average number carried by the student body as a whole; they were enrolled in all academic departments of the college, etc. Credit awards were examined by age categories and by assessment instrument used. This information was useful to the college faculty and administrators in deciding to continue the "program."

Course Exhibits

AF

NOTE: The Community College of the Air Force has been accredited by the Soutern Association's Commision on Colleges and grants an Associate in Applied Science degree. CCAF transcripts should be treated in the same manner as transcripts from institutions granting similar degrees. Official copies of transcripts may be obtained from Registrar, Community College of the Air Force, Maxwell AFB, Alabama 36112.

AF-0101-0001

Disease Vector and Pest Control Technology

Course Number: 3AZR56650.
Location: Sheppard Technical Training Center, Sheppard AFB, TX.
Length: 5 weeks (132 hours).
Exhibit Dates: 10/71-12/73.
Objectives: To train enlisted personnel in the basic principles of pest control.
Instruction: Lectures and practical experience in the basic principles of pest control, including the classification and characteristics of insects; mosquito abatement procedures; field ecology; control of flies, fleas, lice, ticks, and mites; formulation, evaluation, and proper use of pesticides; operation and maintenance of insecticide dispersal equipment; and epidemiology of vector-borne diseases.
Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in entomology (1/74).

AF-0101-0002

Engineering Entomology Specialist

Course Number: ABR56630.
Location: 3750th Technical School, Sheppard AFB, TX.
Length: 6 weeks (180 hours).
Exhibit Dates: 8/65-12/73.
Objectives: To train enlisted personnel in the basic principles of animal and vegetable pest control.
Instruction: Lectures and practical experience in the basic principles of animal and vegetable pest control, including ecology and epidemiology of vector-borne diseases; pesticide classification, safety, dispersal, and disposal; fumigation techniques; sanitation; mosquito control; and control of venomous animals, rodents, and other vertebrates.
Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in community sanitation or agricultural pest control (2/74).

AF-0101-0003

Engineering Entomology Specialist/Technician
(Entomology Specialist)

Course Number: 3ABR56630.
Location: Sheppard Technical Training Center, Sheppard AFB, TX.
Length: 6 weeks (240 hours).
Exhibit Dates: 4/73-12/73.
Objectives: To train enlisted personnel in the basic principles of animal and vegetable pest control.
Instruction: Lectures and practical experience in the basic principles of animal and vegetable pest control, including ecology and epidemiology of vector-borne diseases; pesticide classification, safety, dispersal, and disposal; fumigation techniques; sanitation; mosquito control; and control of venomous animals, rodents, and other vertebrates.
Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in community sanitation or agricultural pest control (1/74).

AF-0101-0004

Pest Control (SEA)

Course Number: 2ASR56650-2.
Location: Sheppard Technical Training Center, Sheppard AFB, TX.
Length: 2 weeks (80 hours).
Exhibit Dates: 4/73-12/73.
Objectives: To train enlisted personnel to identify and control pest problems.
Instruction: Lectures and practical experience in the basic principles of pest control, including epidemiology of vector-borne diseases; use and evaluation of various pest control methods; operation of pest control equipment; and safety procedures for mixing, handling, and storing insecticides.
Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in entomology (1/74).

AF-0102-0001

Animal Specialist

Course Number: 5ALY90831.
Location: School of Aerospace Medicine, Brooks AFB, TX.
Length: 8 weeks (259-276 hours).
Exhibit Dates: 5/72-11/77.
Objectives: To provide enlisted personnel with the skills required in zoonosis control clinics, working dog programs, and veterinary support of biomedical research.
Instruction: Lectures and laboratory in all facets of animal care, including anatomy and physiology, clinical laboratory procedures, necropsy, animal diseases, pharmacology, sanitation, zoonosis control clinic management, and military dog care.
Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in laboratory animal management (2/74).

AF-0102-0002

Animal Technician
(Laboratory Animal Technician)

Course Number: *Version 1:* 5AZY90850. *Version 2:* AAY90871.
Location: School of Aerospace Medicine, Brooks AFB, TX.
Length: *Version 1:* 6 weeks (204 hours). *Version 2:* 8 weeks (308 hours).
Exhibit Dates: *Version 1:* 9/77-1/89. *Version 2:* 1/67-8/77.
Objectives: To provide the skills necessary to manage, handle, and care for laboratory animals.
Instruction: Lectures and laboratories in animal care and handling, including anatomy and physiology, pharmacology, clinical laboratory procedures, necropsy, animal nutrition, surgery and aseptic techniques, and laboratory animal diseases.
Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 4 semester hours in laboratory animal management, 3 in basic animal medical sciences (2/78). *Version 2:* In the vocational certificate category, 4 semester hours in laboratory animal management (1/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in laboratory animal management (1/74); in the upper-division baccalaureate category, 4 semester hours in laboratory animal management (1/74).

AF-0102-0003

1. Veterinary Specialist
   (Veterinary Specialist Phase II)
2. Veterinary Specialist
3. Veterinary Specialist
4. Veterinary Specialist
   (Apprentice Veterinary Specialist)
5. Apprentice Veterinary Specialist

Course Number: *Version 1:* 5ABY90830. *Version 2:* 3ABR90830. *Version 3:* 3ABR90830. *Version 4:* ABR90830; AB90830. *Version 5:* AB90830.
Location: *Version 1:* School of Aerospace Medicine, Brooks AFB, TX. *Version 2:* Sheppard Technical Training Center, Sheppard AFB, TX. *Version 3:* Sheppard Technical Training Center, Sheppard AFB, TX. *Version 4:* Medical Service School, Gunter AFB, AL. *Version 5:* Medical Service School, Gunter AFB, AL.
Length: *Version 1:* 3-4 weeks (113 hours). *Version 2:* 16 weeks (518 hours). *Version 3:* 13 weeks (390 hours). *Version 4:* 10-11 weeks (402-429 hours). *Version 5:* 13 weeks (507 hours).
Exhibit Dates: *Version 1:* 8/77-1/89. *Version 2:* 10/70-2/77. *Version 3:* 1/69-9/70. *Version 4:* 10/57-12/68. *Version 5:* 5/54-9/57.
Objectives: To train airmen in food inspection procedures, sanitary surveillance of food processing and storage facilities, and veterinary support of combat operations.
Instruction: *All Versions:* Lectures and practical exercises in the fundamentals of medical service, veterinary administration, microbiology, technical inspection procedures, veterinary field training, animal service, and zoonosis control activities. *Version 1:* Phase I training (8 weeks) is at Ft. Sam Houston, TX at the Academy of Health Sciences. See exhibit AR-0104-0002.
Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in administration and management, 2 in food sanitation, 2 in laboratory animal management (2/78). *Version 2:* In the lower-division

baccalaureate/associate degree category, 3 semester hours in food science and meat and dairy hygiene (2/74); in the upper-division baccalaureate category, 3 semester hours in food science and meat and dairy hygiene (2/74). *Version 3:* In the upper-division baccalaureate category, 3 semester hours in meat and dairy hygiene (1/69). *Version 4:* In the upper-division baccalaureate category, 3 semester hours in meat and dairy hygiene (12/68). *Version 5:* In the upper-division baccalaureate category, 3 semester hours in meat and dairy hygiene (5/63).

AF-0104-0001

VETERINARY TECHNICIAN

Course Number: *Version 1:* 3AAR90870-1; AAR90870-1. *Version 2:* AAR90870; AA90870. *Version 3:* AA90870.

Location: *Version 1:* Medical Service School, Sheppard AFB, TX. *Version 2:* Medical Service School, Gunter AFB, AL; *Version 2:* School of Aviation Medicine, Gunter AFB, AL. *Version 3:* School of Aviation Medicine, Gunter AFB, AL.

Length: *Version 1:* 10 weeks (300 hours). *Version 2:* 12-14 weeks (434-499 hours). *Version 3:* 15 weeks (585 hours).

Exhibit Dates: *Version 1:* 11/68-12/73. *Version 2:* 7/65-10/68. *Version 3:* 10/56-6/65.

Objectives: To present a comprehensive program in food microbiology, animal service, and zoonotic disease control to qualified enlisted personnel.

Instruction: Practical experience in the inspection of meat and meat products; supervision of sanitary handling; inspection of fruits; sanitary surveillance of food processing establishments; basic principles of food microbiology; statistical inspection procedures; and food preservation and storage.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 3 semester hours in meat and dairy hygiene (12/68). *Version 2:* In the upper-division baccalaureate category, 3 semester hours in meat and dairy hygiene (12/68). *Version 3:* In the upper-division baccalaureate category, 6 semester hours in meat and dairy hygiene (12/68).

AF-0202-0001

GRAPHICS PREPARATION AND ILLUSTRATION TECHNIQUES

Course Number: 3AZR22351.

Location: 3750th Technical School, Sheppard AFB, TX.

Length: 6 weeks (180 hours).

Exhibit Dates: 10/68-12/73.

Objectives: To provide trainees with skills in illustration fundamentals, layout and media techniques, and reproduction methods and processes.

Instruction: Illustration fundamentals, including care and use of equipment and materials, lettering, figure drawing, cartooning, layout, still life drawing; illustration layout and media techniques, including sketched layouts, line and tone media, color media, visual communication techniques; reproduction methods and processes, including printing and reproduction processes, projection transparencies and slides, silkscreen, shop operation, and production controls.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in graphic material preparation (12/73).

AF-0306-0001

MAINTENANCE ANALYSIS TECHNICIAN

Course Number: *Version 1:* 3AAR39170. *Version 2:* 3AAR39170; 3AAR43470. *Version 3:* AAR43470.

Location: *Version 1:* School of Applied Aerospace Sciences, Chanute AFB, IL. *Version 2:* School of Applied Aerospace Sciences, Chanute AFB, IL; *Version 2:* 3345th Technical School, Chanute AFB, IL. *Version 3:* 3345th Technical School, Chanute AFB, IL.

Length: *Version 1:* 6 weeks (240 hours). *Version 2:* 6-7 weeks (180-210 hours). *Version 3:* 7-8 weeks (198-228 hours).

Exhibit Dates: *Version 1:* 8/73-12/73. *Version 2:* 4/68-7/73. *Version 3:* 1/64-3/68.

Objectives: To train enlisted personnel to be maintenance analysis technicians.

Instruction: *All Versions:* Lectures and laboratory in advanced analytical methods used in data collection assembly and analysis techniques, including communications security, maintenance management, supervision, data presentation, use of TV cameras and video tape recorders, and maintenance and man-hour data analysis. *Version 2:* Instruction includes business statistics and probability.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 2 semester hours in business report writing (6/74). *Version 2:* In the upper-division baccalaureate category, 3 semester hours in business statistics (6/74). *Version 3:* In the upper-division baccalaureate category, 3 semester hours in statistical report writing (6/74).

AF-0326-0001

INDUSTRIAL PROPERTY ADMINISTRATION (JT)

Course Number: 160.

Location: School of Systems and Logistics, Wright-Patterson AFB, OH.

Length: 3 weeks (75-114 hours).

Exhibit Dates: 12/69-6/74.

Objectives: To provide industrial property administrators with advanced training in industrial property administration.

Instruction: Lectures and practical exercises in industrial property administration. Course includes property law and procurement regulations, property administrator's responsiblities and duties, contract administration and inventory management, controls audit, statistical sampling, and selected property administration problems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in industrial management (6/74); in the upper-division baccalaureate category, 2 semester hours in industrial management (6/74).

AF-0326-0003

CONTRACT ADMINISTRATION

Course Number: 175.

Location: School of Systems and Logistics, Wright-Patterson AFB, OH.

Length: 3-4 weeks (90-120 hours).

Exhibit Dates: 12/69-6/74.

Objectives: To provide selected personnel with knowledge and skills essential to performance as contracting officers or contracting administrators.

Instruction: Lectures and practical exercises to include organization for contract administration; types of contracts; cost analysis, pricing, and profit; contract modification; production and progress evaluation; funding and financing; quality assurance; inspection and acceptance; warranties; negotiation of changes, disputes, and claims; and termination.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in contract administration (8/74); in the upper-division baccalaureate category, 2 semester hours in contract administration (8/74).

AF-0331-0001

REAL ESTATE—COST-MANAGEMENT ANALYSIS SPECIALIST

(Real Estate and Cost Management Analysis Specialist)

Course Number: 3ALR55430.

Location: 3750th Technical School, Sheppard AFB, TX.

Length: 3 weeks (90 hours).

Exhibit Dates: 8/68-2/73.

Objectives: To train enlisted personnel to be real-estate and cost-management analysis specialists.

Instruction: Lectures in cost accounting and management analysis procedures as applied to real-property management, including publications, automatic data processing, establishment and maintenance of automated cost and real-property files, labor accounting, work control, real-property accounting, and cost procedures.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in real estate and cost accounting (12/68).

AF-0332-0001

SUPPLY SERVICES SUPERVISOR

Course Number: AAR61170.

Location: 3320th Technical School, Amarillo AFB, TX.

Length: 6 weeks (180 hours).

Exhibit Dates: 1/66-1/68.

Objectives: To train enlisted personnel as supply services supervisors.

Instruction: Lectures and practical exercises in supply services supervision, including personnel relations and management practices, OJT training, clothing sales store management, stock control and pricing, requisitioning, receiving and shipping, merchandising, inventory, accounting and reporting, commissary management, laundry and dry-cleaning management, and organization and equipment required for various supply services. Includes redistribution and marketing management.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in supply services management (12/68).

AF-0406-0001

COMMISSARY OPERATIONS

(Commissary Noncommissioned Officer (NCO))

(Commissary NCOIC)

Course Number: AZR61170; AZR64270-1; AZR64270; OTS6444-1.

Location: 3320th Technical School, Amarillo AFB, TX.

Length: 3-4 weeks (90-120 hours).

Exhibit Dates: 2/60-12/68.

Objectives: To train officers and noncommissioned officers in commissary operations.

Instruction: Lectures and practical exercises in commissary operations, including property accounting and supply discipline, subsistence supply procedures, pricing, inventory procedures, sales, accounting and reporting, sales forecasting, and subsistence and sales report analysis.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in store management (12/68).

AF-0419-0002

AIR PASSENGER SPECIALIST
(Air Passenger and Operations Specialist)

Course Number: 3ABR60530; ABR60530; ABR60130; AB60130.

Location: Technical Training Center, Sheppard AFB, TX, Technical Training Center, Keesler AFB, MS.

Length: 5-8 weeks (90-240 hours).

Exhibit Dates: 11/54-12/73.

Objectives: To provide enlisted personnel with the skills and knowledge necessary to perform as apprentice air passenger specialists.

Instruction: Lectures and practical experience in the basic principles of air transportation, including effective communication, human relations, customer service, air terminal organization, air traffic records and reports, airlift and airspace requirements, aircraft weight and balance, and customs regulations.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in transportation (12/68).

AF-0419-0004

AIR CARGO SPECIALIST BY CORRESPONDENCE

Course Number: 60551.

Location: Extension Course Institute, Gunter AFS, AL.

Length: Maximum 52 weeks.

Exhibit Dates: 7/84-Present.

Objectives: This course provides a basic introduction of air cargo policies and procedures material handling equipment and occupational safety standards.

Instruction: Course instruction covers career opportunities, terminology, shipping and receiving documents, storage, hazardous materials, loading and unloading procedures, weight limitations and various equipment handling systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in basics in air cargo (10/85).

AF-0419-0005

SURFACE TRANSPORTATION OFFICER

Course Number: OBR6031; OB6031.

Location: Sheppard Technical Training Center, Sheppard AFB, TX.

Length: 10 weeks (300 hours).

Exhibit Dates: 6/55-12/62.

Objectives: To train officers for managerial positions in the surface transportation field.

Instruction: Lectures and practical exercises in principles of surface transportation management, including passenger and freight terminal operations, airlift operations and management, aircraft load planning, weight and balance problems, and aerial delivery procedures.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in transportation (11/62).

AF-0419-0007

AIR FREIGHT SPECIALIST

Course Number: ABR60531; AB60132.

Location: Technical Training school, Sheppard AFB, TX.

Length: 7-9 weeks (180-210 hours).

Exhibit Dates: 7/55-6/69.

Objectives: To provide enlisted personnel with basic knowledge and technical skill in air cargo transportation and handling.

Instruction: Lectures and practical demonstrations in basic air cargo transportation and handling, including air transportation activities fundamentals; military air command airlift systems; materials-handling vehicle operation; aircraft loading techniques; weight and balance computation; dangerous cargo processing and handling; and processing, documentation, and warehousing of general cargo and mail.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in transportation (12/68).

AF-0419-0009

FREIGHT TRAFFIC SPECIALIST

Course Number: AB60231.

Location: Technical Training Wing, Sheppard AFB, TX.

Length: 9 weeks (180-240 hours).

Exhibit Dates: 9/56-12/68.

Objectives: To provide enlisted personnel with basic training in freight operations management and commercial transportation.

Instruction: Lectures and practical demonstrations in the basic principles of transportation and freight traffic management, including classification of freight; tariffs; bill-of-lading procedures; various modes of transportation; duties of traffic managers; and special transportation problems, such as carrier liability, transit privileges, reconsignment, diversion, demurrage, and routing.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in traffic operation or transportation management (12/68).

AF-0419-0010

TRANSPORTATION OFFICER
(Air Transportation Officer)

Course Number: 3OBR6041; OBR6041; OBR6021; OB6021.

Location: Sheppard Technical Training Center, Sheppard AFB, TX.

Length: 10-16 weeks (270-480 hours).

Exhibit Dates: 8/55-12/73.

Objectives: To train officers in the duties and responsibilities of a transportation officer.

Instruction: Lectures and practical experience in the management of all facets of air and surface transportation, including operation of a commercial transportation office; airlift terminal organization and operation; movement and storage of household goods; personnel transportation; transportation budget; movement of materials by air, water, rail, and pipeline.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in transportation management (12/68).

AF-0419-0012

1. TRANSPORTATION STAFF OFFICER
2. TRANSPORTATION STAFF OFFICER
(Transportation Officer)

Course Number: *Version 1:* 3OAR6011. *Version 2:* OAR6011.

Location: Air Training Command, Sheppard AFB, TX.

Length: *Version 1:* 10-12 weeks (330-390 hours). *Version 2:* 12-24 weeks (360-720 hours).

Exhibit Dates: *Version 1:* 6/68-12/73. *Version 2:* 1/56-5/68.

Objectives: To train transportation officers in all aspects of advanced transportation management.

Instruction: Lectures and supervised student projects in procedures and techniques of advanced traffic management; military traffic management; air transportation management; vehicle operation and maintenance; transportation fund management; development of transportation systems, plans, and programs; data automation and systems analysis; commercial transportation services; packing, packaging, and marking materials; military and commercial air, motor, rail, water, and pipeline movement.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 8 semester hours in transportation management (1/74). *Version 2:* In the upper-division baccalaureate category, 6 semester hours in transportation management (12/68).

AF-0419-0019

MOTOR VEHICLE MAINTENANCE MANAGEMENT

Course Number: 3AZR47000.

Location: School of Applied Aerospace Sciences, Chanute AFB, IL.

Length: 4 weeks (148 hours).

Exhibit Dates: 7/73-12/73.

Objectives: To train enlisted personnel to supervise and manage motor vehicle maintenance activities.

Instruction: Lectures and practical exercises in motor vehicle maintenance management. Course includes administration and supervision techniques, maintenance scheduling, quality and material control, vehicle safety, and parts supply management.

Credit Recommendation: In the upper-division baccalaureate category, 4 semester hours in transportation management (7/74).

AF-0419-0021

AIR PASSENGER SPECIALIST BY CORRESPONDENCE

Course Number: 60550.

Location: Extension Course Institute, Gunter AFS, AL.

Length: Maximum 52 weeks.

Exhibit Dates: 1/83-Present.

Objectives: This course provides background information related to the duties and responsibilities of a military air passenger specialist. Procedures for processing passenger reservations are detailed. Supervision and employee/customer relations are also discussed.

Instruction: Course instruction covers management/supervisory functions, passenger safety, air transport regulations, documentation, aircraft indentification and automated data processing of passenger reservations.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (2/87).

AF-0419-0022

AIR PASSENGER SPECIALIST (RESERVE)

Course Number: 3ARR60550.

Location: School of Applied Aerospace Sciences, Sheppard AFB, TX.

Length: 2 weeks (72 hours).

Exhibit Dates: 8/73-12/73.

Objectives: To train airmen as air passenger specialists.

Instruction: Lectures and practical exercises in duties of air passenger specialists, including scheduling and processing passengers for flight, organization of air terminals, flight schedules, industrial funding and reimbursable traffic procedures, passenger eligibility, acceptance, processing, manifesting, and passenger baggage-handling equipment operation.

Credit Recommendation: In the upper-division baccalaureate category, 1 semester hour in transportation and air passenger traffic management (7/74).

AF-0419-0023

VEHICLE OPERATIONS SUPERVISOR BY CORRESPONDENCE

Course Number: 60370.

Location: Extension Course Institute, Gunter AFS, AL.

Length: Maximum 52 weeks.

Exhibit Dates: 6/78–Present.

Objectives: This course provides initial training for vehicle operations supervisors in planning and scheduling of vehicle activities, personnel management, inspection and evaluations and maintenance operations.

Instruction: Course instruction covers care and servicing of wheeled vehicles, personnel employment standards, fuel consumption, maintenance checks, on-the-job training needs, as well as supervisory management policies and practices.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in principles of supervision (10/85).

AF-0419-0025

PASSENGER AND HOUSEHOLD GOODS SPECIALIST

(Passenger Traffic Specialist)

Course Number: AB60230.

Location: 3750th Technical School, Sheppard AFB, TX.

Length: 4–9 weeks (120–180 hours).

Exhibit Dates: 9/56–12/68.

Objectives: To train airmen in passenger traffic management and the movement of household goods and baggage.

Instruction: Lectures and practical exercises in passenger traffic management and the movement of household goods and baggage, including transportation agencies, regulations of carriers, travel orders, modes and classes available for passenger transportation, passenger routing, preparation of transportation requests, transportation costs, and movement, storage, and documentation of household goods.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in transportation (12/68).

AF-0419-0026

APPRENTICE VEHICLE OPERATOR/DISPATCHER BY CORRESPONDENCE

Course Number: 60330.

Location: Extension Course Institute, Gunter AFS, AL.

Length: Maximum 52 weeks.

Exhibit Dates: 4/83–Present.

Objectives: To provide apprentice training in passanger/cargo vehicle selection and operation. General upkeep and maintenance training are also included.

Instruction: Course training covers vehicle operations, defensive driving, emergency repairs, passenger/cargo load factors and dispatching procedures.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (2/87).

AF-0419-0027

LOGISTICS PLANS SPECIALIST BY CORRESPONDENCE

Course Number: 66150.

Location: Extension Course Institute, Gunter Air Force Station, AL.

Length: Maximum 52 weeks.

Exhibit Dates: *Version 1:* 2/89–Present. *Version 2:* 11/84–1/89.

Learning Outcomes: At the conclusion of the course the student will be able to comprehend and utilize the principles of logistics in the retail and wholesale areas of distribution, comprehend and manage facilities, manpower, finances, and war reserve materials, prepare planning processes and support plans with manpower and equipment, make site and installation surveys and follow through with support efforts in mobility training and operations.

Instruction: Instruction covers logistic management at retail and wholesale levels of distribution, site surveying for warehousing and storage and the proper management procedures utilizing manpower, facilities, equipment, external and inernal support and finances needed to conduct the total job of logistics starting with the planning processes, the series of four volumes levels through planning, supporting, equipment, manpower, feasibility studies and surveys.

Credit Recommendation: *Version 1:* Pending evaluation. *Version 2:* In the lower-division baccalaureate/associate degree category, 3 semester hours in logistics management/transportation (marketing management major area (2/87).

AF-0419-0028

SERVICES SUPERVISOR BY CORRESPONDENCE

Course Number: 61170.

Location: Extension Course Institute, Gunter Air Force Station, AL.

Length: Maximum 52 weeks.

Exhibit Dates: 7/85–Present.

Learning Outcomes: Upon completion of the course, the student will be able to comprehend management activities of resources and assets of equipment, supplies, furnishings and services readiness mission, follow government procedures dealing in safety, operational publications, billeting and mortuary affairs.

Instruction: Includes the management of resources and assets, supervisory responsibilities for safety, operational publications, mortuary affairs, billeting financial management, front desk procedures and administration of equipment, supplies, furnishing and service readiness missions.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (2/87).

AF-0419-0029

APPRENTICE AIR CARGO SPECIALIST BY CORRESPONDENCE

Course Number: 60531.

Location: Extension Course Institute, Gunter Air Force Station, AL.

Length: Maximum 52 weeks.

Exhibit Dates: 3/84–Present.

Learning Outcomes: Upon completion of this course the student will have the skill required to function as a beginning air cargo specialist with knowledge of materials handling cargo documentation, cargo storage and cargo handling.

Instruction: Topics included in this course are military airlift services, aerial port work centers, cargo storage and handling, palletization, load planning procedures, aircraft loading and offloading and aircraft ground servicing.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (2/87).

AF-0419-0030

TRAFFIC MANAGEMENT SUPERVISOR BY CORRESPONDENCE

Course Number: 60271.

Location: Extension Course Institute, Gunter Air Force Station, AL.

Length: Maximum 52 weeks.

Exhibit Dates: 5/83–6/89.

Learning Outcomes: Upon completion of this course the student will have knowledge of the principles of transportation, traffic management transportation documents, movement of personal property, storage and quality control.

Instruction: Topics included in this course are an introduction to transportation, supervision, documentation, shipping and storage methods and quality control.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in principles of transportation/traffic management (2/87).

AF-0419-0031

PASSENGER AND HOUSEHOLD GOODS SPECIALIST BY CORRESPONDENCE

Course Number: 60250.

Location: Extension Course Institute, Gunter Air Force Station, AL.

Length: Maximum 52 weeks.

Exhibit Dates: 8/81–Present.

Learning Outcomes: Upon completion of this course the student will be able to function as a specialist in moving people and personal property transportation throughout the world.

Instruction: Topics covered include passenger transportation and supervision, safety, supervision and security, movement of personal property, and transportation documentation.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semster hours in introduction to transportation (2/87).

AF-0419-0032

FREIGHT TRAFFIC SPECIALIST BY CORRESPONDENCE

Course Number: 60251.

Location: Extension Course Institute, Gunter Air Force Station, AL.

Length: Maximum 52 weeks.

Exhibit Dates: 8/81–Present.

Learning Outcomes: At the completion of this course the student will have knowledge of the fundamentals of freight traffic management, traffic, safety, planning and packaging of shipments and freight routing, documentation, and expediting.

Instruction: Topics covered include transportation planning, packaging, modes of transportation, preparation of transportation documents, scheduling and routing, freight expediting and training.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in principles of transportation/traffic management (2/87).

AF-0504-0002

Ground Radio Operator by Correspondence

Course Number: 29353.

Location: Extension Course Institute, Gunter AFS, AL.

Length: Maximum 52 weeks.

Exhibit Dates: 8/84–8/88.

Objectives: This course is designed to teach basic operational concepts in air ground operations, system structure and radio transmission fundamentals.

Instruction: This course provides a basic understanding of the various agencies which manage communications-electronics matters throughout the world. It includes command, control and communication countermeasures, frequency usages and administration of various types of radio stations. Radio propogation theory, antenna systems, weather, aircraft emergencies and logkeeping are also included.

Credit Recommendation: In the vocational certificate category, 3 semester hours in radio/television communication concepts or 1 in electronics (10/85); in the lower-division baccalaureate/associate degree category, 2 semester hours in media operations (10/95).

AF-0504-0003

Telecommunications Operations Specialist by Correspondence

Course Number: 29150.

Location: Extension Course Institute, Gunter AFS, AL.

Length: Maximum 52 weeks.

Exhibit Dates: 9/84–Present.

Objectives: The purpose of this course is to provide information about the composition, organization, and utilization of communication systems.

Instruction: This course covers communication security, publications, telephone operations, budgeting, and processing of messages by teletypewriter, magnetic tape, keypunch and standard remote terminals. Instruction includes a basic understanding of the main components and peripheral devices of a computerized communications network.

Credit Recommendation: In the vocational certificate category, 2 semester hours in communications or, in the lower-division baccalaureate/associate degree category, 2 semester in information processing theory (10/85).

AF-0504-0004

Apprentice Telecommunications Operations Specialist by Correspondence

Course Number: 29130.

Location: Extension Course Institute, Gunter AFS, AL.

Length: Maximum 52 weeks.

Exhibit Dates: 4/81–1/85.

Objectives: This course provides training in communications fundamentals and telephone operations, message formats and procedures, and in communications equipments.

Instruction: The course is an introduction to basic communication skills and includes publications, security, telecommunication systems, telephone operations, message format and preparation. It describes basic communication equipment including communication circuits and automated systems operated in relay and terminal stations.

Credit Recommendation: In the vocational certificate category, 1 semester hour in communications (10/85).

AF-0505-0001

Television Production Specialist

Course Number: ATS 72151-1.

Location: 3415th Technical School, Lowry AFB, TX.

Length: 7 weeks (210 hours).

Exhibit Dates: 5/61–12/68.

Objectives: To train personnel for assignment in television services.

Instruction: Topics include the television system, video and audio switching, staging and principles of lighting, directing concepts, recording processes, practical television production, and the television script.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in television production (11/77).

AF-0701-0002

Dental Assistant by Correspondence

Course Number: 98150.

Location: Extension Course Institute, Gunter AFS, AL.

Length: Maximum of 52 weeks.

Exhibit Dates: 10/80–1/85.

Objectives: To prepare the person to serve as an assistant in a basic dental office, engaging in general dental tasks including the exposure and processing of x-rays, and the treatment of patients.

Instruction: The correspondence course includes general office assistant responsibilities in four-handed dentistry to include dental records, safety, equipment maintenance, and supervision; student will learn oral anatomy and physiology, dental therapeutics, dental pathology and microbiology, sterilization, principles of dental radiology, dental instruments and materials and instruments of oral surgery and prophylaxis.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to anatomy or 3 semester hours in instruments of oral prophylaxis. Course concludes with a proctored examination (9/84).

AF-0701-0003

Dental Assistant Specialist by Correspondence

Course Number: 98150.

Location: Extension Course Institute, Gunter AFS, AL.

Length: Maximum 52 weeks.

Exhibit Dates: 2/85–Present.

Learning Outcomes: Upon completion of the course, the student will be able to identify and explain the duties of the dental assistant specialist.

Instruction: Monitored home study including readings, written exercises, on-the-job training and proctored examinations. Topics include role and scope of the dental assistant specialist, interpersonal communication, basic sciences, chemistry, histology, dental materials, therapeutic agents, dental instruments, preventive dentistry, nutrition, prophylaxis, dental radiography, and chairside assisting.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in oral anatomy and physiology, 3 in instruments of oral prophylaxis (5/88).

AF-0701-0005

Dental Assistant (Phase I)

Course Number: 3ALR98330.

Location: Sheppard Technical Training Center, Sheppard AFB, TX.

Length: 18 weeks (540 hours).

Exhibit Dates: 7/72–12/73.

Objectives: To provide enlisted personnel with auxiliary training in the field of dental assisting.

Instruction: Lectures and practical experience in advanced dental assisting, including postoperative treatment; making impressions; placing and removing sutures; irrigating and medicating root canals; constructing and placing temporary crowns and temporary fixed partial dentures; and placing, carving, and finishing temporary and permanent restorations.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in dental assisting, 3 in dental hygiene, all on the basis of institutional evaluation (2/74).

AF-0701-0006

Dental Assistant (Phase II)

Course Number: 3AAR98370.

Location: Sheppard Technical Training Center, Sheppard AFB, TX.

Length: 8 weeks (320 hours).

Exhibit Dates: 11/72–12/73.

Objectives: To provide enlisted personnel with auxiliary training in the field of dental assisting.

Instruction: Lectures and practical experience in advanced dental assisting, including postoperative treatment; making impressions; placing and removing sutures; irrigating and medicating root canals; constructing and placing temporary crowns and temporary fixed partial dentures; and placing, carving, and finishing temporary and permanent restorations.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in dental assisting, 2 in dental hygiene, all on the basis of institutional evaluation (2/74).

AF-0701-0008

Preventive Dentistry Specialist

Course Number: 3ALR98131.

Location: Sheppard Technical Training Center, Sheppard AFB, TX.

Length: *Version 1:* 7 weeks (228 hours). *Version 2:* 8 weeks (240 hours).

Exhibit Dates: *Version 1:* 8/72–12/73. *Version 2:* 4/69–7/72.

Objectives: To train enlisted personnel as preventive dentistry specialists.

Instruction: *All Versions:* Lectures and practical exercises in preventive dentistry, including pathology, elementary chairside assisting, clinical procedures, oral hygiene, prosthetic procedures, periodontal anatomy, microscopy, and communicative skills. *Version 1:* Instruction includes radiology.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 1 semester hour in oral and written communication (1/74). *Version 2:* In the upper-division baccalaureate category, 2 semester hours in oral and written communication (1/74).

AF-0701-0010

Complete Denture Prosthetics

Course Number: 3AZR98270-4.

Location: School of Health Care Sciences, Sheppard AFB, TX.

Length: 4 weeks (160 hours).

Exhibit Dates: 8/73–12/73.

Objectives: To train dental technicians in complete denture prosthetics.

Instruction: Lectures and practical exercises in the fabrication of dentures. Course includes baseplates and occlusion rims, cast mounting, tooth arrangement, wax up and festoon, flasking and boilout, packing and curing, deflasking and remounting, selective grinding, and finishing and polishing.

Credit Recommendation: In the upper-division baccalaureate category, 5 semester hours in complete denture prosthetics (7/74).

AF-0701-0012

REMOVABLE PARTIAL DENTURE PROSTHETICS

Course Number: 3AZR98270-6.

Location: School of Health Care Sciences, Sheppard AFB, TX.

Length: 3 weeks (138 hours).

Exhibit Dates: 7/73–12/73.

Objectives: To provide enlisted personnel with the skills necessary to cast removable dentures.

Instruction: Lectures and practical experience in the basic principles of casting chrome-cobalt removable dentures, including design and duplication; setting up, polishing, finishing, and repairing completed dentures; and preventive maintenance.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in dental laboratory technology on the basis of institutional evaluation (2/74).

AF-0701-0016

DENTAL LABORATORY SPECIALIST

Course Number: 3ABR98230.

Location: School of Health Care Sciences, Sheppard AFB, TX.

Length: 27–29 weeks (878 hours).

Exhibit Dates: 9/69–12/73.

Objectives: To provide enlisted personnel with a basic knowledge of dental technology.

Instruction: Lectures and laboratory in the fundamentals of dental technology, including dental anatomy; complete denture construction; cast removable partial denture construction; construction of gold crowns and inlays, fixed partial dentures, and acrylic resin jacket crowns; and maintenance of dental laboratory equipment.

Credit Recommendation: In the upper-division baccalaureate category, 1 semester hour in dental laboratory technology on the basis of institutional evaluation (2/74).

AF-0701-0018

DENTAL LABORATORY SPECIALIST BY CORRESPONDENCE

Course Number: 98250.

Location: Extension Course Institute, Gunter AFS, AL.

Length: Maximum 52 weeks.

Exhibit Dates: 6/85–Present.

Learning Outcomes: Upon completion of the course the student will be able to identify and explain the correct procedures, techniques, devices, and appliances developed in the general dental laboratory.

Instruction: Monitored home study including readings, written exercises, on-the-job supervision and proctored examinations. Topics include tooth anatomy, mandibular movement, articulation, occlusion, crown and fixed dentures, waxing, spruing, investing, burnout, casting, finishing, polishing, denture construction, and removable partial dentures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in oral anatomy and physiology and 5 in dental laboratory technology (5/88).

AF-0702-0003

CLINICAL LABORATORY OFFICER

Course Number: OBR9151.

Location: Medical Service School, Gunter AFB, AL.

Length: 16 weeks (624–640 hours).

Exhibit Dates: 3/55–12/68.

Objectives: To provide the student with the skills necessary to supervise and administer a medical laboratory.

Instruction: Lectures and practical clinical exercises in electrocardiography, bacteriology, chemistry, hematology, histology, parasitology, immunohematology, urinalysis, preventive medicine, veterinary service, and laboratory administration.

Credit Recommendation: In the upper-division baccalaureate category, 6 semester hours in advanced clinical laboratory techniques (12/68).

AF-0702-0004

MEDICAL LABORATORY TECHNICIAN

Course Number: *Version 1:* 5AZY90470. *Version 2:* AA90470.

Location: *Version 1:* School of Aerospace Medicine, Brooks AFB, TX. *Version 2:* School of Aviation Medicine, Gunter AFB, AL.

Length: *Version 1:* 6 weeks (240 hours). *Version 2:* 25 weeks (972 hours).

Exhibit Dates: *Version 1:* 12/71–12/73. *Version 2:* 2/54–11/71.

Objectives: To provide the medical laboratory technician with current information in medical laboratory methods and equipment.

Instruction: Lectures and practical experience in quality control methods, bacteriology, medical mycology methods and techniques, parasitology, serology, hematology, clinical chemistry, virology, forensic toxicology, drug abuse detection, laboratory management, and military public health programs.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 10 semester hours in medical technology or 10 in biology or chemistry (2/74). *Version 2:* In the upper-division baccalaureate category, 10 semester hours in science for non-science majors or 5 in biology or chemistry for science majors (12/68).

AF-0702-0005

1. MEDICAL LABORATORY SPECIALIST, PHASE I
2. MEDICAL LABORATORY SPECIALIST, PHASE I
3. APPRENTICE MEDICAL LABORATORY SPECIALIST

Course Number: *Version 1:* ABR90430-2. *Version 2:* ABR90430. *Version 3:* AB90430.

Location: *Version 1:* Medical Service School, Sheppard AFB, TX; *Version 1:* Medical Service School, Gunter AFB, AL. *Version 2:* Medical Service School, Gunter AFB, AL. *Version 3:* School of Aviation Medicine, Gunter AFB, AL.

Length: *Version 1:* 14–17 weeks (510–596 hours). *Version 2:* 16 weeks (596 hours). *Version 3:* 19–21 weeks (741–819 hours).

Exhibit Dates: *Version 1:* 9/65–8/68. *Version 2:* 6/62–8/65. *Version 3:* 6/54–5/62.

Objectives: To train personnel as medical laboratory specialists.

Instruction: *All Versions:* Lectures and practical exercises in medical laboratory technology, including clinical chemistry, bacteriology, hematology, and disaster medicine. *Version 1:* Topics include microbiology. *Version 2:* Topics include biochemistry, urinalysis, microbiology, preventive medicine, serology, and histological techniques. *Version 3:* Topics include aviation medicine, medical material, serology, transfusions, histological techniques, parasitology, urinalysis, virology, nuclear medicine.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 30 semester hours applied to a major in medical technology OR 10 semester hours applied to a minor in chemistry or biology (12/68). NOTE: Granting of this credit is contingent upon completion of this course and either AF-0702-0006 or AF-0702-0007. No credit is recommended for completion of this course alone. *Version 2:* In the upper-division baccalaureate category, 30 semester hours applied to a major in medical technology OR 10 applied to a minor in chemistry or biology (12/68). NOTE: Granting of this credit is contingent upon completion of this course and either AF-0702-0006 or AF-0702-0007. No credit is recommended for completion of this course alone. *Version 3:* In the upper-division baccalaureate category, 5 semester hours in basic science for non-science majors, 2 in biology or chemistry for science majors (12/68).

AF-0702-0006

HISTOPATHOLOGY/CYTOTECHNOLOGY SPECIALIST

(Alternate Phase II of Medical Laboratory Specialist Course)

Course Number: 5ALO90431.

Location: Selected Air Force Hospitals, U.S.A.

Length: 36 weeks (1440 hours).

Exhibit Dates: 10/68–1/88.

Objectives: To train airmen as histopathology and cytotechnology specialists.

Instruction: Lectures and practical exercises in histopathology and cytotechnology including histopathology procedures; decalcifying procedures; dehydration procedures; normal staining procedures; using the microtome and cryostat and sharpening blades for the two instruments; coverslipping microscopic slides; assisting in morgue duties; cytotechnology procedures; facts about normal vaginal, cervical, and uterine cytology, prepuberty smears, postpartum smears, menopausal smears, and postmenopausal smears; preparing biological stains and staining prepared slides; normal, atypical, and abnormal vaginal, cervical and uterine cells; therapeutic changes; maturation index and fluid cytology; and screening of female genital tract slide-specimen materials to differentiate the normal from atypical and abnormal cell patterns.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 8 semester hours in chemistry or biology (7/74); in the upper-division baccalaureate category, 20 semester hours in histopathology/cytotechnology for medical technology majors, 8 in chemistry or biology (12/68). NOTE: Granting of this credit is contingent upon completion of Medical Laboratory Specialist, Phase I (AF-0702-0005) and this course.

AF-0702-0007

MEDICAL LABORATORY SPECIALIST, PHASE II

Course Number: 5AZO90450; AZR90450.

Location: Selected Air Force Hospitals, U.S.A.

Length: 36 weeks (1440 hours).

Exhibit Dates: 9/60–1/88.

Objectives: To train airmen as medical laboratory specialists.

Instruction: Lectures and practical exercises in medical laboratory technology, including introduction to the clinical laboratory, hematology, urinalysis, blood banking and immunohematology, serology, clinical chemistry, microbiology (bacteriology, mycology, and virology), parasitology, histopathology, special chemistry, laboratory administration, and night duty training.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in clinical laboratory techniques, 8 in hematology, 3 in clinical microscopy, 5 in blood bank and immunohematology (7/74); in the upper-division baccalaureate category, 30 semester hours in medical technology for medical technology majors or 10 in biology or chemistry for medical technology minors (12/68). NOTE: Credit is contingent upon completion of this course and Phase I (AF-0702-0005). No credit is recommended for either phase considered separately (12/68).

AF-0703-0002

Nurse-Midwifery Residency

Course Number: 5OZO9776.

Location: Malcolm Grow USAF Medical Center, Andrews AFB, MD.

Length: 30 weeks (1350 hours).

Exhibit Dates: 1/73-1/88.

Objectives: To train qualified registered nurses in the management of a patient's normal obstetrical and gynecological needs during the maternity cycle.

Instruction: Lectures and clinical residency experience in the practice of nurse-midwifery including antepartum care; physical examinations; sociological, cultural, and marital attitudes and influences; human growth and development; labor, delivery and puerperium; community aspects of nurse-midwifery; supervised clinical practice in labor and delivery methods; postpartum care; and management of minor gynecological problems.

Credit Recommendation: In the upper-division baccalaureate category, 15 semester hours in clinical practicum on the basis of institutional evaluation (6/75).

AF-0703-0003

Nursing Service Administration

Course Number: OZR9711.

Location: Medical Service School, Gunter AFB, AL.

Length: 24 weeks (920-946 hours).

Exhibit Dates: 12/62-12/68.

Objectives: To prepare staff nurses to assume administrative duties.

Instruction: Lectures and discussions in personnel management, human relations, communication skills, principles and methods of in-service education, legal responsibilities, and financial management.

Credit Recommendation: In the upper-division baccalaureate category, 4 semester hours in nursing administration, 2 in personnel management (2/74).

AF-0703-0005

Operating Room Supervisor

Course Number: 3OZR9736.

Location: School of Health Care Sciences, Sheppard AFB, TX.

Length: 22 weeks (837 hours).

Exhibit Dates: 7/72-12/73.

Objectives: To prepare registered nurses to supervise surgical services.

Instruction: Lectures and practical exercises in interpersonal relationships; guidance and counseling; job descriptions and performance standards; in-service education; safety; infection control; nursing processes and care evaluation; management principles and organization; budget; disaster planning; collective bargaining; and nursing service evaluation.

Credit Recommendation: In the upper-division baccalaureate category, 4 semester hours in nursing management (2/74).

AF-0703-0006

Nursing Service Management

Course Number: 3OZR9711-3.

Location: School of Health Care Sciences, Sheppard AFB, TX.

Length: 17 weeks (632 hours).

Exhibit Dates: 7/72-12/73.

Objectives: To train registered nurses for managerial and supervisory duties in military facilities.

Instruction: Lectures and practical exercises in research; problem-solving techniques; work simplification; data processing; human relations; in-service education; evaluation of nursing care; budget control; disaster planning; and collective bargaining and standards of accreditation.

Credit Recommendation: In the upper-division baccalaureate category, 4 semester hours in nursing management (2/74).

AF-0703-0007

Medical Service Fundamentals

Course Number: 3AQR90010.

Location: 3750th Technical School, Sheppard AFB, TX.

Length: 4 weeks (128 hours).

Exhibit Dates: 5/70-12/73.

Objectives: To train auxiliary medical support personnel in basic medical fundamentals as a prerequisite for advanced specialties.

Instruction: Lectures and practical exercises in basic medical fundamentals, including basic hospital procedures, field casualty care, and anatomy and physiology. Topics include medical terminology, medical ethics, safety practices, facilities, emergency treatment for shock and hemorrhage, vital signs, resuscitation, emergency treatment for wounds, field dressings, fractures and dislocations, toxic agents, head and back injuries, chest and abdominal injuries, thermal injuries and heat disorders, disaster medicine, supplies and equipment, and resuscitation.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in anatomy and physiology, 3 in basic nurse skills, 3 in medical-surgical procedures (7/74).

AF-0703-0008

Flight Nurse

Course Number: 5OLY9761; OLY9761; OZY9700.

Location: School of Aerospace Medicine, Brooks AFB, TX; School of Aviation Medicine, Gunter AFB, AL.

Length: 5-6 weeks (170-234 hours).

Exhibit Dates: 4/75-6/83.

Objectives: To train personnel in the duties and responsibilities necessary to perform patient care during aeromedical evacuation.

Instruction: Lectures and practical exercises in physiological education, aerospace nursing, survival, preventive medicine, and flying safety.

Credit Recommendation: In the upper-division baccalaureate category, credit in general and advanced nursing on the basis of institutional evaluation or 5 semester hours as electives in the biological sciences (2/78).

AF-0703-0009

Pediatrics Nurse Practitioner

Course Number: OAY9755.

Location: Wilford Hall Medical Center, Lackland AFB, TX.

Length: 21 weeks (840 hours).

Exhibit Dates: 7/71-12/73.

Objectives: To prepare nurse corps officers to assume an expanded role in providing comprehensive health services to children.

Instruction: Lectures and practical exercises in pediatric physical examinations, newborn care, growth and development, nutrition, immunizations, prematurity, infectious disease, behavioral problems, mental retardation, neurology, allergy, hematology, poisoning, dermatology, and pediatric gynecology.

Credit Recommendation: In the upper-division baccalaureate category, 8 semester hours in clinical practicum (6/75).

AF-0703-0011

Medical Service Technician by Correspondence

Course Number: 90270.

Location: Extension Course Institute, Gunter AFS, AL.

Length: Maximum of 52 weeks.

Exhibit Dates: 11/77-Present.

Objectives: To prepare personnel to assist in patient treatment and to learn supervisory management skills at the unit level.

Instruction: This correspondence course includes the teaching of administrative skills; administration of medications; management functions and techniques of patient care; field medical care and sanitation, field preparation and disaster preparedness; oxygen therapy and resusitation, therapy techniques; supervision of medical service activities; and preoperative and postoperative nursing. This course includes procedures found inlicensed practical nursing programs.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in nursing care. Course concludes with a proctored examination (7/84).

AF-0703-0012

Medical Service Specialist by Correspondence

Course Number: 90250.

Location: Extension Course Institute, Gunter AFS, AL.

Length: Maximum of 52 weeks.

Exhibit Dates: 4/77-Present.

Objectives: To prepare personnel to assist in nursing care and treatment of patients.

Instruction: This correspondence course teaches principles of general nursing care techniques; the student learns to assist in medical examinations and treatments; perform procedures using therapeutic equipment; peform aeromedical evacuation duties and independent duties; and learns body systems and their disorders, signs and symptoms; student also covers principles of diagnostic and therapeutic procedures; adult, geriatric,amd pediatric medicine are introduced as well as mental illness, burned patient trauma, critical care, and chronic diseases; and pathophysiology of common disorders. The course is equivalent to the basic courses commonly found in LPN programs.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in basic principles of nursing assisting. Course concludes with a proctored examination (7/84).

AF-0703-0013

NURSE ANESTHETIST

Course Number: 50AY9746.

Location: Wilford Hall USAF Medical Center, Lackland AF, TX.

Length: 104 weeks (5069-5246 hours).

Exhibit Dates: 4/84–Present.

Objectives: To instruct qualified USAF nurse corps officers in both the art and science of anesthesia so that they may become certified registed nurse anesthetists, CRNA's.

Instruction: Areas of instruction include: Hospital orientation; professional aspects of anesthesiology; anatomy and physilogy and pathophysiology; chemistry and physics and biochemistry; pharmacology; principles of anesthesia practice; basic life support, advanced cardiac life support, EKG, research paper, educational review; clinical conference, journal club, seminars; clinical experience.

Credit Recommendation: In the upper-division baccalaureate category, 6 semester hours in anatomy/physiology I, 6 in anatomy/physiology II, 3 in pathophysiology, 4 in chemistry/physics/biochemistry; of digestive, neval, and respiratory systems. in the graduate degree category, 8 in pharmacology, 8 in principles of anesthesia practice, 8 semester credit hours in clinical conference/journal club, 6 in clinical experience (9/85).

AF-0703-0014

NURSING SERVICE MANAGEMENT BY CORRESPONDENCE

Course Number: 9711.

Location: Extension Course Institute, Gunter AFS, AL.

Length: Maximum 52 weeks.

Exhibit Dates: 9/76–Present.

Learning Outcomes: Upon completion of the course the student will understand theory and principles of management of a nursing unit, personnel evaluation, and assignment and supervision of staff for patient care.

Instruction: Monitored home study including reading, written exercises, on-the-job supervision and proctored examination. Topics include administration, management, personnel evaluation and management of patient centered nursing care. The nursing process includes patient assessment for patient care plans and staf assignment.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in nursing management (5/88).

AF-0703-0015

SURGICAL SERVICE SPECIALIST BY CORRESPONDENCE

Course Number: 90252.

Location: Extension Course Institute, Gunter AFS, AL.

Length: Maximum 52 weeks.

Exhibit Dates: 4/83–Present.

Learning Outcomes: Upon completion of the course the student will be able to assist in operating room aeseptic techniques, manage operating room supplies and equipment, and deliver pre- and post-operative patient care.

Instruction: Monitored home study including reading, written exercises, on-the-job supervision and proctored examinations. Topics include, introduction to the study of aeseptic techniques, operating room procedures, operating room equipment and supplies, and pre- and post-operative patient care. Also includes basic medical terminology and anatomy and physiology in relation to surgical procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in operating room techniques and procedures (5/88).

AF-0704-0001

PHYSICAL THERAPY TECHNICIAN

Course Number: 3AZR91370.

Location: School of Health Care Sciences, Sheppard AFB, TX.

Length: 6 weeks (180 hours).

Exhibit Dates: 6/70–12/73.

Objectives: To provide physical therapy assistants with advanced training in physical therapy techniques and clinic management.

Instruction: Lectures include administrative procedures, personnel supervision, advanced anatomy, patient treatment and prognosis, and clinical procedures and therapeutic exercises.

Credit Recommendation: In the upper-division baccalaureate category, 4 semester hours in anatomy and physiology, 6 in physical therapy, 3 in management (2/74).

AF-0704-0002

PHYSICAL THERAPY SPECIALIST

Course Number: 3ABR91330.

Location: Sheppard Technical Training Center, Sheppard AFB, TX.

Length: *Version 1:* 15 weeks (428 hours). *Version 2:* 10 weeks (300 hours).

Exhibit Dates: *Version 1:* 9/69–12/73. *Version 2:* 6/67–8/69.

Objectives: To train enlisted personnel to assist physical therapists in clinics.

Instruction: Lectures and practical exercises in neurological system and musculo-skeletal system anatomy, rehabilitation procedures, exercises and other therapeutic procedures, and medical and surgical conditions necessary in treating musculo-skeletal and neurological disorders.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 3 semester hours in first aid or disaster training, 30 in physical therapy assisting, and credit in nursing on the basis of institutional evaluation (2/74). *Version 2:* In the upper-division baccalaureate category, 2 semester hours in anatomy or physiology, and credit in physical therapy on the basis of institutional evaluation (12/68).

AF-0704-0004

PHYSICAL THERAPY SPECIALIST BY CORRESPONDENCE

Course Number: [illegible]1350.

Location: Extension Course Institute, Gunter AFS, AL.

Length: Maximum 52 weeks.

Exhibit Dates: 5/87–Present.

Learning Outcomes: Upon completion of the course the student will be able to list, describe and explain the general duties of the physical therapy student.

Instruction: Monitored home study including readings, written exercises, on-the-job supervision and proctored examinations. Topics include osteology and myology of all joints; joint pathology; indications, contraindications, hazards, and goals of all major therapeutic modalities.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in neuromusculoskeletal pathology, 3 in therapeutic exercise, 7 in treatment modalities, and 2 in introduction to physical therapy (5/88).

AF-0705-0001

RADIOLOGY TECHNICIAN

Course Number: AAR90370-1; AAR90370; AA90370.

Location: Medical Service School, Sheppard AFB, TX; School of Aviation Medicine, Gunter AFB, AL.

Length: 9-16 weeks (270-624 hours).

Exhibit Dates: 10/56-12/73.

Objectives: To provide radiology personnel with advanced training in radiologic technology.

Instruction: Lectures and practical exercises in radiographic fundamentals, anatomy and physiology, radiographic techniques, special radiographic positions, special equipment and procedures, radiation protections, and administration.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in elementary anatomy and physiology (12/68).

AF-0705-0002

1. RADIOLOGY SPECIALIST
2. RADIOLOGY SPECIALIST

Course Number: *Version 1:* 3ABR90330. *Version 2:* ABR90330-1; ABR90330.

Location: *Version 1:* 3750th Technical School, Sheppard AFB, TX. *Version 2:* Medical Service School, Sheppard AFB, TX.

Length: *Version 1:* 18 weeks (545 hours). *Version 2:* 12–14 weeks (420–439 hours).

Exhibit Dates: *Version 1:* 9/71–12/73. *Version 2:* 1/63-8/71.

Objectives: To train airmen as radiology specialists.

Instruction: *All Versions:* Lectures and practical exercises in radiology, including radiographic fundamentals and procedures. *Version 1:* Topics include medical service fundamentals, osteology and radiographic considerations of the upper extremity, control of film quality, osteology and radiographic consideration of the lower extremity and pelvic girdle, osteology and radiographic considerations of the thorax, osteology and radiographic considerations of the skull and facial bones, and anatomy and physiology. *Version 2:* Topics include disaster medicine.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 2 semester hours in physics, 2 in anatomy and physiology (7/74). *Version 2:* In the upper-division baccalaureate category, 2 semester hours in anatomy and physiology (12/68).

AF-0705-0003

RADIOLOGY TECHNICIAN BY CORRESPONDENCE

Course Number: 90370.

Location: Extension Course Institute, Gunter AFS, AL.

Length: Maximum 52 weeks.

Exhibit Dates: 4/84–Present.

Learning Outcomes: Upon completion of the course the student will understand the basic functions of a radiology technician which include management of the radiology department, diagnostic radiology, plus imaging and contrast studies procedures.

Instruction: Monitored home study including reading, written exercises, on-the-job supervision and proctored examination. Topics include management of the radiology department, anatomy and physiology related to positioning, physics, radiation safety and special techniques and procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in radiation physics and 7 in radiography (5/88).

AF-0706-0001

OPHTHALMOLOGY SURGICAL TECHNICIAN

Course Number: AZY91270.

Location: School of Aerospace Medicine, Brooks AFB, TX.

Length: 5 weeks (200 hours).

Exhibit Dates: 7/69–1/89.

Objectives: To prepare ophthalmology assistants to aid, under supervision, in the diagnosis, care, and treatment of ophthalmology patients.

Instruction: Practical application of routine visual testing; fitting and adjusting glasses; administration of eye drops and ointments; emergency care and dressings; preoperative preparation; assisting the ophthalmologist in surgical procedures; and care and maintenance of equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in photography, 2 in anatomy and physiology of the eye, 2 in ophthalmic dispensing, 1 in optics, and 2 in clinical assisting (2/78).

AF-0706-0002

OPTOMETRY SPECIALIST

Course Number: 3ABR91235.

Location: Sheppard Technical Training Center, Sheppard AFB, TX.

Length: 14 weeks (425 hours).

Exhibit Dates: 6/71–12/73.

Objectives: To train airmen to assist in an ophthalmological clinic or physician's office.

Instruction: Lectures and practical exercises in basic ocular anatomy and physiology; basic optics; use and maintenance of optometric testing equipment; visual therapy; medical ethics; asepsis; ocular first aid and emergency treatment.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in physiology and hygiene (5/73).

AF-0706-0003

OPTOMETRY SPECIALIST BY CORRESPONDENCE

Course Number: 91255.

Location: Extension Course Institute, Gunter AFS, AL.

Length: Maximum 52 weeks.

Exhibit Dates: 2/83–Present.

Learning Outcomes: Upon completion of the course the student will understand and be able to describe the procedures of the general optometric specialist.

Instruction: Monitored home study, including readings, written exercises, on-the-job supervision and proctored examinations. Topics include clinic safety, scheduling, maintenance of optometric equipment, record keeping, ocular anatomy and physiology, screening tests, lenses, prescription verification, dispensing, vision training, tonometry, and the instillation of opthalmic drugs.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 5 semester hours in optometric technology (5/88).

AF-0707-0001

MILITARY ASPECTS OF SANITARY AND INDUSTRIAL HYGIENE ENGINEERING

Course Number: OBR9121.

Location: Medical Service School, Gunter AFB, AL.

Length: 8 weeks (320 hours).

Exhibit Dates: 8/62–12/68.

Objectives: To provide the essential knowledge and skills necessary to perform sanitary and industrial hygiene duties.

Instruction: Aerospace medicine, including aviation medicine training; entomology; principles of medicine and surgery; veterinary training; and radiological health, including disaster medicine.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in community sanitation (12/68).

AF-0707-0003

BIO-ENVIRONMENTAL ENGINEERING

Course Number: OBY9121.

Location: School of Aerospace Sciences, Brooks AFB, TX.

Length: *Version 1:* 16 weeks (608 hours). *Version 2:* 16 weeks (605–608 hours).

Exhibit Dates: *Version 1:* 3/75–3/88. *Version 2:* 9/68–2/75.

Objectives: To prepare engineers to practice bioenvironmental engineering in support of the Air Force aerospace medicine program.

Instruction: *All Versions:* Lectures on acoustics, physiology, biometrics, sanitary engineering and hygiene, general and environmental chemistry, and human engineering, and the application of biological and engineering principles to aviation environments. *Version 1:* Includes ecology.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 4 semester hours in physical sciences, 4 in chemistry, 4 in biological sciences, 3 in occupational health, and 3 in administration (2/78). *Version 2:* In the lower-division baccalaureate/associate degree category, 4 semester hours in physical science, 4 in chemistry, 4 in biological science, 4 in aviation science, 2 in industrial psychology, and additional credit in aviation science on the basis of institutional evaluation (2/74); in the upper-division baccalaureate category, 4 semester hours in physical science, 4 in chemistry, 4 in biological science, 4 in aviation science, 2 in industrial psychology, and additional credit in aviation science on the basis of institutional evaluation (2/74).

AF-0707-0004

PREVENTIVE MEDICINE TECHNICIAN

Course Number: AAY90770; AA90770.

Location: School of Aerospace Medicine, Brooks AFB, TX; Medical Service School, Gunter AFB, AL.

Length: 11–12 weeks (407–495 hours).

Exhibit Dates: 2/55–2/78.

Objectives: To train enlisted personnel as preventive medicine technicians.

Instruction: Lectures and practical exercises in preventive medicine, including management of the aerospace medicine program, military public health, water and waste disposal, medical entomology, occupational health, atmospheric sampling, and radiological health.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in sanitary bacteriology, 2 in elementary preventive medicine (7/74); in the upper-division baccalaureate category, 3 semester hours in sanitary bacteriology, 2 in elementary preventive medicine (12/68).

AF-0707-0005

1. PREVENTIVE MEDICINE SPECIALIST
2. PREVENTIVE MEDICINE SPECIALIST
3. APPRENTICE PREVENTIVE MEDICINE SPECIALIST
4. APPRENTICE PREVENTIVE MEDICINE SPECIALIST

Course Number: *Version 1:* ABY90730. *Version 2:* ABY90730; ABR90730. *Version 3:* AB90730. *Version 4:* AB90730.

Location: *Version 1:* School of Aerospace Medicine, Brooks AFB, TX. *Version 2:* School of Aerospace Medicine, Brooks AFB, TX. *Version 3:* Medical Service School, Gunter AFB, AL. *Version 4:* School of Aviation Medicine, Gunter AFB, AL.

Length: *Version 1:* 10 weeks (358 hours). *Version 2:* 10 weeks (371–376 hours). *Version 3:* 14 weeks (546 hours). *Version 4:* 16 weeks (624 hours).

Exhibit Dates: *Version 1:* 11/68–8/73. *Version 2:* 5/62–10/68. *Version 3:* 11/57–4/62. *Version 4:* 2/55–10/57.

Objectives: To train personnel as preventive medicine specialists.

Instruction: *All Versions:* Lectures and practical exercises in the duties of preventive medicine specialists, including bio-environmental engineering, disaster medicine, medical entomology, occupational health programs, radiological health programs, and sanitary engineering. *Version 1:* Topics include acoustics, basic orientation, disease epidemiology, educational methods, environmental surveys, fundamentals of science, illumination, medical aspects of missile operations, and ventilation. *Version 2:* Topics include preventive medicine, aircraft accident investigation, medical administration, field training, and military public health. *Version 3:* Topics include aeromedical evacuation, aeronautical sciences, aviation medicine, dental administration, educational advisory staff, medical materiel, typing, unit and personnel administration, medical laboratory, medical passive defense, nursing, preventive medicine, biostatistics, basic mathematics and chemistry, industrial hygiene, water supply and swimming pool sanitation, food service, military epidemiology, and veterinary service. *Version 4:* Topics include aeromedical evacuation, anatomy and physiology, aviation medicine, clinical dentistry, medicine and surgery, nursing preventive medicine, medical administration, unit and personnel administration, typing, medical materiel, medical laboratory, preventive medicine, military epidemiology, basic mathematics and chemistry, industrial hygiene, water supply and swimming pool sanitation, biostatistics, food service facilities, radiobiology, leadership and training management, leadership through group control, and veterinary service.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 4 semester hours in public health, 3 in OSHA/radiological control, and 3 in sanitary engineering (7/74); in the upper-division baccalaureate category, 4 semester hours in public health, 3 in OSHA/radiological control, and 3 in sanitary engineering (7/74). *Version 2:* In the lower-division baccalaureate/associate degree category, 2 semester hours in preventive medicine and 2 in sanitary bacteriology (7/74); in the upper-division baccalaureate category, 2 semester hours in elementary preventive medicine and 2 in sanitary bacteriology (12/68). *Version 3:* In the upper-division baccalaureate category, 2 semester hours in elementary preventive medicine and 2 in sanitary bacteriology (12/68). *Version 4:* In the upper-division baccalaureate category, 2 semester hours in elementary preventive medicine and 2 in sanitary bacteriology (12/68).

AF-0707-0006

INDUSTRIAL HYGIENE MEASUREMENTS

Course Number: 5AZY907X0-2.

Location: School of Aerospace Medicine, Brooks AFB, TX.

Length: 2 weeks (61-72 hours).

Exhibit Dates: 7/76-1/89.

Objectives: To provide training of officers in the evaluation and control of industrial hazards.

Instruction: Lectures and practical exercises in occupational health, atmospheric sampling, toxicology, ventilation, and illumination.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in industrial hygiene (2/78).

AF-0707-0007

ENVIRONMENTAL PROTECTION

Course Number: 5AZY907X0-1.

Location: School of Aerospace Medicine, Brooks AFB, TX.

Length: 2 weeks (60 hours).

Exhibit Dates: 8/76-12/79.

Objectives: To train personnel in environmental monitoring techniques.

Instruction: Lectures and practical exercises in federal, state, and local regulations, and sampling techniques in relation to solid waste disposal and air, water, and noise pollution.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in environmental monitoring techniques (2/78).

AF-0707-0008

ENVIRONMENTAL HEALTH SPECIALIST

Course Number: 5ABY90730.

Location: School of Aerospace Medicine, Brooks AFB, TX.

Length: 11 weeks (339 hours).

Exhibit Dates: 9/73-1/89.

Objectives: To train personnel to develop knowledge for public health and occupational health surveys.

Instruction: Lectures and practical exercises in fundamentals of science, acoustics, epidemiology, environmental engineering, medical zoology, and pesticide technology.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in medical zoology, 2 in sanitation, 2 in acoustics, 5 in health, 2 in industrial hygiene, and 2 in physical sciences (2/78).

AF-0708-0002

MENTAL HEALTH UNIT SPECIALIST BY CORRESPONDENCE

Course Number: 91451.

Location: Extension Course Institute, Gunter AFS, AL.

Length: Maximum 52 weeks.

Exhibit Dates: 11/84-Present.

Learning Outcomes: Upon completion of the course the student will understand the basic mental health concepts necessary to provide diagnostic and therapeutic nursing for psychiatric patient care.

Instruction: Monitored home study including reading, written exercises, on-the-job supervision and proctored examination. Topics include basic concepts of mental health, diagnostic nomenclature of mental disorders, basic vital signs, diagnostic and therapeutic physical nursing procedures, patient care, and communication skills.

Credit Recommendation: In the vocational certificate category, 3 semester hours in nursing assistant (5/88); In the lower-division baccalaureate/associate degree category, 3 semester hours in mental health associate (5/88).

AF-0709-0001

DIET THERAPY SPECIALIST

Course Number: 3ABR62231-1; 3ABR62231.

Location: Technical Training Center, Sheppard AFB, TX.

Length: 11-13 weeks (338-428 hours).

Exhibit Dates: 9/69-12/73.

Objectives: To train enlisted personnel in food service administration.

Instruction: Lectures and practical exercises in medical food service administration; basic and applied clinical nutrition; diet modifications and revisions, introduction to cooking standard recipes, food production, and services; and food ordering and purchasing.

Credit Recommendation: In the upper-division baccalaureate category, 9 semester hours in food service, hotel-motel management, or diet therapy, 3 in nutrition nursing (2/74).

AF-0709-0003

PHARMACY TECHNICIAN

Course Number: *Version 1:* 3AAR90570-1. *Version 2:* AAR90570.

Location: *Version 1:* School of Health Care Sciences, Sheppard AFB, TX. *Version 2:* Medical Service School, Gunter AFB, AL.

Length: *Version 1:* 10 weeks (300 hours). *Version 2:* 16 weeks (584-594 hours).

Exhibit Dates: *Version 1:* 2/72-12/73. *Version 2:* 7/63-1/72.

Objectives: To train airmen in the compounding, dispensing, and manufacturing of pharmaceutical preparations.

Instruction: Lectures and practical exercises in pharmacy management and administration, pharmaceutical calculations and chemistry, pharmacological principles, and pharmaceutical dispensing.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 3 semester hours in pharmacology nursing, 10 in pharmacy, additional credit on the basis of institutional evaluation (12/68). *Version 2:* In the upper-division baccalaureate category, 3 semester hours in pharmaceutical chemistry, 2 in pharmacy laboratory, 1 in pharmaceutical mathematics (12/68).

AF-0709-0009

1. MEDICAL MATERIEL SPECIALIST
2. MEDICAL MATERIEL SPECIALIST (Apprentice Medical Materiel Specialist)

Course Number: *Version 1:* 3ABR91530. *Version 2:* ABR91530-1; ABR90631; AB90631.

Location: *Version 1:* Technical Training Center, Sheppard AFB, TX. *Version 2:* Medical Service School, Sheppard AFB, TX; *Version 2:* School of Aviation Medicine, Gunter AFB, AL.

Length: *Version 1:* 10 weeks (305-308 hours). *Version 2:* 6-10 weeks (180-390 hours).

Exhibit Dates: *Version 1:* 2/71-12/73. *Version 2:* 5/54-1/71.

Objectives: To train airmen in the procedures and methodology of accounting, requisitioning, document control, stock control, equipment management, and related procedures of a medical supply account.

Instruction: *All Versions:* Organization of medical materiel; procurement procedures; inventory control; equipment management and maintenance. *Version 1:* This version includes data processing. *Version 2:* Data processing and maintenance of office machines are included.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 10 semester hours in hospital administration, 2 in first aid (2/74). *Version 2:* In the upper-division baccalaureate category, 3 semester hours in supply management (12/68).

AF-0709-0010

OPERATING ROOM SPECIALIST

Course Number: *Version 1:* ABR90232-1; ABR90232. *Version 2:* ABR90232.

Location: *Version 1:* Medical Service School, Sheppard AFB, TX; *Version 1:* Medical Service School, Gunter AFB, AL. *Version 2:* 3275th Technical School, Lackland AFB, TX.

Length: *Version 1:* 10-11 weeks (300-415 hours). *Version 2:* 12 weeks (436 hours).

Exhibit Dates: *Version 1:* 6/62-3/70. *Version 2:* 1/59-5/62.

Objectives: To train airmen to function in surgery as operating room technicians.

Instruction: Lectures and practical exercises in aseptic techniques; cleaning and preparation of packs and supplies; sterilization, care, and use of instruments; care and use of equipment; operative procedures; and care of the patient.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 3 semester hours in anatomy, physiology, and hygiene (12/68). *Version 2:* In the upper-division baccalaureate category, 2 semester hours in physiology and hygiene (12/68).

AF-0709-0011

AEROMEDICAL EVACUATION TECHNICIAN

Course Number: 5AZY902X0.

Location: School of Aerospace Medicine, Brooks AFB, TX.

Length: 5-6 weeks (171-196 hours).

Exhibit Dates: 7/70-1/89.

Objectives: To provide airmen with skills and knowledge necessary to function as members of an aerospace evacuation team.

Instruction: Lectures and practical exercises covering physiological education, aerospace nursing, preventive medicine, flying safety, and administration and training in survival.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in health science and 1 in administration/management (2/78).

AF-0709-0012

Aeromedical Technician

Course Number: AA90170.

Location: School of Aerospace Medicine, Brooks AFB, TX. School of Aviation Medicine, Gunter AFB, AL.

Length: 11 weeks (429 hours).

Exhibit Dates: 5/55–4/68.

Objectives: To train aeromedical specialists or aeromedical evacuation specialists to assume supervisory duties in a flight surgeon's office or to perform air evacuation duties.

Instruction: Lectures and practical exercises in aeronautical sciences, aviation medicine, clinical dentistry, medicine and surgery, preventive medicine, nursing, and medical administration.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in first aid and hygiene (12/68).

AF-0709-0014

1. Pharmacy Specialist
2. Pharmacy Specialist
3. Pharmacy Specialist
4. Pharmacy Specialist
   (Apprentice Pharmacy Specialist)

Course Number: *Version 1:* 3ABR90530. *Version 2:* 3ABR90530. *Version 3:* ABR90530-1. *Version 4:* ABR90530; AB90530.

Location: *Version 1:* School of Health Care Sciences, Sheppard AFB, TX. *Version 2:* Medical Service School, Sheppard AFB, TX. *Version 3:* Medical Service School, Sheppard AFB, TX. *Version 4:* School of Aviation Medicine, Gunter AFB, AL.

Length: *Version 1:* 12 weeks (360 hours). *Version 2:* 15 weeks (488 hours). *Version 3:* 12 weeks (360 hours). *Version 4:* 14–18 weeks (571–702 hours).

Exhibit Dates: *Version 1:* 7/73–12/73. *Version 2:* 1/71–6/73. *Version 3:* 7/67–12/70. *Version 4:* 8/55–6/67.

Objectives: To provide students with specialized training in the dispensing, compounding, and proper use of drugs.

Instruction: Lectures on anatomy and physiology; basic pharmacology mathematics; inorganic and organic chemistry; effects of drugs on human systems; practical exercises in the compounding and dispensing of drugs; and pharmacy maintenance and operation.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 15 semester hours in pharmacy, 3 in physiology and anatomy, 3 in nursing pharmacology, and additional credit in pharmacy on the basis of institutional evaluation (2/74). *Version 2:* In the upper-division baccalaureate category, 2 semester hours in physiology and hygiene, 2 in pharmaceutical mathematics, 2 in pharmaceutical chemistry, 3 in pharmacology (12/68). *Version 3:* In the upper-division baccalaureate category, 2 semester hours in pharmaceutical mathematics, 2 in pharmaceutical chemistry, 1 in pharmacology (12/68). *Version 4:* In the upper-division baccalaureate category, 2 semester hours in pharmaceutical mathematics, 2 in pharmaceutical chemistry, 1 in pharmacology (12/68).

AF-0709-0015

1. Medical Service Specialist
2. Medical Service Specialist
3. Apprentice Medical Service Specialist

Course Number: *Version 1:* 3ABR90230. *Version 2:* ABR90230. *Version 3:* AB90230.

Location: *Version 1:* School of Health Care Sciences, Sheppard AFB, TX. *Version 2:* Medical Service School, Gunter AFB, AL; *Version 2:* Medical Service School, Sheppard AFB, TX. *Version 3:* School of Aviation Medicine, Gunter AFB, AL.

Length: *Version 1:* 10–13 weeks (308–398 hours). *Version 2:* 9–10 weeks (351–360 hours). *Version 3:* 11–13 weeks (429–507 hours).

Exhibit Dates: *Version 1:* 6/69–12/73. *Version 2:* 5/62–5/69. *Version 3:* 3/54–4/62.

Objectives: To train airmen as professional assistants in medical and clinical patient care and treatment.

Instruction: First aid and disaster treatment; nursing fundamentals; medical and surgical nursing; obstetrical and pediatric nursing; outpatient and emergency services.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, credit in nursing on the basis of institutional evaluation (2/74). *Version 2:* In the upper-division baccalaureate category, 2 semester hours in physiology and hygiene (12/68). *Version 3:* In the upper-division baccalaureate category, 2 semester hours in physiology and hygiene (12/68).

AF-0709-0016

1. Physiological Training Specialist
2. Physiological Training Specialist
3. Physiological Training Specialist
   (Apprentice Physiological Training Specialist)

Course Number: *All Versions:* ABY91130. *Version 1:* 5ABY91130. *Version 2:* 5ABY91130. *Version 3:* ABR90132; AB90130.

Location: School of Aerospace Medicine, Brooks AFB, TX. *Version 3:* School of Aviation Medicine, Gunter AFB, AL.

Length: *Version 1:* 5 weeks (157 hours). *Version 2:* 5–6 weeks (196–236 hours). *Version 3:* 6–7 weeks (214–236 hours).

Exhibit Dates: *Version 1:* 5/75–1/89. *Version 2:* 11/68–4/75. *Version 3:* 7/54–10/68.

Objectives: To train qualified airmen to assist supervisors in the operation of a physiological training unit.

Instruction: Lectures and practical experience in operation of physiological training devices; inside observation during low pressure chamber flights; conduct of lectures, discussions, and demonstrations for flying personnel; and preparation and maintenance of records.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 1 semester hour in administration, 2 in environmental physiology, 4 in operating special instruments (2/78). *Version 2:* In the upper-division baccalaureate category, 3 semester hours in aviation physiology (12/68). *Version 3:* In the upper-division baccalaureate category, 3 semester hours in aviation physiology (12/68)

AF-0709-0017

Physiological Training Officer

Course Number: *All Versions:* OBY9161. *Version 1:* 5OBY9161.

Location: *Version 1:* School of Aerospace Medicine, Brooks AFB, TX. *Version 2:* School of Aviation Medicine, Gunter AFB, AL.

Length: *Version 1:* 6–7 weeks (235–315 hours). *Version 2:* 7 weeks (258–312 hours).

Exhibit Dates: *Version 1:* 7/68–10/78. *Version 2:* 9/54–6/68.

Objectives: To develop the skills and knowledge to assist supervisory physiological training personnel in operating a physiological training unit.

Instruction: *Version 1:* Lectures and practical experiences in altitude physiology, operation of training devices and instruments, instructional techniques, protective equipment and unit management. *Version 2:* Lectures in physics of the atmosphere and gases; general anatomy and medical terminology; the nervous system and special senses; respiration and circulation; biodynamics; hyperbaric physiology; additional lectures and practical exercises in clinical medicine; aircraft escape, accident prevention and investigation; and oxygen equipment.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 1 semester hour in operation of special instrumentation (2/78); in the upper-division baccalaureate category, 1 semester hour in administration/management, 2 in cardiopulmonary anatomy and physiology, and 1 in physiology of special senses (2/78). *Version 2:* In the upper-division baccalaureate category, 3 semester hours in aviation physiology (2/74).

AF-0709-0018

Medical Aspects of Food Handling

Course Number: 3AZR90870-2.

Location: School of Aerospace Medicine, Brooks AFB, TX; School of Health Care Sciences, Sheppard AFB, TX.

Length: 2 weeks (60–64 hours).

Exhibit Dates: 9/72–1/89.

Objectives: To train enlisted personnel in food handling and food service sanitation.

Instruction: Lectures and practical exercises in food microbiology, preservation, and facility sanitation; environmental hygiene; and pathology of food-borne diseases.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in food sanitation (2/78).

AF-0709-0019

Electroencephalographic Specialist

Course Number: AZR90237.

Location: Air Training Command, Lackland AFB, TX.

Length: 9 weeks (270 hours).

Exhibit Dates: 7/59–12/68.

Objectives: To provide airmen with the skills and knowledge required to perform as electroencephalographic specialists.

Instruction: Lectures on the principles of neurological anatomy, physiology, pathology, neuropsychiatric diseases and disorders, management of electroencephalographic equipment, and laboratory procedures; and clinical practice in all electroencephalographic duties.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in neurological anatomy, physiology, and pathology, additional credit in clinical practice for EEG specialist on the basis of institutional evaluation (2/74).

AF-0709-0021

Orthopaedic Appliance Specialist

Course Number: ABY91332.

Location: Wilford Hall Hospital, Lackland AFB, TX.

Length: 50 weeks (1960 hours).

Exhibit Dates: 3/67–12/73.

Objectives: To train airmen as orthopedic appliance specialists.

Instruction: Lectures and practical exercises in the duties of orthopedic appliance specialists, including anatomy and physiology, arch supports, back braces, introduction to materials, application of plaster of Paris, lower and upper extremity appliances, leather technique, miscellaneous appliances, shop equipment, shoe modification, and patient relationships.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in anatomy and physiology, and credit in industrial arts on the basis of institutional evaluation (7/74).

AF-0709-0022

Physiological Training Supervisor

Course Number: 5AAY91170; AAY91170; AA90172.

Location: School of Aerospace Medicine, Brooks AFB, TX; School of Aviation Medicine, Gunter AFB, AL.

Length: 4-6 weeks (141-234 hours).

Exhibit Dates: 9/56-12/75.

Objectives: To train enlisted personnel to supervise physiological training.

Instruction: Lectures and practical exercises in the supervision of physiological training. Course includes a review of basic physiological principles; extensive indoctrination in the more advanced practices and procedures of aviation physiology; and new equipment used in coordinating the physiological training program.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in aviation physiology (12/68).

AF-0709-0023

Medical Service Technician

Course Number: *Version 1:* 3AZR90270-1. *Version 2:* AAR90270. *Version 3:* AA90270.

Location: *Version 1:* School of Health Care Sciences, Sheppard AFB, TX. *Version 2:* Medical Service School, Gunter AFB, AL. *Version 3:* School of Aviation Medicine, Gunter AFB, AL.

Length: *Version 1:* 13 weeks (390 hours). *Version 2:* 17 weeks (600-680 hours). *Version 3:* 19 weeks (741 hours).

Exhibit Dates: *Version 1:* 4/69-12/73. *Version 2:* 1/63-3/69. *Version 3:* 8/55-12/62.

Objectives: To train enlisted personnel to supervise medical treatment facilities.

Instruction: *All Versions:* Lectures and practical exercises in preventive medicine, medical administration, nursing principles, and psychiatric nursing. *Version 1:* Instruction includes personal, family, and community health; and care of mothers and newborn babies. *Version 2:* Instruction includes anatomy and physiology, medicine and surgery, disaster medicine, and surgical nursing.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 3 semester hours in medical nursing, 6 in surgical nursing, 3 in maternal child care, 3 in community public health (7/74). *Version 2:* In the upper-division baccalaureate category, 2 semester hours in elementary anatomy, 2 in elementary physiology, 1 in preventive medicine (12/68). *Version 3:* In the upper-division baccalaureate category, 2 semester hours in elementary anatomy, 2 in elementary physiology, 1 in preventive medicine (12/68).

AF-0709-0024

1. Aeromedical Specialist
2. Aeromedical Specialist
3. Aeromedical Specialist
   (Apprentice Aeromedical Specialist)
4. Apprentice Aeromedical Specialist

Course Number: *Version 1:* 5ABY90130. *Version 2:* 5ABY90130; ABY90130. *Version 3:* ABY90130; AB90130. *Version 4:* AB90130.

Location: *Version 1:* School of Aerospace Medicine, Brooks AFB, TX. *Version 2:* School of Aerospace Medicine, Brooks AFB, TX. *Version 3:* School of Aerospace Medicine, Brooks AFB, TX. *Version 4:* School of Aviation Medicine, Gunter AFB, AL.

Length: *Version 1:* 7 weeks (272 hours). *Version 2:* 7-9 weeks (227-342 hours). *Version 3:* 7-9 weeks (265-351 hours). *Version 4:* 7-9 weeks (265-351 hours).

Exhibit Dates: *Version 1:* 10/77-6/80. *Version 2:* 5/68-9/77. *Version 3:* 8/54-4/68. *Version 4:* 8/54-4/68.

Objectives: To train enlisted personnel to the semi-skilled level in the aerospace medicine career specialty.

Instruction: Lectures and practical exercises in aerospace medicine, including anatomy and physiology, aerospace personnel care and treatment, aerospace physiology, military public health and occupational medicine, and disaster casualty control.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in anatomy and physiology, 1 in administration/management, 5 in first aid and hygiene, and 1 in audiometry (2/78). *Version 2:* In the lower-division baccalaureate/associate degree category, 2 semester hours in anatomy and physiology, 2 in first aid and hygiene, both on the basis of institutional evaluation (7/74); in the upper-division baccalaureate category, 2 semester hours in anatomy and physiology, 2 in first aid and hygiene, both on the basis of institutional evaluation (7/74). *Version 3:* In the upper-division baccalaureate category, 2 semester hours in first aid and hygiene (12/68). *Version 4:* In the upper-division baccalaureate category, 2 semester hours in first aid and hygiene (12/68).

AF-0709-0026

Basic Pararescueman

Course Number: 92330.

Location: Aerospace Rescue and Recovery Service, Hill AFB, UT.

Length: 8 weeks (408 hours).

Exhibit Dates: 9/74-1/90.

Objectives: To provide training in basic pararescue procedures.

Instruction: Training in recognition and treatment of a full range of medical emergency situations, including shock, chest injuries, occular injuries, spinal and head injuries, comas, gastric ulcers and poisons, burns, fractures, childbirth, wounds, and infections; jump training to include care and preparation of equipment, day jumps, night jump, scuba jump, and tree jump; and mountain rescue and ground operations to include mountaineering knots, rope management, rappeling, and mountain navigation.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in emergency medical technician (6/75).

AF-0709-0027

Medical Administrative Specialist by Correspondence

Course Number: 90650.

Location: Extension Course Institute, Gunter AFS, AL.

Length: Maximum of 52 weeks.

Exhibit Dates: 7/83-6/90.

Objectives: To prepare the student to serve as a medical officer or unit manager.

Instruction: This correspondence course includes organization of facilities, personnel administration, written and oral communication, medical terminology, data collection and reporting to include biostatistical data collection, supply equipment,and bookkeeping control. Course is similar to those found in programs for medical office assistants.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in principles of medical office management. Course concludes with a proctored end of course examination (9/84).

AF-0709-0028

Apprentice Medical Administrative Specialist by Correspondence

Course Number: 90630.

Location: Extension Course Institute, Gunter AFS, AL.

Length: Maximum of 52 weeks.

Exhibit Dates: 4/77-3/87.

Objectives: To teach enlisted personnel to serve as medical administrators.

Instruction: This correspondence course includes administration organization and controls, covering interpersonal relations, telecommunications, official mail, eligibility and appointments for medical care; also covers introduction to medical records to include movement of inpatient records between facilities, inpatient treatment forms, coding inpatient treatment forms; admission procedures, notification procedures, line of duty, third-party liability, and injury reporting for outpatients; also covers introduction to typing and unit clerk functions in bookkeeping including medical resource management and first aid.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in introduction to medical administration. Course concludes with a proctored examination (9/84).

AF-0709-0029

Medical Laboratory Technician (Chemistry and Urinalysis) by Correspondence

Course Number: 90411.

Location: Extension Course Institute, Gunter AFS, AL.

Length: Maximum 52 weeks.

Exhibit Dates: 12/85-6/89.

Learning Outcomes: Upon completion of the course the student will understand the theory and basic fundamentals of clinical chemistry and urinalysis.

Instruction: A monitored home study course including reading and written exercises and proctored written examinations. Topics include the theoretical concepts of the review of basic chemistry, and introduction to clinical chemistry and urinalysis.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours for clinical chemistry and 3 for urinalysis (5/88).

AF-0709-0030

Medical Laboratory Technician (Microbiology) by Correspondence

Course Number: 90412.

Location: Extension Course Institute, Gunter AFS, AL.
Length: Maximum 52 weeks.
Exhibit Dates: 2/82-Present.
Learning Outcomes: Upon completion of the course the student will understand the theory and basic fundamentals of microbiology and parasitology.
Instruction: A monitored home study course including reading and written exercises and written proctored examination. Topics include the theoretical concepts of basic and clinical microbiology, parasitology, and clinical mycology.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in microbiology (lecture course without lab) (5/88).

AF-0709-0031

Medical Laboratory Technician
(Hematology, Serology, Blood Banking and Immunohematology) by Correspondence

Course Number: 90413.
Location: Extension Course Institute, Gunter AFS, AL.
Length: Maximum 52 weeks.
Exhibit Dates: 9/77-Present.
Learning Outcomes: Upon completion of the course the student will understand the theory and basic fundamentals of hematology, serology, blood banking and immunohematology.
Instruction: A monitored home study course including reading and written exercises and proctored written examination. Introduction to the theoretical concepts of the Complete Blood Count (CBC), blood coagulation studies, serological studies, blood grouping, typing and transfusion practices, agglutination, latex-fixation, precipitin and ASO tests.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours for hematology, 2 for serology, 2 for blood banking, and 2 for immunohematology (5/88).

AF-0709-0032

Aerospace Physiology Specialist by Correspondence

Course Number: 91150.
Location: Extension Course Institute, Gunter AFS, AL.
Length: Maximum 52 weeks.
Exhibit Dates: 2/82-Present.
Learning Outcomes: Upon completion of the course, the student will understand the theory and basic fundamentals of aerospace physiology consisting of duties, supervision and training, first aid procedures, medical terminology and cardio-pulmonary physiology related to altitude problems.
Instruction: A monitored home study course including reading and written exercises, and proctored written examinations. Topics include introduction to the theoretical concepts of aerospace physiology, fundamentals of first aid, utilization of life support, equipment and hyperboric chamber operation, maintenance and inspection and overview of cardio-pulmonary physiology as it relates to aerospace applications.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in first aid (5/88).

AF-0799-0001

Global Medicine

Course Number: 5OZY9336.
Location: School of Aerospace Medicine, Brooks AFB, TX.
Length: 2 weeks (78 hours).
Exhibit Dates: 4/72-1/88.
Objectives: To inform medical officers of significant disease problems of importance to military operations throughout the world.
Instruction: Lectures on certain diseases (particularly those not normally familiar to American physicians) and their epidemiology; disease management, treatment, and control measures; area studies; drug abuse; combat psychiatry; arthropod and rodent control; burn treatment; surgical care for missile wounds; nutrition and population; and preventive medicine.
Credit Recommendation: In the graduate degree category, 3 semester hours in public health epidemiology (2/78).

AF-0799-0003

Pharmacy Specialist by Correspondence

Course Number: 90550.
Location: Extension Course Institute, Gunter AFS, AL.
Length: Maximum 52 weeks.
Exhibit Dates: 6/83-Present.
Learning Outcomes: Upon completion of the course the student will understand the basics of pharmacy guidelines, law, quality control, procurement, principles of compounding, dispensing of unit dose, and intravenous admixtures.
Instruction: Monitored home study including reading, written exercises, on-the-job supervision and proctored examination. Topics include quality control, phamaceutical calculations, chemistry and pharmacology.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 9 semester hours in pharmacy technology (5/88).

AF-0799-0004

1. Medical Administrative Specialist
2. Medical Administrative Specialist
3. Apprentice Medical Administrative Specialist

Course Number: *Version 1:* 3ABR90630. *Version 2:* ABR90630-1; ABR90630. *Version 3:* AB90630; AB90631.
Location: *Version 1:* Sheppard Technical Training Center, Sheppard AFB, TX. *Version 2:* Medical Service School, Sheppard AFB, TX. *Version 3:* School of Aviation Medicine, Gunter AFB, AL.
Length: *Version 1:* 9 weeks (308 hours). *Version 2:* 6 weeks (180-240 hours). *Version 3:* 7-9 weeks (273-351 hours).
Exhibit Dates: *Version 1:* 4/70-12/73. *Version 2:* 10/65-3/70. *Version 3:* 4/54-9/65.
Objectives: To train airmen in the fundamental duties of medical administrative specialists.
Instruction: Lectures and practical exercises in general administration; typing and formats; administrative control of patients and beds; and medical service fundamentals, including field casualty care and medical field exercises.
Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 2 semester hours in office procedures (2/74). *Version 2:* In the upper-division baccalaureate category, 2 semester hours in office procedures (2/74). *Version 3:* In the upper-division baccalaureate category, 3 semester hours in office procedures (2/74).

AF-0799-0005

Basic Course in Medical Service Administration
(Basic Course in Medical Administration)

Course Number: OBR9021.
Location: Medical Service School, Gunter AFB, AL; School of Aviation Medicine, Gunter AFB, AL.
Length: 15 weeks (585-600 hours).
Exhibit Dates: 1/55-12/68.
Objectives: To train newly commissioned officers in medical services administration, including the operation of medical care facilities and the supervision of direct support activities.
Instruction: Lectures and practical exercises in management, material and food service, housekeeping, administrative assistance to specialized medical services, and patient care administration.
Credit Recommendation: In the upper-division baccalaureate category, 6 semester hours in medical administration (12/68).

AF-0799-0007

Compression Chamber Team Training

Course Number: 5OZY9300-7.
Location: School of Aerospace Medicine, Brooks AFB, TX.
Length: 2 weeks (76-78 hours).
Exhibit Dates: *Version 1:* 12/77-1/89. *Version 2:* 3/72-11/77.
Objectives: To train a technical team to operate and maintain compression chambers, to act as observers during chamber operation, and to participate in the treatment of patients by compression therapy.
Instruction: *All Versions:* Lectures in hyperbaric physiology and clinical medicine; practical exercises in high-pressure chambers and unit administration. *Version 1:* Includes chamber operation and maintenance.
Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 1 semester hour in biological sciences, 1 in physical sciences, and 2 in operating special instrumentation (2/78). *Version 2:* In the upper-division baccalaureate category, 2 semester hours in physical science (2/74).

AF-0801-0001

Air Force Joint Service Supervisor Safety by Correspondence

Course Number: 1900.
Location: Extension Course Institute, Gunter Air Force Station, AL.
Length: Maximum 52 weeks.
Exhibit Dates: 1/82-Present.
Learning Outcomes: At the conclusion of the course the student will know the role of the supervisor as it relates to safety, be able to prepare the worker for the job, be able to supervise the job, know how to identify and correct hazards, know the safety considerations in the workplace environment, know the issues related to fire protection, and be able to identify off-duty safety concerns.
Instruction: Topics include the major issues and concerns related to safety on the job. Students learn to identify unsafe conditions, develop and implement safety training programs, and the specific role of the supervisor in the administration of the safety function in the workplace.
Credit Recommendation: In the vocational certificate category, 1 semester hour in safety (2/87).

AF-0801-0002

Army Joint Service Supervisor Safety by Correspondence

Course Number: 1901.
Location: Extension Course Institute, Gunter Air Force Station, AL.
Length: Maximum 52 weeks.
Exhibit Dates: 8/82–Present.
Learning Outcomes: At the conclusion of this course students will know the role of the supervisor as it relates to safety, be able to prepare the worker for the job, be able to supervise the job, know how to identify and correct hazards, know the safety considerations in the workplace, know fire protection issues, and be able to identify off-duty safety concerns.
Instruction: This course covers the major issues and concerns related to safety on the job. Students learn to identify unsafe conditions, develop and implement safety training programs, and the specific role of the supervisor in the administration of the safety function in the workplace.
Credit Recommendation: In the vocational certificate category, 1 semester hour in safety (2/87).

AF-0801-0003

Navy Joint Service Supervisor Safety by Correspondence

Course Number: 1902.
Location: Extension Course Institute, Gunter Air Force Station, AL.
Length: Maximum 52 weeks.
Exhibit Dates: 8/82–Present.
Learning Outcomes: At the conclusion of the course the students will know the role of the supervisor as it relates to safety, be able to prepare the worker for the job, be able to supervise the job, know how to identify and correct hazards, know the safety considerations in the work place, know fire protection issues, and be able to identify off-duty safety concerns.
Instruction: This course covers the major issues and concerns related to safety on the job. Students learn to identify unsafe conditions, develop and implement safety training programs, and the specific role of the supervisor in the administration of the safety function in the workplace.
Credit Recommendation: In the vocational certificate category, 1 semester hour in safety (2/87).

AF-0801-0004

Coast Guard Joint Service Supervisor Safety by Correspondence

Course Number: 1903.
Location: Extension Course Institute, Gunter Air Force Station, AL.
Length: Maximum 52 weeks.
Exhibit Dates: 8/82–Present.
Learning Outcomes: At the conclusion of this course students will know the role of the supevisor as it relates to safety, be able to prepare the worker for the job, be able to supervise the job, know how to identify and correct hazards, know the safety considerations in the workplace, know fire protection issues, and be able to identify off-duty safety concerns.
Instruction: This course covers the major issues and conerns related to safety on the job. Students learn to identify unsafe conditions, develop and implement safety training programs, and the specific role of the supervisor in the administration of the safety function in the workplace.
Credit Recommendation: In the vocational certificate category, 1 semester hour in safety (2/87).

AF-0801-0005

Civil Air Patrol-Safety Officer (Level II Technical Rating) by Correspondence

Course Number: 02170.
Location: Extension Course Institute, Gunter Air Force Station, AL.
Length: Maximum 52 weeks.
Exhibit Dates: 7/86–Present.
Learning Outcomes: At the conclusion of this course, the student will know the general responsibilities of commanding officers at all levels with regards to the safety function, know the criteria for the administration of safety programs, know the principles and philosophy of accident prevention, know the duties of the safety officer, and know the various safety awards in the Civil Air Patrol.
Instruction: This course covers the general safety responsibilities of the various levels of commanding officers, establishing a safety program, the practice and philosophy of accident prevention, specific accident procedures and safety awards.
Credit Recommendation: In the vocational certificate category, 1 semester hour in safety management (2/87).

AF-0802-0001

1. Disaster Preparedness Specialist (Remote Duty)
   (Disaster Preparedness Specialist (Additional Duty))
   (Disaster Control Specialist)
2. Disaster Control Specialist
   (Disaster Preparedness Specialist)
3. Disaster Control Instructor
4. Disaster Control Instructor

Course Number: *Version 1:* 3AZR24230. *Version 2:* AZR24230. *Version 3:* AZR46150. *Version 4:* AZR46150; SS46150-11.
Location: 3415th Technical School, Lowry AFB, CO.
Length: *Version 1:* 4–5 weeks (120–150 hours). *Version 2:* 8 weeks (240 hours). *Version 3:* 15 weeks (450 hours). *Version 4:* 6 weeks (180 hours).
Exhibit Dates: *Version 1:* 7/68–12/73. *Version 2:* 12/66–6/68. *Version 3:* 7/60–11/66. *Version 4:* 3/58–6/60.
Objectives: To train enlisted personnel to be disaster preparedness specialists and disaster control instructors.
Instruction: *All Versions:* Lectures and practical exercises in disaster preparedness and control operations, individual and collective protection, decontamination and monitoring procedures, and weapons effects. *Version 2:* Instruction includes radiological safety practices and procedures. *Version 3:* Instruction includes casualty and damage prevention, with emphasis on instructor training fundamentals and application. *Version 4:* Instruction includes a brief introduction to biological, chemical, and radiological defense, and instructor training in these areas.
Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, credit in occupational health and safety on the basis of institutional evaluation (5/74). *Version 2:* In the upper-division baccalaureate category, credit in protective service on the basis of institutional evaluation (12/68). *Version 3:* In the upper-division baccalaureate category, credit in instructional methods, speech, and protective service on the basis of institutional evaluation (12/68). *Version 4:* In the upper-division baccalaureate category, credit in instructional methods and protective service on the basis of institutional evaluation (12/68).

AF-0802-0002

1. Disaster Preparedness Specialist
2. Disaster Control Specialist
   (Disaster Preparedness Specialist)
3. Disaster Control Specialist

Course Number: *Version 1:* 3ALR24230. *Version 2:* 3ALR24230; ALR24230. *Version 3:* ALR24230.
Location: 3415th Technical School, Lowry AFB, CO.
Length: *Version 1:* 6 weeks (192–198 hours). *Version 2:* 10 weeks (300 hours). *Version 3:* 17 weeks (510 hours).
Exhibit Dates: *Version 1:* 10/70–12/73. *Version 2:* 12/66–9/70. *Version 3:* 1/63–11/66.
Objectives: To train enlisted personnel in aspects of disaster preparedness and control.
Instruction: *All Versions:* Lectures and practical exercises in disaster preparedness, effects of nuclear and nonnuclear weapons and dangerous materials, decontamination and monitoring, and individual and collective protection. *Version 2:* Includes instruction in the conducting of formal classes in disaster preparedness or control, and in the development of training aids for these classes. *Version 3:* Includes instruction in the conducting of formal classes in disaster preparedness or control, and in the development of training aids for these classes.
Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, credit in occupational health and safety on the basis of institutional evaluation (5/74). *Version 2:* In the upper-division baccalaureate category, credit in instructional methods and protective service on the basis of institutional evaluation (12/68). *Version 3:* In the upper-division baccalaureate category, credit in institutional methods, speech, and protective service on the basis of institutional evaluation (12/68).

AF-0802-0004

Passive Defense Instructor

Course Number: XX46132; AL46172.
Location: 3415th Technical School, Lowry AFB, CO.
Length: 6–7 weeks (180–210 hours).
Exhibit Dates: 4/55–12/68.
Objectives: To train airmen in defense measures against possible chemical, biological, and radiological warfare.
Instruction: Lectures and practical exercises in defense measures against possible chemical, biological, and radiological warfare, including detection and classification of chemical agents, first aid, outline of basic nuclear physics, radioactive emissions, radiation effects, dosage, monitoring, and biological defense.
Credit Recommendation: In the upper-division baccalaureate category, credit in instructional methods and protective service occupations on the basis of institutional evaluation (12/68).

AF-0802-0007

Missile Safety Technician

Course Number: ATS24170-2.
Location: 3345th Technical School, Chanute AFB, IL.
Length: 15 weeks (450 hours).
Exhibit Dates: 6/62–12/68.

Objectives: To train enlisted personnel to perform missile safety surveillance duties at ballistic missile sites.

Instruction: Lectures and practical exercises in missile safety surveillance at ballistic missile sites, including basic mathematics, physics, fluid mechanics, electricity, chemistry, construction practices applicable to construction and operation of missile facilities, propulsion systems principles, industrial safety, industrial hygiene and human factors, and safety management.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in industrial safety management (12/68).

AF-0802-0008

Ballistic Missile Safety

Course Number: AZR24130B.

Location: 3345th Technical School, Chanute AFB, IL.

Length: 4 weeks (120 hours).

Exhibit Dates: 2/63-12/68.

Objectives: To train enlisted personnel as ballistic missile safety surveillance technicians.

Instruction: Lectures and practical exercises in ballistic missile safety surveillance. Topics include missile terminology, missile structures, constructional features, safety associated with missile maintenance and aerospace ground equipment, monitoring of hazardous missile operations, and nuclear safety familiarization.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in safety management (6/74).

AF-0802-0009

Air Launched Missile Safety Officer

Course Number: 3OZR1945; OZR1945.

Location: 3415th Technical School, Lowry AFB, CO.

Length: 3 weeks (78-90 hours).

Exhibit Dates: 6/66-9/68.

Objectives: To train officers as air launch missile safety officers.

Instruction: Lectures and practical exercises in missile safety, including fundamentals; environmental, explosives, and nuclear safety; aircraft and missile loading hazards; aircraft and missile accident investigation, surveys and survey guides and board proceedings; and safety applications.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in safety education (12/68).

AF-0802-0011

Air Launched Missile Safety Technician

Course Number: AAR24170-1.

Location: 3415th Technical School, Lowry AFB, CO.

Length: 1-3 weeks (90 hours).

Exhibit Dates: 7/66-12/68.

Objectives: To train enlisted personnel to be air launch missile safety technicians.

Instruction: Lectures and practical exercises in missile safety, including human engineering, first aid, missile explosive hazards, aircraft loading hazards, safety management and supervision, physiology, missile fundamentals, environmental safety, and aircraft and missile accident prevention.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in safety management (12/68).

AF-0802-0016

General Safety Specialist
(Ground Safety Specialist)

Course Number: ALR24130; ALR24130A.

Location: 3345th Technical School, Chanute AFB, IL.

Length: 8-10 weeks (258-300 hours).

Exhibit Dates: 12/62-4/68.

Objectives: To train Air Force personnel to conduct installation safety programs.

Instruction: Course covers safety education, communication, and human factors; high pressure and explosive safety; industrial hygiene and safety; traffic and off-duty safety; and accident investigation and reporting.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in industrial safety (12/68).

AF-0802-0018

Survival Instructor Training

Course Number: S-V81-A; 140001.

Location: Air Training Command, Fairchild AFB, WA; Air Training Command, Stead AFB, NV.

Length: 21-24 weeks (613-628 hours).

Exhibit Dates: 6/65-1/90.

Objectives: To qualify selected airmen as instructors in the techniques and procedures of global survival and as rescue and survival specialists.

Instruction: Lectures and practical exercises in the principles and techniques of survival; anatomy, physiology, first aid; global geography; evasion, resistance, and escape; and survival teaching methods.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in instructional methods, 3 in survival techniques including woodcraft and camp training, winter survival, and recreation (7/74).

AF-0802-0025

Munitions and Weapons Maintenance by Correspondence

Course Number: 46150.

Location: Extension Course Institute, Gunter Air Force Station, AL.

Length: Maximum 52 weeks.

Exhibit Dates: 12/65-4/86.

Objectives: To train personnel in munition and weapons systems maintenance.

Instruction: This correspondence course of instruction consists of on-the-job supervision and at-home study. Instruction includes an overview of the AF internals managements system and the identification and use of hand tools and test equipment. The primary direction of this course is toward military ordnance handling, maintenance and arming.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (9/86).

AF-0802-0026

Disaster Preparedness Specialist by Correspondence

Course Number: 24250.

Location: Extension Course Institute, Gunter Air Force Station, AL.

Length: Maximum 52 weeks.

Exhibit Dates: 3/81-Present.

Objectives: To train disaster/safety personnel in procedures for response to chemical, biological and nuclear warfare situations.

Instruction: This correspondence course of instruction consists of on-the-job supervision and at home study. The course of instruction includes topics in disaster preparedness as military career field, methods of managing and planning for disaster situations, use of equipment specific to disaster created by nuclear, biological and chemical warfare situations.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (9/86).

AF-0802-0027

Nuclear Weapons Specialist by Correspondence

Course Number: 46350.

Location: Extension Course Institute, Gunter Air Force Station, AL.

Length: Maximum 52 weeks.

Exhibit Dates: 9/68-3/85.

Objectives: To train personnel in the handling and maintenance of nuclear weapons systems.

Instruction: This correspondence course of instruction consists of on-the-job supervision and at-home study. The course includes an overview of internal maintenance management systems and use of AF technical manuals. A study of hand tools, impact tools, micrometers, feeler gauges and tap and dies is included. The remainder of the course is directed toward the specific maintenance of nuclear bombs, missiles and rockets, and nuclear reentry systems.

Credit Recommendation: In the vocational certificate category, 2 semester hours in general shop (9/86).

AF-0802-0028

Disaster Preparedness Technician by Correspondence

Course Number: 24270.

Location: Extension Course Institute, Gunter Air Force Station, AL.

Length: Maximum 52 weeks.

Exhibit Dates: 2/84-8/88.

Objectives: To provide upgrade training in the field of disaster preparedness plans, checklists, and inspection of personnel and equipment.

Instruction: This correspondence course consists of on-the-job supervision and at-home studies. Subject matter consists of disaster preparedness organization, preparedness operations site and personnel inspections.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (9/86).

AF-0802-0029

Safety Specialist by Correspondence

Course Number: 24150.

Location: Extension Course Institute, Gunter Air Force Station, AL.

Length: Maximum 52 weeks.

Exhibit Dates: *Version 1:* 8/88-Present. *Version 2:* 7/81-7/88.

Objectives: To provide upgrade training for entry level safety specialists consistant with the provisions of the Occupational Safety and Health Act of 1970.

Instruction: This correspondence course of instruction consists of on-the-job supervision and at-home studies. The home study provides the basic knowledge of safety regulations and the on-the-job supervision provides training to reinforce and apply the home studies. The course contains safety program, elements, traffic safety, OSDA provisions and comparable Air Force occupations safety and health program requirements. Included in the instruction are electrical, chemical, pressure system and construction safety, explosive, missile and nuclear safety, and mishap investigation, reporting and analysis.

Credit Recommendation: *Version 1:* Pending evaluation. *Version 2:* In the lower-division baccalaureate/associate degree category, 2 semester hours in introductory industrial safety (9/86).

AF-0802-0030

Explosive Development by Correspondence

Course Number: 46450.

Location: Extension Course Institute, Gunter Air Force Station, AL.

Length: Maximum 52 weeks.

Exhibit Dates: 9/72–1/83.

Objectives: To provide upgrade in munitions maintenance training to personnel assigned to munitions maintenance.

Instruction: This correspondence course of instruction consists of on-the-job supervision and at-home study. Instruction includes an introduction to explosive ordnance disposal, a study of the elements of electricity including circuits both series and parallel, application of ohms law and use of ohmmeter. The remainder of the course is specific to the programmed maintenance of conventional, nuclear and chemical ordnance.

Credit Recommendation: In the vocational certificate category, 3 semester hours in the fundamentals of electricity (9/86).

AF-0803-0003

Survival Training
(Survival Training (SEA))
(Advanced Survival Training)
(USAF Combat Survival Training)

Course Number: S-V80-A; S-V85-A; 140000.

Location: Air Training Command, Fairchild AFB, WA; Air Training Command, Stead AFB, NV.

Length: 2–4 weeks (94–216 hours).

Exhibit Dates: 2/55–1/90.

Objectives: To prepare selected flying personnel in the principles, procedures, and equipment necessary to survive in any climate.

Instruction: Lectures and practical exercises in survival principles and procedures; recovery and evasion; code of conduct; survival factors; psychological aspects of survival; special problems; medicine and hygiene; parachuting principles and practice; maps; and food procurement.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in camp training and survival techniques (10/77).

AF-0902-0001

Executive Hospital Housekeeper

Course Number: 3AZR90670.

Location: Medical Service School, Sheppard AFB, TX.

Length: 3 weeks (90 hours).

Exhibit Dates: 8/68–12/73.

Objectives: To train enlisted personnel in the supervision of housekeeping personnel in medical treatment facilities.

Instruction: Lectures in organization and management of housekeeping services, maintenance, sanitation, and safety.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in industrial hygiene (12/68).

AF-1113-0001

Ground C-E-M Maintenance Analysis Technician

Course Number: ALR30950.

Location: 3380th Technical School, Keesler AFB, MS.

Length: 4 weeks (120 hours).

Exhibit Dates: 6/67–12/73.

Objectives: To train maintenance personnel as ground C-E-M maintenance analysis technicians.

Instruction: Lectures and practical exercises in ground C-E-M maintenance analysis, including analysis, interpretation, and summary of data from data collection systems, monitoring and direction of analysis activities, identification of areas for development; charts, tables, graphs, and related visual media for presentation of analysis results, summary preparation, presentation of results, determination of effectiveness and efficiency, and analysis of status and configuration management system reports.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in statistical analysis (12/68).

AF-1115-0001

1. Maintenance Analysis Specialist
2. Maintenance Analysis Specialist (Aircraft and Missile Maintenance Analysis Specialist)

Course Number: *Version 1:* 3ABR39130. *Version 2:* 3ABR43430; ABR43430; ALR43430.

Location: 3345th Technical School, Chanute AFB, IL.

Length: *Version 1:* 11 weeks (330 hours). *Version 2:* 7–13 weeks (228–360 hours).

Exhibit Dates: *Version 1:* 7/70–12/73. *Version 2:* 2/61–6/70.

Objectives: To train enlisted personnel in basic statistical analysis and its application to aerospace weapons systems and motor transportation.

Instruction: Lectures and practical demonstrations in basic statistical analysis and maintenance analysis, including frequency distribution, dispersion, points and curves, control charts, maintenance documentation, data systems, management concepts, graphic presentations, and data processing for maintenance reporting.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 2 semester hours in introductory statistics (2/74). *Version 2:* In the upper-division baccalaureate category, 4 semester hours in statistical analysis (12/68).

AF-1115-0002

Reliability

Course Number: 435.

Location: School of Systems and Logistics, Wright-Patterson AFB, OH.

Length: 3 weeks (96 hours).

Exhibit Dates: 1/69–6/74.

Objectives: To provide officers and civilian personnel with an understanding of the theory of reliability, and the skills to employ the techniques of reliability in solving problems and carrying out reliability programs.

Instruction: Lectures and practical exercises in the study of statistical distributions; reliability allocation and distribution techniques; test plans, O.C. curves, and the use of Mil Standards; data analysis; construction and interpretation of confidence intervals; applications of mathematical models; and reliability program management.

Credit Recommendation: In the upper-division baccalaureate category, 5 semester hours in quality control or applied statistics (2/74).

AF-1115-0003

Reliability Maintainability

Course Number: 3OZR2895G.

Location: 3345th Technical School, Chanute AFB, IL.

Length: 3 weeks (90 hours).

Exhibit Dates: 3/68–12/73.

Objectives: To train enlisted personnel in developing, monitoring, and contracting reliability and maintainability of systems and subsystems from drawing board to operation.

Instruction: Lectures in basic statistics, probability functions, nonparametric estimation, mathematical estimation of parameters, stress/strength analysis, and reliability maintainability management.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in applied statistics (2/74).

AF-1115-0004

1. Advanced Quantitative Methods in Cost Analysis
2. Advanced Quantitative Methods in Cost Analysis
3. Quantitative Methods in Cost Analysis

Course Number: 189.

Location: School of Systems and Logistics, Wright-Patterson AFB, OH.

Length: *Version 1:* 4 weeks (111 hours). *Version 2:* 4 weeks (105 hours). *Version 3:* 9 weeks (200 hours).

Exhibit Dates: *Version 1:* 4/73–6/74. *Version 2:* 1/72–3/73. *Version 3:* 1/69–12/71.

Objectives: Advanced training in nonlinear and multivariate regression analysis for officers and civilian personnel having six semester hours in college-level algebra and statistics and some experience in cost analysis.

Instruction: Lectures in advanced nonlinear and multivariate regression analysis, including quadratic equations, logarithms, matrix inversions, linear and curvilinear regression, and net scatter diagrams.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 2 semester hours in advanced quantitative methods (2/74). *Version 2:* In the lower-division baccalaureate/associate degree category, 3 semester hours in advanced quantitative methods (2/74); in the upper-division baccalaureate category, 3 semester hours in business statistics or economic statistics, and credit in mathematics on the basis of institutional evaluation (12/68). *Version 3:* In the lower-division baccalaureate/associate degree category, 3 semester hours in advanced quantitative methods (2/74); in the upper-division baccalaureate category, 3 semester hours in business statistics or economic statistics (12/68).

AF-1115-0005

Basic Quantitative Methods in Cost Analysis

Course Number: 188.

Location: School of Systems and Logistics, Wright-Patterson AFB, OH.

Length: 3 weeks (105 hours).

Exhibit Dates: 1/72–6/74.

Objectives: To provide officers with a basic understanding of the quantitative tools and techniques employed in cost estimating and analysis.

Instruction: Lectures and applications in algebraic operations, elementary statistical methods, probability, curve and sample theory, interval estimates, linear equations and regression, and variance analysis.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in basic statistics (2/74); in the upper-division baccalaureate category, credit in basic statistics on the basis of institutional evaluation (12/68).

AF-1115-0006

DATA SERVICES SPECIALIST
(Statistical Specialist)

Course Number: ABR68130; AB68130.

Location: 3750th Technical School, Sheppard AFB, TX; 3415th Technical School, Lowry AFB, CO.

Length: 9-13 weeks (240-360 hours).

Exhibit Dates: 1/54-12/68.

Objectives: To train personnel in the functions and techniques of data services.

Instruction: Lectures and practical exercises in administrative procedures, Air Force reports management systems, functional area concepts and reports, punched card accounting machines and data processing familiarization, and data services case problems.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in statistical methods (12/68).

AF-1115-0007

MANAGEMENT ENGINEERING OFFICER

Course Number: *Version 1:* 3OBR7461. *Version 2:* OBR7431.

Location: 3415th Technical School, Lowry AFB, CO.

Length: 10 weeks (300 hours).

Exhibit Dates: *Version 1:* 5/68-12/73. *Version 2:* 4/64-4/68.

Objectives: To train officers as management engineering officers.

Instruction: Lectures and practical exercises in the development and application of manning standards. Course includes methods, techniques, and procedures used in attaining objectives of the management engineering program; operations analysis, linear programming, engineering theory, performance rating, time study, work sampling, operational audit, and allowance computation; linear, multiple linear, and curvilinear correlation and regression analysis; and manpower allocation systems.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 3 semester hours in statistics, 3 in quantitative methods (8/74). *Version 2:* In the upper-division baccalaureate category, 3 semester hours in statistics, 3 in business organization and management (12/68).

AF-1115-0008

POWER MEASUREMENTS BY CORRESPONDENCE

Course Number: 3037.

Location: Extension Course Institute, Gunter, Air Force Station, AL.

Length: Maximum 52 weeks

Exhibit Dates: 6/88-Present.

Learning Outcomes: Upon completion of the course, the student willunderstand the unique mathematical concepts used in electronic power level measurement: namely the logarithm and the manipulation of powers of ten. Other competencies include the use units of measurement and the specialized test equipment appropriate to determine signal power relationships and noise at any test point.

Instruction: A review of basic mathematics including logarithms and the use of the powers of ten. Decibel and noise weighting network characteristics and computations are covered. Principles and use of measuring devices appropriate for freqencies from the low range to the microwave range are presented.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in applied physics, electronic measurement (12/89).

AF-1303-0001

SPACE SYSTEMS ANALYST

Course Number: 3OBR2021.

Location: 3380th Technical School, Keesler AFB, MS.

Length: 7-8 weeks (216-246 hours).

Exhibit Dates: 5/68-12/73.

Objectives: To provide commissioned officers with training in satellite motion, orbital analysis, data acquisition, and basic tracking concepts.

Instruction: Lectures and practical exercises in the analysis of satellite motion and orbits, and in data acquisition and basic tracking concepts. Course includes radar theory and analysis of satellite motion and orbital determination and upper-level college mathematics through numerical analysis and differential equations.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in applied physics, 2 in mathematical analysis (6/74).

AF-1304-0001

WEATHER OBSERVER

Course Number: 3ABR25231; AB25231; AB25230.

Location: School of Applied Aerospace Sciences, Chanute AFB, IL; 3345th Technical School, Chanute AFB, IL.

Length: 15-22 weeks (426-570 hours).

Exhibit Dates: 4/55-12/73.

Objectives: To train airmen to perform as weather observers.

Instruction: Lectures and practical exercises in weather observation, including introduction to meteorology; observing, recording, and encoding weather elements; plotting weather maps, charts, and diagrams; care and operation of weather instruments; electronic weather equipment; weather radar; data evaluation; noninstrumental observation; and operation of standard weather communications equipment.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in meteorology (12/68).

AF-1304-0002

WEATHER FORECASTER
(Weather Technician)
(Weather Forecaster Technician)

Course Number: 3ALR25330; ALR25330; AL25330.

Location: 3345th Technical School, Chanute AFB, IL.

Length: 32-44 weeks (960-1320 hours).

Exhibit Dates: 3/56-12/73.

Objectives: To train weather observers and airborne weather operators in meteorological theory and forecasting procedures.

Instruction: Lectures and practical exercises in meteorological theory and forecasting procedures, including climatology, mathematics and physics, weather data analysis, synoptic meteorology, operational weather, advanced weather analysis, and weather equipment and facilities.

Credit Recommendation: In the upper-division baccalaureate category, 17 semester hours in meteorology (12/68).

AF-1304-0003

GROUND WEATHER OBSERVING PROCEDURES

Course Number: XX25251-1A.

Location: 3345th Technical School, Chanute AFB, IL.

Length: 8 weeks (240 hours).

Exhibit Dates: 2/58-12/68.

Objectives: To train personnel in observing, recording, and encoding weather phenomena and in plotting weather maps and charts.

Instruction: Lectures and practical exercises in ground weather observation procedures, including surface weather observations; observing, recording, and encoding cloud forms, states of the sky, and obscuring phenomena; observing, recording, and encoding visibility, present weather, and obstructions to vision; determination of temperature, humidity, and pressure data; surface observation equipment; and plotting weather maps and charts, constant pressure, winds aloft, and thermodynamic diagrams.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in meteorology (12/68).

AF-1304-0005

RAWINSONDE OPERATION

Course Number: 3AZR25251-1; AZR25251-1.

Location: 3345th Technical School, Chanute AFB, IL.

Length: 12 weeks (360 hours).

Exhibit Dates: 1/60-12/73.

Objectives: To train weather observers in rawinsonde operation and observations.

Instruction: Lectures and practical exercises in rawinsonde operation and observations, including rawinsonde equipment, recorder and record evaluation, radiosonde charts and codes, winds-aloft observations and calculations, and upper-air observation.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in meteorology (12/68).

AF-1304-0008

WEATHER OBSERVER TECHNICIAN

Course Number: 3AAR25271; AA25271; AAR25271.

Location: 3345th Technical School, Chanute AFB, IL.

Length: 16-25 weeks (480-750 hours).

Exhibit Dates: 4/58-12/73.

Objectives: To provide weather observer technicians with advanced training in weather observation.

Instruction: Lectures and practical experience in elementary mathematics, general meteorology and map analysis, operation and supervision of surface observing activities, electronic observations and equipment, office procedures, upper-air observations, management for the observer technician, communications skills, data dissemination and chart preparation, supply and maintenance forms and administrative procedures.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in meteorology, 3 in business organization and management (12/68).

AF-1304-0009

Advanced Meteorological Applications

Course Number: 3OZR2524-4.

Location: School of Applied Aerospace Sciences, Chanute AFB, IL.

Length: 4 weeks (120 hours).

Exhibit Dates: 11/72-12/73.

Objectives: To train personnel to perform as detachment forecasters.

Instruction: Lectures and practical exercises in advanced meteorological applications, including development of forecast methods, use of computer weather products, findings from environmental research projects, special forecasts for allied agencies, the latest developments in highly specialized meteorological programs, meteorological physics, air-sea interaction, environmental meteorology, and severe-weather applications.

Credit Recommendation: In the upper-division baccalaureate category, 6 semester hours in meteorology or general science (5/74).

AF-1304-0013

Weather Specialist by Correspondence

Course Number: 25150.

Location: Extension Course Institute, Gunter AFS,AL.

Length: Maximum 52 weeks.

Exhibit Dates: 7/84-Present.

Objectives: This is a home study course designed to instruct the weather observer in the fundamentals of general meteorology, air weather communications, the analyses of weather satellite data, upper air and surface codes, and the procedures used to make simple forecasts of synoptic conditions.

Instruction: This correspondence course covers the Air Weather Service procedures, the composition, structure, behavior, fundamental processes of the atmosphere, description of methods of weather observations, the principles and techniques of synoptic weather analysis, as well as the fundamentals of data analyses of remotely determined parameters of the atmosphere as detected by spacecraft and weather radars.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in fundamental of meteorology, 3 in meteorological observation (9/85).

AF-1304-0014

Weather Equipment Specialist by Correspondence

Course Number: 30250.

Location: Extension Course Institute, Gunter Air Force Station, AL.

Length: Maximum 52 weeks.

Exhibit Dates: 5/85-Present.

Objectives: To provide instruction in principles of design and operational techniques of weather measuring equipment.

Instruction: This correspondence course covers general need for weather instrumentation, fundamentals and prevention of corrosion, design of instrumentation to measure temperature, dew point, wind, ceiling heights, fundamentals of digital techniques, numbering systems, fundamentals of Boolean algebra, transistor logic, operational amplifiers, fundamentals of FPS-77 weather radar and use of oscilloscope.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in meteorological instrumentation, and 3 in digital techniques (11/86).

AF-1304-0015

Meterological Technician by Correspondence (Specialized)

Course Number: 2570.

Location: Extension Course Institute, Gunter Air Force Station, AL.

Length: Maximum 52 weeks.

Exhibit Dates: 11/83-Present.

Learning Outcomes: Upon completion of the course, the student will be able to function as a forecaster or station chief in the air weather service (AWS). This course is also applicable to commissioned officers newly entering the weather career field.

Instruction: Includes study of history and administration of the air weather service (AWS). Weather Station Management, Meteorology, climatology, weather data analysis, forecasting techniques and AWS support to the mission of the USAF.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in meteorology/climatology and 3 in administrative management (12/89).

AF-1304-0016

Weather Specialist by Correspondence

Course Number: 25150.

Location: Extension Course Institute, Gunter Air Force Station, AL.

Length: Maximum 52 weeks.

Exhibit Dates: 7/89-Present.

Learning Outcomes: Upon completion of the course, the student will be able to make and report accurate weather observations utilizing visual and radar techniques, plot weather charts and diagrams, and assist the forecaster in preparing necessary forecasts.

Instruction: Includes background and history of the air weather service, surface visual and radar observations, recording meteorologic phenomena and measurements, weather codes, communications, weather station operations, structure and movement of the atmosphere, basic meteorology, and climatology data analysis, satellite observations and basic mathematics and physics.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in fundamentals of meteorology and 1 in general mathematics (12/89).

AF-1401-0001

1. Accounting and Finance Specialist
2. Accounting and Finance Specialist
3. Finance Specialist

Course Number: *Version 1:* ABR67130. *Version 2:* ABR67130. *Version 3:* AB67130.

Location: 3750th Technical School, Sheppard AFB, TX.

Length: *Version 1:* 16 weeks (450 hours). *Version 2:* 27 weeks (720 hours). *Version 3:* 11 weeks (300 hours).

Exhibit Dates: *Version 1:* 6/60-12/68. *Version 2:* 3/58-5/60. *Version 3:* 7/57-2/58.

Objectives: To train airmen as accounting and finance specialists.

Instruction: *Version 1:* Discussions and practical exercises in accounting principles, general ledger controls and subsidiaries, commercial services, military pay, travel and accounts control. *Version 2:* Discussions and practical exercises in accounting principles, inventory accounting (monetary), appropriation expense and general ledger, stock funds, military and civilian pay, travel allowances, commercial accounts, and accounting for public funds. *Version 3:* Discussions and practical exercises in the computation of military pay and allowances, travel allowances, payment of commercial accounts, and accounting for public funds.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 3 semester hours in elementary accounting, 2 in general business practice (12/68). *Version 2:* In the upper-division baccalaureate category, 3 semester hours in elementary accounting , 3 in general business practice (12/68). *Version 3:* In the upper-division baccalaureate category, 3 semester hours in disbursing and finance (12/68).

AF-1401-0003

Accounting Specialist

Course Number: AB67230.

Location: 3750th Technical Training Center, Sheppard AFB, TX.

Length: 15 weeks (450 hours).

Exhibit Dates: 4/55-12/68.

Objectives: To train enlisted personnel in elementary accounting procedures.

Instruction: Lectures and on-the-job training in elementary accounting procedures, inventory accounting, military accounting procedures, and stock funds and nonappropriated funds procedures.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in elementary accounting (12/68).

AF-1401-0004

Accountant

Course Number: SS6884.

Location: 3750th Technical School, Sheppard AFB, TX.

Length: 3 weeks (90 hours).

Exhibit Dates: 4/58-12/68

Objectives: To provide officers with a basic knowledge of government accounting procedures.

Instruction: Lectures in basic government accounting procedures, including general military and civilian accounting procedures, expense accounting, inventory accounting, appropriation accounting, stock fund and nonappropriated funds accounting, and a review of commercial accounting.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in government accounting (12/68).

AF-1401-0005

General Accounting Specialist

Course Number: 3ABR67131; ABR67131.

Location: 3750th Technical School, Sheppard AFB, TX.

Length: 11-12 weeks (330 hours).

Exhibit Dates: 11/62-12/73.

Objectives: To provide enlisted personnel with a working knowledge of elementary accounting.

Instruction: Lectures in the basic principles of accounting, including payment vouchers and financial reports, appropriations and funds systems, materiel and commercial services systems, and the stock fund and general ledger systems.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in elementary accounting (12/68).

AF-1401-0006

Disbursement Accounting Specialist

Course Number: 3ABR67133; ABR67133.
Location: 3750th Technical School, Sheppard AFB, TX.
Length: 11 weeks (300-330 hours).
Exhibit Dates: 11/62-12/73.
Objectives: To provide enlisted personnel with a basic knowledge of business finance.
Instruction: Lectures and practical exercises in business finance and accounting fundamentals, with emphasis on financial disbursement procedures involving personnel, materiel, and commercial services.
Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in general business practice and credit in finance and accounting on the basis of institutional evaluation (12/68).

AF-1401-0007

Accounting Technician

Course Number: AA67270.
Location: 3750th Technical Training Center, Sheppard AFB, TX.
Length: 16-18 weeks (430-540 hours).
Exhibit Dates: 12/54-12/68.
Objectives: To train selected airmen in commercial and Air Force accounting systems.
Instruction: Lectures and practical exercises in managerial functions, graphic presentation, principles of accounting and the accounting cycle, merchandising, valuation of assets, stock funds, and cost-accounting processes.
Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in cost accounting (2/74).

AF-1401-0008

Accountant

Course Number: OB6881.
Location: 3750th Technical School, Sheppard AFB, TX.
Length: 12 weeks (360 hours).
Exhibit Dates: 9/55-12/68.
Objectives: To train officers to organize, direct, and coordinate accounting activities.
Instruction: Lectures in appropriation accounting, cost accounting, consolidation accounting, operating and capital accounting, budgeting, and preparation and analysis of financial statements.
Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in cost accounting, 3 in government accounting (12/68).

AF-1401-0009

Accounting and Finance Officer

Course Number: OBR6721.
Location: 3750th Technical School, Sheppard AFB, TX.
Length: 18-19 weeks (540-570 hours).
Exhibit Dates: 5/58-8/65.
Objectives: To train officers as accounting and finance officers.
Instruction: Lectures and practical exercises in the duties of an accounting and finance officer. Course includes accounting and finance systems, paying and collecting, commercial services and materiel, travel, civilian pay and military pay, accounting procedures and document flow, and financial accountability.
Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in general accounting, 2 in cost accounting (12/68).

AF-1401-0010

Accounting and Finance Supervisor

Course Number: AAR67170.
Location: 3750th Technical School, Sheppard AFB, TX.
Length: 19 weeks (570 hours).
Exhibit Dates: 11/59-12/68.
Objectives: To provide finance and accounting supervisors with advanced training in accounting and finance.
Instruction: Lectures on accounting and finance activities, appropriation accounting, financial inventory accounting, expense and general ledger systems, stock funds, and civilian and military pay procedures.
Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in cost accounting, 4 in finance and disbursing (12/68).

AF-1401-0013

Auditor

Course Number: OB6781; OB6871.
Location: 3750th Technical School, Sheppard AFB, TX.
Length: 15 weeks (450 hours).
Exhibit Dates: 12/55-12/68.
Objectives: To train officers to be auditors.
Instruction: Lectures and practical exercises in organization and management, job order and standard cost accounting, contracts, internal audit, appropriation accounting, military accounting system, functional and stock fund accounting and auditing techniques, and data processing.
Credit Recommendation: In the upper-division baccalaureate category, 4 semester hours in general accounting, 4 in auditing (12/68).

AF-1401-0014

Disbursing Officer

Course Number: OB6771.
Location: 3750th Technical School, Sheppard AFB, TX.
Length: 13 weeks (390 hours).
Exhibit Dates: 12/54-12/68.
Objectives: To train officers to manage financial accounts and services.
Instruction: Lectures in the management and operation of financial accounts and services, including maintenance of pay records; preparation, computation, and processing of vouchers for pay allowances (per diem and mileage); accounting for public funds; finance office administration and control of financial operations; and organization of finance functions and activities.
Credit Recommendation: In the upper-division baccalaureate category, 4 semester hours in disbursing and finance (12/68).

AF-1401-0015

Accounting and Finance Supervisor (Disbursement Accounting)

Course Number: AAR67170-3.
Location: 3750th Technical School, Sheppard AFB, TX.
Length: 10 weeks (300 hours).
Exhibit Dates: 8/67-12/73.
Objectives: To train personnel to supervise the disbursement functions of accounting and finance activities.
Instruction: Lectures on accounting and finance disbursement functions in areas of travel, military pay, civilian pay, and paying and collecting.
Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in disbursement accounting (12/68).

AF-1401-0016

Accounting and Finance Automated Materiel System
(Accounting and Finance Applications of Base Supply Computer (UNIVAC 1050 II))

Course Number: 3AZR67170; AZR67170.
Location: 3750th Technical School, Sheppard AFB, TX.
Length: 3 weeks (72-90 hours).
Exhibit Dates: 10/66-12/73.
Objectives: To train enlisted personnel to perform as accounting and finance specialists at base supply installations using UNIVAC 1050 II computers.
Instruction: Lectures and practical exercises in the duties and skills necessary to perform as accountants and finance specialists or supervisors at base supply installations using UNIVAC 1050 II computers. Course includes materiel supply; materiel system and the UNIVAC 1050 II, categories and sources of inventory; local procurement; issues, turn-ons, and receipt of materiel; accounting and finance; UNIVAC 1050 II output; adjustments, system failure, and recovery; and practical applications to the materiel system.
Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in procurement accounting (8/74).

AF-1401-0017

Health Services Administration

Course Number: 3OBR9021-1.
Location: School of Health Care Sciences, Sheppard AFB, TX.
Length: 11 weeks (440 hours).
Exhibit Dates: 6/72-12/73.
Objectives: To train newly commissioned Medical Service Corps officers in the skills and knowledge necessary to perform as Air Force Health Service administrators.
Instruction: Lectures and practical exercises in planning, directing, coordinating and controlling administrative and materiel activities of medical facility units, including financial management and general administration.
Credit Recommendation: In the upper-division baccalaureate category, 7 semester hours in financial management, hospital organization and administration (6/75).

AF-1402-0001

1. Data Systems and Statistics Officer
2. Data Systems and Statistics Officer
3. Statistical Services Officer

Course Number: *Version 1:* OBR6831. *Version 2:* OBR6831. *Version 3:* OBR6831; OB6831.
Location: 3750th Technical School, Sheppard AFB, TX.
Length: *Version 1:* 11 weeks (330 hours). *Version 2:* 11 weeks (330 hours). *Version 3:* 10-13 weeks (300-390 hours).
Exhibit Dates: *Version 1:* 1/64-12/68. *Version 2:* 9/63-12/63. *Version 3:* 1/55-8/63.
Objectives: To train personnel in the use of electrical accounting machines, the management of data systems, and the principles of data processing.
Instruction: Lectures on basic data processing machines; data systems analysis and design; accounting machine operation; and

calculating, punch, type 602, and reporting systems.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 3 semester hours in data processing : unit record and computer management (2/74). *Version 2:* In the upper-division baccalaureate category, 3 semester hours in data processing: unit record and computer management (12/68). *Version 3:* In the upper-division baccalaureate category, 3 semester hours in methods of statistical analysis, 2 in office management (12/68).

AF-1402-0002

Automated Systems Programming Technician (Management Support Systems)

Course Number: 3AZR06789-1.
Location: 3750th Technical School, Sheppard AFB, TX.
Length: 7 weeks (210 hours).
Exhibit Dates: 9/67-12/73.
Objectives: To train airmen to write computer programs (Assembler and COBOL) utilizing a UNIVAC 1050 II computer.
Instruction: Lectures and practical exercises in the theory and operating principles of computers, symbolic programming, input/output directives, utility programs, subroutines, COBOL programming, and flow charting.
Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in computer programming (12/68).

AF-1402-0003

Computer Systems Analyst

Course Number: 3OZR5135B; 3OZR5135.
Location: 3750th Technical School, Sheppard AFB, TX.
Length: 5 weeks (150 hours).
Exhibit Dates: 10/70-12/73.
Objectives: To train officers in the techniques of computer system analysis and design.
Instruction: Lectures and practical exercises in preparation, analysis, and design steps of a system study; flowcharting techniques; forms of design; development of programming specifications; development of system performance specifications; system implementation considerations; and management of system development activities.
Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in business systems analysis (2/74).

AF-1402-0004

Phase II General Accounting Applications

Course Number: 3AZR67170-10.
Location: Technical Training Center, Sheppard AFB, TX.
Length: 2 weeks (60 hours).
Exhibit Dates: 12/72-12/73.
Objectives: To provide personnel with the skills and knowledge necessary to perform as accounting and finance technicians at installations using Phase II computers (Burroughs 3500).
Instruction: Discussions and practical exercises in Phase II accounting applications, data elements and codes, established records, processing of daily transactions, processing of reject and management notices, remote operation, batch and interface processing, accounting and finance output from the system, and system recovery procedures.
Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in computer operations (2/74).

AF-1402-0005

Supply Systems Specialist
(Supply Systems Specialist)
(Supply Computer System Specialist)

Course Number: 3ALR64830-1; 3ALR64830A-1; ALR64830A.
Location: School of Applied Aerospace Sciences, Lowry AFB, CO; 3320th Technical School, Amarillo AFB, TX.
Length: 6 weeks (180-191 hours).
Exhibit Dates: 11/66-12/73.
Objectives: To train enlisted personnel in the use of the Burroughs 1050-II computer and support equipment as applied to the operation of base-level supply systems.
Instruction: Lectures and practical exercises in the Burroughs 1050-II computer system, including assembly language, hands-on computer training, central processor functions, various numbering systems, and utility and report program generator processing.
Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in computer principles (12/68).

AF-1402-0007

FORTRAN Programming

Course Number: 3AZR68750-2; AZR68750-2.
Location: 3750th Technical School, Sheppard AFB, TX.
Length: 3 weeks (90 hours).
Exhibit Dates: 10/64-12/73.
Objectives: To train officers, airmen, and civilians in the techniques of programming in FORTRAN.
Instruction: Lectures and practical exercises in coding conventions; constants, variables, and subscripts; control statements and end statements; input/output statements; specification statements; and subroutines as related to FORTRAN programming language.
Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in computer programming (12/68).

AF-1402-0008

Computer Programming

Course Number: 3AZR68750; AZR68750.
Location: 3750th Technical School, Sheppard AFB, TX.
Length: 7 weeks (210 hours).
Exhibit Dates: 4/64-12/73.
Objectives: To train airmen in the principles and techniques of computer programming (COBOL).
Instruction: Discussions and practical exercises, including an introduction to data processing; programming logic; COBOL instruction set; and processing using card, tape, and disc files.
Credit Recommendation: In the upper-division baccalaureate category, 4 semester hours in computer programming (12/68).

AF-1402-0009

NCMC Computer Programmer

Course Number: 4OZF0123-4.
Location: 3380th Technical School, Keesler AFB, MS.
Length: 20 weeks (600 hours).
Exhibit Dates: 2/69-12/73.
Objectives: To provide enlisted personnel with the knowledge and skills necessary to write programs in several computer languages.
Instruction: Lectures and practical exercises in computer programming, including input/output programming, JOVIAL programming, COSMOS (Colorado Springs Maintenance Operations program System) programming and utility programming using COSMOS, and NOCOPS (NORAD Combat Operations Program System).
Credit Recommendation: In the upper-division baccalaureate category, 8 semester hours in computer programming (2/74).

AF-1402-0010

1. Automated Systems Program Designer (Management Support Systems)
2. Automated Systems Program Designer

Course Number: *All Versions:* 3OZR0678-1.
Location: 3750th Technical School, Sheppard AFB, TX.
Length: *Version 1:* 8 weeks (240 hours). *Version 2:* 9 weeks (270 hours).
Exhibit Dates: *Version 1:* 8/69-12/73. *Version 2:* 9/67-7/69.
Objectives: To train personnel in the principles and capabilities of punched card equipment, electronic data processing, and machine language programming.
Instruction: Orientation to automatic data processing, principles and capabilities of unit record equipment, basic components of electronic data processing systems, system concepts of third-generation computers (Burroughs 3500), and COBOL programming.
Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 2 semester hours in computer programming, 2 in unit data record processing (2/74). *Version 2:* In the upper-division baccalaureate category, 3 semester hours in computer operations (12/68).

AF-1402-0011

COBOL Programming

Course Number: 3AZR51151-1; AZR68750-1.
Location: 3750th Technical School, Sheppard AFB, TX.
Length: 3 weeks (90 hours).
Exhibit Dates: 10/64-12/73.
Objectives: To train personnel in the techniques of COBOL programming.
Instruction: Lectures and practical exercises in characteristics of Burroughs 3500 computer, and COBOL language structure, coding form, divisions, flowcharting, processing, control cards, declaratives, and programming.
Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in computer programming (12/68).

AF-1402-0012

Programming Technician by Correspondence

Course Number: 51171.
Location: Extension Course Institute, Gunter AFS, AL.
Length: Maximum 52 weeks.
Exhibit Dates: 5/79-4/88.
Objectives: To teach the student to analyze, design, and implement a computer system.
Instruction: This correspondence course includes systems study and objectives, systems survey, analysis of present systems,

and new system design and implementation. Course concludes with a proctored examination.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in systems analysis (9/84).

AF-1402-0013

JOVIAL PROGRAMMING

Course Number: 3AZR68750-3; AZR68750-3.

Location: 3750th Technical School, Sheppard AFB, TX.

Length: 4 weeks (120 hours).

Exhibit Dates: 10/64-12/73.

Objectives: To train officers, airmen, and civilians in the techniques of programming in a high-level language (JOVIAL).

Instruction: Lectures and practical exercises in coding constants, assignment and exchange statements, decision-making statements, compound statements, modifiers, indexing and subscripts, subroutines, and strings and arrays.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in computer programming (12/68).

AF-1402-0014

COMPUTER PRINCIPLES

Course Number: ABR305XX.

Location: 3380th Technical School, Keesler AFB, MS.

Length: 20-21 weeks (600-630 hours).

Exhibit Dates: 10/64-12/68.

Objectives: To train airmen in electricity and electronics fundamentals and in computer principles.

Instruction: Lectures and practical exercises in electricity and electronics fundamentals and computer principles, including DC and AC, resonance, magnetism, motors, synchros, diodes, transistors, and electron tubes; operation, function, and basic mathematical relationships of power supplies, regulators, multivibrators, pulsed and blocking oscillators, AM, FM, and PM modulation and demodulation systems; binary and octal numbers; logic functions; truth tables; Boolean algebra; logic diagrams and circuits; counters and storage devices; digital techniques; transmission lines and antennas; transmitters; wave-guides; cavity resonators; UHF and microwave oscillators and amplifiers; electrical test equipment; computer circuits; coding and memory circuits; electro-mechanical input-output devices; and programming principles.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in electrical laboratory, 3 in digital computer maintenance (2/74).

AF-1402-0015

B 263 COMPUTER PROGRAMMING AND OPERATION
(Computer Operation)

Course Number: 3AZR51150; 3AZR68550; AZR68550.

Location: 3750th Technical School, Sheppard AFB, TX.

Length: 3 weeks (90 hours).

Exhibit Dates: 6/65-12/73.

Objectives: To train enlisted personnel in the basic principles of data processing and computer operations.

Instruction: Lectures and practical exercises in basic data processing and computer operations, including computer components, number systems, flowcharting, stored program instructions, data processing procedures, and Burroughs 263 computer operations.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in computer operation (12/68).

AF-1402-0017

COMPUTER OPERATOR BY CORRESPONDENCE

Course Number: 51150.

Location: Extension Course Institute, Gunter AFS, AL.

Length: Maximum of 52 weeks.

Exhibit Dates: 5/70-10/88.

Objectives: To provide the knowledge necessary to become a computer operator.

Instruction: This correspondence course includes computer systems, computer systems security, safety, supervision and training, unit-record and peripheral equipment, computer systems basics, computer operations, production control, and data processing activities management.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in computer operations, 1 in introduction to data processing. Course concludes with a proctored examination (9/84).

AF-1402-0018

STORE AND FORWARD COMMUNICATIONS SYSTEM COMPUTER PROGRAMMER

Course Number: 3OZR3024D; 3OZR0124-3.

Location: 3380th Technical School, Keesler AFB, MS.

Length: 16-17 weeks (474-510 hours).

Exhibit Dates: 9/66-12/73.

Objectives: To train officers, airmen, and civilians as communications system computer programmers.

Instruction: Lectures and practical exercises in computer principles, computer mathematics, basic programming concepts and techniques, compiler language (COBOL) programming techniques, and theory of real-time programming systems.

Credit Recommendation: In the upper-division baccalaureate category, 5 semester hours in programming (12/68).

AF-1402-0019

COMPUTER OPERATOR
(Data Processing Machine Operator)

Course Number: 3ABR51130; 3ABR68530; ABR68530.

Location: 3750th Technical School, Sheppard AFB, TX.

Length: 9-11 weeks (270-300 hours).

Exhibit Dates: 5/65-12/73.

Objectives: To train enlisted personnel in the operation of digital computers, punched card accounting machines, and collators.

Instruction: Lectures and exercises in card punch operation; alphabetic interpretation; sorting; collating; wiring of control panels; computer components; coding systems; flow charting; stored program instructions; programming language; and computer operations.

Credit Recommendation: In the upper-division baccalaureate category, 4 semester hours in data processing, unit record, or computer operations (12/68).

AF-1402-0020

AUTOMATIC DIGITAL SWITCHING TECHNICIAN

Course Number: 4ALT29530-1.

Location: School of Applied Aerospace Sciences, Sheppard AFB, TX.

Length: 11 weeks (320 hours).

Exhibit Dates: 8/72-12/73.

Objectives: To train airmen in the principles of operation and the operating characteristics of data processing and digital switching equipment.

Instruction: Lectures and practical exercises in the AUTODIN system, messages, and codes; paper tape reader/punch; card reader/punch; magnetic tape equipment; memory units; system operation; service routines; and UNIVAC Set-8 operation.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours as an elective in computers or data processing (3/74).

AF-1402-0022

DIGITAL TECHNIQUES

Course Number: 2ASR30151-4.

Location: 3380th Technical School, Keesler AFB, MS.

Length: 3 weeks (90 hours).

Exhibit Dates: 8/68-12/73.

Objectives: To train enlisted personnel in the principles of digital data processing circuitry.

Instruction: Lectures and practical exercises in digital techniques; review of transistor principles; numbering systems, logic, and Boolean expression; analysis of digital computer circuits; and functional analysis of computers.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in computers (3/74).

AF-1402-0023

ELECTRONIC DIGITAL COMPUTER REPAIRMAN (DISPLAY EQUIP/465L)

Course Number: ABR30533-4.

Location: 3380th Technical School, Keesler AFB, MS.

Length: 15 weeks (450 hours).

Exhibit Dates: 9/64-12/68.

Objectives: To train enlisted personnel to operate, inspect, and maintain electronic data display equipment.

Instruction: Lectures and practical exercises in electronic digital computer data display central equipment operation, inspection, and maintenance procedures, including electronic and data processing principles, digital techniques, circuit logic, maintenance concepts, test routines, malfunction analysis, components isolation and repair, and use of associated aerospace ground equipment.

Credit Recommendation: In the upper-division baccalaureate category, 4 semester hours in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (3/74).

AF-1402-0024

F-111A COMPUTER/NAVIGATION TEST STATION TECHNICIAN

Course Number: 3ALR30174-3.

Location: 3415th Technical School, Lowry AFB, CO.

Length: 12 weeks (360 hours).

Exhibit Dates: 5/68-12/73.

Objectives: To train airmen to perform maintenance and shop repair on computer/navigation test stations.

Instruction: Lectures and practical exercises in digital fundamentals, binary and octal numbers, algebra, logic symbols, functions and circuits, signal flow analysis, equipment operation principles.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in computer operations (3/74).

AF-1402-0030

SAGE Computer Programmer

Course Number: 3OZR0123-1.

Location: 3380th Technical School, Keesler AFB, MS.

Length: 18 weeks (522 hours).

Exhibit Dates: 5/68-12/73.

Objectives: To train officers to perform as SAGE computer programmers.

Instruction: Lectures and practical exercises in the functions of SAGE computer programmers, including computer principles, computer mathematics, programming concepts and compiler language programming techniques, machine language coding, peripheral equipment programming, interpretation of programs, and modification and adoption of existing programs.

Credit Recommendation: In the upper-division baccalaureate category, 5 semester hours in computer programming, 3 in data processing (12/68).

AF-1402-0031

Computer Maintenance Officer

Course Number: 3OLR3061; 3OZR3061.

Location: 3380th Technical School, Keesler AFB, MS.

Length: 12 weeks (360 hours).

Exhibit Dates: 10/71-12/73.

Objectives: To train officers to supervise the maintenance of computers.

Instruction: Lectures and practical exercises in the maintenance of computers, including computer principles, numbering systems, storage principles, basic programming, read/write operations, internal logic of computer, hardware routines, input/output terminal equipment (emphasis on display consoles), and maintenance program development and analysis.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in computer maintenance, 3 in data processing principles (4/74).

AF-1402-0032

Computer Systems Programming Officer, SAGE

Course Number: 3OZR5144-1.

Location: School of Applied Aerospace Sciences, Keesler AFB, MS.

Length: 8 weeks (228-254 hours).

Exhibit Dates: 1/71-12/73.

Objectives: To train officers to program the SAGE system computer.

Instruction: Lectures and practical exercises in SAGE system computer programming, including basic assembly programming, fundamentals of radar, air surveillance, weapons, real-time control, operational program analysis, I/O methods and equipment, program documentation and debugging, and functions of utility, simulation, and data reduction programs.

Credit Recommendation: In the upper-division baccalaureate category, 4 semester hours in computer programming (4/74).

AF-1402-0033

HM4118 Computer Programmer Tactical and Control System

Course Number: 3AZR51151-4.

Location: School of Applied Aerospace Sciences, Keesler AFB, MS.

Length: 12 weeks (360 hours).

Exhibit Dates: 2/73-12/73.

Objectives: To train enlisted personnel who have had training in basic computer programming to operate computers in the tactical air control system.

Instruction: Lectures and practical exercises in the operation of computers in the tactical air control system, including computer system specifications, signal flow analysis, program module function, computer programming, symbolic language, word format and subsystem unit identification, real-time programming, operation of the tactical air control data recording, data reduction, and system software application and assembly.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in computer programming (4/74).

AF-1402-0034

Air Force Integrated Command and Control System Computer Programmer

Course Number: 3OZR5144-2.

Location: 3380th Technical School, Keesler AFB, MS.

Length: 13 weeks (402 hours).

Exhibit Dates: 3/71-12/73.

Objectives: To train officers and airmen to perform as computer programmers on IBM 1410 equipment.

Instruction: Lectures and practical exercises in computer programming on IBM 1410 equipment, including computer principles, basic programming concepts and techniques, assembler language programming, machine language coding, peripheral equipment programming (magnetic disks, line printers, magnetic tapes, display consoles, and miscellaneous input/output devices), data storage files, and program assembly, operation, and debugging.

Credit Recommendation: In the upper-division baccalaureate category, 6 semester hours in computer programming (4/74).

AF-1402-0035

Computer Systems Programming Officer

Course Number: 3OBR5141.

Location: 3750th Technical School, Sheppard AFB, TX.

Length: 12 weeks (360 hours).

Exhibit Dates: 9/70-12/73.

Objectives: To train officers to program computer systems and design automated systems programs.

Instruction: Lectures and practical exercises in computer systems programming and automated systems program design, including programming techniques, computer mathematics, operating principles, flow charting methods and applications, program testing and debugging, machine language programming, assembler language programming, compiler theory and languages (FORTRAN, COBOL and JOVIAL), online and real-time systems, principles of system analysis and design, and management and direction of programming activities.

Credit Recommendation: In the upper-division baccalaureate category, 5 semester hours in computer programming, 2 in business systems analysis (4/74).

AF-1402-0036

1. Data Processing Machine Supervisor
2. Data Processing Machine Supervisor
3. Data Processing Machine Supervisor (Punched Card) (Machine Accounting Supervisor)
4. Data Processing Machine Supervisor (Punched Card) (Machine Accounting Supervisor)

Course Number: *Version 1:* 3AAR68570. *Version 2:* AAR68570. *Version 3:* AAR68570A; AA68270A; AA68270; AA83270. *Version 4:* AAR68570A; AA68270A; AA68270; AA83270.

Location: *Version 1:* 3750th Technical School, Sheppard AFB, TX. *Version 2:* 3750th Technical School, Sheppard AFB, TX. *Version 3:* 3750th Technical School, Sheppard AFB, TX. *Version 4:* 3415th Technical School, Lowry AFB, CO.

Length: *Version 1:* 12 weeks (360 hours). *Version 2:* 12 weeks (360 hours). *Version 3:* 12-14 weeks (360-420 hours); 12-14 weeks (360-420 hours).

Exhibit Dates: *Version 1:* 7/69-12/73. *Version 2:* 5/65-6/69. *Version 3:* 2/54-4/65. *Version 4:* 2/54-4/65.

Objectives: To train noncommissioned officers and enlisted personnel to supervise data processing and computer operations.

Instruction: *All Versions:* Lectures and practical exercises in unit record equipment programming and operation, computer operations and management, data systems analysis and design, collator wiring, and logical analysis. *Version 1:* Instruction includes some introductory business systems analysis.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 1 semester hour in unit record data processing, 2 in data processing management, 2 in business systems analysis (4/74). *Version 2:* In the upper-division baccalaureate category, 4 semester hours in computer operation (12/68). *Version 3:* In the upper-division baccalaureate category, 2 semester hours in office management (12/68). *Version 4:* In the upper-division baccalaureate category, 2 semester hours in office management (12/68).

AF-1402-0037

Programming Specialist

Course Number: 3ABR68730; ABR68730.

Location: 3750th Technical School, Sheppard AFB, TX.

Length: 7-9 weeks (210-240 hours).

Exhibit Dates: 1/64-12/73.

Objectives: To train enlisted personnel in data processing principles and computer programming in a compiler language.

Instruction: Lectures in data processing introduction, including data organization, computer and components, programming logic applications, and COBOL language programming techniques and requirements. Seven-week course includes detailed training in COBOL, including magnetic tape and disk applications. Nine-week course includes basic computer programming and a complete assembly language instruction set.

Credit Recommendation: In the upper-division baccalaureate category, 4 semester hours in computer programming (12/68).

AF-1402-0038

Management/Supervision of a Data Processing Installation (DPI)

Course Number: 3AZR51170.

Location: 3750th Technical School, Sheppard AFB, TX.
Length: 4 weeks (132 hours).
Exhibit Dates: 2/72-12/73.
Objectives: To train enlisted personnel to be computer operations supervisors.
Instruction: Lectures, demonstrations, and practical exercises in data processing activities organization; data processing installation evaluation; production control; security procedures; personnel supervision; and data processing management, including equipment operation and maintenance, storage, supplies, reporting procedures, and facilities management.
Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in data processing management (4/74).

AF-1402-0039

Data Systems Analysis and Design (Officer)

Course Number: 3OZR6854; OZR6834; OTS6854-1.
Location: 3750th Technical School, Sheppard AFB, TX.
Length: 4 weeks (120 hours).
Exhibit Dates: 12/60-12/73.
Objectives: To train officers in data systems analysis and design.
Instruction: Lectures in data systems study preparation, initial survey, interviewing, systems flow charting, analysis of present system resources, decision logic tables, electronic data processing equipment, computer programming introduction, optimum systems design characteristics and design requirements, data system specifications, and proposed system follow-up.
Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in computer systems (12/68).

AF-1402-0040

1. Computer Systems Analysis and Design (Enlisted)
2. Data Systems Analysis and Design (Enlisted)

Course Number: *Version 1:* 3AZR51172. *Version 2:* 3AZR68670; AZR68670; ATS68570B-1.
Location: 3750th Technical School, Sheppard AFB, TX.
Length: *Version 1:* 5 weeks (150 hours). *Version 2:* 4-5 weeks (120-150 hours).
Exhibit Dates: *Version 1:* 12/71-12/73. *Version 2:* 2/61-11/71.
Objectives: To train enlisted personnel in systems analysis and design techniques.
Instruction: Lectures in data systems concepts, systems study techniques, system flow charting, document analysis, item analysis, decision logic tables, system design characteristics, and designing, presenting, and flow charting the proposed system.
Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 3 semester hours in business systems analysis (2/74). *Version 2:* In the upper-division baccalaureate category, 2 semester hours in computer systems (2/74).

AF-1402-0041

Advanced Data Processing Audit Analysis

Course Number: 3OZR6784-1.
Location: 3750th Technical School, Sheppard AFB, TX.
Length: 6 weeks (180 hours).
Exhibit Dates: 3/70-12/73.
Objectives: To train auditors to evaluate automated data systems.
Instruction: Lectures in computer processes review; advanced computer programming techniques; in-depth analysis and evaluation of data systems; computer flow charts; remote input/inquiry language and techniques; COBOL programming; and audit theory, tools, and techniques.
Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in data processing principles, 2 in computer programming (4/74).

AF-1402-0042

Auditing Data Processing Systems

Course Number: 3OZR6784.
Location: 3750th Technical School, Sheppard AFB, TX.
Length: 3-4 weeks (90-108 hours).
Exhibit Dates: 8/68-12/73.
Objectives: To train auditors to audit and evaluate operational automated data processing systems.
Instruction: Lectures and laboratory in automated data processing systems concepts, flow charting, computer programming techniques, computer processes, computer assisted audit techniques, and automated data processing equipment.
Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in data processing principles (4/74).

AF-1402-0043

IDHS 1410 FFS Operations and Specifications II

Course Number: 3AZR20450-3.
Location: 3415th Technical School, Lowry AFB, CO.
Length: 3 weeks (90 hours).
Exhibit Dates: 1/70-12/73.
Objectives: To train enlisted personnel to structure and maintain a data file and to retrieve records using a data management system.
Instruction: Lectures in file structuring, file maintenance, data retrieval, output card specifications, conditional and computation statements, extracting an output mode, correction and analysis of output computer run, and operational concepts of IBM 1410 system.
Credit Recommendation: In the upper-division baccalaureate category, 1 semester hour in computer programming (4/74).

AF-1402-0044

Automated Systems Program Designer

Course Number: 3OZR5141-1.
Location: 3750th Technical School, Sheppard AFB, TX.
Length: 12 weeks (360 hours).
Exhibit Dates: 9/71-12/73.
Objectives: To train officers as computer systems programming officers and automated systems program designers.
Instruction: Lectures and practical exercises in the design and programming of business data systems, including fundamentals of computer programming, machine and assembler language programming, compiler theory and higher-level languages using FORTRAN IV and COBOL, computer mathematics, use of magnetic tape files and disk files, and basic JOVIAL procedures.
Credit Recommendation: In the upper-division baccalaureate category, 3 in computer programming — assembler language, 3 in computer programming — compiler languages (FORTRAN and COBOL), 3 in systems analysis (7/74).

AF-1402-0046

Computer Systems Operations Officer
(Data Automation Officer)
(Electronic Data Processing Officer)

Course Number: 3OBR5151; 3OBR6851; OBR6851.
Location: 3750th Technical School, Sheppard AFB, TX.
Length: 8-11 weeks (240-330 hours).
Exhibit Dates: 9/58-12/73.
Objectives: To train officers to manage electronic data processing activities.
Instruction: Lectures and practical exercises in the management of electronic data processing activities and punched-card equipment, including data representation, computer components, assembler language programming, compiler languages, data communications, system characteristics of advanced computer systems, production control, advanced computer hardware and software, card punch and associated equipment, electrical accounting machines, data systems analysis, design and implementation, and personnel management.
Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in computer programming and management (12/68).

AF-1402-0048

Computer Systems Programming Officer

Course Number: 3OBR0121.
Location: 3380th Technical School, Keesler AFB, MS.
Length: 16 weeks (656 hours).
Exhibit Dates: 12/69-12/73.
Objectives: To train officers to program electronic digital computer systems.
Instruction: Lectures and practical exercises in programming electronic digital computer systems, including flow diagramming; preparation, assembly, operation, and correction of compiler language (FORTRAN, JOVIAL, and COBOL) and assembler language programs; input/output equipment; interrogating typewriters; line printers; magnetic tapes, disks, and drums; display devices; advanced concepts of multi-programming, time-sharing, and real-time; principles of computer system management and development of a complete medium-scale programming system.
Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in principles of data processing, 3 in computer programming—assembler, 3 in computer programming—FORTRAN, 3 in computer programming—COBOL (7/74).

AF-1402-0049

Advanced COBOL Programming Techniques

Course Number: 3AZR68770-1.
Location: 3750th Technical School, Sheppard AFB, TX.
Length: 3 weeks (90 hours).
Exhibit Dates: 10/70-12/73.
Objectives: To train officers and airmen to program at an advanced level using COBOL language.
Instruction: Lectures and practical exercises in programming using COBOL language, including multiprogramming and multiprocessing, B 3500 computer system, segmentation, sequential file organization, table handling, immediate-access storage de-

vices, disk file organization, B 3500 library, sorting, debugging aids, programming applications, data communications, and B 3500 software.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in computer programming (12/68).

AF-1402-0050

Electronic Computer Systems Supervisor/Technician

Course Number: 3AAR30500.

Location: 3380th Technical School, Keesler AFB, MS.

Length: 47–52 weeks (1410–1500 hours).

Exhibit Dates: 4/70–12/73.

Objectives: To train enlisted personnel as electronic computer and data processing maintenance superintendents.

Instruction: Lectures and practical exercises in duties of electronic computer and data processing maintenance superintendents, including basic mathematics, algebra, logarithms, imaginary numbers, trigonometric functions; DC and AC circuit analysis, vacuum tube and solid-state devices, semiconductors, power supplies and oscillators; principles of electronic computers, numbering systems, logic circuits and Boolean algebra; counters and storage devices, timing, and computer language; indicators, generators, motors, and synchros and servo systems; personnel and maintenance management; and flow charting and programming, memory systems, central computer analysis, input/output control, magnetic drums, discs, tape units, printers and readers, keyboard assembly, data display, message processor, printout interpretation, data processor, electromagnetic compatibility, and systems analysis.

Credit Recommendation: In the upper-division baccalaureate category, 6 semester hours in computer principles, and 2 in maintenance management (7/74).

AF-1402-0051

BUIC Systems Computer Programmer

Course Number: 3OZR5144.

Location: 3380th Technical School, Keesler AFB, MS.

Length: *Version 1:* 10 weeks (300–302 hours). *Version 2:* 8 weeks (240 hours).

Exhibit Dates: *Version 1:* 7/72–12/73. *Version 2:* 1/71–6/72.

Objectives: To train enlisted personnel as computer programmers on the BUIC systems computer.

Instruction: Lectures and practical exercises in computer programming. Course includes computer mathematics, assembly language programming, program terminal devices, and program maintenance.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 3 semester hours in principles of data processing, 3 in assembly language programming (7/74); *Version 2:* In the upper-division baccalaureate category, 3 semester hours in principles of data processing, 2 in assembly language programming (7/74).

AF-1402-0052

BUIC III Computer Programmer

Course Number: 2OSR0123-3.

Location: 3380th Technical School, Keesler AFB, MS.

Length: 18 weeks (540 hours).

Exhibit Dates: 12/67–12/73.

Objectives: To train enlisted personnel to perform as computer programmers in the BUIC III system.

Instruction: Lectures and practical exercises in computer programming, including computer principles, basic programming concepts and techniques, central processor programming, I/O programming, program maintenance testing, and compiler language techniques.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in computer programming in the field of computer sciences (12/68).

AF-1402-0053

Advanced Data Automation Analysis and Design

Course Number: 3OZR6854-1; 3OZR6855-1.

Location: 3750th Technical School, Sheppard AFB, TX.

Length: 4 weeks (120 hours).

Exhibit Dates: 9/67–12/73.

Objectives: To train personnel in advanced data automation analysis and design.

Instruction: Lectures and practical exercises in advanced automation analysis and design, including capabilities and limitations of EDPE, data systems concepts, preparation for a systems study, survey of present systems study, analysis of the present system, design of a proposed system, and follow-up of proposed system.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in computer programming and systems analysis (12/68).

AF-1402-0055

Operation and Maintenance of UNIVAC 1218 Computer

Course Number: AZR31672H-1.

Location: 3345th Technical School, Chanute AFB, IL.

Length: 10 weeks (300 hours).

Exhibit Dates: 4/67–12/68.

Objectives: To train airmen to operate, program, troubleshoot, and maintain UNIVAC 1218 digital computers.

Instruction: Lectures and practical exercises in operation, programming, troubleshooting, and maintenance of UNIVAC 1218 digital computers, including block diagramming, computer logic, analysis of computer components and circuitry, computer arithmetic section, input/output section, wire-wrapping techniques, and computer memory section analysis.

Credit Recommendation: In the upper-division baccalaureate category, 4 semester hours in computer operation in the field of data processing (12/68).

AF-1402-0057

Store and Forward Communications System Computer Programmer

Course Number: 3OZR0123-3; OZR0123-3.

Location: 3380th Technical School, Keesler AFB, MS.

Length: 17 weeks (510 hours).

Exhibit Dates: 9/66–12/73.

Objectives: To train officers to program real-time command and control systems using a compiler language (JOVIAL).

Instruction: Lectures and practical exercises in programming real-time command and control systems using a compiler language (JOVIAL). Topics include introduction to computers and computer terminology, binary and octal mathematics, coding schemes, computer elements and system organization, flow charting, information organization and storage, data retrieval and manipulation, digital techniques (computer logic, digital devices, Boolean algebra), and extensive programming in JOVIAL language, including input/output operations, symbology, various conventions and techniques, and analysis and debugging of programs.

Credit Recommendation: In the upper-division baccalaureate category, 5 semester hours in computer programming in the field of computer science (12/68).

AF-1402-0058

1. Command and Control Systems Computer Programmer
2. Command and Control Systems Computer Programmer
   (Weapon Support Systems Computer Programmer)

Course Number: *Version 1:* 3OZR0124-2. *Version 2:* OZR0123; OZR0005; OZR0076.

Location: 3380th Technical School, Keesler AFB, MS.

Length: *Version 1:* 16 weeks (474 hours). *Version 2:* 15 weeks (450–480 hours).

Exhibit Dates: *Version 1:* 10/69–12/73. *Version 2:* 6/61–9/69.

Objectives: To train officers to program command and control systems computers.

Instruction: Lectures and practical exercises in computer principles, computer mathematics, Boolean logic, flow chart design and analysis, machine language and computer language programming, program maintenance and testing, and data reduction techniques.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 3 semester hours in principles of data processing, 3 in computer programming—assembler, and 3 in computer programming—compiler (7/74)/ *Version 2:* In the upper-division baccalaureate category, 5 semester hours in computer science or computer programming (12/68).

AF-1402-0060

Base Level Military Personnel System (BLMPS), Phase II

(Base Level Military Personnel System (BLMPS)/Personnel Data System (PDS) Work Center Operations, Phase II)

(BLMPS/PDS Work Center Operations, Phase II)

Course Number: 3AZR73270-6.

Location: 3380th Technical School, Keesler AFB, MS; School of Applied Aerospace Sciences, Keesler AFB, MS.

Length: 3–4 weeks (102 hours).

Exhibit Dates: 7/72–12/73.

Objectives: To train enlisted personnel to perform as operators of the Phase II Base Level Military Personnel System (BLMPS).

Instruction: Lectures and practical exercises in the operation of the Phase II BLMPS, including PDS; card formats; edits; the weighted-data reporting system; operation of data communications system equipment; data maintenance techniques; and direct English statement information system.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in introduction to computer science (7/74).

AF-1402-0061

BUIC Computer Programming

Course Number: *Version 1:* 3AZR68770-2. *Version 2:* 3AZR27370-D.

Location: 3380th Technical School, Keesler AFB, MS.
Length: *Version 1:* 15 weeks (450 hours). *Version 2:* 18 weeks (534 hours).
Exhibit Dates: *Version 1:* 1/71-12/73. *Version 2:* 3/70-12/70.
Objectives: To train noncommissioned officers to perform as BUIC III computer programmers.
Instruction: Lectures and practical exercises in the skills necessary to perform as BUIC III computer programmers. Course includes computer principles, computer mathematics, basic programming concepts and techniques, BUIC assembler language programming, BUIC compiler language programming, analysis of the BUIC system equipment training, and preparation, assembly, and debugging of assembler and compiler language programs.
Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 4 semester hours in principles of data processing, 4 in assembly language (7/74). *Version 2:* In the upper-division baccalaureate category, 3 semester hours in programming in the field of computer science (12/68).

AF-1402-0062

Digital Computer Principles
Course Number: 3AZR34250.
Location: School of Applied Aerospace Sciences, Chanute AFB, IL.
Length: 7 weeks (280 hours).
Exhibit Dates: 7/73-12/73.
Objectives: To train enlisted personnel to apply digital computers to flight simulation.
Instruction: Lectures and practical exercises in the application of digital computers to flight simulation. Course includes computer mathematics, flow charting, computer programming fundamentals, input/output devices, memory and arithmetic units, and utility programs.
Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in principles of data processing, 3 in computer architecture (7/74).

AF-1402-0064

Automated Systems Analyst
(Management Support Systems)
Course Number: 3OZR0678-2.
Location: 3750th Technical School, Sheppard AFB, TX.
Length: 4 weeks (120 hours).
Exhibit Dates: 9/67-12/68.
Objectives: To train selected officers to analyze and use data systems.
Instruction: Lectures and practical exercises in the techniques of analysis and use of automated data systems. Course includes techniques for conducting a data systems study, flow charting, data analysis, application of automatic data processing equipment, and systems implementation.
Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in computer programming (12/68).

AF-1402-0065

Programming Specialist by Correspondence
Course Number: 51151.
Location: Extension Course Institute, Gunter AFS, AL.
Length: Maximum of 52 weeks.
Exhibit Dates: 4/79-10/87.
Objectives: To train the student in computer programming logic, fundamentals, and design.
Instruction: This correspondence course includes computer systems security, supervision, and training, safety, computer systems components, data representation and number conversion, flow charting, IBM 360 assembler, COBOL and FORTRAN programming, top down design, documentation, testing and analysis, and computer systems management.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in computer programming. Course concludes with a proctored examination (9/84).

AF-1402-0066

Automated Systems Analyst
(Management Support Systems)
Course Number: 3AZRO6789-2.
Location: 3750th Technical School, Sheppard AFB, TX.
Length: 5 weeks (150 hours).
Exhibit Dates: 9/67-12/73.
Objectives: To train enlisted personnel as automated systems analysts.
Instruction: Lectures and practical exercises in data systems analysis. Course includes data systems concepts, systems analysis, equipment and communications concepts, computer programming techniques, and systems design and implementation.
Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in computer programming and systems analysis (12/68).

AF-1402-0068

Computer Operations Supervisor by Correspondence
Course Number: 51170.
Location: Extension Course Institute, Gunter AFS, AL.
Length: Maximum of 52 weeks.
Exhibit Dates: 2/83-4/88.
Objectives: To teach the student to become a computer operations supervisor.
Instruction: This correspondence course includes computer systems, computer principles, computer preparation and operation, data processing activities management, and program and data management.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in computer operations and management. Course concludes with a proctored examination (9/84).

AF-1402-0069

Maintenance Systems Analysis Specialist by Correspondence
Course Number: 39150.
Location: Extension Course Institute, Gunter Air Force Station, AL.
Length: Maximum 52 weeks.
Exhibit Dates: 2/84-Present.
Learning Outcomes: Upon completion of this course the student will have knowledge of concepts of maintenance management, oral and written communications, fundamentals of statistics and statistical analysis, data collection and reporting and data processing.
Instruction: Topics covered include maintenance management, oral and written communications, fundamentals of statistics, statistical analysis, probability distributions, correlation, data collection and reporting and data processing.
Credit Recommendation: In the vocational certificate category, 5 semester hours in maintenance management, and 1 in data processing (2/87); in the lower-division baccalaureate/associate degree category, 2 semester hours in business communications or technical writing, and 2 in statistics (2/87).

AF-1402-0070

Information Systems Operator by Correspondence
Course Number: 49151.
Location: Extension Course Institute, Gunter AFS, AL.
Length: Maximum 52 weeks.
Exhibit Dates: 6/86-Present.
Learning Outcomes: At the conclusion of this course the student will understand the safety, security and maintenance issues in computer center installation, understand data processing terminology and have a working knowledge of computer equipment concepts and operation of a computer room, and know the concepts of the Air Force's automated communications system.
Instruction: This course provides the student with a working knowledge of the production control and computer room functions of a computer facility. Topics include data processing terminology, storage media and equipment concepts, library management, and production control functions; also covered is an overview of the Air Force's automated communication system.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in introduction to computers or introduction to data processing (2/87).

AF-1402-0071

Information Systems Programming Specialist by Correspondence
Course Number: 49152.
Location: Extension Course Institute, Gunter Air Force Station, AL.
Length: Maximum 52 weeks.
Exhibit Dates: 6/86-Present.
Learning Outcomes: At the conclusion of this course the student will understand the safety and security issues in computer operations; understand data processing terminology; know how data is stored in computers; know flowcharting techniques; be able to code elementary assembly language, COBOL and FORTRAN programs; understand system analysis and design concepts; understand the programming cycle.
Instruction: This course provides the student with a working knowledge of data processing concepts and terminology, flowcharting techniques, the programming function, the assembler, COBOL and FORTRAN programming languages, and the systems analysis and design function.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in introduction to computers or introduction to data processing or introduction to computer programming (2/87).

AF-1402-0072

Fundamental Principles of Electronic Data Processing Equipment by Correspondence
Course Number: 5123.
Location: Extension Course Institute, Gunter Air Force Station, AL.
Length: Maximum 52 weeks.
Exhibit Dates: 3/83-Present.
Learning Outcomes: At the conclusion of this course the student will have an under-

standing of data processing terminology and concepts.

Instruction: This course covers data processing terminology and programming concepts. A survey of the COBOL and FORTRAN programming languages is presented.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in introduction to data processing or introduction to computer programming (2/87).

AF-1402-0073

Apprentice Operations Resource
Management Specialist by
Correspondence

Course Number: 27132.

Location: Extension Course Institute, Gunter Air Force Station, AL.

Length: Maximum 52 weeks.

Exhibit Dates: 12/86–Present.

Learning Outcomes: Upon completion of the course, the student will have a basic level of understanding of duties related to an entry level in flight operations management. The ability to prepare and retain historical documents with minimal direct supervision will have been achieved.

Instruction: The course consists of self-paced, independent study with open-book progress checks and satisfactory completion of a proctored comprehensive final examination. Content areas include introduction to tasks related to administrative control and accountability of flight records. Topics include aircrew schedule and training, aircraft schedule, and data processing.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in introduction to data processing and 1 in clerical procedures (business) (12/89).

AF-1403-0002

Administration Management
Specialist by Correspondence

Course Number: 70250A.

Location: Extension Course Institute, Gunter AFS, AL.

Length: Maximum 52 weeks.

Exhibit Dates: 11/84–5/87.

Objectives: To provide specialty knowledge of the administrative career field, particularly in the area of the management and processing of internal documentation.

Instruction: The course instructs administrative management specialists in all aspects of internal document processing, including the objectives of such documents, preparation procedures, storage and distribution, updating of records and the impact of the Privacy and Freedom of Information Acts on specific documents.

Credit Recommendation: In the vocational certificate category, 3 semester hours in office procedures (10/85).

AF-1403-0003

Staff Support Administration
Specialist by Correspondence

Course Number: 70250B.

Location: Extension Course Institute, Gunter AFS, AL.

Length: Maximum 52 weeks.

Exhibit Dates: 11/84–4/87.

Objectives: To provide specialty knowledge of the administrative career field, particularly in the area of processing internal documentation.

Instruction: The course instructs administrative support specialists in all aspects of internal document processing, including the documents, preparation procedures, storage and distribution, updating of records and the impact of the Privacy and Freedom of Information Acts on specific documents.

Credit Recommendation: In the vocational certificate category, 3 semester hours in office procedures (10/85).

AF-1403-0004

Unit Orderly Room Administration
Specialist by Correspondence

Course Number: 70250C.

Location: Extension Course Institute, Gunter AFS, AL.

Length: Maximum 52 weeks.

Exhibit Dates: 11/84–4/87.

Objectives: To provide specialty knowledge of the administrative career field, particularly in the area of processing internal documentation.

Instruction: The course instructs administrative support specialists in all aspects of internal document processing, including the objectives of such documents, preparation procedures, storage and distribution, updating of records and the impact of the Privacy and Freedom of Information Acts on specific documents.

Credit Recommendation: In the vocational certificate category, 3 semester hours in office procedures (10/85).

AF-1404-0004

Apprentice Telecommunications
Operations Specialist by
Correspondence

Course Number: 29130.

Location: Extension Course Institute, Gunter Air Force Station, AL.

Length: Maximum 52 weeks.

Exhibit Dates: 2/85–6/89.

Learning Outcomes: At the conclusion of this course the student will have a good working knowledge of the Air Force communications systems, protocols, communication equipment, message formats, procedures, and security provisions.

Instruction: This is a comprehensive course on the methods, protocols, procedures, formats, data classifications, and use of equipment for communications. Special attention is given to the operating characteristics of a wide range of telecommunications equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in data processing, and 1 in telecommunications (2/87).

AF-1405-0001

Base Supply Management

Course Number: 550.

Location: School of Systems and Logistics, Wright-Patterson AFB, OH.

Length: 3 weeks (120 hours).

Exhibit Dates: 1/70–6/74.

Objectives: To provide warrant officers and civilian personnel with training in the principles and procedures of resource management.

Instruction: Lectures and workshops in the principles of resource management, including logistic policies and processes, data processing, weapons system acquisition, equipment management, personnel management, maintenance and procurement procedures within supply organizations, and a logistic management exercise.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in supply management (2/74); in the upper-division baccalaureate category, 1 semester hour in supply management (2/74).

AF-1405-0003

Logistics Specialist

Course Number: 3ALR66130.

Location: 3415th Technical School, Lowry AFB, CO.

Length: 6 weeks (180 hours).

Exhibit Dates: 1/70–12/73.

Objectives: To train airmen in the management and control of material support functions and activities.

Instruction: Lectures and practical exercises in the management and control of supply, maintenance, transportation, procurement, and production functions at command and base levels; financial management; and employment and phase-out of weapon systems.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in supply management (12/68).

AF-1405-0006

Medical Supply Officer

Course Number: None.

Location: School of Aviation Medicine, Gunter AFB, AL.

Length: 7 weeks (273 hours).

Exhibit Dates: 10/55–12/68.

Objectives: To train officers of the Medical Service Corps as base and unit medical supply officers, with emphasis on efficient management and economical use of personnel, materiel, and facilities.

Instruction: Lectures on medical supply service organization; inventory management, including requisition, stock control, requirements determination, and related accounting for medical equipment and supplies; and medical administration.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in supply management (12/68).

AF-1405-0007

Logistics Management

Course Number: 580.

Location: School of Systems and Logistics, Wright-Patterson AFB, OH.

Length: 4–5 weeks (117–135 hours).

Exhibit Dates: 3/69–6/74.

Objectives: To train officer and civilian personnel in logistics management principles.

Instruction: Lectures in logistics introduction; economics and national defense; logistics planning theory; integrated logistics support; stock control and distribution systems; basic statistics; logistics management techniques; problem solving and decision analysis; group dynamics; gaming and simulation; maintenance, transportation, procurement, and financial management; and current and future developments in logistics.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in survey of logistics (6/74).

AF-1405-0008

Supply Operations Officer
(Supply Officer)

Course Number: 3OBR6421-1; OBR6421; OB6421.

Location: 3415th Technical School, Lowry AFB, CO; 3320th Technical School, Amarillo AFB, TX; 3450th Technical School, Warren AFB, WY.

Length: 8-12 weeks (234-360 hours).

Exhibit Dates: 2/54-12/73.

Objectives: To train officers in supply management practices and procedures.

Instruction: Lectures and practical exercises in materials management and control principles; technical aspects of reference data and inventory record keeping; supply organization; warehousing methods; cataloging; and supplies and equipment receiving, storage, and distribution procedures.

Credit Recommendation: In the upper-division baccalaureate category, 4 semester hours in supply management (12/68).

AF-1405-0011

Inventory Management Supervisor

Course Number: AAR64570.

Location: 3320th Technical School, Amarillo AFB, TX.

Length: 5-7 weeks (150-210 hours).

Exhibit Dates: 12/59-7/68.

Objectives: To train airmen to perform as inventory management supervisors.

Instruction: Lectures and practical exercises in inventory management supervision, including personnel relations, supply systems, equipment and maintenance management, demand processing, equipment transfer, requisitioning and inventory, stock maintenance, processing of receipts, use of automatic data processing for item accounting, and inventory transactions. Includes property accounting, communications, budget preparation, and data elements, codes, and formats.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in supply management (12/68).

AF-1405-0013

Materiel Facilities Specialist by Correspondence

Course Number: 64551.

Location: Extension Course Institute, Gunter AFS, AL.

Length: Maximum 52 weeks.

Exhibit Dates: 12/84-Present.

Objectives: This course provides the student with the basic fundamentals of materiel supply systems, inspection and equipment handling operations and the storing and issuing of supplies.

Instruction: Instruction cover security operations, materiel sources, storage and distribution systems and records control. Documentation, storage procedures and the proper selection of materials handling equipment are also discussed.

Credit Recommendation: In the vocational certificate category, 3 semester hours in materials handling and inventory control (2/87).

AF-1405-0014

Base Procurement Officer

Course Number: 3OZR6531.

Location: 3415th Technical School, Lowry AFB, CO.

Length: 2 weeks (72 hours).

Exhibit Dates: 7/70-12/73.

Objectives: To train commissioned officers to perform as base procurement officers.

Instruction: Lectures and practical exercises in procurement procedures and practices. Course includes organization; nonappropriated funds; purchase requests; imprest funds; contracting for supplies, services, construction, and engineering; and contract administration.

Credit Recommendation: In the upper-division baccalaureate category, 1 semester hour in purchasing and contracting (6/74).

AF-1405-0015

Central Procurement Officer

Course Number: 3OBR6531-3.

Location: School of Applied Aerospace Sciences, Lowry AFB, CO; 3415th Technical School, Lowry AFB, CO.

Length: 6-9 weeks (168-270 hours).

Exhibit Dates: 4/70-12/73.

Objectives: To train personnel as systems procurement officers.

Instruction: Lectures and practical exercises in systems procurement, including procurement and production fundamentals; procurement methods and management; specialized training in base, central, contract, systems, and research and development procurement; procurement by advertising and negotiating; interdepartmental and coordinated procurement; organization and policy formulation; precontract analysis; and postcontract functions.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in purchasing management (6/74).

AF-1405-0016

Systems Procurement Officer

Course Number: 3OZR6531-3.

Location: 3415th Technical School, Lowry AFB, CO; School of Applied Aerospace Science, Lowry AFB, CO.

Length: 3 weeks (90-104 hours).

Exhibit Dates: 6/69-12/73.

Objectives: To train personnel as systems procurement officers.

Instruction: Lectures and practical exercises on systems procurement, including procurement and production fundamentals, procurement methods and management; specialized training in base, central, contract, systems, and research and development procurement; procurement by advertising and negotiating; interdepartmental and coordinated procurement; organization and policy formulation; precontract analysis; and postcontract functions.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in purchasing management (6/74).

AF-1405-0017

Systems Procurement Officer

Course Number: 3OBR6531-5.

Location: 3415th Technical School, Lowry AFB, CO.

Length: 8 weeks (240 hours).

Exhibit Dates: 7/70-12/73.

Objectives: To train commissioned officers in procurement systems and functions.

Instruction: Lectures and practical exercises in procurement systems and operations. Course includes principles of system procurement, system program management, system life cycle, system program documentation, and programming and financial management.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in purchasing management (6/74).

AF-1405-0018

Apprentice Materiel Facilities Specialist by Correspondence

Course Number: 64531.

Location: Extension Course Institute, Gunter AFS, AL.

Length: Maximum 52 weeks.

Exhibit Dates: 12/84-Present.

Learning Outcomes: Upon completion of this course the student will have knowledge of the standard base supply system, receiving and materials handling operations and storage function.

Instruction: The instruction in this course provides an introduction to the supply distribution system, supply publications, supply classifications; property receipt procedures, internal and external records; material handling principles and equipment; pickup and delivery functions; storage functions; material locator system; inventory procedures, special storage procedures; and shipments and transfers.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in materials handling (10/85).

AF-1405-0019

1. Motor Vehicle Management Officer
2. Motor Vehicle Maintenance Officer
3. Motor Vehicle Maintenance Officer

Course Number: *Version 1:* 3OBR6021. *Version 2:* OBR4721. *Version 3:* OBR4721.

Location: 3345th Technical School, Chanute AFB, IL. *Version 1:* School of Applied Aerospace Sciences, Chanute AFB, IL.

Length: *Version 1:* 6-7 weeks (210-268 hours). *Version 2:* 6 weeks (180 hours). *Version 3:* 8-9 weeks (240-270 hours).

Exhibit Dates: *Version 1:* 7/68-12/73. *Version 2:* 3/67-6/68. *Version 3:* 2/61-2/67.

Objectives: To train officers to perform as motor vehicle management or maintenance officers.

Instruction: *All Versions:* Lectures and practical exercises in motor vehicle management or maintenance, including personnel administration, supervision, and training; miscellaneous vehicular equipment; and shop procedures, including budgeting. *Version 1:* Includes motor vehicle operation.

AF-1405-0032

Central Procurement Officer

Course Number: 3OZR6531-1.

Location: 3415th Technical School, Lowry AFB, CO.

Length: 3–4 weeks (90–120 hours).

Exhibit Dates: 6/69–12/73.

Objectives: To train selected enlisted personnel as central procurement officers.

Instruction: Lectures and practical exercises in the duties of a central procurement officer. Course includes government contracting policies and procedures, purchase requests, procurement planning, documentation, procurement sources, evaluation of offers, cost and price analysis, contract award, and modification and termination.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in procurement (8/74).

AF-1405-0033

Materiel Facilities Supervisor by Correspondence

Course Number: 64571.

Location: Extension Course Institute, Gunter AFS, AL.

Length: Maximum 52 weeks.

Exhibit Dates: 10/83–Present.

Objectives: This course is a comprehensive coverage of the operational and supervisory functions of a supply distribution system. It emphasizes the importances of a computer system for purchasing, storing, controlling and distributing materiels.

Instruction: This course covers supply sources, correspondence, requisitions support services, inventory controls, storage facilities and equipment and hazardous materiels. Included also are management and supervisory responsibilities, computerizing control systems, and documentation.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in materiels management (10/85); in the upper-division baccalaureate category, 3 semester hours in material control systems (10/85).

AF-1405-0034

Fuel Supply Officer

Course Number: OTS6451-1.

Location: 3320th Technical School, Amarillo AFB, TX.

Length: 5 weeks (150 hours).

Exhibit Dates: 8/58–12/68.

Objectives: To train personnel as fuel supply officers.

Instruction: Lectures and practical exercises in the supervision of fuel supply activities, including duties and responsibilities of fuel supply officers; characteristics of petroleum products and fuel-handling safety; fuel accounting procedures; estimation of fuel requirements; inspection, operation, and operator maintenance of receiving, storing, and dispensing systems and packaged products facilities; commercial and military pipelines; inspection and operator maintenance of vehicular equipment; fueling and defueling of aircraft; coordination of fuel supply functions; tank cleaning; and control of quantity and quality.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in handling and storage of petroleum products (12/68).

AF-1405-0035

Initial Provisioning

Course Number: 150.

Location: School of Systems and Logistics, Wright-Patterson AFB, OH.

Length: 3 weeks (90 hours).

Exhibit Dates: 4/70–6/74.

Objectives: To train supply and maintenance personnel in initial provisioning.

Instruction: Lectures and practical exercises in initial provisioning, including basic principles of logistics, the provisioning process, responsibilities of other commands and agencies, functions of initial provisioning, advancements in initial provisioning, and initial provisioning under the Air Force advanced logistics system master plan.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in supply management (8/74); in the upper-division baccalaureate category, 1 semester hour in supply management (8/74).

AF-1405-0036

Research and Development Procurement Officer

Course Number: 3OZR6531-4.

Location: School of Applied Aerospace Sciences, Lowry AFB, CO.

Length: 3 weeks (78–104 hours).

Exhibit Dates: 6/69–12/73.

Objectives: To train commissioned officers to serve as research and development procurement officers.

Instruction: Lectures and practical exercises in the duties of a research and development officer. Course includes acquisition methods, patents, source selection procedures, solicitation requirements, proposal evaluations, and negotiations and contract administration.

Credit Recommendation: In the upper-division baccalaureate category, 1 semester hour in supply management (8/74).

AF-1405-0037

Systems Procurement Officer

Course Number: 3OBR6531-5.

Location: School of Applied Aerospace Sciences, Lowry AFB, CO. *Version 2:* 3415th Technical School, Lowry AFB, CO.

Length: *Version 1:* 6 weeks (168 hours). *Version 2:* 8–9 weeks (240–270 hours).

Exhibit Dates: *Version 1:* 9/72–12/73. *Version 2:* 4/70–8/72.

Objectives: To train officers as systems procurement officers.

Instruction: *All Versions:* Lectures and practical exercises in procurement fundamentals and system program management. *Version 1:* Course includes life-cycle phases, system program office functions, advanced planning, negotiated procurement, source selection, contracting for a major system, contract administration functions, and production surveillance. *Version 2:* Course includes statutes and publications governing procurement, procurement and production authorities and delegation, formal advertising and negotiation, procurement management, fundamentals of procurement and production, system life-cycle phases, system programming, program documentation, system contracting, and evaluation of contractor performance.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 3 semester hours as an elective in procurement or management (8/74). *Version 2:* In the upper-division baccalaureate category, 5 semester hours as an elective in procurement or management (8/74).

AF-1405-0038

BASE PROCUREMENT OFFICER

Course Number: 3OBR6531-2.

Location: *Version 1:* School of Applied Aerospace Sciences, Lowry AFB, CO. *Version 2:* 3415th Technical School, Lowry AFB, CO.

Length: *Version 1:* 5 weeks (165 hours). *Version 2:* 7-9 weeks (222-252 hours).

Exhibit Dates: *Version 1:* 11/72-12/73. *Version 2:* 4/70-10/72.

Objectives: To train officers to perform as base procurement officers.

Instruction: *All Versions:* Lectures and practical exercises in the fundamentals, policies, and procedures of procurement. *Version 1:* Course includes procurement fundamentals, formal advertising and negotiation, specialized procurement procedures and administration. *Version 2:* Course includes statutes and publications governing procurement, procurement and production authorities and delegations, programming, budgeting and funding, value engineering, quality assurance, disputes and appeals, formal advertising, and negotiation; procurement management; base procurement organization; vendor-procurement personnel relationship; types of base procurement contracts; and contract administration.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 3 semester hours in procurement or purchasing (8/74). *Version 2:* In the upper-division baccalaureate category, 5 semester hours in procurement or purchasing (8/74).

AF-1405-0039

LOGISTICS PLANNER

Course Number: 3AZR66000.

Location: 3415th Technical School, Lowry AFB, CO.

Length: 6 weeks (156 hours).

Exhibit Dates: 7/72-12/73.

Objectives: To train enlisted personnel to serve as logistics planners for supply, maintenance, transportation, procurement, and service functions.

Instruction: Lectures and practical exercises in logistics planning for supply, maintenance, transportation, procurement, and service functions. Course includes introduction to logistics planning, programming and budgeting management of war reserve materiel, and mobility concepts and procedures.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in logistics (8/74).

AF-1405-0040

CHIEF OF SUPPLY MANAGEMENT

Course Number: 3OZR6411.

Location: 3415th Technical School, Lowry AFB, CO.

Length: 3 weeks (90 hours).

Exhibit Dates: 5/71-12/73.

Objectives: To train selected commissioned officers to perform as supply managers.

Instruction: Lectures and practical exercises in the management of supply functions. Course includes supply management responsibilities, repair cycles, bench stock, materiel facilities, equipment management, stock control, stock funds, data analysis, fuels and munitions.

Credit Recommendation: In the upper-division baccalaureate category, 1 semester hour in supply management (8/74).

AF-1405-0043

RESEARCH AND DEVELOPMENT PROCUREMENT OFFICER

Course Number: 3OBR6531-6.

Location: School of Applied Aerospace Sciences, Lowry AFB, CO; 3415th Technical School, Lowry AFB, CO.

Length: 6-9 weeks (180-258 hours).

Exhibit Dates: 4/70-12/73.

Objectives: To train selected commissioned officers to perform duties in the procurement of research and development services.

Instruction: Lectures and practical exercises in the procurement of research and development services. Course includes fundamentals of procurement and production; planning, programming and budgeting; processing of purchase requests; evaluation of proposals and work statements; technical coordination; funding; and selection of contracts.

Credit Recommendation: In the vocational certificate category, 2 semester hours in research and development procurement (8/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in research and development procurement (8/74); in the upper-division baccalaureate category, 2 semester hours in research and development procurement (8/74).

AF-1405-0045

1. MEDICAL MATERIEL SUPERVISOR (B-3500)
2. MEDICAL MATERIEL SUPERVISOR
3. MEDICAL MATERIEL SUPERVISOR

Course Number: *Version 1:* 3AZR71570. *Version 2:* AAR91570-1; AAR91570; AAR90671. *Version 3:* AA90671.

Location: *Version 1:* School of Health Care Sciences, Sheppard AFB, TX. *Version 2:* Medical Service School, Sheppard AFB, TX; *Version 2:* Medical Service School, Gunter AFB, AL. *Version 3:* School of Aviation Medicine, Gunter AFB, AL.

Length: *Version 1:* 5 weeks (150 hours). *Version 2:* 6-7 weeks (210-258 hours). *Version 3:* 10 weeks (390 hours).

Exhibit Dates: *Version 1:* 5/71-12/73. *Version 2:* 5/62-4/71. *Version 3:* 7/55-4/62.

Objectives: To train enlisted personnel to perform supervisory and managerial duties in medical materiel services.

Instruction: *All Versions:* Lectures and practical exercises in the supervision and management of medical materiel services. *Version 1:* Course includes electronic data processing systems; processing and quality control of computer input and output; inventory control; inventory management; equipment control; and budgetary control. *Version 2:* Course includes accounting and document control; acquisition and management of medical materiel stocks; administrative practices and procedures, principles of management and personnel; and principles of effective communication.
